The NEW

Pacific Builder

...y construction newspaper
...ete coverage of the con-
...es in Central and Northern
...ing work contemplated,
...opened, contracts award-
...has been wanted and sub-contracts let on
all types of building construction, bridges,
dams and harbor works, irrigation projects;
machinery and equipment; water works
and supplies business opportunities, build-
ing permits, building contracts, mechanics'
liens, acceptances, etc., etc.

Keep informed on construction develop-
ments in Central and Northern California
and the major projects in Southern Califor-
nia, the states of Oregon, Washington, Ne-
vada and Arizona.

The new DAILY PACIFIC BUILDER
will afford a service that serves—both in
Quality and Quantity. You, as a member
of the construction fraternity, should not be
without it.

**Subscription price \$1.50 per month, or
\$15.00 a year, payable in advance.**

BOILER-ELEVATOR INSPECTORS TO MEET

The annual convention of the California Certified Boiler and Elevator Inspectors will be held in the Civic Auditorium, San Francisco, January 6, 7, 8.

The first half of this convention will be the elevator session. Able speakers will present interesting and educational papers, dealing with new developments in elevator construction, and also inspection problems in the field.

The last half of the convention, commencing Wednesday, January 7 at 2 P. M., will be the boiler session. Several very interesting papers about the 1400 pound per square inch boiler installation and on new methods of welding, will be read.

The greater part of this session will be devoted to practical inspection problems in the field, and the application of the new and revised paragraphs of both the Boiler Safety Orders and the Air Pressure Tank Safety Orders, or the Unfired Pressure Vessel Code.

COMMITTEE ASKS DELAY IN LICENSE LAW LEGISLATION

Postponement of all legislation bearing upon the registration of architects and engineers until after its report is submitted is asked by the joint committee of architects and engineers set up recently to attempt to iron out the difficulties which have caused friction between the two professions. While the points at issue between the two professions are being considered by the committee, its members feel that no new legislation should be passed now which might add fuel to the fire.

The joint committee was set up by the American Institute of Architects and the American Society of Civil Engineers, the American Institute of Electrical Engineers and the American Society of Mechanical Engineers. The architects are represented by J. Riely Gordon, C. Herrick Hammond, John Hall, Rankin and D. Everett Waid, chairman; the engineers by W. T. Chevalier, Robert Ridgway, Harry A. Kidder and F. A. Molitor, chairman.

The government has adopted and will pursue a policy of maintaining the highest prevailing wage scales in construction contracts, President Hoover announces.

Mr. Hoover points out that the policy was first adopted a year ago when employers were called here for an agreement to maintain the then existing wage levels. He said it had been followed in every direction both as to existing contracts for construction of government buildings throughout the Nation and as to contracts being let.

COURT UPHOLDS REGISTRATION LAW

An important ruling upholding the State Department of Professional and Vocational Standards in enforcement of the Contractors' Registration Law was made by Judge Walter S. Gates in Department 8, Superior Court of Los Angeles County, December 17, in *Southwest Builder and Contractor*. Two cases were at issue: Burnett vs. the Department of Professional and Vocational Standards and Brick vs. the Department of Professional and Vocational Standards.

Complaints had been filed with Jas. F. Collins, director of the department and Registrar of Contractors, against the plaintiffs in both cases and he had summoned them for hearing to show cause why their licenses as contractors should not be suspended or revoked. Both plaintiffs had applied for and obtained a temporary writ of prohibition to prevent the hearing. The cases were assigned for trial December 17 and when called in court the Department of Professional and Vocational Standards countered with a demurrer.

J. A. Boland, attorney for the plaintiffs, attacked the constitutionality of the law, declaring that the legislature had no power to confer upon any commissioner or board authority to conduct hearings for the revocation of a state license. However, the court, in passing upon the cases, did not consider the question of constitutionality of the act, but sustained the demurrer and dissolved the writ of prohibition on the ground that the plaintiffs' remedy did not lie in such a procedure because provision is made in the law for appeal to the court from any ruling made by the Registrar of Contractors. Unless stayed by appeal to a higher court, the hearing ordered by the Registrar of Contractors in the cases at issue will proceed.

Because of the great importance of the cases, which are the first in connection with the Contractors' Registration Law to reach the Superior Court, the Department of Professional and Vocational Standards was represented by Attorney L. G. Campbell, representing the attorney-general; Karl Carlin, attorney for the department; and Attorney J. W. Morin of Pasadena, who made the original draft of the contractors' law passed by the legislature.

Charles U. Heuser, general engineering contractor of Glendale, has been elected president of the Southern California Chapter, Associated General Contractors of America. K. P. Lowell, of K. P. Lowell & Co., Ltd., Los Angeles, was elected vice-president. Directors are: Newell Chardae, James A. Lynch, J. M. Macdonald, W. J. Escherich, Geo. R. Wells, Wm. A. Johnson, R. A. Wattson, George J. Bock, M. S. Ross, and Melville Dozier, Junior.

MATERIAL DEALERS TO FINANCE HOMES

The Associated Leaders of Lumber & Fuel Dealers at Chicago have voted to organize a mortgage corporation to finance home building.

The plan provides for a subscription of \$2,500,000 by the lumber manufacturers to be represented by 6 per cent cumulative preferred stock and a subscription of a similar amount by the retailers to be represented by common stock, subscriptions to be payable over a period of three years.

The plan also contemplates several bond issues up to \$25,000,000, providing a total capital of \$33,333,333. Loans will be made up to 75 per cent of the valuation of the property, 15 per cent being allowed for second mortgages and 60 per cent for first mortgages. It is expected the new corporation will be organized and functioning by April 1, 1931.

Dealers participating in the plan will each have to subscribe \$3000 a year for three years and adopt a merchandising policy of controlled marketing of complete homes to the consumer.

CLAY PRODUCTS INSTITUTE ISSUES PRODUCTS MANUAL

The Clay Products Institute of California, 611 Architects' Building, Los Angeles, is distributing complimentary copies of the "Clay Products Manual" to all certificated architects, registered engineers and others directly connected with the building industry. The manual is sent only upon written request.

The manual, compiled by Norman W. Kelch assisted by M. C. Poulsen, contains considerable new data which have been obtained in connection with research work carried on by the Institute during the past several years, together with carefully selected data derived from a variety of authorities on the various subjects.

It contains complete information regarding the uses and merits of the following burnt clay products: Common, face, fire, paving, and sewer brick, vitrified sewer pipe and liners, vitrified sewer manholes, load-bearing, partition, roof, and drain tile, terra cotta, flue lining, fire clay vents, chimney pipe, and patent chimneys.

The Division of Simplified Practice of the Bureau of Standards, Department of Commerce, recently announced that Simplified Practice Recommendation Number 57—Wrought-Iron and Wrought-Steel Pipe, Valves, and Fittings has been reaffirmed by the standing committee of the industry, without change, for another year. A survey of the 1929 production of this product, conducted prior to the revision meeting, indicated the degree of adherence to the recommendation to be approximately 98 per cent.

STABILIZING AND IMPROVING THE EFFECT OF UNEMPLOYMENT

For many years the General Electric Company has been making constant endeavors, each one a step in a comprehensive program, for removing fear of the future from the minds of the workers in the shops, that in his constant fear of not being able to provide for and take care of his responsibilities, first to his parents, or, if he has taken on further responsibilities, to his wife and children.

The first item to give peace and security of mind is provision for the uncertainty of life. In 1919 Free Group Life Insurance was offered by the Company, to which later was added a participation by the employees, so that the life insurance of each employee has been increased. This has been received very well by all the employees, and all new employees coming into the organization, after five years of service, come under its provisions. The maximum life insurance offered free by the Company is \$1500 and the Additional Insurance, paid for by the employee, varies depending upon his age, service and salary, but usually is in the same amount or larger than the free insurance offered by the Company. This has worked out quite satisfactorily and since the inauguration of the plan \$6,500,000 has been paid to the families of deceased employees. The organization of the General Electric Company is now so large that there are deaths in its family each day, and each month the roster of those departed is published, where it is seen that the reaper has taken young people as well as old. Life insurance in this way does much to ameliorate the tragic circumstance of death and relieves somewhat the hardship of the departure of the family breadwinner, either in whole or in part.

The second matter of importance in assuring peace of mind, not only of the employee but even more frequently of the wife, is the ownership of the home. While the General Electric Co. has never been in the position of landlord, it does assist the employees in acquiring or building homes. In the last seven years 2500 homes, worth \$19,000,000 have been acquired or built by the employees, with a payment on their part of upwards of \$6,000,000, the balance being held in the form of first and second mortgages by regular financial institutions. The Company's making provisions for the employees can borrow this money on a favorable basis. To date there has been no loss in connection with this work, either to the banks or the Company.

The third is a plan to enable the worker to put something aside for the inevitable "rainy day." The General Electric Company, like many companies, started with the plan of having employees subscribe to the common stock. But its common stock, of course, is subject to the fluctuations of all stocks and soon after the subscription was offered the market price went down. Naturally the employees were frightened and cancelled their subscriptions. Later on the price went up and many thousands of employees saw the opportunity to make a profit and sold their stock, so it was not effective in promoting saving by the employees or having the employees become financially interested in the Company in which they were spending their lives. Therefore, a new plan was organized, known as the G. E. Employees Securities Corporation,

Address of Gerard Swope, President, General Electric Company, over WGY and the NBC network from Schenectady, December 18.

where the General Electric Company takes the stock risk and the employees subscribe for its bonds. These bonds are not subject to the fluctuations of the market but are redeemable at cost at any time the employee so desires. While these bonds are held by the employee and he is in the active service of the Company, he receives a return of 8%. The employees elect directors who represent them on the Board and are familiar with the transactions taking place, and each year a report of its operations is published. This G. E. Employees Securities Corporation is the largest single holder of General Electric common stock and its other funds are diversified in investments in public utility companies in the United States. These companies at the same time are customers of the General Electric Company, so the employees are financially interested not only in the Company for which they work but also its customers. These investments have been so diversified that the market value even today exceeds the cost and the income return has always been ample to pay the return on the bonds and stock that have been issued. Upwards of 36,000 employees now hold bonds, with a total value of \$41,000,000.

The fourth item to give security and peace of mind is provision for old age. Of course, if each employee made provision, along the line of the above, for death, a home and savings, old age provision, theoretically, might not be necessary, but experience has proven that it is. The General Electric Company in 1912 adopted a Pension Plan which gave a pension to every employee and this has since been supplemented by what we call an Additional Pension Plan, whereby the employee contributed 1 1/2% of his earnings. This will have the effect of increasing his pension on retirement by approximately 50%, so that in some cases the employee may retire on a pension of three-quarters of the income he has received while in the active service of the Company, one-third of this pension being provided by the Additional Pension Plan which he has paid for and the balance by the Pension provisions of the Company. These Pensions are paid from a Trust Fund which has been set aside quite separately and apart from the Company's operations. The amount the employee has put aside in the additional Pension Plan is always his; if he leaves the Company he receives this money plus interest, if he dies his beneficiary receives it and if he lives to old age he enjoys it. Since the inauguration of the plan, the Pensions paid to retiring employees have amounted to almost \$14,000,000 and the Company has approximately 1000 on the Pension rolls of the Company at the present time.

The fifth and probably the most important from the standpoint of the worker is the security, freedom and fear of unemployment. For years the General Electric Company has been developing methods of stabilizing employment for its workers. This varies, of course, with the product, is easiest in a standardized line, which does not become obsolescent and does

not deteriorate. One such article is the incandescent lamp, where for many years we have been able to avoid unemployment because of seasonal fluctuations by making lamps in the summer time, when fewer lamps are used, storing them and distributing them to our customers in the fall and winter months when the days are shorter.

The other end of the line, and of course, very much more difficult, is our engineering products, such as large turbines, where due to the progress of the art or the demands of the customers, no two turbines ordered at different times of the larger sizes are alike and very little can be done on these engineering products in the substitution of employment. Notwithstanding, on the smaller engineering products, in slack times we do make parts that are used generally and interchangeably and place them in stock. The plan has been worked out throughout the Company to further as far as possible, this policy of stabilization of employment. Every effort is being made to carry out this plan effectively. The plan has down certain principles which the management of each works does its best to follow, first when business is increasing and secondly when work begins to fall off.

But no one company is able to grapple effectively with this problem of cyclical variations in business, so the best that can be done is to have a plan which will ameliorate the hardship when they do arise. Five years ago a plan of unemployment pensions, loans and relief was offered, but at that time the employees considered unemployment remote and it was not accepted. This year it was again proposed and received immediate acceptance.

Fundamental in this new plan for relief are the following principles:

1. Joint and equal contributions by employees of the Company.
2. Joint participation in the administration of the plan.
3. Aid through group action to those workers who are in need or require temporary loans, or who become unemployed, or for whom only part-time work is available.
4. In times of unemployment emergency, co-operation and assistance from these employees of the Company usually affected by unemployment, and assistance by the Company in equal amount.

The plan is adopted by each works as a unit, by a majority vote of eligible employees. It has now been adopted or is being considered by the employees of all works. It is of further interest, that the plan is quite generally favored by departments which are not usually subject to lay-off in periods of unemployment and whose members would not make normal contributions to the fund, but would contribute during the unemployment emergencies.

This plan is not final in form or in substance and may be modified by joint action of the employees and the Company. It is an interesting experiment in which the Company is glad to join its employees, first in endeavoring to find a solution, and, second, in ameliorating the tragic effects of unemployment on particular employees, who are in no sense responsible for their unemployment.

Under the original provisions of this plan as announced last June, no employee was eligible for unemployment

benefits under it unless he had made payments of one per cent of wages due to the fund for a period of six months. This limitation would have delayed initial payments in the earliest instance until next February. In the light of the emergency now existing, the payment of benefits and the extension of loans to unemployed workers were commenced December 1, and the Company is sincerely gratified that it has found this step possible as the means alleviating the condition of those for whom no work is available. Benefit payments now consist of 50% of the wages of those entirely unemployed or a smaller amount sufficient to afford 50% of normal wages to those on less than half time employment. Loans are being made in those urgent cases where the company feels that the real distress otherwise arising must be relieved.

The comments in regard to this Unemployment Emergency Plan from the organization have been very gratifying, indeed, not only from the workmen in the shops, even in those cases who are not members of the Plan, who are glad to help their brother employees who are not so fortunate as to have work, but also from those in the commercial world. In moving thousands of miles from the factories, the main comments we have had being "Why was the percentage made so low as 1%?" and "Why have we not begun this earlier?" These are evidences of how the steel industry is knit together, the plan, therefore, tending to improve the unity and spirit of the organization.

The Company also announced last week a further plan for the year 1931 of guaranteeing fifty weeks work of not less than thirty hours each week in the Incandescent Lamp Department, which I referred to earlier in my talk, where we are dealing with a standard product not subject to obsolescence and deterioration. This plan is entirely voluntary and will not be adopted unless 60% or more of the employees in the works are interested and every employee is asked to have a further "anchor to windward" setting aside 1% of his earnings. The Company guarantees 5% interest and the money so saved always belongs to the employee. If he dies the accumulation is given to his beneficiary and if he remains with the Company until he retires on pension, it is added to his retirement allowance. This plan goes into effect Jan. 1, 1931, if the employees desire it. It will be interesting to see what reaction this received.

These are definite, specific things that the Company has done first to stabilize and second to ameliorate the tragic effect of unemployment. We are now in a situation where things must be done on a broader scale than this. The efforts of a constructive character that are being made to relieve distress and to avoid and ameliorate these things in the future are having and should have very general support.

VEHICULAR TUNNEL PROPOSED FOR LOS ANGELES

Tentative plans for a proposed vehicular tunnel under Cerritos channel, connecting Terminal Island with the mainland, have been submitted to the Los Angeles board of harbor commissioners. The plans were prepared by George F. Nicholson, harbor engineer, and provide for a concrete tube 5,375 ft long. The estimated cost is \$8,250,000. The tunnel would relieve motor car and truck traffic congestion in the harbor area. The height of the tube would be 40 ft. and the width 38 ft. Plans for a two-way, two-lane highway in the center, with sidewalks on either side. A bascule bridge now carries traffic across the channel, and this bridge would be retained for rail-road traffic.

LEGAL DECISIONS AFFECTING HIGHWAY CONTRACTORS REVIEWED

When the Creator made the world he did not stop to equip it with highways and litigation has followed the course of highway construction, according to J. F. Ingham, professor of construction law and evidence at Dickinson College, in a report to the American Road Builders' Association. Take, for instance, the seven decisions published herewith.—Editor.

Surety Bond—A case of great interest to contractors and material men is *Greene County vs. Southern Surety Company* 292 Pa. 304, in which the court decided that the surety company was not responsible for claims made for the labor and material furnished in the construction of a highway by the county. The decision in this case was based principally upon the wording of the bond accompanying the contract, which indicated in the opinion of the supreme court that there was no intention expressed in the bond that it should be for the benefit of any other than the county. The creditors were regarded as third persons, not parties to the contract, and the bond could not inure to their benefit.

Misrepresentation—Another case involving the contract phase of highway law is that of *Jackson vs. State*, 205 N. Y. 458, in which the withholding of a material fact, amounting to a misrepresentation on the part of the state, entitled the contractor to damages.

The state let a contract for the excavation of a portion of a canal. Boring had been made by the state, and in giving the information to the bidders, the material was stated to be of certain kinds and classes, easy to excavate. At the time of the making of the contract the state had other information classifying the material as being a compacted mass of hard-pan, much more expensive to excavate.

The court said: "A party to a contract cannot by misrepresentation of a material fact, induce the other party to enter into the contract to his damage, and then protect himself from the legal effect of such misrepresentation by inserting in the contract a clause to the effect that he is not to be held liable for the misrepresentation which induced the other party to enter into the contract. The effect of misrepresentation and fraud cannot be thus easily avoided. If it could be, the implied covenant of good faith and fair dealing, existing in every contract, would cease to exist."

Labor—Matters of great import to those interested in the "open shop" theory of labor are those treated in the report of *William M. Cannon, Esq.*, referee, made October 30, 1929, to the U. S. District Court for the Southern District of New York, in the case of *Levering and Garrigues Co. vs. Paul J. Morris*. Judge Cannon decreed:

"The defendants (members of voluntary labor organization) should be permanently restrained and enjoined from inducing, or attempting to induce, owners, architects or general contractors to let no subcontract to the plaintiffs for the erection of structural iron and steel in buildings now being or to be erected in the Metropolitan District of New York by sending them circulars or other writing stating, threatening, warning or intimating that members of the union associated with the international may or will refuse to work on buildings upon which plaintiffs have subcontracts or by sympathetic strikes," etc.

Other cases of interest are: *Aeolian*

Company vs. Fisher, 35 Fed. (2d) 34, *Collective refusal of local workmen to work with non-union workmen employed in installing goods shipped into state is not a violation of the Sherman Anti-Trust Act.*

Alco-Zanders Company vs. Amalgamated, 35 Fed. (2d) 263: *Labor organization procuring strikes in non-union plants to stop production and prevent construction in other states constitutes restrainable violation of Sherman Anti-Trust Act.*

Liability for Injuries—Appeal of the city of Erie, 147 Atl. 53: *City overseeing work of sewer contractor was liable for injuries to pedestrian falling into open trench which city failed to properly safeguard. It can not escape liability by placing work in charge of an independent contractor.*

McCrary Company vs. White Coal Power Company, 35 Fed. (2d) 142: *Contractor constructing water works for town on cost plus basis, and having supervision over work, is an independent contractor and the town is not liable for his negligence.*

Defects in Design and Workmanship—*Tooker vs. Lonky*, 147, Atl. 445: *Independent contractor is liable in operation of employer only for defects in doing work, not for defect in design. (Excavation causing collapse of adjoining building).*

Falkinburg vs. Venango Township, 147 Atl. 62: *There is a rebuttable presumption that the township supervisors have properly performed their duties and taken proper steps to give validity to their official acts.*

Power to Contract—*Foreman vs. Gregg Township*, 147 Atl. 64: *A township contract for the purchase of road machinery must be approved by an officer of the state highway department before it is actually entered into. Contract was invalid because approval was not obtained and, therefore, could not be enforced. One dealing with officials of a quasi-municipality must take notice of its limited powers to contract.*

Strauss and Company vs. Berman, 147 Atl. 85: *One who signs acceptance of a proposition submitted to him individually by a contractor is held individually liable therefor although he wrote in the name of the corporation.*

Fidelity and Deposit Company vs. Wheeler, 34 Fed. (2d) 892: *Agreement by creditor to hold surety harmless from all claims arising under surety bond in consideration of surety paying creditor stipulated sum and waiving all claims for reimbursement is valid and enforceable, and the one promise is consideration for the other.*

Completion of Work—*Speck vs. Layne-Bowler Company vs. Glenwood*, 34 Fed. (2d) 889: *Where the contract set no date for final completion, but the bond stipulated against suit on the contract after a date certain in the two will be construed together, and the contractor who breaches the contract is estopped to claim the right to continue work after such date.*

The Division of Simplified Practice of the Bureau of Standards, Department of Commerce, announces that Simplified Form Recommendation No. 57—Wrought-Iron and Wrought-Steel Pipe, Valves, and Fittings has been reaffirmed by the standing committee of the industry, without change from the other recommendations.

A survey of the 1929 production of this product, conducted prior to the revision meeting, indicated the degree of adherence to the recommendation to be approximately 98 per cent.

THE OBSERVER

What He Hears and Sees on His Rounds

Formation of a federation seeking closer co-operation among the clay products industries was suggested at the annual meeting of the American Face Brick Association by O. W. Renkert of the Metropolitan Paving Brick Company of Canton, Ohio. Renkert urged selection of a strong leader at the head of such a federation, but with the various groups retaining their own organizations to handle their special problems. The membership committee authorized the appointment of a committee to give the matter further consideration.

California continues to hold her own in building operations. According to figures compiled by S. W. Straus & Co., this state continues to hold second place among the twelve leading states in the Union. Herewith are published statistics from the twelve leading states, the figures being based on building permits granted:

	No. of Places	Reported	Est. Cost
New York	48	148,683,289	
California	67	15,455,583	
Massachusetts	29	7,852,664	
Ohio	37	6,839,252	
Illinois	51	6,187,300	
New Jersey	36	5,660,327	
Pennsylvania	31	5,552,059	
Michigan	22	5,013,071	
Texas	21	3,914,309	
Washington	12	3,758,815	
Wisconsin	20	3,095,922	
Connecticut	20	2,344,378	

A system of licensing contractors as a means of promoting safety on construction operations was advocated by Frances Perkins, industrial commissioner of New York, at the 14th annual safety conference of that state. In her address she said: "We have excellent results from certain large contractors who have organized accident prevention and have obtained success as great as any industry, but the accident rate among the fly-by-night building contractors is so horrifying high as to necessitate some immediate and vigorous steps to stem the toll of life. Irresponsibility is rife among certain contractors and the only obvious remedy is a system of licensing whereby no contractor would be allowed to operate without showing that he is able to protect the lives of his workers adequately. The doctor must be licensed, and so must the hair dresser, the manicurist, the chiropodist. No matter if his work only concerns individuals or scant must be licensed, and he should be. Yet a man is permitted to engage in the highly dangerous project of running up skyscrapers, to hire dozens or hundreds of workmen, and he need have no license at all."

When dinner time comes around in these modern times, does mother put on her hat, grab the children and meet papa for a table d'hôte instead of putting the potatoes on to boil at home?

Yes, the National Restaurant Association is reported as saying. Everyone is eating where a check comes with the dessert, and only 20 per cent of all apartment buildings have kitchens or kitchenettes.

No, says the National Association of Real Estate Boards, 20,000 apartments in 26 representative cities show only

36 units without kitchens or kitchenettes, and if they rent 'em, they use 'em, because they cost more "with" than "without."

The estimated cost of the Boulder dam, reservoir and power house is \$19,800,000, according to information given out by the Department of the Interior. This work is to be let in a single contract and on account of its magnitude, a Washington dispatch says, only four or five contracting firms in the country can bid on it. It will be surprising, however, says Southwest Builder and Contractor, if a larger number of bids are not received, since a combination of large firms interested in different parts of the work and capable of qualifying may be formed to submit proposals. Reports indicate that negotiations for a number of such combinations have been in progress, with indications that they will be successfully arranged.

This California case is probably good law in many states. Wm. Douglas, M. D. Haubert and Theodore Citizen, partners, were engaged in roofing a dwelling house in San Diego, Calif., by use of waterproof paper and melted tar. A vat in which the tar was heated was left in the street against the curb in front of the house undergoing construction, with the tongue of the vehicle resting on a sand pile. So after the completion, the left work the plaintiff's son, 7 years old, stepped upon the vat platform and began stirring the tar with a stick which had been left projecting from the vat. His weight upon the vehicle, causing the tar to be poured over him.

The California Supreme Court sustained the jury's decision of the lower court: that the vehicle, considering its position, was an attractive nuisance to children and that the defendants were liable for the death of the child. *Morse v. Douglas*, July, 1930, California.

Rejection of bids on laying of water mains by the water board of Grant's Pass, Ore., so that the contract might be awarded to a local contractor, was protested by Portland Chapter, Associated General Contractors, as unfair to publicly invited outside bidders on the ground that they were put to an unnecessary and expensive expense estimate of the cost of the work. While the law requires advertising for bids on all important public work done by contract, and they may not be legally resubmitted to contractors of any locality, outside contractors should be advised in some way of the situation when it is known in advance that their bids will not be considered.

A fight for exclusion of Russian goods, including lumber, by legislative action during the present short session of Congress, continuance of the program for extension of big mill machinery and grading practices to small mills and probably formation of sales organizations to represent various small mill groups and perfection of plans for retail cooperation involving the establishment and marketing of a "quality" brand of southern pine through selected dealers, were determined on at the fall meeting of the Southern Pine Association at Orleans, La., last week by the American Lumberman. No definite action on the proposed legislation for extension of Interstate Commerce

Commission authority to coastal shipping was taken.

Price of cement, alongside dock, New York, was reduced 3c per barrel to \$2.40 on Nov. 13, the first price change in a year. This is the price to contractors and dealers. The engineers' price delivered on the job is \$2.10, unchanged since July. Mill prices are \$1.85 at Hudson, N. Y., and \$1.75 at Northampton, Pa., unchanged in a year.

A smaller increase in unemployment of trade union labor than usual in the first half of December is reported by the American Federation of Labor, although a general increase in the number of jobless was recorded. The report, made public by William Green, president, said the total now unemployed was estimated at 5,300,000, and that "suffering from unemployment is already intense."

A series of meetings of electrical men, representing city inspection departments, the Industrial Safety Commission, contractors, power companies, and other branches of the industry, is being held in a number of southern California cities. The object of the meetings is to acquaint those interested with the requirements of the 1930 National Electrical Code and with the Electrical Safety Orders of the Commission.

The meetings are usually held in schools where the blackboards are available, and consist primarily of a talk, illustrated by drawings on the blackboard, explaining many of the more important rules in the National Electrical Code and the corresponding requirements of the Electrical Safety Orders. The talk is given by James M. Evans, Electrical Engineer with the Board of Fire Underwriters of the Pacific. During the address those present are urged to ask questions regarding the rule under discussion at that particular time, and the variations between the Electrical Safety Orders, and the Code rules are explained.

The meeting is opened by the local Electrical Inspector, who explains the purposes and then follows a brief talk on first-aid methods and a demonstration of the Sauer, or prone pressure, method of artificial respiration. Mr. Evans is then introduced, and gives the illustrated talk on the Code.

The meetings are being well attended and are producing good results. The number in attendance varies from 35 to over 100. Meetings have been held recently in Riverside, Pomona, San Bernardino, Alhambra and Inglewood.

When the Board of Education of Sacramento City asked the District Attorney's office for an opinion as to whether it might favor local contractors in awarding contracts under a proposed school bond issue, it was advised that under the state law contracts exceeding \$1000 must be let to the lowest responsible bidder, whether he is a local or outside contractor. This is an interpretation of the California school law.

Engineers and architects in Ohio have formed an organization to urge upon the next session of the legislature the enactment of a bill licensing persons practicing those professions.

Orders for the first material to be used in the construction of the transmission line to be erected by the Southern Sierras Power Co. to Boulder Dam to furnish power for its construction have been placed by the power company. These orders are for 3,000,000 lb. of fabricated steel pole line structures and deliveries are to be made at Torrance, Calif., between December 15, 1930, and March 15, 1931.

A tentative budget of \$1,000,000 for trade extension work has been set up by the executive committee of the National Lumber Manufacturers' Association. The budget is a flexible one, however, and it will be carried out only insofar as actual receipts will permit. Should they fall below the mark, reduction will be made to prevent accumulation of a deficit. Under the tentative budget allocation of funds was made for the following activities: Research, field promotion work, educational promotion, architecture promotion, lumber purchase and use specifications, cooperation with other agencies, merchandising, building code service and publicity. In the research field provision is made for laboratory work of specimens of wood processing treatments and coatings, structural assemblies and emergency investigations. Nearly three million copies of the various publications issued by the association had been distributed up to October. This covers 56,000 copies of heavy timber publications, 359,000 on light frame construction, 25,000 on building and construction generally, 25,000 on building codes, 445,000 architectural, 13,000 on fabricated and industrial uses of lumber, 805,000 copies of educational, general information and wood property and treatment publications.

As a permanent measure of prevention of unemployment and for temporary relief in the present emergency, the American Construction Council, in a letter to the governor of each state and mayors of cities of more than 100,000 population, urges the rebuilding of slum or obsolete tenement districts in all cities. The council believes that this is one of the greatest potential fields of building construction for the coming decade and should furnish many billions of dollars of new construction and employment to thousands of workers, as well as in valuable social benefits. The letters carry the warning that certain safeguards and standards must be provided, including proper regional planning and possible revision of existing building codes and enactment of necessary permissive legislation.

Two new products have been added to line of waterproofings and concrete hardeners manufactured by The Master Builders Co., Cleveland, Ohio.

Brikron is an admixture for masonry which minimizes efflorescence, waterproofs the joint, protects mortar colors from fading and prevents cracks and general disintegration of the mortar joint.

Colored Metalcron is a material which when mixed with cement and trowelled into freshly floated cement finish, colors, slip-proofs and waterproofs the floor. This product also provides protection from "color clouding" by soluble salts due to an ingredient known as "Omicon."

Omicon is an element discovered in the Master Builders Research Laboratories. It reduces the ratio of soluble salts in cement mixes. Omicon has been combined with a powerful stearate waterproofing to make the product Brikron.

The Pacific Telephone & Telegraph Company and associated companies report that the East Bay Division of the Central Area went through the first six months of 1930 with no lost-time accidents, and that every division has succeeded at one time or another during the year in going through a full month or longer without a lost-time accident.

R. L. Heck, building inspector of Pittsburg, Calif., has become an active member of the Pacific Coast Building Officials' Conference.

HERE—THERE EVERYWHERE

El Segundo, Calif., and El Centro, Calif., have adopted the Uniform Building Code of the Pacific Coast Building Officials' Conference.

Hillborough, San Mateo County, is considering the adoption of the Uniform Building Code of the Pacific Coast Building Officials' Conference. Application for active participating membership in the Conference has been made by the town through J. C. Nowell, town manager.

Ventura Chapter, Associated General Contractors, has elected the following officers to serve the coming year: President, John Crump, Ventura; vice-president, Wm. A. Hudson, Santa Paula; treasurer, A. Schroeder, Oxnard; secretary, E. E. Wiker, Ventura; additional directors, W. R. Guyer, Oxnard; Ed Abplanalp, Oxnard; B. Frank Barr, Ventura; A. A. Lowdermilk, Ventura.

The Nail Department of the American Steel and Wire Company at its Farrell Works believes that it has shattered all safety records. This department was continuing a record of no lost-time accidents since April 17, 1924, a six-year period. In that time an average force of 170 employees had worked a total of 1,568,910 man-hours.

A large construction program has been sanctioned by Austria, which will be financed by the International loan recently obtained. The program includes a hydro-electric power plant on the Danube near Persenbrunn to develop ultimately 110,000-hp.; a bridge across the Danube near Ybbs; and a new electric railway line crossing Austria from north to south from Gmund to Graz, to cost approximately \$18,000,000 and including 26 tunnels through the Alps.

Restrictions on the use of water have gone into effect in Baltimore, Md., but but 100 days' supply in the reservoir. A number of smaller Maryland cities have been restricting consumption for months, their water supplies affected by the drought.

The Chicago city council by a vote of 40 to 1, passed the ordinance for the construction of a subway in State Street to cost \$16,000,000. The measure was passed over the protest of a large number of property owners who urged changes to the plans. The council's action will cause a contest in the courts, it is expected, by the property owners, who, by the terms of the measure, are to pay 65 per cent of the cost of the subway.

In a decision handed down Dec. 15 the U. S. Supreme Court upheld the action of the District Court for the Western District of Washington in declaring void the patent held by the Concrete Mixing and Conveying Co., Chicago, Ill., covering the conveying of concrete by compressed air.

As an aid in the selection of heavy-duty engines and power units, the Hercules Motors Corp., Canton, Ohio, has issued two new bulletins containing advice as to the selection of the proper type of Hercules power plant for any given requirement. One of these contains specifications and illustrations of typical motor applications; the second consists of a series of charts of motor characteristics.

ALONG THE LINE

Hugh R. Davies has been elected president of the Long Beach Architectural Club; Cecil Schilling, vice-president and Joseph H. Roberts, secretary-treasurer.

The Long Beach Architectural Club has appointed a committee consisting of Cecil Schilling, H. A. Anderson, and Warren Derlick to consider group advertising to inform the public of the activities and purposes of the architectural profession.

D. W. Pontius, president of the Pacific Electric Railway Company, has been appointed controller of the Metropolitan Water District of Southern California. He has accepted the office with the understanding that full-time salary will be provided as soon as the permanent organization of the district is effected.

James F. Collins, director of the Department of Professional and Vocational Standards and Registrar of contractors, has tendered his resignation to Governor-elect Rolph, effective January 5. He expects to resume the practice of civil engineering in which he was engaged previous to his appointment to the position.

Russell G. Cone, who was resident engineer during the construction of the Philadelphia-Camden bridge and of the Ambassador Bridge at Detroit, has been retained as resident engineer to take charge of work in the field when construction of the Golden Gate Bridge at the mouth of San Francisco Bay is started.

Star Brick and Tile Co., Ltd., capitalized for \$250,000, has been incorporated in Los Angeles. Directors are W. and John and Marion Graniczay, all of Los Angeles.

In future all new road construction in Santa Barbara County will be done by contract, it was announced by the county supervisors, following a conference with leaders of the California Branch of the Associated General Contractors of America. Much highway work by day labor has been done by Santa Barbara county for some time and contractors through investigations of the cost of the jobs and the time required to complete them showed that contract work was more economical to the public.

The law in California in regard to labor work is that on all jobs costing more than \$5,000 an accurate cost accounting must be kept of the day labor expenses which must be kept and filed with the lowest bid received for the project for permanent record. In the course of its investigations of the practices of the Santa Barbara officials, the Southern California Chapter of the Associated General Contractors found that on several jobs no such records were kept and that in some cases bids were not even asked. Much publicity was given to these findings and the supervisors requested the conference for determining future practice in regard to the county's road building.

Intercoastal lumber shipping rates will not be lower than rate of \$11 on contract lumber and \$13 for non-contract lumber is announced by the U. S. Intercoastal Lumber Conference for February on shipments of lumber from the Pacific northwest to the Atlantic coast.

OAK FLOORING GRADE NAMES ARE CHANGED JANUARY 1

A change in the grade names of oak flooring is announced by the Oak Flooring Manufacturers' Association of the United States, from the executive offices in Memphis, to go into effect on January 1, 1931.

The new grade names will be known as follows:

Quarter sawed (three grades), Clear, Sap, Plain, Select.

Plain sawed (four grades), Clear, Select, No. 1 Common, No. 2 Common.

The change in names was decided recently by the entire oak flooring industry in view of the trend toward designations that will be most fully descriptive of the special qualities and particular uses of various grades of lumber. The tendency, it is stated, is to specify grades which are especially adapted for a given purpose, irrespective of a former technical position as "higher" or "lower" grade. The grade names of Oak flooring now follow this new trend toward simplification of practice.

The Association announces that there has been no change in the wording of the present grading rules otherwise. A new edition of "Oak Flooring Grading Rules" is now ready for distribution to the trade and to architects.

CONFERENCE ACTION EXPECTED IN JANUARY

Deferment of the launching of activities by the National Conference on Construction till some time in January 1931 is announced by Julius H. Barnes, chairman of its executive committee and chairman of the Board of Directors of the U. S. Chamber of Commerce. The National Conference on Construction was formed in Chicago July 30 under the auspices of the U. S. Chamber of Commerce and appointed its executive committee late in October.

The November and December dates contemplated for the first meeting of the executive committee of the conference of representatives of all major branches of the industry have been postponed. It has appeared to Chairman Lamont, Secretary of Commerce, and to Mr. Barnes advisable to avoid any confusion which a meeting of the executive committee might have as to the relation of the work of the National Conference on Construction to the emergency work which is being given renewed impetus through the President's Emergency Committee for Employment.

The field of usefulness of the National Conference on Construction is seen to lie primarily in activities of a continuing character on some of the long-time problems of the construction industry. A date has been tentatively suggested for holding the first meeting of the executive committee during the week of January 12.

POWDER COMPANY EXPANDS

An enlarged field for the Giant Powder Company near Richmond was announced by Manager Richard Stratton upon his return from Seattle, where he went to take over the plant of the Puget Sound & Alaska Powder Company just purchased by the Atlas Powder Company, the parent company of the Giant corporation.

Under the new plan, the plant at Everett will be dismantled and the northwestern country, formerly served by the products of the Everett mill, will be supplied from the Richmond plant of the Atlas-Giant Company.

1930 BUILDING IN LOS ANGELES NEAR \$75,000,000

Indications are that Los Angeles' building total for the year 1930 will be close to \$74,000,000 as compared with \$93,016,160 for 1929.

During the first 17 days of December, 1930, the city building department issued 1396 permits with an estimated valuation of \$2,781,101. For the corresponding period in December a year ago the number of permits issued was 1420 with an estimated valuation of \$2,457,707, while for the first 17 days of November, 1930, the number of permits issued was 1284 with an estimated valuation of \$2,792,248. For the current year up to and including December 17, Los Angeles' building total was \$71,586,591 as compared with \$91,481,408 for the corresponding period in 1929. Permits for two important building projects will probably be issued before the close of the year and with a fair average of minor operations this total for the year should be close to \$74,000,000.

TIME TO GET UP! SIX O'CLOCK

(By Tony Smith)

I have stood it for a year. I don't want to hear or see any more creaking, whining and cowardly gloom spreading salesmen reminiscing about the "good old times." I have been through three or four "panics," as they call the mania for gloom, and one is bored with "old stuff." If you are a salesman beating the sleepy field to it, I want to see you. I am fed up on last night's night-mares. It's time to wake up to realities. So come in if you are doing business, but stay out if you are lecturing on what's wrong with business, life and the universe, especially as your judgment is not worth a damn.

Next to the gloom spreading, migrating salesman, I am sick of the timid and play safe buyer, the wise-acre buyer who clutches the dollar as his last and looks for fools to give him more. Dammed streams turn no wheels until the water flows. Spend bravely and wisely and it will come back to you; save foolishly and in fear and you will soon get nothing to save. I don't want any man's money in business who buys fearfully. I don't like to take candy from the baby nor do I trust such a man in credit. Saving in fear is miserly, selfish and cowardly. Saving a percentage is wise and thrifty; saving the greatest saving should be done during prosperity, the least during deflation. The best time to buy is at or near the bottom.

It's about six o'clock in the morning now and time to get up. The salesman who gets busy now beats the field to it. The buyer now gets in on the ground floor. No man should buy just to make prosperity, he should buy now if he expects to buy later. Buying keeps up the exchange of goods and makes work. Last night you slept well or had bad dreams but it is six o'clock now, time to get up and time to snap out of the fear complex.

J. J. Mahony, city clerk of St. Johns Newfoundland, has requested the Pacific Coast Building Officials' Conference for a copy of the Uniform Building Code. The city, of about 40,000 population, contemplates a new building code and it is possible the Pacific Coast code will be adopted.

BUILDING HEIGHT LIMIT IS PLAN OF LOS ANGELES CO.

Terminating a series of public hearings on the question of limiting the height of buildings in unincorporated territory of Los Angeles county, the Regional Planning Commission at a meeting December 17 adopted the following regulations which will be submitted to the board of supervisors in an ordinance to be drafted by the commission:

"No building shall be erected in the unincorporated territory of the county of Los Angeles which exceeds a height of 150 feet from the curb level or contains more than thirteen floors, or the cubical content of which exceeds 125 times the area of the site upon which the building is to be erected."

"Provided:

"(1) That if the owner shall dedicate for light and air purposes a setback on all sides of the site upon which the building is to be erected of not less than twenty feet, a building of greater height may be erected.

"(2) That any portion of such building erected to a height of greater than 100 feet shall be setback on all sides of the site upon which a building to be erected of not less than thirty-five feet.

"(3) That where a dedicated alley exists the twenty-foot setback may be measured from the center of the alley, and that no further setback above 160 feet on that side of the building facing such alley shall be required.

"(4) That no portion of any building site included in the calculations of the volume of a building erected under the provisions of this ordinance and upon which a dedication for light and air has been accepted in accordance with this ordinance may be included as a portion of any other building site for the purpose of determining the maximum cubical content thereof."

WAGE VIOLATOR IS FOUND GUILTY

Roy E. Andrus, operator of the Lorraine Lumber Company, was found guilty last week at Tahoe City on three counts of violations of the state labor laws. On the first count, failure to maintain semi-monthly paydays, Andrus was sentenced to pay a \$50 fine or serve a twenty-day jail sentence.

If Andrus meets the terms the sentence on the second and third counts will be suspended. The second count, his failure to post notice of semi-monthly paydays, brought a fine of \$50 or twenty days. Suspension was ordered if Andrus abides by the law in the future.

The third count was his failure to pay R. Schurman, an employee, his wages. He paid the wages, \$145, in the court. Andrus was given ten days in which to pay his fine on the first count.

It has been estimated by the Travelers Insurance Company that industrial accidents cost five billion dollars annually and constitutes a tax of 11 percent on the income of the salaried worker.

INCORPORATES

C. S. Maltby Magnesite Co., Ltd., capitalized for \$2000 has been incorporated with the principal place of business in San Francisco. Directors are Mabel P. Maltby, Katherine Percy and H. W. Erskine.

SETTLEMENT OF JURISDICTIONAL DISPUTES BY BOARD IS RATIFIED

Procedure for the joint settlement of jurisdictional disputes by organized building crafts and the National Association of Building Trades Employers was agreed upon and ratified in Boston at the meeting of the Building Trades Department of the American Federation of Labor, says The Constructor. This procedure involves the formation of a Board of Trade Claims organized on a basis which, it is believed by its proponents, will aid in the settlement of jurisdictional disputes on both a local and national scale.

Unlike the National Board for Jurisdictional Awards, the Board of Trade Claims is to represent only the National Association of Building Trades Employers and such international unions as subscribe to the new board. The contract between these bodies which provides for the Board of Trade Claims will run until December 31, 1932.

Among the outstanding features of the procedure which has been agreed upon are the following:

Jurisdictional disputes originating in a community may be settled by the existing local joint arbitration board that function by agreement between local associations of contractors affiliated with the National Association of Building Trades Employers and the local building trades council. Settlements reached by such local arbitration boards will be binding as concerns any particular disputes in that

community.

If a dispute is not settled locally the case may be carried to the Board of Trade Claims which will select a special arbitration committee to pass on the case and provide a ruling to apply to the dispute originating in that particular community.

The new agreement, it is understood likewise provides that if a local union refuses to abide by a decision, the international union shall furnish skilled men within 48 hours to do the work. If the international fails to do this the employer is at liberty to fill the places of such men as have been called on jurisdictional strike with members of other unions who, in the employer's opinion, can perform the work.

While the formation of this board is seen by general contractors to be an important step toward the eventual solution of jurisdictional problems, its immediate effect is somewhat in doubt. Two important international unions, namely, the bricklayers and the carpenters, are not now affiliated with the Building Trades Department and therefore may not at once participate in the procedure. In addition, the International Brotherhood of Electrical Workers expressed doubts as to the plan for settling jurisdictional matters but expects to maintain its affiliation with the Building Trades Department and postpone judgment on the plan until it has had a fair trial.

BRIDGE FRANCHISE PEDDLING IS CONDEMNED BY ENGINEERS

Adoption by Congress of a new bridge law "so framed as to prevent the nefarious practice known as bridge franchise peddling" is urged by the American Engineering Council, acting upon recommendations in a report of its Committee on Bridge Legislation, of which Herbert S. Crocker, Denver, Colo., is chairman. Hundreds of millions of dollars are invested in toll bridges, and it is now no longer uncommon for a bridge to cost from \$1,000,000 to \$50,000,000, the Council points out.

"The present system of granting bridge franchises is the outgrowth of a haphazard evolution of methods applicable before the advent of motor transportation and was never improved," the report declared. "It involves a great waste of time and does not in many ways protect either the interest of the public or the investments of those who build the bridges."

"There are in existence abuses of the present system, notably the obtaining from Congress of franchises for the sole purpose of their exploitation and sale at inflated values. The processes and restrictions upon recapture should be thoroughly aired and reduced to a working basis fair to all concerned."

"There should be a greater and more definite measure of cooperation than now exists between the various agencies of administration. The existing bridge laws can be very much simplified and made more easily workable."

The Engineering Council opposes all pending legislation, which unless radically altered, it asserts, would be positively injurious. Its opposition centers on the Denison bill, introduced in Congress by the chairman of the subcommittee on Bridges of the House Interstate and Foreign Commerce Committee.

This measure, the engineers feel, confers too much authority on the War Department and contains a recapture clause which is unusually severe and which in operation would undoubtedly prevent the financing of privately owned toll bridges.

Private capital should be encouraged to construct toll bridges, says the Council in a statement of principles to be considered in framing new legislation. A toll bridge, it holds, should be permitted only where the local authorities are on record as not willing to construct a free bridge.

A clause permitting recapture not sooner than twenty years after the completion of the bridge is favored, and unreasonable limitations upon financing, design, construction and maintenance are opposed.

"It is becoming increasingly difficult for states to find ways of financing such structures," it is added. "Hence privately owned toll bridges are meeting a great need. However, such structures may be considered public utilities, and as such ought to be under public regulation like other public utilities. This is not now generally the case."

"Tolls charged may become a burden to interstate commerce. Therefore the construction of toll bridges must be subject to at least some super-judicial regulation of the Federal Government."

"Under Congressional authorization, the owner of a toll bridge is given no protection against unfair competition. There are examples where competing bridges have been constructed which were unnecessary and economically unjustified. There is something wrong with a system which permits toll charges based upon inflated valuation. Toll bridge companies have in recapture demanded prices far in ex-

cess of the cost of the bridges built by them."

"State highway authorities and toll bridge companies have come to cross purposes in respect to the location of roads and possible competing free bridges. At present, the Engineer Corps, U. S. A., cannot ascertain the cost of toll bridges until nine days after the completion of the bridge. It is then frequently too late to discover any discrepancies in cost figures."

"There are in the United States today in operation approximately 300 toll bridges. There are now under construction about 58 toll bridges and approximately 250 proposed; of these latter a very small percentage will materialize. This is largely due to the present economic conditions and to the difficulties of financing in the face of adverse legislation threatened by Congress."

"The American public does not like to pay a direct toll for the use of such a public convenience as a bridge and there are a number of Congressmen who try to prevent the authority for toll bridges. This attitude is assumed in spite of the fact that although our roads appear to be free, almost every state levies a gasoline tax which is used for construction and maintenance of roads so that every road user in a sense pays about one-half cent per mile for the use of the roads."

"Furthermore, were it not for the use of toll bridges in many cases, the old inefficient, unsafe and slow ferries would still be in use for which a toll was always charged. In this connection it may be noted that the advocates of free bridges are strangely silent in regard to these ferries."

There are cases on record of the exploitation of permits to build toll bridges. The cost of construction and financing of such bridges has been in some cases watered or inflated. This has made the cost excessive to the public when it has desired to purchase such bridges. These circumstances have led to discontent and dissatisfaction with the present toll bridge situation. This must be corrected."

Other members of the Engineering Council Committee on Bridge Legislation are: V. H. Cochrane, Tulsa; Prof. A. H. Fuller, Iowa State College; A. F. Groenfelder, St. Louis; Frank M. Gurby, Boston; John L. Harrington, Kansas City, Mo.; David B. Steinman, New York City.

GROUND WATER IN THE MOKELEHUNE AREA

The ground-water supply of the Mokelelune area, California, has been under investigation since 1926 by the Geological Survey, United States Department of the Interior. Lodi is the principal town in the area, is said to be the Tokay grape center of the world. The broad vineyards and orchards of this productive agricultural area are supplied chiefly by water pumped from wells. A report on this investigation was made available to the public in September, 1929, by filing a manuscript copy in the Lodi Public Library. This report was published by the United States Government in March, 1930, as Water-Supply Paper 619 of the Geological Survey. On account of the great value of the ground-water supply for this area, the investigation is being continued, and the results are released to the public from time to time in the form of progress reports that are filed in the Lodi Public Library. In accordance with this practice, a summary statement supplementary to Water-Supply Paper 619 is being filed in that library for public consultation. Additional data, largely statistical, similarly filed at frequent intervals, as they become available and can be prepared for release.

METHODS OF ENGINEERING TEACHING TO BE CHANGED TO FIT THIS "MACHINE AGE"

A project to increase the standard of engineering education to enable it to meet better the tremendous demands which the modern machine age is making upon it has been announced by H. Hubert Porter, chairman of the Engineering Foundation, writes David Dietz, Science Editor for Scripps-Howard newspapers.

The new project unites the engineering profession, educational institutions and industrial organizations.

Porter has appointed a research committee on education, headed by Dr. Harvey N. Davis, president of Stevens Institute of Technology. The objective of this committee, according to Porter, will be to frame a program to meet the demand of industry and public service for professional education of high quality.

As a first step, the Engineering Foundation has sought the view of engineers, industrialists and educators upon the subject.

One of the first things which this consensus brought out was that technical schools were being handicapped by the fact that industries are luring away the best men from their faculties.

This was pointed out by Gen. R. I. Rees, assistant vice-president of the American Telephone & Telegraph Co., and former president of the Society for the Promotion of Engineering Education.

Right Selection

Gen. Rees points out other difficulties facing the engineering field, among them the selection of the right material for the future engineers of America.

"The mortality rate during first years in college seems to indicate that we are faced with a major problem in the right selection of candidates for the engineering student body," Gen. Rees says.

"In general, the quality of students entering the freshman year is good on the basis of scholastic achievement in secondary schools. On the other

hand, those interested in employment of engineering graduates find large numbers surviving the four strenuous years of the engineering curriculum poorly fitted to become efficient engineers.

Continual Complaint.

"There is continual complaint by deans of the lack of good engineering teachers, and responsibility is placed largely at the door of industry. Cannot engineering education be improved upon business and industry that it is short-sighted to attract good men away from engineering facilities and that it might be better to co-operate in encouraging good men in industry to accept positions on engineering faculties?"

F. L. Bishop, secretary of the Society for Promotion of Engineering Education, says that engineers are trained in an old system which they naturally pass on. It is highly important, he urges, to break this chain and introduce new types of training for engineers and new methods of teaching.

Two Facts Learned

Dr. A. B. Crawford, director of the department of personal study at Yale University, says that at Yale two facts have been learned. First, it is possible to determine by attitude tests what students' possibilities are; second, many freshmen are debarred from courses they would like to pursue after the first year because not soon enough started in that direction, due to lack of early information.

"Engineering educators," Dr. Crawford says, "are now giving thought to the question whom they should educate and to the impartial effectiveness of objective tests."

"The fact also is being recognized that youths of 16 to 19 years, when confronted with selection of a course to follow the freshman year, have not ordinarily discovered their aptitudes in time to prepare as now required for an engineering education."

they are holders of mortgages or deeds of trust.

2. An obligatory requirement for the withholding of building funds after the service of the stop notice, under a bond for the protection of the laborers and material men has been furnished in response thereto.

3. The provision that bonds executed by money lenders for faithful completion should be required to inure to the laborers and material men as well.

4. The enactment of a statute permitting the financing of the property either before or after beginning construction, by the filing of a bond running to the laborers and material men in an amount equal to one-half of the face principal amount of any mortgage or deed of trust which is to be a building loan upon the property.

5. The enactment of legislation establishing, so far as possible, the principle that a building loan is a trust fund applicable to the completion of the building and the payment of laborers and material men involved therein, and all building loans to maintain priority shall be accompanied by a recorded bond inuring to laborers and material men for an amount equal to one-half of the face of said loan.

With reference to the proposed amendments of the Contractors' License Law of 1929, by J. W. Morin.

1. The elimination of the \$200 exemption clause.

2. The regulation of speculative builders by requiring a license as builders.

3. Increasing the license fee to \$10.

4. Providing for the retention of the funds on hand at the end of the fiscal year in the department.

5. Defining "contractor" as one who bids as well as one who contracts.

6. Giving authority to the registrar to make available the list of licenses at frequent intervals for the information of officials and the public.

7. Placing under Civil Service regulations the employees of the department.

8. Providing for due process of law in the hearing of causes by issuance of suitable notice to the accused and for authority of the registrar to subpoena witnesses.

9. Providing penalty for advertising or claiming to be a contractor with a license.

10. Providing for the keeping of true books of account.

11. Providing for bringing within the terms of the statute, those who aid and abet a contractor in violation of the law, under the head of conspiracy.

12. Giving the authority to the registrar to accumulate statistical information as a preliminary to the issuance of licenses.

13. The enactment of the "Notice of Intention to Build" Law, requiring owners before the beginning of construction to record a verified statement of the ownership and encumbrances and a statement of proposed disposition of the proceeds of the encumbrances.

This conference goes on record as endorsing the work of the State Builders' Exchange Legislative Committee, and recommend that they be given full power to carry on, in connection with J. W. Morin and Glen Behymer and each other parties in the law, as may be determined by said J. W. Morin and Glen Behymer in bringing the many diversified divisions of the building industry into a unified legislative program for the next Legislature.

PROPOSED LEGISLATION AIMS TO BETTER BUILDING INTERESTS

By Geo. W. Israel, Secretary-Manager, Builders' Exchange of Pasadena

The Southern Conference meeting in connection with the following members of the State Legislative Committee, T. M. Robinson, Charles Pettifer, Dan Wagner, Wm. T. Loesch (W. H. George absent), together with Glen Behymer and J. W. Morin, held December 13th at the Pasadena Athletic Club, was undoubtedly one of the most important meetings the Exchanges have ever held.

At this meeting were representatives of most of the divisions of the building industry, and when the following resolution was unanimously passed, it means an unprecedented get-together of the building industry of California, and it means—

The industry as a whole will go before the next Legislature with bills which are directly in the interest of the building public as well as every division of the industry itself, for the plans as set forth are backed by only clean men and every thought profounded is strictly in the general

benefit of a better condition for the much neglected industry and its duty of the building public and buyer of building paper.

BE IT RESOLVED

That the Southern California Conference of Builders' Exchanges this day assembled at Pasadena, California, hereby endorses the program of legislation upon the subject of the principle of the proposed amendments to the Mechanic's Lien Law as drafted by Glen Behymer; the principle of the proposed amendments to the Contractors' License Law of 1929 and the principle of the proposed new statute for the Legal requirements of building finance as suggested by J. W. Morin.

Those referred to as proposed by Glen Behymer are as follows:

Giving concurrent jurisdiction in the Mechanic's Lien actions under \$2000 to the Superior and Municipal Courts and clearing up doubts as to necessary parties defendant where

RESULTS AND BENEFITS OF APPLYING SIMPLIFIED PRACTICE TO SOFTWOOD LUMBER INDUSTRY

The application of the simplified practice recommendation on softwood lumber is resulting in a reduction of manufacturing costs, and in inventories, and less warehousing and storage space is required. Also it makes for more uniform lumber which minimizes the number of errors made in ordering and shipping. Deliveries are also expedited. All of which leads to more satisfactory business relations and to a greater stability of the industry, according to an article entitled "Benefits from Simplifying Varieties of Softwood Lumber," by J. F. McNeil of the Division of Standards, Department of Commerce, appearing in the November, 1930, issue of the Commercial Standards Monthly. This article is based on the findings of a survey recently conducted among the accepters of this recommendation.

The manufacture of lumber was one of the earliest, if not the first industry, to be started in this country. The colonists were obliged to erect cabins for shelter and stockades for protection against onslaughts of native marauders. It was also necessary for them to fell timber before they could cultivate the land. Spars, masts, and other ship timbers were exported even before many of the early commercial products.

"During the era of colonization and on through the formative stage of the union, the manufacture of lumber was comparatively simple. Trees were felled as needed, sawed and hewn by hand into rough logs, and the logs sawmills began to make their appearance in the year 1825 when one was erected in Virginia. These mills, however, were an unimportant factor until the advent of steam, early in the 19th century.

"As the industry grew not unlike many other industries it became hampered by the accumulation of an enormous number of sizes, grades and classifications which varied with each producing locality. The diversification was corrected locally by regional associations which drafted rules governing manufacture within specific areas. While the work of these associations, in that respect, was commendable and of much use in its limited sphere, nationally, the conflict of the sizes, grades and classifications became more and more vexatious, mainly because of the disadventure encountered in the lumber which was manufactured in various sections of the country.

"The present national lumber standardization movement had its inception in the first American Lumber Congress, held in April, 1919, when a resolution was passed favoring the unification of sizes of all softwood lumber. In June of that year, and in September, 1920, other meetings of representatives of the industry were held and much discussion was had on the subject of standard sizes, grades, forms and nomenclature. Plans for future work were also outlined.

"In May, 1922, one hundred and ten representatives of organizations of all interests met in general conference at Washington, D. C., under the auspices of the division of simplified practice of the National Bureau of Standards. The principle action of this meeting was the appointment of sub-committees whose duty it was to formulate the necessary standards in sizes and grades, and the methods of interpreting, applying and enforcing them.

"A second general conference was held in Chicago, Ill., in July, 1922. Here, the Central Committee on Lumber Standards was created, its membership being composed of representatives of lumber manufacturers, wholesalers and retailers associations, the railway associations, the American Institute of Architects, and the Association of Wood Using Industries. A consulting committee, to handle the technical phases of lumber standardization, was in turn formed by the central committee.

"The third general conference, in December, 1923, received the report of the central committee, and the meeting resulted in the approval of a simplification and standardization program which was instrumental in reducing the actual finished yard lumber items approximately 60 per cent.

"In accordance with the usual procedure of the National Bureau of Standards, simplified practice recommendations are subjected to review procedure tends to sustain continued periodically, either by the standing committee of the industry or by subsequent general conferences. This interest and adherence to the program, and to keep it abreast with current practice. Four such general conferences have been held since the original simplification program on lumber was approved and accepted, the last taking place on May 3, 1928.

"The work of the committee at this conference marked the completion of their original plan concerning the simplification and standardization of softwood lumber. It now remains to keep these recommendations current by means of the aforesaid procedure of the Bureau.

"Simplified Practice Recommendation No. R16—Lumber (Fourth Edition), includes recommendations for recognized classifications, nomenclature, basic grades, seasoning standards, sizes, uniform workings, description, measurement, tally, tally cards, shipping provisions, grade marking, and inspection.

"At the time of the last conference, it was estimated by the industry that 80 per cent of the softwood lumber in the United States was being manufactured in accordance with the American Lumber Standards. In 1925, it was estimated by responsible members of the industry that the waste eliminated by this simplification and standardization program exceeded \$200,000,000 per year.

"To ascertain the practical effect of the application of these recommendations, letters of inquiry, recently were addressed to all acceptors and to several hundred mills located in all parts of the country. The following are excerpts from the replies:

"We have made an appreciable saving through grade marking our stock," wrote one midwestern manufacturer, "and this has saved us somewhere between \$4,000.00 and \$5,000.00 per year on claims."

"Another manufacturer in the same locality said: 'It increases the productive capacity of employees and storage space requirements.'

"The sales manager of a mill on the west coast replied: 'As American Lumber Standards, as provided in (Simplified Practice Recommendation) R16—Lumber, have effected economies both to the manufacturer and to the distributor, without working any hardship on the consumer, it is highly logical to assume that they will soon be accepted one hundred per cent.

This has shown a saving to us, perhaps, of \$1,000.00 in our operations last year.'

"We note a steady increase in the demand for standard items, which enables us to reduce our manufacturing costs, inventories, etc., considerably," stated the general manager of another plant.

"Our saving has been chiefly in decreasing the amount of degrade formerly secured on account of stock being too thin or dress to the former standard thickness, and also the increased underweights resulting from the thinner net thickness," said another manufacturer. He further stated: 'We would estimate such savings as being about \$5,000.00 per year. We might add that all such saving has been passed on to the consumer in the way of lower prices.'

"As to the benefits which accrue to consumers, the secretary of a water users association replied: 'We have found that standard grading rules make for more uniform lumber; standard nomenclature avoids mistakes in ordering and shipping; simplified practices gives the buyer knowledge of what he can expect to find in stock for immediate shipment; it tends to lower prices by requiring a smaller amount of equipment to manufacture and by having stock fewer sizes. We are engaged in cataloging all of the material which we use, and simplified practice recommendations certainly simplify cataloging.'

"A roof contractor engaged in business in the City of New York wrote: 'We derived the following benefits: Better value for the money, and a greater protection against unscrupulous traders.'

"A member of a firm of engineers and architects said: 'We believe that this work has been of definite benefit through reduction in cost of materials and greater speed in deliveries.'

"The interest shown in the foregoing replies indicates that much benefit, tangible in its nature, is being derived alike by the manufacturer, distributor and consumer."

San Jose's \$1,000,000 school building program, now well under way, is providing employment for a large body of local mechanics and laborers. It is estimated that perhaps 300 to 400 men are being given employment now when jobs are scarce. A survey of the jobs under study indicate that almost without exception the work on every school job is being done by local workers. In fact, on some of the school jobs there is a standing order that none but local men shall be employed, the preference being given married men with families.

Silver Lake Blvd., in Los Angeles, will be paved on a 44-foot roadway where there is no existing pavement, between Glendale Blvd. and Virgil Ave. at no cost to the property owners, according to a condition imposed by the city council in ordering proceedings for the improvement. This project has long been the subject of controversy. Opening and widening proceedings for this important traffic artery at the cost of \$521,111 to the property owners are now nearing conclusion. Cost of the paving is estimated at \$207,000, of which amount \$100,000 will be paid by the county and the balance by the city of Los Angeles.

This life is nothing more or less Than little acts of kindness: A good word here, a service there, To lift from mankind some great care. So let us daily, thoughtfully Pursue our way rejoicingly; For I'll help you and you'll help me And this is a happy world will be. Begin it now and carry on So when the year is past and gone In Meditation you can smile, For Living's really been worth while.

NEW FORM OF CONSTRUCTION FOR APARTMENT HOUSE WALLS

A radical departure from standard construction for apartment partition walls, involving a more effective use of lumber, has been developed in the offices of Schack and Young, architects and engineers of Seattle, and is being used for the first time in the apartment under construction in Seattle, according to the West Coast Lumbermen's Association.

The interesting departure from standard practice lies in the fact that the partition lumber is cut to length and first used as shoring for concrete construction. It therefore never leaves the location in which it is first carried as an auxiliary construction material and is finally set up for permanent construction.

The construction involves the use of 2x6 tongued and grooved Douglas fir lumber, first using it as shoring, bracing, stringers and soffit boards for reinforced concrete construction and later taken down and built into a mill construction partition. The great bulk of this material is pre-cut to required finished lengths.

The typical partition consists of the 2x6 set up vertically, making a solid 2-inch wall. For sound resistant partitions, this wall is covered with sound resisting material on each side and plastered. For minor partitions, it may be lathed with wood lath. Where wood lath is used it is furred out by lath strips set vertically at about 16-inch centers, and the whole nailed through to the 2x6-inch core.

This construction is extremely fire resistant, there being no low spaces except those occasionally encountered for housing pipes or ducts and these are cut off by the fireproof floor at each floor level.

The partition is extremely resistant to sound transmission. This type of wall is thinner than standard hollow walls and effects a material saving in space.

The economic feature of this construction practice is that all of the floor framework is used in the partitions. A single 2x6, well braced, supports an area of about 15 sq. ft. Stiffening the entire construction a row of 2x6's, doubled, is carried down the center of the span.

A great saving is found in the ease of erecting forms and taking them down with the almost total absence of waste and elimination of the labor of removing and destroying large quantities of form lumber. Labor costs are very materially reduced.

In regions where freight rates on lumber become a considerable item, it would be found economical to use the 2x6-inch material for wall forms, later using it up in the same type of partition. In the average apartment construction it will be found that with the most extensive use of 2x6-inch in formwork, there still will remain a small deficiency in the amount of lumber required for partitions.

This form of construction is very simple. Workmen are able to go through the various steps in using lumber with great speed. As shoring, the 2x6's are first cut to length, then set up and braced, each upright resting on wedges for adjustment which approximate the thickness of the plate to be used. The soffit boards largely consist in the main part of 2x6's cut to partition lengths and put together with temporary cleats.

When the forms are removed, the lumber is piled in positions convenient for installation in the partition walls. It has been found that forms so constructed are stiff and unyielding and that the finished soffits and ceilings are straight. Records on this building show no concrete loss usually present at the result of some deflection.

The only waste consists of the cleats and possible odd lengths, most of which are used up in the partitions over doorways and the like. When taken apart 2x6's are substantially free of nails, making the reconditioning easy and inexpensive.

When set flush in the wall position, the wall is almost air tight even before lath and plaster are applied. Space for electrical outlets and conduit are cut as required.

This type of building, which involves concrete floors with all vertical openings fireproof, and openings protected by fire doors, in conjunction with mill partitions, appears to offer a great range of usefulness. The solid partitions are incombustible and a fire would be confined to any apartment in which it started.

James H. Schack and A. M. Young, of the above firm, are members of the American Institute of Architects and Mr. Young is also a member of the American Society of Civil Engineers. Both members of the firm have a substantial record in constructive work in connection with the Building Code of the City of Seattle. Mr. Schack is at present a member of the Board of Appeals of the Building Department.

fectiveness of the sprinklers in these specific instances in bringing the fire under control without material damage to the hangar.

The findings of the Committee, eleven in number, read:

1. Slow-burning fires in well ventilated buildings with high ceilings may continue without opening automatic sprinklers.
2. Extremely fast fires in single planes may burn themselves out without opening automatic sprinklers.
3. Fires in readily ignitable and highly combustible materials spread over wide areas, such as gasoline on the floor or highly inflammable wing surfaces, may proceed at first faster than the opening of sprinklers and thus outrun for the time the application of water to the fire.
4. Water from overhead sprinklers may on some occasions keep the top surfaces of an airplane wetted, thus preserving a surface under which the fire may spread to various parts of the machine. Under this condition, supplemental equipment, such as hand extinguishers or hose streams, could be brought into operation. The use of floor sprinklers might reduce the spread of fire. None of these should be permitted to deprive overhead sprinklers of the water necessary for their effective operation.
5. Each sprinkler installation should be equipped with suitable alarm devices in order that additional fire-fighting appliances may be on hand as promptly as possible.
6. Fires involving large quantities of gasoline or similar fuel may not be entirely quenched by sprinklers alone, but would be kept, usually, in a subdued condition, making possible close approach thereto with other means for their subjugation. Suitable additional extinguishing devices should be provided to supplement sprinkler systems for quenching these or similarly persistent fires.
7. Fires in which several airplanes are ignited simultaneously will usually result in the burning of surface fabrics and the ruin or destruction of some of the structural members of all involved, and may damage airplanes considerably.
8. Fire igniting a single airplane, even under highly favorable conditions for quick spread throughout the machine, is usually controlled by sprinklers so as to cause little or no damage to other airplanes stored close to the one first ignited.
9. The automatic application of water by sprinklers will generally give good protection to airplane hangars and contents except such of the contents as are involved in the outbreak of the fire.
10. The advantages of a heat-actuated system of open sprinklers, such as the one tested are apparent (a) in small or slowly spreading fires (b) in buildings having high ceilings or conditions of ventilation causing horizontal drafts, or (c) in those cases where the time required for the opening of automatic sprinklers permits the fire to burn out or to get beyond the range of discharging sprinklers.
11. These tests have indicated that sprinkler systems installed and maintained in accordance with recognized good practice for the protection of this class of property, and having an adequate water supply, can control most of the fires likely to occur in airplane hangars; therefore serious thought, including thorough economic consideration should be given to the subject of more than three hundred gallons of gasoline was at risk including gasoline spilled on the floor and wings of four planes and in fuel tanks. In

FINDINGS PUBLISHED ON AIRPLANE HANGAR FIRE TESTS

A wooden hangar has successfully weathered a series of seven fire tests made by a special Fact-Finding Committee organized by the Aeronautics Branch of the U. S. Department of Commerce, to determine the effectiveness of automatic application of water in controlling airplane hangar fires. The report of the committee covers the circumstances and gives the results and conclusions of the tests which were conducted in Washington last Spring with obsolete airplanes in a regulation-size lumber hangar. It is amply illustrated with photographs and drawings and gives comprehensive details for the information of aeronautical engineers and other interested persons.

While these tests were not considered exhaustive, they covered a wide range of likely fire origins, a

variety of risks respecting plans storage and inflammable material present.

Four types of sprinkler installations were used for applying water, viz: dry-pipe; wet-pipe; open overhead sprinklers of the same type and floor spray nozzles with heat-actuated water supply valve releasing mechanisms. Every effort was made to set up conditions that would make up in intensity for any limitations in variety in character of fire origin or hazard increasing circumstances.

The Committee's conclusions are carefully worded to avoid assuming more than could be reasonably deduced from the specific tests. Graphic illustrations of the report, on the other hand, showing several instances in which the interior of the hangar was filled with a bank of intense flame, give vivid testimony of the ef-

HIGH-POWERED FINANCING IS CONDEMNED BY BANKER

(By R. W. Watson, Vice-President of
the Bank of America of California,
in the California Construction)

some of the tests the wings were saturated with gasoline, gasoline was spilled on the floors or allowed to leak from tanks, gasoline and oil saturated rags were used to convey flames, and a highly inflammable treating "dope" was spread over the wings. In no instance flames leaped through the front door of the hangar to a height of approximately 50 feet. Several times the hangar was filled with what seemed a solid bank of flame and on one occasion flames licked at the roof and a roof truss member for a considerable period of time.

The hangar was of wood construction approximately 80 feet by 65 feet by 28 feet high. It was donated by the National Committee on Wood Utilization of the Department of Commerce. The National Automatic Sprinkler Association furnished the overhead and ground sprinkler installations and an elevated water supply tank. The Bureau of Standards furnished technicians and observers for conduct of the tests and scientific instructions for recording data during the course of the fires.

The report, which is available from the Public Printer, at Washington, at a nominal charge of fifteen cents per copy, covers each test in detail, giving conditions precedent, data tables, time log of the test and a statement of results. It also explains the character of sprinkler systems used and illustrates their installation. In addition, it contains reports on volumetric capacity tests made on the dry-pipe systems subsequent to the fire tests.

Harry H. Elee, Director of Aeronautic Development, Department of Commerce, served as Chairman of the Fact-Finding Committee. Included in its membership were representatives of the Army and Navy air services, the U. S. Bureau of Standards, the National Advisory Committee for Aeronautics, the Aeronautical Chamber of Commerce, the National Automatic Sprinkler Association, the National Board of Fire Underwriters, and the Underwriters Laboratories.

SKYSCRAPERS NOT CAUSE OF N. Y. TRAFFIC CONGESTION

Separate skyscrapers and small groups of skyscrapers are exonerated as causes of traffic congestion in a report made public recently by the Regional Plan of New York and Its Environs under the heading "Building Bulk and Uses in Relation to Traffic," says Engineering News-Record. Blame for New York's traffic congestion is placed on the excessive bulks of buildings over large areas permitted by the present zoning laws.

It is pointed out that in midtown Manhattan, between 34th and 59th Sts., the average story height per unit of building plot is seven stories, which is likely to rise to between eight and nine stories by 1945—a height greatly in excess of what can be borne by the existing street system.

Property owners and merchants are declared to be the chief sufferers from the traffic congestion which they themselves cause by overbuilding. The difficulties in the way of automobile traffic in the midtown area are driving tenants and customers to other areas.

The Regional Plan urges as remedial measures that property owners should be compelled to provide space within their property for parking and for loading and unloading merchandise; the construction of bypass highways to eliminate through traffic from the streets; and requirement of setbacks on the street by stores which are responsible for an excessive amount of pedestrian traffic.

As the construction industry and affiliated lines represent one of the major industries of this country, the banks are of vital assistance in helping the various units that go to make up this industry.

Banks are called upon to finance almost every angle of building; are called upon to assist contractors in carrying on their jobs; to assist subcontractors, and also to assist material men. In fact they are back of the financing of almost every angle of business. In many cases the owners of buildings being erected borrow temporarily to complete the construction thereof, and banks also assist materially in the building construction by granting of building and real estate loans. Banks with ample savings funds, loan to a very large extent on real estate, for the purpose of improving the property.

The better handling of loan problems in the construction industry can be materially helped by proper understanding of credit fundamentals by all concerned. Contractors should have a thorough understanding of the financing of the jobs they are bidding on, especially in this day of high powered promotion and high finance, where the building industry has suffered along with other lines through unwise financing. Contractors should investigate the details of financing of each project, and this investigation should go beyond the first and second money encumbrances of record. Where securities are to be realized upon at a later date—these securities should be placed in escrow. Commitments for loans should also be checked carefully, verified and ascertained whether or not they are still in effect. Numerous losses have been incurred through the failure to check commitments of this type, material being furnished under the assumption that a commitment for loan was in effect, when as a matter of fact the time limit had expired, and when request was made for the advances this fact developed.

Contractors' Loans Problem

Loans to contractors present a problem to a banker somewhat different from regular commercial loans, especially in California—where volume has been developed by some contractors at a very rapid rate.

The preparation and submission of a financial statement, which reflects the correct position of the contractor, is one of the difficult things to do. Accounting practices for contractors vary to a great degree, and it is exceedingly difficult for some contractors to submit a proper statement of their actual financial position. A contractor's questionnaire and financial statement form has been prepared by the Associated General Contractors of America, which when properly filled out sets forth the exact position of the applicant. The contractor should know exactly where he stands on each job under way every day. Estimated profits on work in process should not be anticipated, nor set up on the contractor's books until the actual completion of the job. Contingencies often arise that absorb all of the estimated profits, and often occasion a loss rather than a profit.

Contractors should have a definite consciousness, and should endeavor

to live up to their terms of purchase strictly, and not impose upon the material men in the granting of extra time or extra discount. Abuse of good credit practice has resulted in many cases from this type of unjust treatment. There is a tendency in some localities to settle past due accounts for material by giving trade discounts, and as a result of the standing of the material men with their banks these have been discounted without question, and the abuse has grown to a quite substantial proportion. In case of additional time being necessary, creditors should be notified of all of the angles, and proper request for additional time submitted.

In the financing of material men, banks are also of great assistance, and again a proper accounting system is necessary. There are numerous cases where material men have been submitting financial statements showing a rather easy liquid position, when, as a matter of fact, accounts receivable are being carried that should have long ago been charged to losses. Material men should furnish a segregation of these notes and accounts receivable by maturities, showing those of thirty days and under, sixty days and under, and ninety days and over. In the proper preparation of financial statements to be furnished by contractors or material men—to banks, creditors, bonding companies and others, a correct accounting procedure, as above outlined, will materially assist all concerned in arriving at a proper understanding. Contractors' statements should show a segregation of the jobs, with an accurate estimate of the material and labor necessary to complete the job at all times.

Large Losses' Blame Fixed

Large losses have been sustained by the granting of credit promiscuously to irresponsible contractors by material houses, who have depended to some extent on the possible collection of the items through the mechanic's lien law. These irresponsible contractors frequently underbid the legitimate contractor, who is endeavoring to operate and handle work with a reasonable profit. The irresponsible contractor has nothing to lose, and is endeavoring to get by, by not living up to the strict terms of the contract, cutting the material or labor on the job, and trying to make a profit thereby. The result of this type of practice, as above stated, has resulted in heavy losses to all concerned. Credit should be granted only to those justly entitled to it, and who have a reputation for square dealing. The illegitimate and irresponsible contractor has no place in the building industry.

As above outlined, the banks of the state have been of great help in the financing of construction—in the granting of real estate loans. The banker banks through their stock and bond affiliations have been instrumental in underwriting some of our large building issues, and in that way have been helpful to the industry as a whole. Likewise through the Trust Departments the financing of subdivisions has accomplished a lot toward the development of the residential sections of the larger cities in California.

Banks, through analysis of credit problems presented, can be helpful to the material men and contractors as a whole, by assisting in the elimination of high-powered financing, and credit losses to be concerned will be curtailed. The banks are willing at all times to check matters of this kind, through their well organized

for use on steel and concrete frame buildings, saves lives, time and money

It pays to use the best Scaffolding Equipment whenever a Scaffold is required. The risk is always great.

The Patent Scaffolding Company

270—13th St., San Francisco

Phone Hemlock 4278

Lessor of Suspended and Swinging Safety "Gold Medal" Scaffolding.

Sub-Bids Being Taken.

HOSPITAL. Cont. price, \$69,223
STOCKTON, San Joaquin Co., Calif.
 State Hospital Group and
 Two-story and part basement reinforced concrete hospital and two-story reinforced concrete industrial building.

Owner—State of California.

Architect—State Department of Public Works, Division of Architecture, Geo. B. McDougall, State Architect, Public Works Building, Sacramento.

Contractor—Sensen and Haggmark, 2652 Harrison St., San Francisco.
 Hospital building will be of reinforced concrete with tile and solid plaster partitions, wood roof construction and tile roof and a total floor area of 14,500 square ft.

The industrial building will be of concrete construction, wood and concrete second floor construction, steel roof construction and a total floor area of approximately 6,150 sq. ft.

As previously reported plumbing and heating awarded to J. C. Plack, 721 W. Elm St., Stockton, at \$14,900; electrical work to Collins Electric Co., 703 E. Market St., Stockton, at \$381.

EUREKA, Humboldt Co., Cal.—Until January 13, 2 P. M., bids will be received by F. M. Kay, clerk of Board of Supervisors, to furnish the miscellaneous items for County hospital for the quarter ending March 31, 1931. Specifications and further information obtainable from above.

WILLOWS, Glenn Co., Cal.—County Grand Jury, in annual report, recommends a \$3000 expenditure on the county hospital for "painting and general renovations."

RIVERSIDE COUNTY, Calif.—State Director of Institutions, Earl E. Jensen, announces the purchase of a 1069 acre site in Riverside County on which will be erected a new state hospital for the insane. The land, known as the Arlington site, was purchased from J. W. Hole of Los Angeles at \$28,600 or \$310 per acre.

The 1929 Legislature appropriated \$1,000,000 for the site and buildings at the new institution and from the sum remaining after paying for the land the following construction is planned: Unit to house 400 patients, \$360,000; laundry building and equipment, \$50,000; bakery, commissary and refrigeration unit, \$60,000; sewage treatment plant and collection system, including storm drains, \$33,000; administration building, \$50,000; domestic water development, \$15,000; fire protection, \$7500; electrical service, \$10,000; gas service, \$2000.

The unit for patients will be started immediately. Funds already have been delivered to the State Division of Architecture and it will be completed by next summer. There will also be started immediately temporary wooden buildings to house 50 patients and 20 employees, who will be used to start farming activities and aid in the construction program.

With the completion of the first unit for patients, relief can be afforded other hospitals in the south by transferring patients. The construction program for the next biennium will provide another unit for 400 patients as well as employees' quarters and minor construction items.

HOTELS

Plans Being Completed.

HOTEL. Cost, \$175,000
OAKLAND, Alameda Co., Cal. San Pablo Ave. near Fortieth St.
 Six-story steel frame and concrete hotel.

POWER PLANTS

GRIDLEY, Butte Co., Cal.—Until January 12, 8 P. M., bids will be received by J. L. Lewis, city clerk, to furnish one Diesel engine generating unit with auxiliary pumps, motors, equipment and materials. Certified check or surety bond 10% required with bid. Specifications on file in the office of clerk.

SANTA ANA, Orange Co., Cal.—Construction of a \$1,500,000 substation at Stanton in Orange County, has been announced by R. E. Bacon, manager of the Santa Ana district for the Southern California Edison Co. A 15-mile transmission line will connect the Stanton and Light-tube substations. This line will involve an additional \$1,500,000. According to Mr. Bacon, transformers and switching equipment of large capacity will be installed at Stanton. The initial installation will be 32,523 horse power. All will be oil insulated, and each switching and each will weigh 28,800 lbs., containing 16,133 gallons of oil. Each transformer will be 37 ft. in height and approximately 21 ft. in diameter. There will be 24 oil switches weighing 876,000 lbs., each containing 2400 gallons of oil. The project will require approximately 11,752 ft. copper tubing.

PUBLIC BUILDINGS, FIRE HOUSES AND JAILS

SAN FRANCISCO.—Until Jan. 9, 2 P. M., informal bids will be received by State Department of Architecture, Public Works Bldg., Sacramento, for partition work in the State Building, San Francisco.

 is in charge of the memorial drafting
 rooms.

WHARVES AND DOCKS

STOCKTON, San Joaquin Co., Cal.—Fire destroyed Union Oil Company and Associated Oil Company's loading docks at Harrison and Lindsey Sts. They plan to rebuild immediately.

MISCELLANEOUS CONSTRUCTION

SACRAMENTO, Cal.—J. R. Reeves, 12th and American River, Sacramento at \$5,713.34 awarded contract by H. G. Denton, city clerk, for grading and leveling off roadway, parking area and hangar area at the Municipal Airport.

Following is a complete list of bids:

J. R. Reeves, Sacramento, \$3,997; (add for culvert), \$1,716.
M. J. Treaster, Sacramento, \$4,401; (add for culvert), \$1,750.
A. Teichert & Son, Sacramento, \$4,743.

Low Bidder.
UNDEK TAKING PARLORS \$40,000
SAN FRANCISCO, Sacramento Street bet. Van Ness Ave. and Polk St. Three-story frame and stucco undertaking establishment and apartments.

Owner—Jos. Hagan, 178 Sacramento. Architect—Henry C. Smith and A. R. Williams, Humboldt Bank Bldg. Low Bidder—Reavey & Spivock, Shell Oil Bldg.

Mechanical bids are held under advisement.

FRESNO AND KINGS COUNTIES

—State Railroad Commission authorized San Joaquin Light & Power Company, the Great Western Power Company, and the Pacific Gas & Electric Co. to proceed with a \$7,500,000 installation program of additional gas and electric facilities. The construction will include a new steam and electric power plant at Herndon, 50 miles of natural gas transmission conduit from Kettleman hills to Herndon, 65 miles of gas transmission line from Fresno to Merced, and a new electric substation at Merced.

EUREKA, Humboldt Co., Cal.—Until January 13, 2 P. M., bids will be received by F. M. Kay, clerk of Board of Supervisors, for moving certain buildings in town of Garberville. Certified check of 5% required with bid. Specifications obtainable from Frank Kelly, county surveyor.

ALAMEDA, Alameda Co., Cal.—Until Jan. 3, 9:30 A. M., bids will be received by W. Varcoe, City Purchasing agent, for painting and spraying fences at Lincoln Park Nursery on Fernside Blvd., pump house at Jackson Park, fence at McKinley Park and pump house, etc., at Washington Park. Plans and specifications obtainable at the office of the purchasing agent.

MISCELLANEOUS SUPPLIES AND MATERIALS

SACRAMENTO, Cal.—Following bids received by H. G. Denton, city clerk, for furnishing three trucks:

Ellsworth Harrold, Sacramento, (Ford)	\$2,388
Moeller Auto Sales Co., Sacto., (Ford)	2,432
Universal Motor Co., Sacto.,	2,653
Morrison Chevrolet Co., Sacto.,	2,247
Emich Winchel Co., Sacramento (International)	3,966
General Motors Truck Co.,	3,936

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 37 Post Street, San Francisco. (Phone Sutter 1664).

R-3444-S ENGINEERS and draftsmen, experienced in industrial and power plant work, particularly piping, also electrical draftsmen experienced in power and lighting installations. Salary \$225-250 per mo. Apply by letter. Location, Southern California.

R-3424-S CHEMIST, technical graduate, preferably with advanced degree, to review French and German technical literature in connection with patent causes. Permanent. Salary open. Location, Bay Region.

R-3446-S PERSONNEL EXECUTIVE 39-50 years, to have charge of and assist in the administration of division of personnel and organization. Must be thoroughly trained and experienced in this type of work and possessed with tact, good judgment and integrity. Will be responsible to Chief of Division. Salary \$500 a month. Apply by wire if outside of Bay Region as applications must be on file by December 26.

K-333-W-2071-C-S ASPHALT ENGINEER, graduate civil engineer, single, not over 32, with experience on hot mixed type sheet asphalt, asphalt concrete, penetration preventing by the grouting method, asphalt emulsions, ability to decide proper percentages of various grades of stone, sand, cement and asphalt to secure a road of maximum density, etc. Must be familiar with asphalt literature. Salary \$3600-4000 a year. Apply only by letter. Location, India.

R-3429-S ENGINEER, 35-45 years old, with forceful personality and ability to deal with plant executives, for production manager of company operating several scattered plants in

California. Must have operating experience. Salary \$5000-6000 per year. Apply by letter. Headquarters, San Francisco.

N. Y. CITY AUTHORIZED TO BUILD TOLL STRUCTURES

The Appellate Division, in a decision rendered Nov. 21, sustained the validity of the action of the board of estimate and apportionment of New York City in starting plans for the construction of the Triborough bridge, the Brooklyn-Staten Island vehicular tunnel, and the midtown tunnel in Manhattan and upheld to city's right to charge tolls for the use of these traffic outlets.

The majority opinion said: "Not only had the city the toll-fixing power to provide for the construction of revenue-producing public improvements, such as bridges and tunnels, but the exercise of such power in the present instance has been ratified and confirmed by the legislature."

HANGARS BUILT OF LAMELLA STEEL TYPE SECTIONS

Short steel sections of the lamella type, which can readily be assembled by unskilled labor, are now being distributed by the Lamella Roof Syndicate, Inc., 45 West 45th St., New York City, for use in many types of buildings and for the construction of airplane hangars. For the latter purpose the lamella truss, when assembled, is covered with galvanized metal or any of a number of other types of surfacing. Advantages claimed for this type of hangar include easy transportation to the site, simple foundations, quick assembly and dismantling, and a form which minimizes the effect of wind pressure. The hangar is designed for dead load plus a snow load of 15 lb. per square foot and a wind load of 25 lb. per square foot. In addition, a monorail crane can be hung from the center of the truss.

DAILY PACIFIC BUILDER

The only daily construction newspaper affording complete coverage of the construction activities in Central and Northern California—featuring work contemplated, bids wanted, bids opened, contracts awarded, sub-bids wanted and sub-contracts let on all types of building construction; bridges, dams and harbor works, irrigation projects; machinery and equipment; water works and supplies; business opportunities; building permits; building contracts, mechanics' liens; acceptances, etc., etc.

Keep informed on construction developments in Central and Northern California, and the major projects in Southern California, the states of Oregon, Washington, Nevada and Arizona.

Engineering News Section

BRIDGES

SAN JOSE, Santa Clara Co., Cal.—San Jose Paving Co., awarded contract by Southern Pacific Railroad, 65 Market St., San Francisco, to construct Park Avenue Subway, to have overhead clearance of 15 feet, with roadway width of 30 ft., 6 ft. sidewalk on each side; length of barrel between approaches to be 100 feet. Project involves:

15,500 cu. yds. excavation;
614 cu. yds. 1-2-4 reinf. concrete;
130 cu. yds. 1½-1½-1½ do;
42 cu. yds. reinf. conc. precast;
2,337 cu. yds. unreinf. concrete;
450 cu. yds. conc. paving, 1-½-3;
118,000 lbs. reinforcing steel.

The amount of the bid as yet has not been disclosed, though the railroad previously announced its estimate of the cost of the structure was \$148,000. There was seventeen other bidders.

OROVILLE, Butte Co., Cal.—Board of Supervisors deferred action for authority to build a private bridge over Big Chico Creek, on request of R. W. Silver, pending a formal decision from the state attorney's office.

SANTA CRUZ, Santa Cruz Co., Cal.—Until January 7, 2:30 P. M., bids will be received by H. E. Miller, County Clerk, to construct either a timber bridge with reinforced concrete floor or steel bridge with reinforced concrete floor near Felton Railroad station across the S. P. tracks, Zayante Creek and Zayante Road in San Lorenzo road district. Plans and specifications obtainable from L. Bowman, County Surveyor, on deposit of \$3.00. Certified check 10% required with bid. See call for bids under official pro-

SANTA ROSA, Sonoma Co., Cal.—Rea and Coletti, San Rafael, at \$173,255 awarded contract by Joint Highway District No. 16 to construct steel bridge over the Russian River, 1¼ miles above Jenner, involving two 145 ft. steel deck truss spans and nine 60 ft. steel girder spans with concrete deck and steel H beam piling and two concrete abutments, one 40 feet and another 30 ft. Project involves:
\$8,000 cu. yds. roadway excav., 32c.
27,000 sta. yds. overhead, 2c.
6,000 ft. property fence, 10c.
10 gate, \$18.
116 ft. 12-in. corr. pipe, 2¢.
70 ft. 24-in. do, \$3.75.
180 ft. 30-in. do, \$6.
17 cu. yds. "A" concrete (culverts) \$16.10.
tremie, \$10.
bridge complete, fencing, etc., \$173,255.

SAN JOSE, Santa Clara Co., Cal.—City Manager C. B. Goodwin announces construction of a bridge over Guadalupe Creek linking West Virginia and Home Sts. will be undertaken during 1931.

DREDGING, HARBOR WORKS & EXCAVATIONS

REDWOOD CITY, San Mateo Co., Cal.—Until January 6, 3 P. M., bids will be received by U. S. Engineer Office, Customhouse, San Francisco, for

dredging in Redwood Creek. Specifications obtainable from above office.

SAN FRANCISCO—Until January 16 bids will be received by U. S. Engineer's Office, Custom House, for removing existing jetty and constructing new jetties and dredging in Noyo River. Further information obtainable from above.

SACRAMENTO, Sacramento Co., Cal.—Until January 5, 3 P. M., bids will be received by U. S. Engineer's Office, California Fruit Bldg., Sacramento, to dredge channel, 9 feet deep and approximately 100 feet wide thru the shoal in Middle River, near Mildred Island. Further information obtainable from above.

SAN DIEGO, Cal.—Until 3 P. M., Jan. 5, bids will be received by the U. S. Engineer, 751 S. Figueroa St., Los Angeles, for dredging approximately 825,000 cu. yds. material in San Diego Harbor in an area around the municipal wharf, covering about 185 acres. Plans and specifications may be obtained from the U. S. Engineer, Major W. H. Lanagan, at above address, Los Angeles.

LONG BEACH, Cal.—Until 3 P. M., Jan. 7, bids will be received by the U. S. Engineer, 751 S. Figueroa St., Los Angeles, for dredging approximately 1,540,000 cu. yds. material in Long Beach Harbor and in the Cerritos Channel turning basin, in accordance with plans and specifications which may be obtained at the above address. Major W. H. Lanagan is the United States Engineer.

LOS ANGELES, Cal.—Until 3 P. M., Jan. 6, bids will be received by the U. S. Engineer, 751 S. Figueroa St., Los Angeles, for dredging approximately 1,400,000 cu. yds. material in the east basin channel, Los Angeles Harbor, and in Cerritos Channel to hook up with similar work to be done in Long Beach Harbor. Plans and specifications may be obtained from the office of the engineer, Major W. H. Lanagan, at above address.

SAN FRANCISCO—Following is a complete list of the bids received by U. S. Engineer's Office, Custom House, to dredge Oakland harbor:
Longview Dredging Co. 2625
United Dredging Co. (per cu. yard) \$3629
San Francisco Dredge Co. 28
Hydraulic Dredging Co. 31

Estimate of \$272 submitted by Government, using government plant and hired labor; 691,675 cu. yds. involved.

IRRIGATION PROJECTS

CHELAN, Wash.—Until 1:30 P. M., Jan. 9, bids will be received by the Howard Flat Irrigation District, Chehalis, Wash., for irrigation construction as follows:

Construction of a concrete pump house with pumping equipment, including two 700 b. p. centrifugal pumps.

Finishing and laying:
5,200 lin. ft. 30-in. steel pipe, ¼-in. thick;
22,530 lin. ft. 30-in. steel pipe, 3/16-in. thick;

1,322 lin. ft. 24-in. steel pipe, 3/16-in. thick;
1,325 lin. ft. 20-in. steel pipe, 3/16-in. thick;
9,319 lin. ft. 16-in. steel pipe, 3/16-in. thick;
15,768 lin. ft. 12-in. 8-gauge (B.W.G.) pipe;
6,154 lin. ft. 8-in., 8-gauge (B.W.G.) pipe;
2,083 lin. ft. 6-in., 8-gauge (B.W.G.) pipe;
39 lin. ft. 4-in., 8-gauge (B.W.G.) pipe;
complete with valves, fittings, hydrant, air valves, blow-off valves and appurtenances.

Plans may be obtained from Willis T. Batcheller, Inc., consulting engineer, 1903 Exchange Bldg., Seattle, Wash., upon deposit of \$10.00. Chas. R. Sargent is secretary. The date above has been changed from Dec. 19 as originally set.

MACHINERY AND EQUIPMENT

VENTURA, Ventura Co., Cal.—Following is list of bids opened by city council to furnish one vertical dry pit sewage pump and motor. The bids were:

Byron-Jackson Co.—Pump completely installed, \$1765; pump only, \$1615
DeLaval Steam Turbine Co.—\$2750 installed; \$2550, pump only.
Buffalo Steam Pump Co.—\$2290, pump installed; \$1613, pump only.
Samuel A. Bray, Ventura—\$1600, pump installed; \$1400, pump only (Fairbanks type equipment).
A. T. Mead—(1) \$1346, (2) \$2525, (3) \$2433 (American Well Works equipment). This bid not submitted on the basis of the others. The items are for his own alternate figures.
Bids held under advisement.

GRIDLEY, Butte Co., Cal.—Until January 12, 9 P. M., bids will be received by J. L. Lewis, City Clerk, to furnish a Diesel engine generating unit with auxiliary pumps, motors and equipment and materials. Plans and specifications obtainable from city clerk. Certified check of 10% required with bid.

BRAWLEY, Imperial Co., Cal.—Until 7:30 P. M., Jan. 5, bids will be received by the city council for furnishing one truck of rated capacity of from one and one-half to two and one-half tons, equipped with dual tires on rear, Wood hydraulic hoist, and tight body of lawful width and maximum length to properly fit truck. Depth of body to be four feet. Rear end of body to be properly equipped for dumping load. On each side of the body, at the center, the upper two feet is to be provided with a gate for loading. If standard frame and wheel base is such that a sixteen foot body cannot be properly installed thereon, alternate bids may be submitted with frame and wheel base altered for sixteen foot body. O. May Juvenal, city clerk.

COMPTON, Los Angeles Co., Cal.—Until 7 P. M., Jan. 6, bids will be received by the city manager, A. B. Gridley, for furnishing one 1¼-ton truck with cab, flat body with stakes and full equipment.

DENVER, Colo.—Until 2 P. M., Jan. 3, bids will be received by the Chief Engineer, Bureau of Reclamation, Denver, Colo., for one dragline excavator, capacity $\frac{1}{2}$ -cu. yd., gasoline-engine driven, 35 ft. boom with 10-ft. extension, 24-in. caterpillar treads, with one $\frac{1}{2}$ -cu. yd. bucket, complete. The bidder shall state the number of calendar days within which he agrees to deliver excavator and accessories f. o. b. cars at factory shipping point specified. Further information may be obtained from the office of S. O. Harper, Acting Chief Engineer, 1441 Wolcott St., Denver, by applying for Specifications No. 498-D. Proposal guaranty, 10%.

RAILROADS

OAKLAND, Alameda Co., Cal.—City Council has entered into an agreement with the Southern Pacific Railway to construct underpass at the crossing of the S. P. tracks and Seventh St. Same to be handled jointly by the city and the railroad.

OAKLAND, Alameda Co., Cal.—The Southern Pacific Company have completed plans for the new \$205,000 Seventh Street Subway and bids will be called for immediately. The cost is to be borne equally by the city and the railroad.

FIRE EQUIPMENT

LAGUNA BEACH, Orange Co., Cal.—Until 5 P. M., Jan. 7, bids will be received by the city council for furnishing one 500-gallon triple combination pumping fire engine. Specifications may be obtained from the city clerk, G. W. Prior. Bidder must submit his own specifications, however, and bids will be received at the same time for the purchase of a used Reo triple combination pumping fire engine which may be seen at the fire house, Laguna Beach.

RESERVOIRS AND DAMS

UKIAH, Mendocino Co., Cal.—Until January 7, 8 P. M., bids will be received by Fred Bosworth, City Clerk, to furnish 2 500-cu. ft. Rivett Gas Tanks, 6" dia x 20' long, $\frac{3}{8}$ " shell, $\frac{1}{2}$ " and $\frac{5}{8}$ " heads. Equipped with 1 11x 15 manhole in head, 3 2" forged steel flanges, 1 4½" dial pressure gauge, designed for 90 lb. per sq. in. working pressure and built in accordance with A. S. M. E. Code for Unfired Pressure Vessels. F. o. b. cars, Ukiah, Calif.

Certified check of 10% required with bid. Specifications and further information obtainable from above.

HOOVER DAM—The Bureau of Reclamation has made further announcement of the specifications for the Hoover Dam for which bids are to be received by the department at Denver, March 4. According to the specifications, preference will be given domestic articles and materials. Unless otherwise stated in the bid it will be understood domestic articles or materials will be used and foreign articles or materials will not be permitted unless they are of better quality or being equal in quality furnished at lower cost to the government and unless domestic articles or materials are not available.

Among the materials to be furnished by the government to the contractor f. o. b. at the delivery yard near Boulder City are: cement, reinforcement bars and rails, anchor bars, rods and bolts, metal pipe and fittings, conduit castings, plate steel conduit linings, copper sheets, grates and

hoists, needle valves, traveling cranes, machinery, structural steel, bridges and other structures, sheet piling, all doors, windows, metal floor plates and stairways, steel partitions, paint, plumbing, hardware, hollow tile, roofing materials, corrugated metal pipe, thermometers, forms of concrete relief work and steel pipe forms for concrete bulkhead gate supports.

The materials to be furnished by the contractor include: sand, gravel, cobbles, oil, lumber, spikes, nails, liner plates for tunnels, wire, water, compound for cooling pipes and brazing and soldering materials.

The contractor must haul all his materials as well as those delivered by the government. The contractor will have to bear the cost of unloading, hauling, and furnishing his own materials.

These costs are to be included in the bid. Sand, gravel and cobbles are to be obtained by the contractor from natural deposits on the Arizona side of the Colorado river about eight miles upstream from the damsite.

Twelve traveling cranes will be required for installation of machinery.

The two steel bulkhead stoney gate will be 20x30 ft. and will be installed at the downstream end of the inner diversion tunnels to provide access to the tunnels for inspection and repairs. Each gate will be 50 ft. high, 54 ft. 7½-in. wide, and made up of structural steel plate girders 6 ft. deep. They must be mounted on caterpillar roller cranes with counterweight hangers. There will be 56 hydraulic gates.

There will be four intake concrete towers with a total height of 341 ft. One cylinder gate will be installed in each tower, the outside diameter being 21 ft. and the height of the gate 10 feet, 4½ in. made of steel casting. Twelve 8x10 ft. metal shutter gates will be provided for each tower and are to be used for closing the water passages for repairs. Plans now contemplate that 10 72-in. needle valves will be installed.

According to the specifications the contractor must maintain camps at Boulder City. Certain blocks will be set aside there for his use for office and headquarters buildings, warehouses, store, hospital, boarding houses and homes for employees.

There will be on charge for ground rental, but reasonable charge will be made for services and facilities furnished by the government for the benefit of the contractor, such as water and sewerage systems, electricity, and fire and police protection.

IRVINE, Orange Co., Cal.—H. W. Rohl Co., 4351 Alhambra Ave., Los Angeles, awarded contract by Irvine Co. at about \$55,000 for constructing an earth fill dam in Peters Canyon, about 1½ miles southwest of Irvine Park. Construction will start about Dec. 29. The reservoir created will

occupy the site of the old Orange county golf course, and will impound about 11,000 acre feet of water. Plans were prepared by Roy Browning, engineer for the Irvine Co. The work will involve steam shovel and truck work.

GLENDALE, Los Angeles Co., Cal.—The city council has adopted a resolution asking the county supervisors for financial aid in constructing the Giorietta reservoir in Verdugo Woodlands, estimated to cost \$350,000. The plea was made on the grounds that the reservoir is virtually a flood control measure.

LOS ANGELES, Cal.—E. C. Eaton, chief engineer of the Los Angeles County flood control district, to prepare plans and specifications for the three dams to be built in the San Gabriel Canyon, including check dams, spreading grounds and other appurtenant works in the project designed to supplant the San Gabriel High Dam which the state rejected. A resolution was also adopted directing the issuance of block of bonds of the original \$25,000,000 issue, amounting to \$5,000,000. The flood control department attorneys will immediately institute a friendly suit to compel Chairman of the Board Henry Wright to sign the bonds. The plans will be prepared concurrently with the suit, in order that no time may be lost. Vincent is attorney for the flood control department, with Roy Dowds of the County Commissioner's office, associated.

BOULDER CITY, Nev.—Contractors who have applied to the Chief Engineer of the Bureau of Reclamation at Denver, Colo., for plans and specifications of the Hoover Dam, for which bids are to be opened at Denver on March 4 at 10 A. M., are:

Lynn S. Atkinson, Jr., Edwards & Wilder Bldg., Los Angeles, and 9135 Russell Ave., Oakland.

Fisher, Ross, McDonald & Kahn, 1204 Spring Arcade Bldg., Los Angeles. Meritt-Chapman & Scott Corp., P. O. Box 698, San Pedro, Calif.

Utah Const. Co., Phelan Bldg., San Francisco.

W. A. Bechtel Co., 155 Sansome St., San Francisco.

Kaiser Paving Co., Latham Square Bldg., Oakland.

Winston Bros., 520 Alaska Bldg., Seattle, and Minneapolis, Minn.

General Const. Co., 552 Colman Bldg., Seattle, Wash.

Bates, Rogers & Foley, St. Paul, Minn.

Brundel Corp., Baltimore, Md.

The Carleton Co., New York, N. Y.

The Foundation Co., New York, N. Y.

LOS ANGELES, Cal.—Calls for bids for the driving of 500 ft. of untimbered tunnel and 100 ft. of timbered tunnel at each of San Gabriel dams, No. 2 and No. 3, issued by the board of supervisors, have been withdrawn by the board and the chief engineer, E. C. Eaton, authorized to proceed with the work by force account.

BERKELEY, Alameda Co., Calif.—Robert Heaney, 1654 Capistrano Ave., Oakland, at \$1,302.50 submitted low bid to the city council to construct a dam in Cragmont Slide Area and drill holes to release sub-surface water. Complete list of bids follows:
Robert Heaney.....\$1,302
L. J. Immel.....2,070
T. D. Courtright.....2,502
Ely & Bean.....2,750

SEWERS AND SEWAGE DISPOSAL PLANTS

OAKLAND, Cal.—As previously reported, bids will be received by Frank C. Merritt, city clerk, until December 31, 12 noon, to construct sewers in portion of Foothill Blvd., 8th Ave., Iris St., Dowling St. and Blanche St. Project involves:

- (a) 285 lin. ft. 24-inch pipe sewer;
- (b) 606 lin. ft. 8-inch pipe sewer;
- (c) 6 manholes.

Bond of one-fourth the amount of the contract price required of the successful bidder. Specifications on file in office of clerk. Walter N. Frickstad, city engineer.

LOS ANGELES, Cal.—The city council has before it the matter of ordering the \$5,000,000 sewer bond issue, defeated at the last election, placed on the primary ballot next spring. The health commission has proposed the issue as an urgent necessity.

APTOS, Santa Cruz Co., Cal.—An election will be held early next year to vote bonds of \$55,000 for the construction of a pumping and screening plant and main trunk line sewer to serve district. William H. Oliver, engineer Soquel, has already completed plans and specifications.

SAN JOSE, Santa Clara Co., Cal.—City Engineer Wm. Popp prepares plans for sanitary sewer in Delmas Ave., bet. Snyder Ave. and Willow St., property owners having petitioned for the work.

SAN MATEO, San Mateo Co., Cal.—City council contemplates election in April to vote bonds of \$50,000 to finance construction of an outfall sewer.

WATER WORKS

LOS ANGELES, Cal.—Engineering Board of Review of the Metropolitan Water District, composed of three internationally famous engineers, has indorsed the Parker route for the \$200,000,000 Colorado river aqueduct, which will bring enough domestic water to the Los Angeles metropolitan area from Boulder dam to supply the needs of 6,000,000 people.

HAWTHORNE, Los Angeles Co., Cal.—Bids for furnishing cast iron pipe received by city council follows:

- (1) 5000 ft. 2-in. cast iron pipe;
- (2) 5000 ft. 4-in. cast iron pipe;
- (3) 5000 ft. 6-in. cast iron pipe;

The bids were:
American Cast Iron Pipe Co.—(1) 19.7c, (2) 41.5c, (3) 61.5c.

C. G. Claussen & Co.—(1) 20.75c, (2) 46.25c, (3) 65.75; alternate bid: (2) 39.5c, (3) 60.5c.

Crane Co.—6 ft. lengths—(1) \$16.95 per C. ft.

National Cast Iron Pipe Co.—(1) 21c, (2) 45c, (3) 60.5c.

Pacific Pipe Co.—(3) flange pipe, \$31 per C. ft.

Pacific States Cast Iron Pipe Co.—6 ft. lengths—(1) 19c, (2) 35.5c, (3) 59c; 15-ft. lengths—(1) 20.5c.

U. S. Pipe & Foundry Co.—(1) 20c, (2) 45c, (3) 60.5c; bidding on 15-ft. lengths, B & S.—(1) 21.5c, (2) 18-ft. lengths, 41.6c, (3) no bid

Bids taken under advisement.

EUREKA, Humboldt Co., Cal.—Until January 6th, 5 P. M., bids will be received by city council to construct wooden water tank to be located on Harris St., between E and F Sts. Plans and specifications on file in office of Superintendent of Public Works, 524 D St. Certified check of 10% required with bid.

LOS ANGELES, Cal.—Western Pipe & Steel Co., 5717 Santa Fe Ave., submitted low bid to city purchasing agent, Thomas Oughton, Dec. 26, at prices shown below, for welded steel pipe under Specifications No. 2256. Bids were taken on the following items:

- (1) 1560 ft. laying length, 51-in. welded steel pipe;
- (2) 1560 ft. laying length, 51-in. welded steel pipe, double dipped in McEverlast steel water pipe coating;
- (3) 1560 ft. laying length, 51-in. welded steel pipe with not more than two girth seams and only one longitudinal seam;
- (4) 1560 ft. laying length, 51-in. welded steel pipe identical with Proposal No. 3, except that the dipping shall comply with Proposal No. 2.

The bids were:

Western Pipe & Steel Co.—Elec. welded—(1) \$6.55, (2) \$6.35, (3) \$7.05, (4) \$6.85; net. Delivery, start Feb. 2, complete Feb. 12.

Consolidated Steel Corp.—(1) \$7.75, (2) \$7.60, (3) and (4) no bids; net. Delivery, start 28 days, complete 45 days.

Standard Boiler & Steel Works—Standard acetylene welded—(1) and (2) no bids, (3) \$8.20, (4) \$8; 1% 30 days after delivery trenchside, delivery to start Jan. 31 and be completed April 30.

L. A. Mfg. Co.—elec. welded—(1) and (2) no bids, (3) \$8.60, (4) \$8.41; net. Delivery to start Feb. 2 and be completed Feb. 28.

REDWOOD CITY, San Mateo Co., Cal.—United States Pipe & Foundry Company, Monadnock Bldg., San Francisco, awarded contract at \$685 by city council to furnish 6000 feet 8-in. and 3000 feet of 6-in. cast iron water pipe.

STREETS AND HIGHWAYS

REDWOOD CITY, San Mateo Co., Cal.—W. O. Tyson, 42 Jefferson St., Redwood City, awarded contract at \$651 by city council to improve Warwick street from Edgewood Road in Redwood City to Eaton Avenue in San Carlos. Western Paving Company, San Francisco, next low bidder at \$6827.

SANTA ANA, Orange Co., Cal.—Until January 5, 7:30 P. M., bids will be received by City Council to improve Washington Avenue between Baker and Artesia Street, involving grading and cement concrete walks. Approximate quantities are (1) 1875 sq. ft. 3½-in. walk incl. grading; (2) 10 sq. ft. 5½-in. walk including grading, 1911 Aet. C. L. Jenken, city engineer. Further information obtainable from above.

SAN BERNARDINO, San Bernardino Co., Cal.—The County Board of Supervisors has ordered the paving of Mt. Vernon Ave. to connect with the Riverside-Redlands Highway, being an extension of Mt. Vernon Ave. and 1st. Colton, between the Cooley Rd. and the Redlands Rd. The pavement will be 6-in. asphaltic concrete, 22 ft. wide. James W. Cole, county highway commissioner, will supervise construction.

SANTA CLARA, Santa Clara Co., Cal.—City Council declares intention (22-D) to improve Harrison, Lewis, Scott, Reeve, Wistar, Monroe, Jackson Washington, Pierce, Benton Sts. and Railroad Ave. involving grading; asphaltic concrete pavement laid on a layer of quarry waste; Portland cement concrete curbs, drop curbs, gutters, sidewalks and driveways; vit. clay pipe, sanitary sewers and Wye branches; laterals; sanitary sewer manholes. Bond Act 1915, Imp Act 1911. Hearing January 5, A. J. Cronin, city clerk. George Sullivan, city engineer.

MODESTO, Stanislaus Co., Cal.—City Council passed an ordinance authorizing Frank J. Rossi, city engineer to start work on construction of new sewers in the industrial district to cost approximately \$16,000.

SAN FRANCISCO.—Bureau of Engineering, Department of Public Wks., 3rd floor, City Hall, completes specifications to improve Salinas Avenue from Wheat St. easterly, involving:

- (a) 70 lin. ft. armored conc. curb;
- (b) 20 lin. ft. 6-inch V. C. P. side sewer;
- (c) 1,400 sq. ft. asph. conc. pavement, consisting of 2-in. surface on 4-in. class F concrete base.

Estimates cost \$550.

SAN FRANCISCO.—Bureau of Engineering, Department of Public Wks., 3rd floor, City Hall, completes specifications to improve 38th Avenue bet. Noriega and Ortega Sts., involving:

- (a) 538 lin. ft. armored conc. curb;
- (b) 400 lin. ft. 6-inch V.C.P. side sewer;
- (c) 11,860 sq. ft. asph. conc. pavement consisting of 2-in. surface with 6-inch class F base.

Estimated cost \$6,900.

SAN FRANCISCO.—Bureau of Engineering, Department of Public Wks., 3rd floor, City Hall, completes specifications to improve Head Street bet. Shields and Sargeant Aves., involving:

- (a) 175 lin. ft. armored conc. curb;
- (b) 45 lin. ft. 6-inch V.C.P. side sewer;
- (c) 2,625 sq. ft. 6-in. class E concrete pavement.

Estimated cost \$2,000.

SAN FRANCISCO.—Bureau of Engineering, Department of Public Wks., 3rd floor, City Hall, completes specifications to improve Santiago St. bet. 41st and 44th Avenues, involving:

- (a) 347 lin. ft. armored conc. curb;
- (b) 325 lin. ft. 6-inch V. C. P. side sewer;
- (c) 8,688 sq. ft. asph. conc. pavement, 2-in. surface on 6-in. class F concrete base.

Estimated cost, \$3500.

SAN FRANCISCO.—Bureau of Engineering, Department of Public Wks., 3rd floor, City Hall, completes specifications to improve Goettlingen Street bet. Harkness and Wilde Aves., involving:

- (a) 20 lin. ft. V. C. P. side sewer;
- (b) 720 sq. ft. class F conc. pave.

Estimated cost \$250.

OAKLAND, Cal.—Heafey-Moore Co., 344 High St., Oakland, at \$34,972 awarded contract by city council to improve E 10th St. bet. High St. and 50th Ave., Russet St. bet. 50th and 54th Aves., etc. Project involves:

- (1) 156,749 sq. ft. grading, \$62.
- (2) 341 lin. ft. conc. curb with steel curb guard, \$80.
- (3) 2597 lin. ft. concrete curb without steel curb guard, \$40.
- (4) 15,390 sq. ft. conc. pave., \$163.
- (5) 93 lin. ft. 8-in. by 29-in. iron and conc. culvert, \$4.
- (6) 14 lin. ft. 10-in. vit pipe conduit, \$150.
- (7) 34 lin. ft. 15-in. do, \$2.
- (8) 2 handholes, \$10.
- (9) 1 storm water inlet (21-in. opening), \$25.
- (10) 1 manhole top, \$60.
- (11) 1 manhole top, \$35.

1931 Act. City will pay 29% of cost from Treasury. Complete list of bids follows:

Heafey-Moore Co. ... \$34,972

N. M. Ball ... 36,642

A. J. Kalsch ... 35,232

Complete list of unit bids received on this project were published in our issue of December 28.

PALO ALTO, Santa Clara Co., Cal.—Until January 10, 7:30 P. M., bids will be received by E. L. Beach, City Clerk, (938) to improve High St., between Lytton Ave. and Addison St., involving vit. san. sewers, cem. concrete gutters, driveways, curbs and walks, catchbasins, conc. storm sewer pipe, electroliner system, resurface roadway with asphalt concrete.

Certified check of 10% required with bid. Plans and specifications obtainable from above. J. F. Byxbee, city engineer.

SANTA CLARA, Santa Clara Co., Cal.—City Council declares intention (21-D) to improve Santa Clara, Market, Poplar, Sherwood, Isabella and

Main Sts. and The Alameda involving grading, asphaltic concrete pavement on layer of quarry waste, Portland cement concrete curbs, drop curbs, gutters, sidewalks and driveways, vitrified clay pipe main sanitary sewers, vit. clay pipe Wye branches, vit. clay pipe sewer laterals, brick manholes, cast iron frames and covers. A. J. Cronin, city clerk. Geo. Sullivan, city engineer. Hearing January 5. Act 1911.

December 30, 1930
SANTA CLARA, Santa Clara Co., Cal.—City council declares intention (23-D) to improve Bellomy street and Campbell Ave., involving grading, asphaltic concrete pavement laid on layer of quarry waste, Portland cement concrete sidewalks, curbs and gutters. Act 1911. Imp. Act 1915. Hearing January 5. A. J. Cronin, city clerk. George Sullivan, city engineer.

LOS ANGELES, Cal.—Geo. H. Oswald, 366 E 58th St., submitted low bid to board of public works Dec. 24 at \$25,422.24 for improving streets in 120th St. and Broadway Improvement District (center line length 13,659 ft.) involving:

- (1) grading (24,579 cu. yds. cut, 6630 cu. yds. fill, special flooding 16,200 sq. ft.);
- (2) 3994 sq. ft. 8-in. conc. paving;
- (3) 24,037 sq. ft. 7-in. conc. paving;
- (4) 1233 sq. ft. 6-in. do;
- (5) 2087 sq. ft. 4-in. do;
- (6) 6394 sq. ft. 6-in. asph. concrete paving;
- (7) 14,075 sq. ft. 4-in. asph. concrete wearing surface;
- (8) 68 sq. ft. 1½-in. do;
- (9) 156 sq. ft. class B resurf.;
- (10) 456 sq. ft. sectional curb armor;
- (11) 11,255 ft. unplas. heavy curb;
- (12) 757 ft. reinf. integral curb, type A

- (13) 430 ft. do, type B;
- (14) 290 ft. integral curb;
- (15) 18,166 sq. ft. 1-course walk;
- (16) 5179 sq. ft. 2-course walk;
- (17) storm drain;
- (18) sanitary sewer;
- (19) 5059 ft. house sewers;
- (20) 22506 sq. ft. concrete reinf.;
- (21) water system;
- (22) 102 water services;
- (23) 21 water service stubs;
- (24) ornamental light system.

Removals: 115 ft. fence, 3581 sq. ft. paving, 10,400 sq. ft. walk, 9256 ft. curb, 33 trees, 40 ft. 18-in. culvert and 2 concrete end walls; reset 14 manholes.

The unit prices were: (1) \$30,000; (2) 27.4c, (3) 23.75c, (4) 25c, (5) 17c, (6) 19.75c, (7) 13c, (8) 11c, (9) 32c, (10) \$1.00, (11) 60c, (12) 65c, (13) 60c, (14) 60c, (15) 14.5c, (16) 15.5c, (17) \$2.00, (18) \$2.00, (19) \$1.00, (20) \$2.00, (21) \$8000, (22) \$22, (23) \$21, (24) \$6,500; total \$217,432.24.

SAN FRANCISCO.—Until January 7, 2:30 P. M., bids will be received by Board of Public Works to improve Campbell Avenue, between Alpha and Rutland streets, involving armored concrete curbs; two course concrete sidewalks; vit. clay pipe side sewers; asphaltic concrete pavement. Certified check of 10% required, payable to clerk of the Supervisors. Further information obtainable from above.

SAN FRANCISCO.—Until January 7, 2:30 P. M., bids will be received by Board of Public Works to improve Duncan St., between Douglass St. and Hoffman Ave., involving armored concrete curbs; side sewers; 1½-in. asphaltic concrete wearing surface and 6-in. Class F concrete base. Certified check of 10% required with bid payable to Clerk of the Supervisors. Further information obtainable from above.

LOS ANGELES, Cal.—Until 10 A. M., Jan. 7, new bids will be received by the Board of Public Works for Improving Rhodes Ave., from Oxnard St. to Burbank Blvd., involving:

- (1) grading (4116 cu. yds. cut, 119 cu. yds. fill);
- (2) 54,478 sq. ft. concr. paving, 6-in. thick, dummy and expansion joints and thickened edges;
- (3) 46,657 sq. ft. waterbound decomposed granite roadway, 4-in. thick;
- (4) fire hydrants and appurtenances, complete.

Bids received December 17 were rejected December 24.

OAKLAND, Cal.—Bids were opened by city council to improve E Tenth St. bet. High St. and 50th Ave., Russell St. bet. 50th and 54th Aves., etc. Project involves:

- (1) 156,749 sq. ft. grading;
- (2) 341 lin. ft. conc. curb with steel curb guard;
- (3) 2397 lin. ft. concrete curb without steel curb guard;
- (4) 154,790 sq. ft. conc. pavement;
- (5) 93 lin. ft. 8-in. by 20-in. corr. iron and concrete culvert;
- (6) 14 lin. ft. 10-in. vit. pipe conduit;
- (7) 34 lin. ft. 15-in. vit. pipe conduit;
- (8) 2 handholes;
- (9) 1 storm water inlet (21-in. opening);
- (11) 1 manhole top;
- (12) 1 manhole top.

1911 Act. City will pay 25% of cost from Treasury.

SALINAS, Monterey Co., Cal.—W. A. Dontanville, Salinas, awarded contract by city council to improve Pajaro St., bet. Sausal and Lake Sts., involving grading, 3.65 sq. ft.; conc. pave, \$19 sq. ft.; cem. conc. sidewalks, \$14 sq. ft.; cem. conc. curbs, \$30 lin. ft.

SANTA BARBARA, Cal.—City council declares intention (1134) to improve Bath Street, bet. Quinte St. and Alamar Ave., involving grading, asphaltic concrete pavement, combined cement concrete curb and gutter, cement concrete cross gutter, cement concrete driveways, cement concrete sidewalk, removal of cement landing walk, etc., under 1911 Act. Hearing January 15.

IMPERIAL COUNTY, Cal.—Until January 21, 2 P. M., bids will be received by State Highway Commission to grade and pave with asphalt concrete, 6.3 miles between Trifolium Canal and Kane Springs.

See call for bids under official proposal section in this issue.

SOLANO COUNTY, Cal.—Approval by the state highway commission of plans to reroute the Sacramento-Oakland road through American canyon, Solano county, was announced by the department of public works at Sacramento Dec. 19. The project, to cost approximately \$1,500,000, would reduce the distance between the two cities by five miles. It must have the

approval of the state legislature. The canyon route calls for construction of 14 miles of new roadway terminating with the present highway at points about one mile west of Colusa and east of Vallejo. The abandoned portion of the existing highway would be turned over to Solano county for inclusion in the latter's road system.

SAN FRANCISCO.—Pay Imp. Co., Theban Bldg., at \$172 awarded contract by State Harbor Commission, Ferry Bldg., for laying asphalt wearing surface on basalt block pavement in 16th St., involving:

- (1) 270 tons Topack wearing surface;
- (2) 100 tons asphalt binder.

Following is a complete list of bids:

Pay Imp. Co., (1) \$5.20; (2) \$4.68; \$18.72.

Edwards & Smith, (1) \$5.65; (2) \$4.80; \$22.05.

Union Paving Co., (1) \$6; (2) \$5; \$2.120.

L. J. Cohn, (1) \$7.00; (2) \$6.50; \$2,540.

MARCH FIELD, Riverside Co., Cal.—Until January 14, 11 A. M., bids will be received by Constructing Quartermaster, March Field, to construct paved aprons in front of hangars at March Field. Plans obtainable from above. The work will consist principally of concrete paving, the appropriation being \$104,000.

See call for bids under official proposal section in this issue.

TAHOE NATIONAL FOREST, Sierra Co., Cal.—Until January 15, 2 P. M., bids will be received by C. H. Sweetser, district engineer, 461 Market St., San Francisco, for grading and surfacing about 4.14 miles in length with crushed rock, involving approximately 28 acres clearing; 72 cu. yds. concrete; 282 cu. yds. masonry; 280 cu. yds. rip-rap; 148,000 cu. yds. excavation; 6700 cu. yds. crushed rock surfacing; 3120 lbs. reinf. steel; 1492 lin. ft. C. M. pipe; 278.20 cu. yds. overhaul. Plans and specifications obtainable from above on deposit of \$10, returnable.

KING CITY, Monterey Co., Cal.—Until January 7, 8 P. M., bids will be received by City Council to improve portions of Mildred Avenue involving grading; hydraulic cement concrete curbs; 5-inch hydraulic cement concrete pavement. K. Z. Mansfield, city clerk, Howard Cozens, Salinas, engineer. Further information obtainable from above.

SANTA CRUZ, Santa Cruz Co., Cal.—Petition has been placed before the Board of Supervisors to improve Skyland Section, which embraces Skyland, Laurel, Hester and Summit District. The roads now are regarded as unsafe.

BENICIA, Solano Co., Cal.—Construction of a new secondary highway to give Benicia direct and convenient access to the proposed new trunk highway through American-Carquinez bridge short cut is the plan of State Highway Engineer, C. H. Purcell.

SAN FRANCISCO.—Until January 7, 2:30 P. M., bids will be received by Board of Public Works to improve Bradford St., between Cortland and Powhattan Avenues, involving side sewers; 6-in. concrete Class E pavement. Certificates of 50% required payable to Clerk of the Supervisors. Further information obtainable from above.

LOS ANGELES, Cal.—J. C. Hickey, 320 S. Palm Ave., Alhambra, submitted the low bid to the board of public works Dec. 24 at \$232,512.29 for

constructing sewers in 112th St. and Willowbrook Ave., Sewer Dist., involving:

- (1) sanitary sewer;
- (2) 11,697 ft. house sewers;
- (3) 60,667 sq. ft. class AA resurf.;
- (4) 10,811 sq. ft. class AA resurf.;

IMPERIAL COUNTY.—As previously reported bids will be received by State Highway Commission to grade and pave with asphalt concrete 6.3 miles between Trifolium Canal and Kane Springs; approximate quantities are:

- (1) 33,000 cu. yds. rdwy. ex-cav. without class;
- (2) 43,000 sta. yds. sta. overhaul;
- (3) 1,500 cu. yds. struc. ex-cav.;
- (4) 14,500 sq. yds. subgrade for pavement;
- (5) 54,400 sq. yds. asph. paint binder;
- (6) 28,800 tons asphalt concrete;
- (7) 1,292 lin. ft. 24-in. corr. metal pipe;
- (8) 132 lin. ft. 36-in. corr. metal pipe;
- (9) 900 lin. ft. furnishing treated piles;
- (10) 36 each, driving piles;
- (11) 16 M. ft. b. m. redwood timber, dense select all-heart structural grade;
- (12) 10 M. ft. b. m. redwood timber, select all-heart structural grade;
- (13) 72 cu. yds. removing and disposing of Portland cement concrete in existing pavement and structures;
- (14) 323 stations finishing roadway;
- (15) 120 each, monuments, complete in place.

The state will furnish corrugated metal pipe.

CAREY ELASTIC RAIL FILLER PATENT LEGAL

In a decision recently handed down by Judge Cooper in the United States District Court in the Northern District of New York, patent No. 1,171,441, under which the Philip Carey Company Elastite rail filler is manufactured, was held to be valid.

The Philip Carey Manufacturing Co. brought suit against Henry Dumary, Albany contractor, and the Albany Milling Corporation, a dealer. The infringing rail filler was manufactured and the suit was defended by Serviced Products Corp., of which Mr. Albert C. Fischer is president.

Judge Cooper's decision stated that rail filler as manufactured under the patent in question "is a real success and a real benefit to the cities and street railway companies. It has solved a problem ever before them of repairing, paving and repaving paved streets containing street railway tracks."

A decree was awarded in favor of the Philip Carey Co. for injunction and costs with accounting of profits sustaining the patent under which that company manufactures and sells Carey Elastite Rail Filler.

After many years in Richmond, W. H. Verbisio has moved his roofing business to 2445 San Pablo Avenue, Berkeley. Verbisio applies all types of asphalt, shingle and roll roofs, felt, asphalt and gravel and now handles exclusively the paint and shingle products of the Parfline Companies, Inc.

OFFICIAL PROPOSALS**STATE OF CALIFORNIA****DEPARTMENT OF PUBLIC WORKS****DIVISION OF HIGHWAYS****NOTICE TO CONTRACTORS**

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on January 21, 1931, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Imperial County, between Trifolium Canal and Kane Springs (VIII-Inp-26-B), about six and three-tenths (6.3) miles in length, to be graded and paved with asphalt concrete.

Proposal forms will be issued only to those Contractors who have furnished a verified statement of ex-

perience and financial condition in accordance with the provisions of Chapter 644, Statutes of 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State. DEPARTMENT OF PUBLIC WORKS DIVISION OF HIGHWAYS

C. H. PURCELL

State Highway Engineer.

Dated December 23, 1930.

Suggested measures for the prevention of the four chief types of unemployment are given in a report of the governor's commission on unemployment problems for the State of New York, issued by Frances Perkins, state industrial commissioner and a member of the special commission. The four types are listed as seasonal, cyclical, technological and chronic. A summary of possible measures of preventing seasonal unemployment is given as follows: stimulating consumer and dealer demand during the off-seasons; scheduling production so that employment will be fairly evenly distributed throughout the year despite fluctuations in sales; developing sideline and filler products for slack seasons; and using a flexible working day rather than alternately hiring and firing workers.

According to the report, cyclical depressions are beyond the power of industry to prevent. As a means of affording some relief to seasonal unemployment, the commission suggests that public works be planned far enough ahead and flexible enough to be pushed forward in times of depression of private industry. Technological unemployment, or that caused by replacing of hand labor with machinery, can be lessened by the adoption of sound plans to take care of those released, either by absorption in other departments or by providing dismissal wages large enough to tide the worker over until other work can be obtained. When it is necessary to reduce the working force because of changes in the plant, it is suggested that it be done gradually, not by layoffs, but by non-replacement of losses due to death or superannuation. Chronic unemployment could be relieved by the organization of competent state and national agencies, which could centralize application for men and work. Such a plan would free workers from the high fees charged by private agencies and would tend to remove the abuses now prevalent in the private agency system of supplying workers.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

STANDARD OFFICE LEASE FORM ISSUED

Safeguarding and clarifying all phases of the agreement entered into between the lessor and lessee in renting office space are the aims of the new standard office lease form issued by the National Association of Real Estate Boards. The new form was prepared by the Association's Property Management Division and approved by the Brokers' Division, and has been sent to all members of both divisions.

Such provisions as have been found by long experience to operate most satisfactorily for the protection of all parties concerned in the transaction of leasing office space—the tenant, the property manager, and the owner of the building—have been included in this standard form, which was prepared after a careful scrutiny of various types of office leases now in use by property managers throughout the country.

Optional rider clauses are provided with the new standard form to cover specific agreements in leasing space in typical office buildings planned for tenants in some special business or profession, as, for instance, a building planned for the use of doctors. The Division points out that is of definite value to the individual tenant that such buildings maintain certain high standards for all tenants.

One optional clause for leases in buildings for the use of doctors and dentists requires the lessee to agree not to advertise his profession in any manner prohibited by the code of ethics of medical and dental professions, and, in case the lessee breaks this agreement, makes him liable to \$500 damages, payable to the lessor.

Further optional clauses to be included in leases made to doctors and dentists cover provisions for the dispensation of alcohol and other drugs and chemicals, name specifically the appliances which the dentist may use for x-rays and compressed air, and relieve the lessor of responsibility for the operation of X-Ray machines and other medical and dental office equipment.

The following committee, from the Property Management Division, in co-operation with the Brokers' Division of the National Association, prepared the standard office lease form: Arthur P. Hall, Chicago, Chairman; William H. Ballard, Boston; L. V. DuBois, Cincinnati; Clarence Turner, St. Louis; Eli Torrance, Minneapolis; and John B. Lear, Philadelphia.

Construction of a tunnel under the city of Vancouver, B. C., will be begun soon under a contract awarded to the Northern Construction Co. and J. W. Stewart by the Canadian Pacific Railway. The tunnel will eliminate five grade crossings in a busy part of the downtown area. Its cost is estimated at \$1,750,000.

G. G. BRIDGE BIDS ABOUT MARCH FIRST

Bids on the first unit of the Golden Gate Bridge, a \$35,000,000 project, will be opened about March 1, it is announced by the Golden Gate Bridge and Highway District.

Plans are now being checked to determine if the structure can be built for the amount of money voted for its construction. At the November 4 election the district sanctioned a \$35,000,000 bond issue to finance the bridge.

The bridge will be constructed between Fort Point in the Presidio of San Francisco and Lime Point in Marin County.

The bridge proper will be 6400 feet, end to end, with a center span of 4200 feet, two side spans of 110 feet each, a 1582 foot viaduct on the south, a 910 foot viaduct on the north and approaches.

The total length of the main bridge between piers is 8943 feet. The clearances are 410 feet horizontally between piers and 220 feet vertically above mean high water at the center.

The bridge will contain 75,000 tons of structural steel and the foundations and anchorages will require 110,600 cubic yards of concrete. The towers are 740 feet above mean high water with glass-enclosed observation platforms at the tops, reached by elevators.

The two main steel cables will each be 7700 feet long, weighing 43,750,000 pounds when wrapped. Each main cable will contain 27,600 individual strands, eyebars being provided at the anchorages.

The sag at the center of the span is 475 feet.

ORANGE COUNTY EXCHANGE ELECTS

Walter F. Sorensen of Santa Ana was elected president of the Orange County Builders' Exchange at the regular annual meeting of that body in Santa Ana last week. C. M. Gilbert was elected first vice-president and V. J. Anderson, second vice-president.

LeRoy M. Strang was elected treasurer and Frederic W. Sanford re-elected secretary-manager.

Directors are H. M. Adams, M. E. Beebe, A. L. Foster, Allison Honer, W. J. Kelly, H. M. Massey, R. C. McMillan, C. E. Rutledge, Wm. J. Tway, Henry Walters and Geo. W. Young.

The officers were installed at a dinner-meeting held in the American Legion Clubhouse at Santa Ana where a special program of entertainment was featured.

Speakers at the dinner included J. Simon Flour, George R. Wells, O. T. Moore, Jules W. Markel, Wm. T. Tway, Allison Honer and R. C. McMillan, all past presidents of the Orange County Builders' Exchange.

VENTURA HARBOR ACT HIT BY COURT

The California Supreme Court on January 2 ruled that the Ventura Harbor District Act, passed by the 1927 Legislature, was invalid, inoperative and void.

The harbor district had petitioned the Supreme Court for an alternative writ of mandate to compel the supervisors of Ventura County to call a special election on a contemplated \$2,000,000 bond issue for improvement of the Ventura harbor.

Contending the act was unconstitutional, the supervisors attacked the validity of the act on the grounds that it conflicted with general laws of California which cover all phases of harbor improvement.

The opinion, written by Justice J. W. Preston, was unanimous.

Justice Preston cited two constitutional provisions, one saying all laws must have uniform application and the other saying no special law was valid where a general law is applicable.

General laws, in force when the Ventura Harbor District Act was passed, cited as follows:

1. The county harbor district act.
2. The harbor district act enabling portions of counties to bond districts for harbor improvement, the county board of supervisors having power to fix the boundaries.

Under the Ventura Harbor District Act the boundaries were fixed in the act itself, not being subject to change. It also provided that taxes to support the district come from real property.

Justice Preston's opinion said that it was a matter as to whether general acts were applicable, and the court ruled that they were and that, therefore, the "Ventura Harbor District Act of 1927 is invalid, inoperative, null and void."

The Ventura act included most of Ventura County in the harbor district. A point mentioned by Justice Preston was that a harbor district, formed in accordance with the general law applying to portions of counties, would permit public hearings at which time the inclusion or exclusion of certain portions of a county in a harbor district could be decided.

A. E. F. ENGINEERS PLAN TO ORGANIZE

An association for former members of the 10th and 20th Engineers, A. E. F., is being projected.

All former members are requested to write to D. R. Meredith, 205 East 42nd Street, New York City, or to F. S. McNally, 5728 Grand Central Terminal, New York City.

It is planned to hold a meeting of the new association during the Northeastern Retail Lumbermen's Association convention to be held at the Pennsylvania Hotel, New York City, January 27-29.

ABILITY OF SALESMEN IS AID TO BUSINESS RECOVERY

Business recovery depends largely upon the ability of the salesman to point the way, declared Charles F. Abbott, Executive Director of the American Institute of Steel Construction in an address before the National Council of Traveling Salesmen's Association at the Hotel Victoria, New York, Dec. 18.

Mr. Abbott pointed out that there has been an advance in the price of steel which marks the turning point in the present period of depression. His address is published herewith.—Editor.

"This is a very important time to talk with salesmen. You are about to return to your territories throughout the United States, and business recovery will depend to a large extent upon your ability to sell," said Mr. Abbott.

"Thousands of employers are now looking for the man who can lead, because they are failing because they have not got him. He does more than anyone else to make work for the unemployed, and he makes his firm prosper. He can restore business in all lines. He is the most valuable man in a time of depression and he does most of all to prevent overproduction.

"The successful salesman frowns upon price cutting. He abhors unethical practices. He is the most wanted man in the world today, as he alone can bring about business recovery—the man who knows how to sell.

"Business is all set to stage a comeback. There is plenty of money available if it could be released for purchasing. It has been temporarily held in abeyance because those who have the money do not like to spend it when news is being released from New York of bank failures and constant declines in the stock market. This has a tendency to create pessimism as thick as a London fog, and has prevented people from buying what they really need. We, as salesmen, however, should be able to break through that.

"There are many important messages the salesman can convey at this time that would have a very beneficial influence upon the whole situation. Among the more important is the creation of a nation-wide recognition of the support that should be extended to President Hoover at this time when we are passing through the worst crisis ever experienced in all history. The country is fortunate in having a man of the experience, knowledge and courage of President Hoover. His humanism and his understanding of world-wide affairs will undoubtedly lead us through successfully. Disregarding all political faiths and preferences, this is the time when all of our people throughout the country should rally to the support of our president and insure that his programs be carried through without interruption or interference. This is no time for delays or procrastinations. It is a time for cooperation, and it should and will be forthcoming.

"A man of lesser experience as President at this time might not have been able to meet the perplexing problems as effectively, in which event we would have experienced a more severe depression and one of longer duration.

"Overproduction has seemingly made it necessary for some drastic experiments. In the case of copper, sugar, coffee, rubber, wheat, cotton and other basic commodities efforts

which have seemingly had their inspiration in price fixing seem to be the only practical remedy for the emergency. As important as steel is to the national existence this industry has consistently refrained from restricting output or depriving the public of its products.

"Recently one of the important companies producing steel announced an advance of a dollar a ton on a few of the products of the mill. Any one acquainted with the temper of the market will agree that the time was ripe for such action. Because some of the competing mills also advanced their prices on similar steel products, the incident has been brought within the purview of certain politicians.

"It seems to me that this is no time for our legislators to criticize business because of the inauguration of constructive policies. Steel has definitely marked the turn of the depression. That alone is the meaning of the price advance and incidentally the hurrying of our legislators in Washington should have received the announcement with hurrahs.

"As a matter of fact the profits incurred in the operation of the steel industry are not in keeping with the hazards and risks assumed in this great and important industry. It has been estimated that less than \$5.00 of every \$100.00 of invested capital represents the return.

"Unless better prices are obtained it is evident that the great steel industry cannot maintain the present rate of employment and wage scales, neither of which have been interfered with during this depressing period when the steel industry has been operating at approximately 45 per cent of capacity. The employment and wage scales depend upon reasonable profitable returns.

"Then again, one of the senators took the opportunity of calling to the attention of the people throughout the country the fact that the cost of steel in our bridges and buildings might now be increased, and the consumer might be obliged to assume the additional burden. This senator possibly did not know that through the Standard Specification, sponsored by the American Institute of Steel Construction, the cost of steel in buildings has been reduced approximately \$25,000,000 annually. We have brought about a standardization in an elimination of wasted, unnecessary steel. Of course, in individual projects the steel industry loses tonnage, but these reduced costs produce additional markets for their product and make larger sales possible.

"The salesman has demonstrated the benefits to humanity that such constructive policies foster. Industry cannot effect the economies essential to reduce the costs of commodities unless the businesses engaged in that industry are allowed to make a fair profit. Bankrupt or near bankrupt concerns would never be able to engage in the research and the promotional work necessary to bring about these beneficial ends.

"Only a hundred years ago steel was a prized commodity. It was scarce and dear. Due to man's ingenuity and commercial resources we have found ways of producing and marketing it at a price within the reach of the poor man. As a result we are selling daily in the United States steel to the amount of $\frac{3}{8}$ lbs. for each man, woman and child. This is a decided sales achievement and is

a monument to our sales genius, for no other nation in the world is consuming so much steel.

"It is essential that our political representatives understand these things. They must be made appreciative of the usefulness of our sales ability. It constitutes a potent influence in the present economic emergency.

"It is just the misunderstanding in high places of these things that creates unnecessary confusion in the public mind, which the salesmen throughout the country can clarify by being intelligently informed and by courageous action in stimulating the necessary support to our President at this time when the employment of our workers is so vitally important to progress and business recovery.

"As we look forward, we can find much in the way of encouragement. Salesmen will be called upon to a greater extent than ever before because the future problem of American business is that of distribution. We have solved our problems of finance and production, but when it comes to distribution there is much that will command our attention. More efficient, aggressive salesmanship will be necessary, and costs must be reduced. The price cutting evil must be eliminated, and salesmen must take the initiative in removing all unethical practices in the field of salesmanship.

"In the future sales must be based upon total cost plus a profit, and real salesmanship will get that profit. It is only the order takers who cut the price or sell goods at cost or below cost. The salesman's compensation depends upon profits, and unless profits are obtained, the earning capacity of the salesman is correspondingly reduced.

"It is well to bear in mind that in the future the attention of salesmen will be concentrated upon the following ethical program:

1. Replace volume sales with honest, intelligent and aggressive selling at a profit.
2. One price to all without any concession or discrimination.
3. Abandon all misrepresentation.
4. Abolish all secret rebates.
5. No sales at cost or below cost.
6. Eliminate all commercial bribery.
7. Maintain standards as established by the industry avoiding any substitution or impairment of quality or workmanship.
8. Cooperative attitude toward competitors.
9. Adopt a sales policy that is fair to all then vigorously carry it out.
10. Refuse to engage in price cutting because of some rumor that a competitor had submitted a lower price.

11. Insist that every order includes a reasonable profit.
12. Support your trade organization to the limit of your ability.

"As we look forward to the next ten years, we anticipate great development of all industry. Greater buildings and bridges will be erected, and there will be many advances in science and invention that would stretch the imagination of all of us.

"The electric industry is on the verge of revolutionizing in price the process of manufacturing and distributing electricity.

"The natural gas industry with all of its vast pipe lines in bringing natural gas into remote cities and towns.

"The chemical industry by applied

research is bringing into being many new industries as new processes are developed.

"The coal industry is making preparations to utilize waste materials by converting them into electrical energy at the mines.

"The railroad systems are engaged in electrification programs.

"The aviation industry is in its infancy. It may, and probably will, accelerate the whole system of transportation.

SAN FRANCISCO BUILDING SLUMPS DURING YEAR 1930

San Francisco closed the year 1930 with a total of 6,541 building permits issued for improvements involving an expenditure of \$22,726,994, the lowest annual total, both in the number of permits granted and money expended, since the year 1921 when the permits registered 6,313 for improvements valued at \$22,344,672, according to figures compiled by John B. Leonard, superintendent of the Bureau of Building Inspection of the Department of Public Works.

During the year 1929 a total of 7,120 building permits were issued for construction aggregating an expenditure of \$33,682,025. During 1928, records show, 8,656 permits granted for work costing \$37,769,363.

December activities registered 445 permits for work costing \$2,292,388 as

"The American salesman has always been inventive, but in the future he will be even more so. He must know science as well as psychology. He must have full acquaintance with engineering and invention as well as his outlets and his markets. And above all the salesman of the future must know his politics as well as his economics because upon his shoulders will rest very largely the forestalling of those obstructive legislative acts which might cripple and hurt American business."

compared with 465 permits for the corresponding period in 1929 when the money expenditure totaled \$1,617,691.

Following is a segregated report of the December, 1930, activities as summarized by Superintendent Leonard:

Class	No. of Permits	Est. Cost
A	1	\$ 80,000
B	4	152,000
C	57	490,740
Frames	350	21,577
Alterations	2	598,471
Public Bldgs.	1	750,000
Harbor Bldgs.		

Total 445 \$2,292,388

NOTE: A complete tabulation of the San Francisco building permit expenditures, by months, for the past eleven years will be found on page five of this issue.

MASTERS OF ARCHITECTURE JOIN RANKS OF UNEMPLOYED

Graduates of the foremost schools of architecture here and abroad have been thrust into the ranks of the unemployed, the American Institute of Architects reports. In the report on New York it is estimated that there are 3,000 architects and 120,000 architectural draftsmen. Investigation indicates that at least ten per cent of this number are in need. Among them are university teachers, practicing architects, and men who have won prizes and medals for outstanding achievement in their profession. Nearly 500 have registered at the bureau set up by the Architects' Emergency Employment Committee in New York City.

Many of the registrants evidence urgent need. Skilled men who have earned more than \$5,000 a year are now lucky if they can earn the emergency stipend of \$15 a week. It is said, "One man 'would drive a truck.' Another 'would gladly do anything however menial.' More than three-quarters of the idle draftsmen have from one to three persons dependent upon them for support. Their ages range from 24 to 60, and their length of experience from 2 to 41 years.

Among them are men who have received degrees from New York University, the College of the City of New York, Columbia University, the Yale School of Fine Arts, the Beaux Arts Institute, The Ecole des Beaux Arts, Cornell University, Massachusetts Institute of Technology, and the University of Pennsylvania, Wisconsin, Illinois and Michigan.

The majority have served long apprenticeships in offices of leading architects in New York, London, and the ateliers of Paris. They include men who have worked on buildings such as Washington Cathedral, where Admiral Dewey and President Wilson are buried, and the Stanford University buildings.

The Architects' Committee, in collaboration with the Emergency Work

Bureau of the Emergency Employment Committee, has so far been able to give employment to only fourteen of the most needy draftsmen on the basis of \$5 a day for a three-day week.

One of the first draftsmen to work at the emergency rate of \$15 a week is a University of Pennsylvania graduate with a wife and two boys to support. In addition to his university training he has studied in Europe and has fine New York references. He has earned \$100 a week, but as he has been out of work for a year, his resources are exhausted and his plight is desperate.

Another draftsman who has joined the long line which forms at four o'clock in the morning outside the headquarters of the Emergency Work Bureau in Wall Street is a man with a wife and three children to support. His earnings have been \$80 a week. Despite his eleven years' experience and the beautiful drawings he has to show he has no hope of adequate earnings to meet expenses.

These two draftsmen are typical of the fourteen men with wives and two or three dependent children, who are considered fit candidates for relief in the lines of destitute men.

However, the Emergency Work Bureau has not the facilities to take care of such cases as that of the Columbia University graduate who also studied at the Beaux Arts Institute of Design and now has a wife and mother to support. He has been out of a job for the last six months.

He is 34 years old, has previously been employed for eight years as chief designer with three of the foremost architects' firms in New York, and his work has often illustrated one of the leading architectural magazines. He now seeks work on a part or full time basis as architect's renderer.

The case of the Cornell man who is a bachelor, 42 years old, with 17 years' experience and first-rate references, who has been out of work for the last

eight months and "will accept any employment," having just recovered from two months' illness, also falls out of the province of the Emergency Work Committee.

The 21-year old man who recently completed the five-year course in architectural decoration at the Yale School of Fine Arts, whose father is now out of work, whose brother and sister are too young to work, and who had earned \$40 a week toward their support, is another instance of the caliber of the draftsmen seeking placement.

One of the applicants now in urgent financial need has been awarded the medal of the American Institute of Architects for distinguished work. One, with a dependent wife who has been out of work for the past four months. He taught formerly for four years in one of America's most prominent universities a course in "descriptive geometry, perspective, shades and shadows," and subsequently worked five years in one of the leading architect's offices in this city.

Another man now eager to find employment is an able architectural draftsman and a former member of the American Institute of Architects and of the Beaux Arts Society. He has had forty-one years' experience and has done brilliant work in New York, Chicago and South America. He is now about 60 years old, and has a wife dependent upon him for support.

Reasons for unemployment are various. Many are traceable to the slowing up and cessation of building projects, and the complete shutdown of architectural departments in banks, and other institutions.

In response to the appeal of the Architects' Emergency Committee, only four organizations requiring the services of architectural draftsmen have so far notified the Committee of positions that may be open.

TRADE EXTENSION CLASS IS STARTED

The new Smith-Hughes Trade Extension Classes of the Technical Department of the Household and Evening High School, Eighteenth and Dolores Sts., will be started this week. It is announced by A. E. Roberts, chief instructor of the Technical Department at the high school.

These new first public classes are conducted for the skilled workmen and apprentices engaged in the engineering and building trades. The Smith-Hughes plan of education for adults provides extra financial aid from the Federal and State government to the San Francisco board of Education for the maintenance of this type of technical education.

The trade instruction includes Mechanical and Building Trades Drafting, Plan Reading, Industrial Applied Science, Industrial Applied Mathematics, Estimating, Applied Mechanics, Applied Electricity, Diesel Engine Construction, Operation of Construction and Operation, Power House Engineering, Telephone Engineering, Practical Steel Metallurgy, Concrete and Steel Construction, Practical Advanced Surveying, oxy-acetylene Welding, and Advanced Decorative Painting, Graining, Varnishing, etc.

It is expected that other trade classes will soon be added in compliance with public requirements.

Frank Hatch, Secretary of the Building Material Dealers' Association of Northern California, at the recent convention of that body in San Francisco, reported live new members during the year 1930, there being F. C. Hansen Lumber Co., Centerville; Urban Bros., Palo Alto; Steve Anderson & Son, Mayfield and the San Francisco Materials Company of San Francisco.

THE OBSERVER

What He Hears and Sees on His Rounds

An ordinance has been passed by the San Mateo County Supervisors providing that work on all county projects would be done by residents of the county. It was referred to District Attorney Swart for report.

As a possible measure of relief to the unemployed, general contractors affiliated with the Orange County Builders' Exchange with headquarters at Santa Ana, have decided to put in to effect during the present depression a five-day working week.

Oregon State Association of County Commissioners and County Judges in annual convention in Portland, Ore., last month, voted to resist any changes in the present laws governing road financing. The action is a direct rejection of any proposal to increase the gasoline tax.

Stockton Chapter, California State Association of Architects has requested the U. S. Treasury Department that a local architect or firm be employed to prepare working plans for the proposed new \$85,000 federal building to be erected in that city. A site for the structure has already been secured.

Thirteen Bridgeport, Conn., contractors, constituting the dwelling and miscellaneous construction division of the Builders' Exchange, have agreed to enter into a cooperative advertising campaign during 1931 to promote the building of Bridgeport. It will consist of 36 quarter-page advertisements in local newspapers.

Oakland city council has passed an ordinance creating thirty temporary emergency laborer jobs in the street department at \$5 a day. The work is to be staggered, allowing 15 men to work three days a week and a second group to work the remaining three. This is one of the city's steps to relieve unemployment.

Directors of the Merced County Chamber of Commerce have adopted resolutions protesting against employment of men from San Francisco and Sacramento in connection with the Yosemite Highway Cut-off in Mariposa County. Reports indicate that 108 men were imported from San Francisco to work on the project.

Cement Reference Laboratory is now arranging for a second tour of inspection of cement-testing laboratories throughout the country. This service, which at present consists of inspecting cement-testing apparatus and demonstrating test methods, is rendered without charge. Laboratories which desire inspection should make prompt application to the Cement Reference Laboratory, U. S. Bureau of Standards, Washington, D. C.

Fresno county's highway maintenance department, formed as a unit of the county government with the voting of bonds for a highway system went out of existence Dec. 31. Under an agreement arrived at by County Surveyor Chris P. Jensen, who heads the department, and members of the board of supervisors, the plan is to have the separate department for the care of the bonded roads was abandoned. The action came at the suggestion of Jensen, and was made effective at the close of the year.

Portland, Ore., reports the issuance of 6943 building permits during the year 1930 for improvements involving an expenditure of \$12,651,550 as compared with 7691 permits in 1929 for work costing \$13,493,310. A tentative schedule of projects to be taken within the next six months, both public and private, will involve an expenditure of \$8,000,000, it is reported.

Theodore Ahrens, president of the American Radiator and Standard Sanitary Corporation, addressing the Louisville Board of Trade, advocated a five-day working week, with six days' pay, as a solution for the unemployment problem.

He said the advent of machinery and various labor-saving devices has resulted in a serious problem and that it may be necessary eventually to adopt a six-hour day. He said:

"I believe we have reached the bottom of this depression, and while recovery may be slow, it will be steady."

During the year 1930 the Los Angeles city building department issued 20,612 permits with an estimated valuation of \$74,088,825 as compared with 31,721 permits with an estimated valuation of \$93,016,160 for the year 1929. For the month of December, 1930, the number of permits issued was 2056, with an estimated valuation of \$5,283,235 as compared with 2201 permits with an estimated valuation of \$3,922,459 for the same month a year ago.

Figures compiled by the census bureau show the average price paid by contractors for Douglas fir (2x4-16 ft.) delivered on the job at Los Angeles on Oct. 1 was \$31.50 and for common boards, 1x6, was \$30.50. Prices for the same lumber at San Francisco were \$25.00 and \$25.00, and at Seattle \$17.00 and \$16.00. The average price paid by contractors for No. 2 vertical grain fir flooring at Los Angeles was \$54.50, at San Francisco \$50.00, and at Seattle, \$38.00.

A revised draft of the proposed American Standard for fabrication of hangers, supports, anchors, sway bracings, and vibration dampeners, required by the sectional committee on pressure piping organized under the procedure of the American Standards Association, is now being circulated for comment and criticism. Copies are available through the American Standards Association, 29 West 39th Street, New York City. The new draft includes a number of revisions made in the previous draft which was circulated several months ago. The committee which is working on the project is under the sponsorship of the American Society of Mechanical Engineers.

Employees of the Standard Sanitary Manufacturing Company at the two Richmond, Calif., plants are being put on a five-day week basis, instead of a three-day week, according to Frank Kales, coast manager of the company. The men have been working on a reduced shift for several months, but recent increases in business and anticipation that there will be further increases after the first of the year has caused more days to be added to the schedule. Approximately 425 men are employed at the two plants.

An unusual feature involved in the bidding on the Union High school building at Florence, Ore., proposals for which were received some time ago, has attracted some attention. Each contractor, according to information received, was furnished a complete quantity survey together with plans and specifications.

By this means, all bids were compiled on a uniform basis as to quantity of measurement, thereby removing the element of gamble as to quantities.

This action was taken at the request of Cleo H. Jenkins, Albany, architect for the project, who believes the advantages great as derived from accurate quantity surveys from the architect's and owner's standpoint.

There was a saving of about \$3000 worth of contractors' and sub-contractors' time, by elimination of duplication of effort through furnishing complete quantities to the respective trade, according to Charles Burton, quantity surveyor, who furnished the surveys on the job.

Close upon Sears, Roebuck Co.'s announcement of instalment financing of home modernization, the Security Finance Corp., Washington, D. C., enters the field with a similar plan for independent building material suppliers and contractors, says The Business Week.

Closely based on the cash price for the job, approximately 1% per month. The loan is amortized in equal monthly instalments, one of \$300, for instance, being covered by a note for \$35, with 12 monthly payments of \$28.

The contractor, when submitting bids on modernization jobs, includes the finance charge, notifies the company when the contract is obtained, secures the loan, and the company enters a special form of finance company note and, when he has endorsed the note, secures the money. A fair amount of equity in the property, plus a good reputation, form the main qualifications demanded from the home-owners.

Loans have averaged less than \$500, but jobs in amounts of \$500 to \$1,000 are handled in considerable numbers, generally on 3-year terms.

Within five years, or by the end of 1935, the San Francisco bay bridge from Rincon hill via Yerba Buena Island to Oakland, should be built and open to traffic.

That was the prediction made by Mark L. Requa, chairman of the Hoover-Young Bridge Commission, in a letter to members of the San Francisco Electrical Development League.

One of those years will be spent in getting the necessary bills through Congress and in obtaining franchises and drawing up contracts, Requa said.

He cited the estimates of the bridge engineer, Ralph Folsom, that it should take about four years to construct the bridge after work is started.

Decrying the "timidity of business men and legislators in the recent business crisis", ninety economists meeting in New York Jan. 4, endorsed a billion dollar loan program to finance construction. The indorsement of the Federal public works for building of public improvements came from university and college leaders and labor officials from all parts of the Nation. The economists say the Federal Government should hasten return of prosperity by large scale expansion in the fields, namely, highway building, irrigation, draining and improved water transport, reclamation of waste lands and flood control and elimination of grade crossings.

Students of architecture in the United States and Canada are invited to participate in a competition for the design of the most beautiful highway bridge in steel. Previous competitions of this nature have been held under the auspices of the Beaux-Arts Institute of Design. This year the competition will be held directly by the American Institute of Steel Construction, which offers a prize money of \$500 for the first, \$250 for the second, and \$100 for the third best design judged by a committee of architects and engineers of international importance. The change in procedure was made in order to conform to the plans for a similar competition held by the Institute among students of engineering. Students of architecture who wish to enter this competition are invited to submit to the American Institute of Steel Construction, 200 Madison Avenue, New York 17, N. Y., their preliminary sketches to be placed in judgment on April 3, 1931. From these the ten best will be selected for final development, and the final drawings will be judged on May 1 next. Full information may be had by addressing the Institute.

California and other Western States have been seriously handicapped in bidding on government contracts to meet Western requirements, due to the existing ruling of the Treasury Department, under which firms seeking to secure contracts to furnish equipment, furniture and supplies for use in federal buildings erected or to be erected anywhere in the United States, must make bids based upon factory cost, freight charges from the factory to Washington, D. C., according to the California State Chamber of Commerce. The free the manufacturers and merchants of the West from such laws and regulations which exclude them from competitive bidding on goods which may be used by the Federal Government in the Western States, the State Chamber of Commerce has asked the State Representatives in Congress to obtain the assistance of Congressional delegates of other Western States in requesting the Treasury Department to amend this ruling, either through zoning or by other means. Chambers of Commerce have also been asked to cooperate in an effort to secure a reasonable share of the Western requirements of the Government for California and other Western States.

Increased buying throughout the country has caused the Norge Corporation, Detroit, manufacturers of Norge Electric Refrigerators, to readjust their employment and production schedules which now call for the doubling of the working force in the Detroit and Milwaukee factories. Fifteen hundred additional employees will go to work in January. There will be no cuts in wages, announced H. E. Blood, president of the Norge Corporation, which is a subsidiary of Borg-Warner Corporation.

America is surpassing all other nations, modern or ancient, in the creation of original and artistic architectural designs, said Dr. Mario Soldati, doctor of literature from the University of Turin, Italy, and lecturer in Barnard College, Columbia University, New York City, lecturing in Denver.

"American architecture combines utility with art and beauty," said Dr. Soldati.

"As sheer art the ancient architects have not been surpassed but modern American architecture goes beyond art to other equally great qualities."

ALONG THE LINE

George C. Foss, electrical contractor, has been elected president of the Sacramento Exchange Club.

Perley S. Woodard, 75, Sacramento building contractor, died in that city Dec. 30, following an illness of several weeks. He was a native of New York.

Ralph Ray, 51, excavating contractor of Oakland, died in that city Dec. 29 following a brief illness. Ray was a native of Oregon. He is survived by his widow, two daughters, three sons and a sister.

Yuba Associated Engineers of San Francisco, has been incorporated. Directors are N. Cleveland, Berkeley; W. C. Hammon, San Francisco; W. B. McCauley and G. E. Oliver, Oakland, and E. T. Cook, San Rafael.

Thomas J. Sullivan, 70, for 25 years a building contractor in Sonoma county, died in Santa Rosa, Dec. 30, as the result of injuries sustained in an automobile accident. His widow, four sons, three brothers and a sister survive.

W. B. Taylor, as assistant in the county engineer's office of Butte County, has resigned to accept a position as engineer with the Thermaito Irrigation District. He will be succeeded in the county office by Claude B. Boynton of Oroville.

Timothy A. Reardon, for seventeen years a member of the Board of Public Works, has been re-elected president of that body. Other members are Col. Chas. E. Stanton and Fred W. Meyer, who will resign to become chief of the State Bureau of Purchases and Supplies.

Robert L. Jones, chief of flood control and reclamation of the State Department of Public Works, has been elected president of the Board of Directors of the Sacramento Municipal Utility District. Ben Leonard was elected vice-president and Raymond C. Oakley, retained as secretary.

Frank B. Rae, for the past seven years city electrical engineer for Berkeley, has submitted his resignation to City Manager H. R. Thompson.

The resignation is effective January 15. The work of the electrical engineer's department will probably be assumed by the office of Harry Goodridge, Berkeley city engineer.

San Jose city council is conferring with H. J. Brunner, consulting structural engineer of San Francisco, on the advisability of requiring certain type of fire prevention apparatus in fireproof structures. Petitions have been submitted to the council seeking to eliminate a provision in the building laws requiring the installation of automatic sprinkler systems in the basements of fireproof structures.

Substantial progress is reported in the work to develop a standard molding book which may be used by all lumber producing regions of the United States. It has been decided to employ a 7000 series, the sizes of which are being reworked to conform to American lumber standards sizes. Final approval is being sought, which, if obtained, will result in publication of the book in early 1931.

TRADE NOTES

Federal Mail Chute Corp., Ltd., has been incorporated in San Francisco. Directors are A. L. Peacock, L. R. Steinberg and A. B. Copeland.

Safety Switchboard Manufacturing Co., has been incorporated in San Francisco. Directors are J. C. Landon, W. A. Dole and M. F. Curren.

Lowrie Paving Co. of San Francisco, organized in 1929, has been incorporated. Directors are M. W. Lowrie, Myrtle Lowrie and J. E. Lowrie.

American Tractor Equipment Co. of Oakland, Calif., announces the appointment of J. B. Livingston as Eastern sales manager. Livingston will have his headquarters at the Peoria, Ill., plant of the company.

Industrial Building and Loan Association, capitalized for \$200,000 has filed articles of incorporation in Oakland. Directors are: W. H. Hendricks, A. J. DeLaune, Purcell Rowe, A. M. Gilbert, Edgar H. Rowe, Jr., all of San Francisco.

A. G. Whittemore of the Frigidair Sales and Service with headquarters at 1412 Macdonald Ave., Richmond, has been admitted to membership in the Builders' Exchange of Contra Costa County. It is announced by W. A. Brown, executive secretary.

Minneapolis-Honeywell Regulator Distributors have established a direct factory branch at 557 Market St., San Francisco, where they will carry a warehouse stock of heat control apparatus for distribution throughout California. Headquarters and the main factory is located at Minneapolis with a branch factory at Wabash, Indiana. A. F. Erickson is San Francisco branch manager.

Lincoln Electric Co. of Cleveland, Ohio, has placed S. H. Taylor Jr., in charge of the Pacific Coast territory, with headquarters in Los Angeles. He succeeds W. S. Stewart, recently appointed district manager of the Cleveland territory. Appointment of L. P. Henderson as manager of the San Francisco office is also announced, as well as the appointment of E. J. Pfister as district manager of Kansas City, Mo.

H. G. Sperry, Call Edge, San Francisco, has been appointed Pacific Coast representative for the Hitchcock Company, Inc., of Boston, Mass., manufacturers of "Covex," a new discovery in rubber chemistry, offering a self-vulcanizing rubber compound which comes in paste form for resurfacing belts, hoppers, agitators, classifiers and covering pipes, shafts, etc. The product is marketed in four colors—red, gray, green or black.

Appointment of R. E. Mittelstaedt, retiring adjutant general, as vice-president and general manager of the newly organized California Lumber Products Company, Ltd., is announced in Sacramento. The company, of which Baylies C. Clark, former Sacramento city engineer, is president, will manufacture carbon dioxide or "dry ice" and will have a plant on a 50-acre tract of land to be purchased between Roseville and Bon Air. Mittelstaedt served as adjutant general for eight years in the administrations of Governor Young and former Governor Richardson.

HERE—THERE EVERYWHERE

Annual banquet-meeting of the Portland, Ore., Builders' Exchange will be held next Wednesday evening in the Grand Ballroom of the Mulholland Hotel. George Corawell, publisher of "The Timberman", lumber magazine of Portland, will be the principal speaker. His topic will be "Conditions in Russia and Europe."

Mayor James M. Curley of Boston, Mass., recommends a five-day week for all city employees in his annual message to the city. He asks the council to study the plan for reduction in hours this year so that it might be put into effect in 1932.

Standard Gypsum Co. of Canada, Ltd., plans immediate construction of a \$100,000 plant on the Vancouver, B. C., waterfront, it is announced by P. R. McRitchie, managing director for the company.

For use with dry, stiff concrete when tamping is permitted or specified, the Ford finishing machine for concrete pavements, manufactured by the Flaw Knox Co., Pittsburgh, Pa., can now be furnished equipped with a tamper. The finisher, which runs on wheels bearing on the steel forms, can be obtained with either single or double screed, with or without tamper.

American Standards Association, 29 West 30th St., New York City, has approved a standard for track bolts and nuts based on a study of different types used by railroads and electric railways in the United States and Canada. Copies can be obtained from the headquarters of the association.

Officers to serve for the ensuing year will be elected at a dinner-meeting of the Washington State Chapter, American Institute of Architects, to be held at the Washington Athletic Club, Seattle, next Saturday evening. Officers nominated are: President, R. E. Borhek; first vice president, J. L. Holmes; second vice president, Earl N. Dugan; third vice president, Stanley A. Smith; fourth vice president, John W. Maloney; secretary, Lance E. Gowen; treasurer, Albert M. Allen; executive board, three-year term, G. W. Stoddard, and four delegates to the institute convention, Lance E. Gowen, Sherwood D. Ford and Nelson J. Morrison.

If the states will provide \$55,352,801 to match Federal appropriations, \$500,736,678 may be spent in the improvement of public highways during the current year, it is announced by Secretary Hyde of the Department of Agriculture. The Federal government has already appropriated \$168,568,446 for roadway construction which will be expended regardless of any additional aid from the States. There is a balance of \$67,000,000 left over for the year ending June 30, 1930. Should the States now make provisions to match what is available to them from the unexpended balance from 1930, it would add \$132,168,232 to the sums already authorized.

Walter L. Morgan has been elected president of the Spokane Section, American Society of Civil Engineers. J. H. Robb was elected first vice-president; V. H. Greisser, second vice-president, and B. J. Garnett, secretary-treasurer.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone SUtter 1684).

R-2444-S ENGINEERS and draftsmen, experienced in industrial and power plant work, particularly piping; also electrical draftsmen experienced in power and lighting installations. Salary \$225-\$250 per month. Apply by letter. Location, Southern California.

R-3451-S ENGINEER, experienced in the operation of kilns for burning limestone. Apply by letter. Location, Northwest.

R-3452-W-L-S PROFESSOR for school of industrial engineering at mid-western university, to teach various phases of printing. Must have had broad experience in printing and be acquainted with the printing industry. Position is likely to lead to development of research. Salary \$5000 a year. Apply by letter. Location, Midwestwest.

K-333-W-2971-C-S ASPHALT ENGINEER, graduate civil engineer, single, not over 32, with experience on hot mixed type sheet asphalt, asphaltum concrete, penetration preventing by the grouting method, asphalt emulsions, ability to decide proper percentages of various grades of stone, sand, cement and asphalt to secure a road of maximum density, etc. Must be familiar with asphalt literature. Salary \$2500-\$4000 a year. Apply only by letter. Location, Indiana.

R-2452-SENIOR PERSONNEL EXAMINER for Engineering and Trades Schools. Should be graduate civil or mechanical engineer with special training and experience to qualify for testing of applicants for technical positions. Age limits, 25-50 years. Salary \$250-\$300 month. Apply by letter for full details. Location, California.

K-355-W-2159-C-S MECHANICAL ENGINEER, experienced in the design and construction of coal tips, skips, rotary dumps, conveying and preparation machinery. Single man, preferred. 2 years contract. Salary about \$7000 a year and traveling expenses. Apply only by letter. Location, Russia. Headquarters, Chicago.

K-333-W-2971-C-S ASPHALT ENGINEER, graduate civil engineer, single, not over 32, with experience on hot mixed type sheet asphalt, asphaltum concrete, penetration preventing by the grouting method, asphalt emulsions, ability to decide proper percentages of various grades of stone, sand, cement and asphalt to secure a road of maximum density, etc. Must be familiar with asphalt literature. Salary \$3600-\$4000 a year. Apply only by letter. Location, Indiana.

K-324-W-2134-C-S DESIGNER, graduate, American, of structural steel and reinforced concrete on headframes for mine-shafts, conveyors, galleries, etc. American staff for Russian service. Two year contract. Salary \$6000 a year out of which living expenses must be paid. Allowance for travelling expenses. Apply only by letter. Location, Russia. Hdqtrs., New York.

ENGINEERS, with or without sales experience, who might be interested in life insurance selling, are invited to take one week preliminary training course conducted by aggressive San Francisco agency. No obligation incurred.

1930 BUILDING OPERATIONS LISTED

Final tabulation of building permits by John B. Logan, superintendent of the Bureau of Building Inspection of the San Francisco Department of Public Works, show 1714 permits granted for new buildings during the year 1930 costing \$19,581,721, and 4827 permits for alterations, repairs and additions costing \$2,145,272. Following is a segregated report of the 1930 activities as compiled from official records:

	No. of P'mits	Est. Cost
Class A	12	\$ 2,562,882
Class B	23	1,684,974
Class C	159	2,874,254
Frame Bldgs.	1494	7,192,298
Alterations	4827	3,145,273
Public Bldgs.	15	2,283,658
Harbor Bldgs.	3	1,345,000
State Bldgs.	1	260,000
U. S. Govt. Bldgs.	7	1,378,679
Total	6541	\$22,726,994

ASPHALT ROOFING GROUP IS ACCUSED

The Asphalt Shingle and Roofing Institute, with numerous affiliated companies and individuals, is charged by the government in federal court with violation of anti-trust laws, according to word from New York.

The department of justice in a bill jointly charged that companies and individuals affiliated with the institute had entered into agreements to fix uniform and non-competitive prices for the sale of non-patented asphalt and shingle roofing products.

J. S. Bryant, manager of the institute, denied the government's accusation and declared the principle in all the institute's agreements always had been that each manufacturer shall be free to fix his own prices or change them at any time.

A. I. A. FAVORS CAPE SABLE PARK

The American Institute of Architects, it is announced, favors the proposed Everglades National Park in Cape Sable region of Florida. A bill to establish the Park is now pending in Congress.

The Board of Directors of the Institute has adopted a resolution presented by Franklin O. Adams of Tampa, regional director of the South Atlantic Division, declaring that the Park "would preserve intact, for the education and enjoyment of future generations, one of the most beautiful of the nation's few untouched areas."

The architects warn that this region, now abundantly supplied with almost limitless varieties of sub-tropical animal and plant life, is in grave danger of being despoiled.

"If such uncontrolled encroachment is allowed, many interesting and valuable species will become extinct and great natural beauty destroyed," the resolution asserts. The American Institute of Architects endorses the movement to create and establish the Everglades of Florida as a National Park and urges Congress to consummate, as expeditiously as possible, the dedication of this region as a National Park to the educational and national betterment of the people of the United States.

James K. James, new county surveyor of San Mateo County, has taken up his official duties succeeding George A. Kneese, whom he defeated at the last general election.

KELHAM HEADS INDUSTRIAL BODY

George W. Kelham, architect, was elected president of the Industrial Association of San Francisco at the organization meeting of that body held yesterday.

J. E. Cushing, vice-president and general manager of the American Hawaiian Steamship Company, was elected vice-president. Chas. R. Page, vice-president of the Fireman's Fund Insurance Company was elected secretary and J. W. Maillard, Jr., of the firm of Maillard and Schmidell, was elected treasurer.

BOND LIABILITY IS NOT AFFECTED BY CHANGE IN PROCEDURE

An amendment to the state law regulating the filing of claims of persons employed by contractors on public works merely changed the procedure and did not affect the liability of the bond, it was ruled by the Court of Appeals, Division One, in a decision handed down on appeals by the Simons Brick Company and R. G. Blessing from the judgment of the superior court in actions against the Eagle Indemnity Company, says Southwest Builder and Contractor. The appeals were taken together and presented on the same record.

The suits arose out of the construction of two public schools in the Los Angeles city school district, in connection with which bonds were furnished, with the indemnity company as the executor. The Simons company furnished bricks for the two schools and Blessing, as a subcontractor, constructed a tile roof on one of the structures. The brick concern charged that \$2392.33 is still owing and Blessing declared \$375 is due.

Shortly after the suits had been executed, the act to obtain payment of claims was amended, the amendment becoming effective July 23, 1925. The act, prior to the amendment, required that before an action could be commenced on the bond, the claimant must file with the official body by whom the contract had been awarded a verified statement of his claim showing that the sum due had not been paid.

The amendment provided that the filing of such claim should no longer be a condition precedent to the commencing of an action on the bond. It was stated that in the case before the court neither of the appellants had filed a statement of its or his respective claim with the school district.

"It is conceded," the court observed, "that if the amendment did apply to the claims upon which the actions were prosecuted, the appellants are entitled to judgments for the respective amounts."

The appellants contended that the amendment merely changed the procedure and the court ruled that their contention must be upheld. The court reversed the lower court's judgment and ordered that court to enter judgments for the brick company and Blessing, with attorney's fees.

NO HELP WANTED

According to word from London, a new mechanical street sweeper does the work of hundreds of men in one-tenth of the time. It carries 84 containers on a truck body and the dirt swept from the street is automatically deposited in the curb. When these are filled, the truck drives off and other containers are placed on the machine for filling.

IRRIGATION DISTRICT LEGISLATION PREPARED BY STATE ASSOCIATION

Four proposals dealing with irrigation district legislation were prepared to be submitted at the next session of the state legislature by the executive committee of the Irrigation Districts' Association of California at a two-day meeting, which concluded in Merced last Monday.

The first proposal deals with partial redemption of defaulted lands. In cases where land has been deeded to the state, the proposed amendment would provide that a person could redeem part of the land by paying defaulted taxes on that part only.

An alternative of issuing either sinking fund or serial bonds would be offered irrigation districts in another proposal.

The committee would extend the period of bonds from forty to fifty years.

The final proposal would provide for refinancing of irrigation districts by the state on 3 1/2 per cent loans.

HIGHER WAGES, SHORTER HOURS, A. F. OF L. PLAN

Four principles described as fundamental for restoration of prosperity have been set forth by President Wm. Green of the American Federation of Labor.

They are:

- 1—High wages to give purchasing power to consumers.
- 2—Shorter hours, to give employment to as many as possible.
- 3—Organization of wage earners to keep their incomes advancing with increased productivity.
- 4—Development of co-ordinated control of industries.

Green listed a number of signs which he said were encouraging in the light of present depressed economic conditions. They included:

Indications that the bottom has been reached in the deflation of prices.

Reports from 24 cities showing increases in unemployment were less than in November.

Evidences of returning confidence in the production policies of large companies.

ELECTRICAL PRODUCTS SHOWS PROFITS GAIN

Electrical Products Corporation of California and Electrical Products Corporation of Oregon, operating units of Claude Neon Electrical Corporation, Ltd., of Delaware, on Dec. 29 reported net profits for November after all charges, at \$55,656, compared with \$49,559 for the same month last year.

For seven months ended November 30, net profit, after charges, was \$571,393, against \$490,847 for the corresponding period in 1929.

Profits of the operating subsidiaries, which accrue to the holding company, do not include figures for the Mexican company or miscellaneous income from royalties or other sources, which are now approximately \$20,000 monthly, according to President Paul D. Howse.

Union Building and Loan Association has opened headquarters at 1175 Market St. Officers and directors of the association are George L. Leonard, president; Joseph A. Leonard, vice-president and secretary; John L. McNab, director and general counsel; Joseph G. Morrow, director; M. J. Conboy, director; John S. Sanford, controller, and C. A. Meyers, assistant secretary.

AUTOMATIC SPRINKLER REVISION IS DESIRED

Revision of the city building code insofar as fire protection devices are concerned looms as the result of recent complaints by San Jose property owners that certain of the devices required by the code are not necessary.

Officers of the San Jose Community Hotel Corporation, owners of Hotel de Anza, Santa Clara Street and Notre Dame Ave., protested to the San Jose city council against the requirement of an automatic sprinkler system in Class A building basements where there are inconsequential fire hazards in the basement.

It was pointed out that no hazardous use of the basement of the new hotel is contemplated, the building is of fireproof construction and yet the ordinance requires an automatic sprinkler system.

A similar complaint was made two weeks ago by Warren Holmes of the San Jose Hardware Company, Holmes pointing out that the basement of the new hardware company building is ruled only for the storage of non-inflammable goods, principally hardware.

The council considered the matter informally and agreed to secure the opinion of competent fire underwriter-engineers and building experts before taking any action on the present code.

A. G. C. AIMS TO FURTHER PRIVATE BUILDING PROJECTS

Credit stabilization, prequalification of contractors, establishment of standard bidding and awarding practices, curtailment of day labor on public projects and last, but not least, ways and means to increase the volume of private building construction, are matters of importance scheduled for discussion at the annual convention of the Associated General Contractors of America to be held in San Francisco January 26 to 30, it is announced by Earle G. Lloyd, secretary of the Northern California chapter of the organization.

Headquarters will be maintained at the St. Francis Hotel where all business sessions will be held.

The depressed condition of the construction industry itself will be a topic of much discussion. With residential building of all types pointing the way there has been a marked recession in work for private owners in all of the building sectors. The construction during the past year while public construction in both the building and engineering fields has somewhat more than held up in volume.

Is it feasible or practical for organized contractors to influence or promote an increase in volume of private construction?—is a vital question to come before the convention.

"Much of the decreased volume in private building construction," Secretary Lloyd says, "is in the field of speculative building in which organized contractors are not primarily interested. Organized contractors do not desire to see a resumption of the speculative building fever that was so prominent during the past decade. They do, however, want to see private construction go ahead. Therefore, plans for procedure which will stimulate sound construction and sound investment and which will not let down the bars to wild cat speculative operations will necessarily be to the fore at this convention."

 coln Blvd., Burlingame.

BONDS

SAN MATEO, San Mateo Co., Cal.
 Trustees of the San Mateo Union
 High School District have called a
 meeting of citizens of the district for
 tomorrow night to consider the ad-
 visability of calling an election to vote
 bonds to finance additional school im-
 provements. A tentative program, pre-
 pared by Homer Martin, superintend-
 ent, contemplates the following con-
 struction:

BURLINGAME HIGH SCHOOL	
Land	\$17,500
Cement floor and new interior in girls' lock- er roof, and other re- pairs	27,500
Library, cafeteria and music rooms	76,000
Equipment for new buildings	25,000 \$146,000
SAN MATEO HIGH SCHOOL	
Auditorium	\$37,000
Furniture and equip- ment for auditorium 20,500	
New boiler unit for au- ditorium	3,000
Completion of gym	3,000
Athletic field & bleach- ers	16,000
Tennis courts and en- closures	10,000
Imp. of grounds	4,000 \$145,000
Total	\$300,000

PORTERVILLE, Tulare Co., Cal.—A \$30,000 bond issue for the construction of a new fire station in Porterville will probably be included on the ballot at the municipal election next April.

VISALIA, Tulare Co., Calif.—Until February 2, bids will be received by county supervisors for purchase of \$7,000 bond issue of Linwood School District. Proceeds of the sale to finance school improvements.

FRESNO, Fresno Co., Cal.—County supervisors sell \$250,000 county hospital bond issue for premium of \$14,000. Proceeds of the sale will finance erection of additional units at the county hospital, plans for which are being prepared by Architects Swartz and Ryland, Brix Bldg., Fresno.

CHURCHES

Contract Awarded.

CHURCH Cost, \$150,000
LOS ANGELES, Cal. Thirty-fourth St. near University Avenue.

Four-story and basement reinforced concrete Class A church (85x130 feet).

Owner—University Methodist Church. Architect—C. Raymond Johnson, University of Southern California, Los Angeles.

Contractor—Wm. Simpson Constr. Co., Architects Bldg., Los Angeles. Construction will start immediately.

Preparing Preliminary Plans.

CHURCH Cost approx. \$100,000
SANTA BARBARA, Santa Barbara Co., Cal.

One-story reinf. concrete church.

Owner—First Church of Christ Scientist. Architect—Henry H. Gutterston, 526 Powell St., San Francisco.

Completing Plans.

CHURCH Cost, \$—
LONG BEACH, Los Angeles Co., Cal. 1080 Myrtle St.

One-story and basement frame and stucco church (30x74 ft.; to seat 400).

Owner—Methodist Episcopal Church. Architect—Clarence E. Aldrich, Pacific Southwest Bank Bldg., Los Angeles.

Low Bidders.

CHURCH Cost, \$50,800
LOS ANGELES, Cal. Jefferson and Third Avenues.

One-story and basement frame and stucco church (85x124 feet) to seat 600 (Sunday school will seat 800).

Owner—St. Paul's Presbyterian Church. Architect—Scott Quintin, Medical Bldg., Alhambra.

Low Bidder—R. S. Martin, 522 E. Broadway, San Francisco.

Low bidders on other portions of work as follows:

Electric Wiring—English Elec. Co., Los Angeles, at \$2383.

Plumbing—J. L. Kroger, Los Angeles, at \$4190.

Heating—Pacific Gas Radiator Co., at \$3554.

LOS ANGELES, Cal.—Trinity Missionary Church, Rev. E. W. Petticoat, pastor, 4937 Marathon St., contemplating erecting a new edifice at the corner of Lemon Grove Ave. and Hobart Blvd. The project will not mature for at least six months. Architect not selected.

Bids Opened—Held Under Adjudication.

CHURCH Cost, \$40,000
SAN MATEO, San Mateo Co., Cal. San Mateo Drive.

One-story frame and stucco church

with tile roof (auditorium to seat 250).

Owner—First Congregational Church. Architect—Kent & Hass, 525 Market St., San Francisco.

Bids have been turned over to the committee for consideration.

Plans Being Completed.

CHURCH Cost, \$19,000
SAN FRANCISCO, Thirty-second Ave. and Ulloa St.

One- and two-story frame and stucco church with slate roof (to seat 400).

Owner—St. Stephens Protestant Episcopal Church. Architect—Charles Stothoff, 2274 15th St., San Francisco.

Bids will be taken in about two weeks.

PORTERVILLE, Tulare Co., Cal.—Trustees of the Methodist Episcopal Church have voted to purchase a pipe organ to be installed in edifice which will undergo extensive alterations at once.

Plans Being Figured.

SUNDAY SCHOOL BLDG. Cost, \$—
PASADENA, Los Angeles Co., Calif. Main St. near Lake Ave.

Three-story and basement reinforced concrete and steel Sunday school bldg. (142x19-ft.; 42 classrooms).

Owner—Lake Avenue Congregational Church. Architect—Marston & Maybary, 25 S Euclid Ave., Pasadena.

FACTORIES AND WAREHOUSES

Plans Being Figured—Bids Close Jan. 19, 1931.

SERVICE BLDG. Cost, \$45,000
REDWOOD CITY, San Mateo Co., Cal. Group of service buildings (wood frame and tile walls).

Owner—Pacific Gas and Electric Co., 245 Market St., San Francisco. Plans by Eng. Dept. of Owner.

Group includes warehouse, garage, service departments, superintendent's offices, etc.

SAN FRANCISCO.—Plant of Pacific Felt Co., 700-798 York St., suffers \$50,000 fire loss, including stored contents, American Woodworking Co., adjoining suffered slight damage.

Sub Contract Awarded.

ADDITION Cost, \$12,000
BERKELEY, Alameda Co., Cal. 2029 Channing Way.

One-story and basement concrete and brick addition to bakery (structure of steel, steel sash, etc.).

Owner—Langendorf United Bakeries, Inc., 2029 Channing Way, Berkeley.

Engineer—Ellison & Russell, Pacific Bldg., San Francisco.

Contractor—Barrett & Hilp, 918 Harrison St., San Francisco.

Structural Steel—Industrial Steel Products Co., 59th & Doyle Sts., Oakland.

Excavation—Ariss Knapp Co., 961 41st St., Oakland.

Lumber—Sunset Lumber Co., 400 High St., Oakland.

Brick Work—Victor DeWight, 1828 Milvia St., Oakland.

AVON, Contra Costa Co., Cal.—C. C. Moore Co., Sheldon Bldg., San Francisco, awarded contract by Associated Oil Co., Associated Oil Bldg., San Francisco, to erect boiler plant and to the Western Pipe and Steel Co., 441 Market St., San Francisco, for the tanks in connection with the \$2,000,000 refining plant at Avon. 20751—Representation, Guayaquil, Ecuador. Party representing several local exporters in Ecuador wishes to take on additional lines. First-class references available.

20752—Information Re Argentine, Buenos Aires, Argentina. Trade lists, statistical data, customs rulings, duties or any information on Argentine will be sent to interested parties.

20755—Foreign Investigation, San Francisco, Calif. is desirous of contacting firms interested in industrial and trade investigation in Spanish America, on food, lumber or machinery. 31

The General Electric Company announces a new pendant type push button for controlling small floor operated cranes. This is designed to supersede the present rope and chain types of control, with the advantages of greater safety to the operator, a saving in time (only one man being necessary to operate the crane) and less aisle space required on the factory floor. The push button station is 20 1/2 inches long, 2 1/2 inches wide and 2 9/16 inches deep less the projection of the buttons. It is of the proper size to be readily grasped and operated by one hand. The box is cast aluminum, thus being both light in weight and strong.

Engineering News Section

BRIDGES

LOS ANGELES COUNTY, Cal.—Until Jan. 28, 2 P. M., bids will be received by State Highway Commission for the following bridge work in Los Angeles County:

Bridge over Topanga Creek, about 4 miles north of Santa Monica, to be widened by constructing eight 27-foot timber spans on pile bents adjoining the existing concrete bridge and grading and surfacing approaches with asphalt concrete.

Bridge over Las Flores Creek about 7 miles north of Santa Monica to be widened by constructing two 26-foot reinforced concrete girder spans on a concrete pier and concrete abutments and grading and surfacing approaches with asphalt concrete.

WILLOWS, Glenn Co., Calif.—Construction will be started at once by G. A. Bondurant, county supervisor, on the construction of two bridges at Stanton and Loomis near of Norman; est. cost, \$1500 and \$1800 each.

STOCKTON, San Joaquin Co., Cal.—County Surveyor Julius B. Manthey will prepare plans for proposed Garwood Ferry Bridge over the San Joaquin river, for which the county will appropriate \$70,000. The sum of \$20,000 has been set aside to build the approaches and negotiations for rights of way are being completed. The new span will be located about 1000 feet north of the present bridge.

LOS ANGELES COUNTY, Cal.—As previously reported, bids will be received by State Highway Commission for widening bridge across Topanga Creek, about 4 miles north of Santa Monica by constructing eight 27-ft. timber spans on pile bents adjoining the existing concrete bridge and grading and surfacing approaches with asphalt concrete; also for widening bridge across Las Flores Creek, about 7 miles north of Santa Monica by constructing two 26-ft. reinforced concrete girder spans on a concrete pier and concrete abutments and grading and surfacing approaches with asphalt concrete. Project involves:

- (1) 375 cu. yds. channel excavation;
- (2) 900 cu. yds. rdwy. excav. without class;
- (3) 990 cu. yds. struc. excavation;
- (4) 1260 lin. ft. furnishing creosoted Douglas fir piles;
- (5) 42 each. drive creosoted Douglas fir piles;
- (6) 125 cu. yds. existing concrete to be removed;
- (7) 470 cu. yds. class A Portland cement concrete;
- (8) 625 cu. yds. class E do;
- (9) 54,500 lbs. reinf. steel;
- (10) 9 M. ft. B.M. redwood timber, dense select all-heart struc. grade;
- (11) 77 M. ft. B.M. untreated Douglas fir timber, struc. grade;
- (12) 12.5 M. ft. B.M. creosoted Douglas fir timber, struc. grade;
- (13) 1380 tons asphalt concrete;
- (14) 1 lot misc. items of work.

OAKLAND, Cal.—Hearing upon the application of the Alameda County Supervisors to construct a bridge over the tidal canal at the north end of Park Street, Alameda, will be held in the chambers of the Board of Supervisors, Courthouse, Oakland, January 29. It is announced by Major E. H.

Ropes, U. S. district engineer. Plans submitted provide for a double lift bascule bridge, having a clear channel width of 250-ft. when opened and vertical clearances of 12.7 feet and 15.4 feet above mean high water at pier and middle, respectively, when closed. The plans were prepared by Geo. A. Possey, Alameda county surveyor.

SANTA BARBARA, Calif.—County Surveyor Owen H. O'Neill preparing plans for steel bridge over San Roque Creek; 560-ft. long, 22-ft. wide; est. cost \$50,000.

OAKLAND, Cal.—Until January 15, (tentative date), bids will be received by Southern Pacific R. R., 65 Market St., San Francisco, to construct 7th St. Subway; total estimated cost \$205,000 of which city of Oakland will pay one-half.

Subway will have a grade of 4% in east approach and 5% in west. Complete length will be 755-ft. Level portion of subway will be 167-ft. long; roadway 22-ft. wide with 6-ft. pedestrian walks on north side. Ventilating system similar to one now in use in the George A. Possey Tube of Alameda County will be installed.

Plans obtainable from Engineering Department, Southern Pacific Company, 65 Market St., San Francisco. W. H. Kirkbridge, chief engineer of maintenance of way and structures.

SANTA CRUZ, Santa Cruz Co., Cal.—Frank Bryant, 2911 23rd St., San Francisco, at \$28,804.72 submitted low bid to the county supervisors to construct a timber bridge with reinforced concrete floor over the Southern Pacific Tracks near Felton Station, Zayante Creek and Zayante Road in San Lorenzo Road District.

C. S. Gildersleeve, 1508 G St., at \$33,389 submitted low bid for steel bridge with reinforced concrete floor. Following is a complete list of the bids received, the two lowest being taken under advisement until January 21:

- (a) timber construction; (b) steel bridge.

Frank Bryant, San Francisco, (a) \$28,804; (b) \$34,732.

M. B. McGowan, San Francisco, (a) \$29,185; (b) \$34,982.

C. S. Gildersleeve (a) \$29,538; (b) \$33,389.

Lord and Eishop, Oroville, (a) \$30,249; (b) \$36,104.

Leo Cardwell Const. Co., (a) \$31,383; (b) \$36,662.

F. M. Bodenhammer (a) \$31,537; (b) \$37,588.

T. S. Walsh (a) \$32,036; (b) \$37,349.

A. W. Kitchen, San Francisco (a) \$35,761; (b) \$37,290.

Pacific Const. Co., San Francisco, (a) \$35,761; (b) \$37,290.

Healy-Tibbitts Const. Co., San Francisco, (a) \$35,920; (b) \$39,618.

B. C. Gerwick, San Francisco, (a) \$36,350; (b) \$38,712.

VISALIA, Tulare Co., Cal.—County Surveyor T. Wayne Switzer instructed by supervisors to make survey of culverts on permanent highways with a view to increasing their widths.

NAPA, Napa Co., Cal.—City Engineer H. A. Harrold is completing specifications for proposed Brown Street bridge and bids will be asked in the immediate future. Details of construction will be published shortly.

DREDGING, HARBOR WORKS & EXCAVATIONS

RICHMOND, Contra Costa Co., Cal.—Until February 5, 3 P. M., bids will be received by U. S. Engineer office, Custom House, San Francisco, for dredging in Richmond Harbor. Project involves 523,500 cu. yds. Specifications obtainable from above.

SAN DIEGO, Cal.—Western Dredging Co., 611 Security Title Insurance Bldg., Los Angeles, submitted low bid of 36c per cubic yard to the U. S. Engineer at Los Angeles for dredging approx. \$25,000 cu. yds. of material from an area of about 185 acres in the NE portion of San Diego Harbor. The area lies westerly of the western waterfront of the city of San Diego, extending from Municipal Pier No. 1 to Spreckels Wharf. Other bids were Standard Dredging Co., 37.9c; San Francisco Bridge Co., 39c; Morris and Cummings Dredging Co., New York City, 68c. The engineer's estimate was \$329,290.

FORT BRAGG, Mendocino Co., Cal.

As previously reported, bids will be received January 16, 3 P. M., by U. S. Engineer Office, Customhouse, San Francisco, to remove old jetty, construct new jetties and dredging in the Noyo river, approximately 1 1/2 miles from Fort Bragg. Project involves:

- (1) 8,000 tons of rock (remove from old jetty);
- (2) 750 cu. yds. concrete (remove from old jetty);
- (3) 240 feet sheet pile bulkhead (new jetties);
- (4) 25,000 tons to be furnished and placed;
- (5) 110,000 cu. yds. dredging of sand, gravel, boulders and clabs;
- (6) 1,820 cu. yds. rock to be removed from river.

Specifications obtainable from U. S. Engineer Office, Custom House, San Francisco.

EUREKA, Humboldt Co., Calif.

Until January 23, 3 P. M., bids will be received by U. S. Engineer Office, Customhouse, San Francisco, for dredging in Humboldt Bay. Project involves 491,700 cubic yards. Specifications obtainable from above office.

SACRAMENTO, Sacramento Co., Cal.—Olympian Dredging Co., 249 1st St., San Francisco, at \$112 cu. yd. submitted low bid to U. S. Engineer Office, Sacramento, to dredge channel, 9 feet deep and approximately 100 feet wide through the shoal in Middle River, near Mildred Island. Project involves 5,000 cu. yds.

HONOLULU, T. H.—U. S. Engineer Office, Honolulu, rejects lone bid of Hawaiian Dredging Co., Ltd., 534 Kashiwamun St., Honolulu, at \$56,500 for repairing high water at Nawiliwili Harbor, Hawaii. Bid received Dec. 4.

SAN RAFAEL, Marin Co., Calif.—Franks Construction Co., 260 California St., San Francisco, at 31c cu. yd. submitted low bid to U. S. Engineer Office, Customhouse, for dredging in San Rafael Creek, involving 42,115 cu. yds. Other bids were Pacific Coast Dredging Co., 32 1/2c cu. yd. and Dutton Dredging Co., 34c cu. yd. Taken under advisement.

PETALUMA, Sonoma Co., Calif.—American Dredging Co., 255 California St., San Francisco, at \$46 cu. yd. submitted low bid to U. S. Engineer Office, San Francisco, for dredging in Petaluma Creek, involving 73,475 cu. yds. Benjamin Walters, 355 Howard St., San Francisco, only other bidder at \$56 cu. yd. 1

SUISUN, Solano Co., Cal.—Hydraulic Dredging Co., Central Bank Bldg., Oakland, at \$1399 cu. yd. submitted low bid to U. S. Engineer Office, Customhouse, San Francisco, for dredging in Suisun Bay, involving 521,249 cu. yds. San Francisco Bridge Co., only other bidder at \$1425 cu. yd. Taken under advisement. 1

IRRIGATION PROJECTS

RICHVALE, Butte Co., Cal.—Election will be held January 21 in Richvale Irrigation District to vote bonds of \$500,000 to finance purchase of a portion of the Sutter-Butte Canal Company's system and a portion of that firm's rights in the Feather River.

TURLOCK, Stanislaus Co., Cal.—H. Johanson, Turlock, at \$2,731.87 awarded contract by Turlock Irrigation District, under Schedule No. 6 and at \$11,876.99 under Schedule No. 7 for 2-inch concrete canal lining.

Lloyd Terrill, Turlock, at \$4,552.94 awarded contract for similar work under Schedule No. 8.

Bids under Schedules 1 to 5 inclusive, were rejected, and new bids will be considered January 26. P. M. Sorenson, secretary of district, at Turlock.

TURLOCK, Stanislaus Co., Calif.—Until January 26, 2 P. M., bids will be received by Anna Sorenson, secretary, Turlock Irrigation District, for construction in Improvement Districts Nos. 55, 34, 33, 10, 63, 66, 34-35 Joint Spillway and Chatham Spillway. The work is divided into eight schedules, and amounts in total to about 632,671 sq. ft. of 2-inch thick concrete canal lining and 473 cu. yds. of concrete in canal structures and about 600 lin. ft. of 30-in. and 36-in. diameter concrete pipe. Certified check 5% payable to district required with bid. Plans obtainable from secretary.

STREET LIGHTING SYSTEMS

SAN FRANCISCO—Paul J. Ost, city electrical engineer, in a report to the supervisors declares that from \$18,000 to \$28,000 will be saved for the city treasury if all concrete standards are installed on the city's 19-mile boulevard system. It was first proposed to install 600 metal standards and 300 concrete standards. The cost of concrete poles and their installation throughout would be \$60,453, whereas 300 concrete and 600 taper tube poles would amount to \$70,059, and 300 concrete and 600 cast iron standards would be \$88,248.

SAN MATEO, San Mateo Co., Cal.—City council will start proceedings at once to widen E street from Baldwin to Ninth avenues including installation of an electrolier system; estimated cost \$75,000. Street will be widened from 46 feet to 52 feet.

MACHINERY AND EQUIPMENT

PHOENIX, Arizona—Until January 26, 2:00 P. M., bids will be received by Phoenix Indian School, Phoenix, to furnish one concrete mixer, similar and equal to TS Lakewood, manu-

factured by The Lakewood Engineering Company, Cleveland, Ohio, and equipped with 6 to 8 H.P. 2-cylinder gas engine, to be radiator cooled, power charging skip, water tank, automatic, self measuring; mixer to be mounted on steel frame with steel wheels; approximate capacity, dry material, 10 cubic feet; wet mixed concrete, 7 cubic feet. Bids wanted on basis of delivery; f.o.b. Phoenix and f.o.b. shipping point.

WASHINGTON, D. C.—See "Government Work and Supplies," this issue. Bids wanted by Bureau of Supplies and Accounts, Navy Department, to furnish and deliver miscellaneous machinery, equipment and supplies to various Pacific Coast Navy Yards.

SEATTLE, Wash.—Buckner-Weatherby Co., Inc., at \$50,217 submitted low bid to Board of Public Works to furnish one 2-trolley crane for installation at Diablo Plant of Skagit hydro-electric development for the city lighting department. Complete list of bids follows:

Buckner-Weatherby Co., Inc.	\$50,217
Harnischfeger Sales Corp.	\$52,175
Cyclops Iron Works	\$56,941
Judson Pacific Co.	\$4,500
Consolidated Steel Co.	\$4,600
Cleveland Crane & Eng. Co.	\$5,500
Whiting Corp.	\$7,345
H. R. L. Motor Co.	\$7,500
Morgan Eng. Co.	\$7,520

BAKERSFIELD, Kern Co., Cal.—Bids will be asked at once by Kern County Union High School District to furnish and deliver one auto truck chassis and body for transportation of pupils.

FIRE ALARM SYSTEMS

LOS ANGELES, Cal.—H. H. Walker, 1323 Venice Blvd., submitted low bid to the city purchasing agent at \$66,145, with time limit 90 days, for installing traffic signals at 23 intersections on Wilshire Blvd. under Specifications No. 2275. Other bids were: Newberry Elec. Co., \$68,837; Acme Traffic Signal Co., \$71,389.50; Eagle Signal Sales Corp., \$80,480; Underground Constr. Co., \$81,560; General Electric Co., \$143,200. All bids were net.

RESERVOIRS AND DAMS

GLENDALE, Los Angeles Co., Cal.—Mittry Bros. Construction Co., 723 Detwiler Bldg., Los Angeles, submitted the low bid to the city council at \$499,000 to construct two reservoirs. Will be built of rectangular shape, 22 ft. deep, with an area of 29,822 sq. ft. The reservoirs will be constructed adjoining, providing a total capacity of 35,000,000 gallons. They will be of the retaining wall type with reinforced concrete roof. The construction involves:

26,000 cu. yds. reinforced concrete;
160,000 cu. yds. excavation;
10,000 cu. yds. tamped embankment
22,000 cu. yds. earth placed on concrete roof.

Other bids were: Martter & Book, \$521,000; C. M. Elliott, \$522,600; Herbert M. Baruch Corp., \$529,587; Carpenter Bros., Inc., \$539,390; Weymouth Crowell, \$543,000; Monroe & Westcott, \$547,000; Western Constr. Co., \$549,215; General Engr. Co., Ltd., \$559,000; H. W. Roth Co., \$550,000; Chas. T. Heuser, \$551,700; Clinton Constr. Co., \$565,000; Gist & Bell, \$572,000. The bids were taken under advisement.

HEALDSBURG, Sonoma Co., Cal.—Until January 26, bids will be received by city council to raise height of side-walls of city reservoir at Fitch Mountain to increase storage capacity. Plans on file in office of city clerk

OWYHEE DAM, Ore.—American Locomotive Co., Schenectady, N. Y., submitted the low bid to the U. S. Bureau of Reclamation, Denver, at \$18,813 for furnishing three 4-in. internal differential needle valves for the Owyhee Dam, Oregon, under Specifications No. 516. The other bids were:

Joshua Hendy Iron Works, San Francisco,	\$19,500.
Consolidated Steel Corp., Los Angeles,	\$19,572.
Sweeney-Schmidt Mfg. Co., York, Pa.,	\$19,570.

Hardie-Tynes Mfg. Co., Birmingham, Ala.,	\$20,565.
Johnson City Foundry & Machine Co., Johnson City, Tenn.,	\$23,700.

Michigan Valve & Foundry Co., Detroit, Mich.,	\$23,970.
Ogden Iron Works, Ogden, Utah,	\$28,250.

The Aldrich Pump Co., Allentown, Pa.,	\$24,900.
Foots Bros. Gear & Mach. Co., Chicago, Ill.,	\$26,700.

Rosedale Foundry & Mach. Co., Pittsburgh, Pa.,	\$23,145.
Baash-Ross Tool Co., Los Angeles, Calif.,	\$24,834.

Lake Erie Engr. Corp., Buffalo, N. Y.,	\$24,484.
Treadwell Eng. Co., Easton, Pa.,	\$26,769.

H. R. L. Motor Co., Seattle, Wash.,	\$23,400.
Rock Island Arsenal, Rock Island, Ill.,	\$31,950.

PIPE LINES, WELLS, ETC.

COALINGA, Fresno Co., Cal.—The Associated Oil Co. has announced that the Coalinga-Monterey Bay pipe line, built 25 years ago, will be rebuilt to make it suitable for the transportation of light crude oil and casinghead gasoline.

KETTLEMANN HILLS, Kings Co., Cal.—Southern California Gas Corp., a subsidiary of the Pacific Lighting Corp. and the Southern California Edison Co., Ltd., will start construction of a 30-inch, 200-mile pipe line from the Kettleman Hills District to Los Angeles at a cost of between \$8,000,000 and \$10,000,000.

NEVADA CITY, Nevada Co., Cal.—Natural Gas Corp. of California, seeks franchise from county supervisors to install gas pipe lines in roads and highways of the county to furnish natural gas for the Nevada county district. The application will be acted upon February 4.

MARTINEZ, Contra Costa Co., Cal.—Wallace E. Blund at \$900 for 20 ft. depth awarded contract by county supervisors to drill well at Brentwood for Contra Costa County Water Works District No. 1. For depth of 300 ft. Blund bid \$1,426.

PALO ALTO, Santa Clara Co., Cal.—Until January 12, 4 P. M., bids will be received by E. L. Beach, city clerk, to construct gravel envelope well in Ewerden Park, East. Cost, \$5,000. Specifications obtainable from J. F. Byxbee, city engineer.

OAKLAND, Cal.—Until January 12, 4:30 P. M., bids will be received by G. B. Hazard, secretary, City Port Commission, Oakland Bank Bldg., to furnish and deliver fifteen 45-foot lengths of 20-in. welded steel dredge pipe. Specifications obtainable from above.

SEWERS AND SEWAGE DISPOSAL PLANTS

SAN JOSE, Santa Clara Co., Cal.—City council declares intention (5275) to improve portions of 15th St., be-

between Vestal Ave. and Rosa St., involving construction of 6-inch sanitary sewer; 1 c. i. flushing inlet; 5x8-in. wye branches; 1-in. vitrified sewer lateral connection. 1911 Act. Hearing January 12. John J. Lynch, city clerk. Wm. Lopp, city engineer.

LOS ANGELES, Cal.—Until 130 P. M., Jan. 14, bids will be received by County Sanitation District No. 2, 130 N Broadway, room 202, for the construction of two sludge digestion units, each consisting of four sludge digestion tanks, a pump and boiler house, a gas tank, and all appurtenant structures. Plans obtainable at the office of the chief engineer, A. R. Warren, 202 West 14th, 133 N Broadway, A. S. Soule, secretary. Cert. check or surety company bond, 10%.

HAYWARD, Alameda Co., Calif.—City Engineer Jesse B. Holly is making surveys for extension of sewer system into area lying SW of the Western Pacific Railroad and C St.

OAKLAND, Cal.—Until January 22, 21 noon, bids will be received by F. C. Merritt, city clerk, to construct storm sewers with appurtenances in 29th Ave. bet. East 12th St. and the U. S. Tidal Canal for which city has provided \$20,000 from the General Fund. Bids will be taken on two propositions, as follows:

Proposition A

- 100 lin. ft. 5x5-ft. monolithic concrete arch storm sewer (including concrete end wall);
- 110 lin. ft. 3-ft. x 3-in. by 3-ft. 6-in. monolithic concrete arch storm sewer;
- 37 lin. ft. 3-ft. 3-in. by 3-ft. 6-in. monolithic concrete arch storm sewer;
- 1210 lin. ft. 2 ft. 6 in. by 2 ft. 9 in. monolithic concrete arch storm sewer;

Proposition B

- 100 lin. ft. 60-in. reinf. conc. pipe storm sewer (including concrete end wall);
 - 210 lin. ft. 30-in. or 42-in. reinforced concrete pipe storm sewer;
 - 110 lin. ft. 30-in. or 42-in. extra strength reinf. conc. pipe storm sewer, with concrete saddle;
 - 1210 lin. ft. 30-in. reinforced concrete pipe storm sewer;
 - 29 in. ft. 1 ft. 6 in. by 4 ft. concrete box storm sewer with reinf. top;
 - 811 lin. ft. 24-in. plain concrete or vit. pipe conduit;
 - 109 lin. ft. 24-in. extra strength reinforced conc. pipe conduit with concrete saddle, or 24-in. vitrified pipe conduit with conc. jacket;
 - 28 lin. ft. 18-in. plain concrete or vitrified pipe conduit;
 - 300 lin. ft. 15-in. pipe conduit;
 - 69 lin. ft. 15-in. extra strength reinforced conc. pipe conduit, with concrete saddle, or 15-in. vitrified pipe conduit with conc. jacket;
 - 183 lin. ft. 12-in. plain concrete or vitrified pipe conduit;
 - 138 lin. ft. 10-in. do;
 - 8 manholes with standard tops on concrete shoulders of storm sewer;
 - 5 manholes with standard tops and brick base on pipe conduits;
 - 2 manholes with inlet tops (34-in. opening);
 - 1 concrete junction chamber, with handhole;
 - 4 storm water inlets (21-in. opening);
 - 5 storm water inlets (34-in. opening);
 - 3 storm water inlets (Type A).
- Certified check 10% payable to city required with bid. Plans on file in office of clerk, Walter N. Frickstad, city engineer.

LOS ANGELES, Calif.—Until 10 A. M., Jan. 21, bids will be received by the board of public works to con-

struct by-pass sewer at Hyperion sewage treatment plant to provide additional safeguard to machinery of plant. The proposed by-pass will be approximately 500 ft. in length, being constructed of 3 ft. and 6 ft. diameter pipe, approx. 30 ft. of the beach end to be constructed on piling, the other end to be in a reinforced concrete lined transition chamber. This by-pass will be used in connection with automatic control gates.

PALO ALTO, Santa Clara Co., Cal.—City Engineer J. P. Byrbee is making surveys for storm water sewer in Union Ave. from High St. to Middlefield Road. Estimated cost, \$5000.

WATER WORKS

OAKLAND, Cal.—Bunker Hill and Sullivan M. & C. Co., San Francisco, and American Smelting and Refining Co., San Francisco, at \$1500 submitted identical bids to the East Bay Municipal Utility District to furnish 50 tons of pig lead for distribution system. Both bids were subject to acceptance on January 8. Independent Smelting and Refining Co., Oakland, at \$5340 only other bidder.

OAKLAND, Cal.—Art Concrete Co., 24th and Adeline Sts., Oakland, at \$4.50 each submitted low bid to East Bay Municipal Utility District to furnish 4,000 concrete meter boxes with covers. W. H. Larson, Sacramento, at 6% only other bidder.

W. H. Larson, 2650 Curtis St., Sacramento, at 33c each submitted low bid to furnish 6000 concrete meter box covers. Art Concrete Co. only other bidder, at 40c each.

Taken under advisement.

OAKLAND, Calif.—Following bids taken under advisement by East Bay Municipal Utility District to furnish and deliver 50,000 ft. 20-in., 16-in., and 6-in. cast iron pipe for distributing system:

- (a) 1,000 ft. Class B, 20-in.;
 - (b) 9,000 ft. Class B, 16-in.;
 - (c) 40,000 ft. Class B, 6-in., or
 - (d) 40,000 ft. Class B, 6-in.
- C. G. Claussen and Co., Inc., Oakland, at \$3.17; (b) \$2.2625; (c) \$0.603, C. S. Pipe & Foundry Co., S. F., at \$2.39; (b) \$2.42; (d) \$0.57.

American C. I. Pipe Co., S. F., at \$3.42; (b) \$2.44; (c) \$0.59.

National C. I. Pipe Co., Los Angeles, (a) \$3.675; (b) \$2.625; (c) \$0.68; (d) \$0.603.

R. O. Wood & Co., Philadelphia, Pa. (a) \$3.71; (b) \$2.65; (c) \$0.706; (d) \$0.625.

Pacific States C. I. Pipe Co., (a) \$0.5825.

R. D. Wood & Co., Philadelphia, Pa. (a) \$3.339; (b) \$2.285.

SACRAMENTO, Sacramento Co., Cal.—Engineer Henry Dewell, 53 New Montgomery St., San Francisco, has been commissioned by the city council to make a study of conditions of the sedimentation basin at the Municipal Filtration Plant with a view to recommending improvements necessary to place the plant in condition.

OAKLAND, Cal.—Bunker Hill and Sullivan Mining and Contracting Co., Crocker Edg., San Francisco, at \$5,500 awarded contract by East Bay Municipal Utility District to furnish and deliver 50 tons of pig lead for use on distributing system.

OAKLAND, Calif.—Byron Jackson Pump Co., 6th and Carlton Streets, Berkeley, awarded contract by East Bay Municipal Utility District to furnish and install booster pump unit and equipment in El Cerrito Pumping Station.

PORTLAND, Ore.—Following bids taken under advisement by city purchasing agent to furnish 6-in. to 30-in. c. i. pipe for Municipal Water Department:

C. D. Wood & Co., total of \$102,785; alternate on sand spun cast iron pipe, \$33,779.79.

U. S. Pipe & Foundry Co., \$104,147; alternate on DeLaval centrifugal cast iron pipe, \$40,556.96.

National Cast Iron Pipe Co., \$104,911.50; alternate on DeLaval, \$19,963.78.

Pacific States Cast Iron Pipe Co., 4800 ft. 6-in. pipe, \$2,904.

American Supply System, omitting 20-in. pipe, \$73,062.50; Mono-cast cast iron pipe alternate, \$40,983.70.

FOSTER, Wash.—Until January 17, 8 P. M., bids will be received by S. N. Bennett, secretary, Water District No. 35, for water supply system involving (a) 6,000 ft. 6-in. main pipe line extending from Beacon Hill to Foster;

(b) distributing system, involving approximately 2½ miles of mains 2-in. to 6-in. diameter.

Certified check 5% payable to Treasurer, King County, Wash., required with bid. Plans obtainable from Miller Engineering Co., Burke Bldg., Seattle, on deposit of \$15, returnable if bid is submitted, otherwise only \$10 will be returnable.

PLACERVILLE, El Dorado Co., Cal.—Pelton Water Works Co., 2029 10th St., San Francisco, at \$3500 awarded contract by El Dorado Irrigation District, under Schedule A, to furnish one 30-inch c. i. thimble; one 30-inch butterfly valve, complete, with all appurtenances; two 5-inch air valves, complete, with connections and under Contract B, one needle valve, complete, with operating mechanism and special connections.

Western Pipe & Steel Co., 444 Market St., San Francisco, at \$7800 awarded contract to furnish, under Schedule C, 795 lin. ft. 30-inch single and double riveted ¼-inch plate steel pipe, complete, installed with connections, bends and specials.

SAN DIEGO, Calif.—U. S. Pipe & Foundry Co., 2336 E 30th St., submitted the low bid to the city purchasing agent, A. V. Goeddel, at \$11,690 or \$1.67 per ft. for furnishing 7000 ft. of 12-in. class C cast iron pipe. The other bids were:

American Cast Iron Pipe Co., \$1.73; \$12,110.

R. E. Hazard Const. Co., \$1,775; \$12,425.

The award will probably be made to the U. S. Pipe & Foundry Co.

BEVERLY HILLS, Cal.—Until Jan. 27, 8 P. M., bids will be received by city council for the following improvements in connection with water system:

- (a) For certain booster pump equipment;
- (b) Furnish and install one deep well turbine pump;
- (c) Drill one well with guaranteed production;
- (d) Construct one underground pump chamber.

Specifications obtainable from Salisbury, Bradshaw and Taylor, engineers 714 W 10th St., Los Angeles.

MODESTO, Stanislaus Co., Calif.—Modesto Irrigation District will include in its 1931 construction program the construction of wells and installation of pumps to cost \$20,000 and the building of spillways at a cost of \$4,000.

PORTLAND, Ore.—NePage-McKenney Co., 45 North 10th St., Portland, at \$183,575.50 awarded contract by city purchasing agent to construct the

Ross Island Bridge mains and connecting lines for the Bureau of Water Works. The new lines will consist of a 30-in. cast iron main from E Tenth and Division Sts. to the east line of the Ross Island Bridge at Powell Blvd. and Grand Ave., where the main will be split into two 24-in. steel lines to cross the bridge under the sidewalk area and suspended to the bridge. At the west end of the bridge the two lines again meet in a 30-in. cast iron main which hooks up at Mill and Water Sts. with the 32-inch supply line from one of the reservoirs in the city park.

DENVER, Colo.—Until 2 P. M., Jan. 15, bids will be received by the U. S. Bureau of Reclamation, 1441 Welton St., Denver, for the fabrication and erection of two riveted plate steel tanks for water supply, Boulder City, Nevada, on the Boulder Canyon project. One tank will be 100 feet in diameter and 35 ft. high, the other tank will be 30 ft. in diameter and 19 ft. 9 in. high. Both tanks will be erected at the edge of the townsite of Boulder City. The city is located about 28 miles SE of Las Vegas. The estimated quantities of metal work involved are:

100 ft. x 35 ft. tank, 429,000 lbs.
30 ft. x 19 ft. 9-in. tank, 26,300 lbs.
The tanks will be erected on solid sand foundation constructed in advance by the government. Plans and specifications may be obtained by prospective bidders without charge. Proposal guarantee, 10%. R. F. Walter, chief engineer. Plans may be obtained from the office of the bureau at Las Vegas, Nev., or Denver, Colo. Spec. No. 500-D.

WALNUT CREEK, Contra Costa Co., Cal.—Election will be held January 7 to vote bonds of \$50,000 to finance construction of a water distributing system to be served from the mains of the California Water Service Corp.

STREETS AND HIGHWAYS

SIERRA COUNTY, Cal.—Until Jan. 20, 2 P. M. (date extended from Jan. 15), bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, for grading and placing crushed rock surfacing on Section No. 3, Shady Flat, Downsville, 26, Yuba Pass National Forest Highway, 4.14 miles in length. Project involves:

- (1) 28 acres clearing;
- (2) 278,320 sta. yds. overhaul;
- (3) 72 cu. yds. concrete;
- (4) 282 cu. yds. C. R. masonry;
- (5) 280 cu. yds. rip-rap;
- (6) 148,000 cu. yds. excav. unclass.;
- (7) 6700 cu. yds. crushed rock surf.;
- (8) 3120 lbs. reinf. steel;
- (9) 1492 ft. corr. metal pipe;
- (10) 250 cu. yds. hand placed embankment.

Plans may be obtained at the office of the engineer, C. H. Sweetser, upon deposit of \$10. Proposal guaranty, 5%.

OAKLAND, Cal.—Until January 15, 12 noon, bids will be received by F. C. Merritt, city clerk, to improve portions of 8th St., Fallon St. and the extension of 10th St. This is a cash job. Alternative bids will be received: "PROPOSITION A."—Grading, curbing, guttering, constructing an asphaltic concrete pavement, resurfacing existing pavement with an asphaltic concrete wearing surface, constructing cement sidewalks, manholes with inlet tops, and a wooden culvert, and constructing penetration macadam pavements consisting of a macadam base, 5-in. in thickness, and a hot oil penetration macadam top course.

"PROPOSITION B." For the construction of the work mentioned un-

der "Proposition A," except that the penetration macadam pavement shall have an emulsified road oil penetration macadam top course.

- (1) 7,518 cu. yds. fill;
- (2) 1,335 cu. yds. excavation;
- (3) 100 cu. yds. material in excavation below subgrade to be removed and replaced with filling material;
- (4) 322 lin. ft. wood curb;
- (5) 4,779 lin. ft. conc. curb;
- (6) 4,781 sq. ft. conc. gutter;
- (7) 9,255 sq. ft. asphaltic concrete pave. (asphaltic concrete surf. course, 2-in. thick, laid upon a Portland cement conc. foundation, 6-in. thick);
- (8) 127,688 sq. ft. penetration macadam pavement;
- (9) 2,411 sq. ft. existing pave. to be resurfaced with asph. conc.
- (10) 21,662 sq. ft. cem. sidewalk;
- (11) 235 lin. ft. 6-inch by 22-inch wooden culvert;
- (12) 2 manholes with inlet tops (24-in. opening).

Certified check 10% payable to city required with bid. Plans obtainable from office of city clerk, Walter N. Frickstad, city engineer.

OAKLAND, Cal.—Heafey-Moore, 344 High St., Oakland, at \$32,304.94 submitted low bid to city council to improve portions of Hampton Rd., Liggett Dr., Estate Dr., Sims Dr. and Pershing Dr., Central-California Roads Co., Oakland, only other bidder at \$34,047.62. Following is a complete list of unit bids received:

- (1) 9,874 cu. yds. excavation;
- (2) 6,264 lin. ft. conc. curb;
- (3) 165,693 sq. ft. concrete pavement;
- (4) 14 lin. ft. 8-in. x 24-in. corr. iron and concrete culvert;
- (5) 17 lin. ft. 8-in. x 29-in. do.
- (6) 34 lin. ft. 10-in. reinf. conc. pipe conduit with concrete covering;
- (7) 28 lin. ft. 10-in. reinf. conc. pipe conduit without conc. covering;
- (8) 49 lin. ft. 12-in. do.
- (9) 47 lin. ft. 15-in. reinf. conc. pipe conduit with concrete covering;
- (10) 208 lin. ft. 15-in. reinf. conc. pipe conduit without conc. covering;
- (11) 4 concrete handholes with c. i. covers;
- (12) 3 storm water inlets, 34-inch openings.

City will pay one-half the cost of the storm water drainage system from General Fund. Improvement Act 1913.

OAKLAND, Cal.—City council declares intention to improve Johnston Drive from Estates Drive southeasterly. Project involves:

- (1) 6,246 cu. yds. excavation;
 - (2) 1,988 lin. ft. concrete curb;
 - (3) 29,780 sq. ft. concrete pavement;
 - (4) 4,954 sq. ft. cement sidewalks.
- 1911 Act. Hearing January 22 F. C. Merritt, city clerk. Walter N. Frickstad, city engineer.

NEVADA COUNTY, Cal.—Fredrickson & Watson and Fredrickson Bros., 254 Hobart St., Oakland, at \$92,012 awarded contract by State Highway Commission to grade 7.4 miles between 1 mile west of Washington Rd. and 1/2 mile east of Summit.

MENLO PARK, San Mateo Co., Cal.—Until January 13, bids will be received by Fannie I. Kurtz, city clerk (30-3) to improve College Avenue and Cambridge Ave. from Arbor Road to El Camino Real; Harvard Ave. bet. University Drive and El Camino Real; University Drive from Middle Ave. to Stanford Ave.; Yale Road bet. Middle Avenue and Stanford Ave.; Princeton Road bet. College and Stanford Ave., including all street intersections. Project involves:

- (a) 30,400 sq. ft. grading;
 - (b) 670,400 sq. ft. 1 1/2-inch emulsified asphalt surface pavement on 4-in. macadam base;
 - (c) 32,000 lin. ft. concrete curb;
 - (d) 220 water service connections.
- 1911 Act. Bond Act 1913. Certified check 10% payable to city required with bid. Plans on file in office of clerk and obtainable from Bert J. Mehl, city engineer.

STOCKTON, San Joaquin Co., Cal.—County Surveyor Julius B. Manthey completing plans for 4.7 miles of road between Farmington and Belota and for the construction of two small bridges; total cost, \$40,000. Oil macadam pavement will be specified.

STOCKTON, San Joaquin Co., Cal.—County Surveyor Julius B. Manthey preparing specifications for oil macadam paving on 3 miles of Rhoden road from Waterloo to Linden and in Harney Lane between Lower Sacramento road and Cherokee Lane; estimated cost \$26,000.

YREKA, Siskiyou Co., Calif.—City council will start proceedings shortly for an extensive street paving program. Streets to be paved are east of Gold and south of Mine St.

FRESNO, Fresno Co., Calif.—Associated Oil Co., Associated Oil Bldg., San Francisco, at \$5 per barrel awarded contract by county supervisors to furnish from 125,000 to 175,000 barrels of oil for use on county highway system during the current year.

OAKLAND, Calif.—City council declares intention to improve portions of E 8th St., E 10th St., 3rd Ave., 5th Ave., 6th Ave. and 7th Ave., involving:

- (1) 351,339 sq. ft. grading;
 - (2) 7,947 lin. ft. conc. with steel curb guard;
 - (3) 293,292 sq. ft. conc. pavement;
 - (4) 22,662 sq. ft. cement sidewalk;
 - (5) 3,576 sq. ft. concrete driveways;
 - (6) 261 lin. ft. of 8x20-in. corr. iron and conc. culvert;
 - (7) 4 cast iron handholes;
 - (8) 66 lin. ft. 10-inch vit. pipe conduit;
 - (9) 38 lin. ft. 12-in. do;
 - (10) 1 catchbasin (34-inch opening);
 - (11) 1 catchbasin (21-inch opening);
 - (12) 286 lin. ft. 8-in. vit. pipe sewer (13) 1 lampole.
- City will pay 2% of cost from the Treasury. Hearing January 15. Frank C. Merritt, city clerk. Walter N. Frickstad, city engineer.

SAN FRANCISCO.—Until Jan. 21, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to improve Montgomery St. from Union to Greenwich Sts.; Alta St. from Montgomery to point 303 ft. easterly; Filbert St. from Montgomery St. to point 16 ft. westerly and from Montgomery to point 22 ft. easterly; Greenwich St. from Montgomery to point 22 ft. westerly, involving:

- 2,040 cu. yds. excavation;
- 1,285 cu. yds. "B" concrete (retaining walls, balustrade, stairs, fences);
- 115,000 lbs. reinforcing steel;
- 1,540 lin. ft. 4x4-in. reinf. concrete fence, single rail;
- 23,600 sq. ft. 6-in. "E" concrete pavement;
- 11,200 sq. ft. 8-in. waterbound macadam base and oiled surface;
- 6 tons asphalt concrete conform pavement;
- 2,740 lin. ft. armored concrete curb;
- 6,990 sq. ft. 1-course concrete sidewalk;
- 250 lin. ft. 4x16-in. redwood curb;
- 33 lin. ft. wood guard rail, heavy type;
- 450 lin. ft. wood fence, light type;
- 190 lin. ft. wood bulkhead;
- 110 lin. ft. 2-pipe railing concrete posts;
- 3 9-unit rod warning reflectors;
- 810 lin. ft. 3-in. vitrified sewer;
- 540 lin. ft. 12-in. do;
- 20 lin. ft. class B 8-in. cast iron sewer;
- 35 lin. ft. class E 12-in. do;
- 140 lin. ft. six x inch vitrified side sewer;
- 32 8x6-in. Y's or T's;
- 10 12x6-in. do;
- 120 lin. ft. 12-in. vitrified culvert;
- 15 brick manholes;
- 6 brick catchbasins;
- 2 storm water inlets;
- 1 lighting system (complete).

Work under Street Imp. Ordinance of 1918. Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

SAN ANSELMO, Marin Co., Cal.—Town trustees have started proceedings to improve Essex St., including sewers. The street will be improved from the highway to the Ancha Vista Hotel.

OAKLAND, Calif.—City council declares intention to improve Patterson Ave. adjacent to Harbor View Ave., involving grading, pave., curbs, gutters and walks, sewer with manhole, lampole and wye branches. 1911 Act. Hearing January 23. Frank C. Merritt, city clerk. Walter N. Frickstad, city engineer.

SANTA CLARA, Santa Clara Co., Cal.—Until February 2, 8:00 P. M., bids will be received by A. J. Cornin, city clerk, to improve approximately 80 blocks of streets, as follows:

- (23-1) Bellamy street and Campbell Ave., involving grading, asphaltic concrete pavement laid on layer of quarry waste, Portland cement concrete sidewalks, curbs and gutters. Act 1911, Imp. Act 1915.

(22-2) Harrison, Lewis, Scott, Reeve Wistar, Monroe, Jackson, Washington Pierce, Benton Sts. and Railroad Ave., involving grading; asphaltic concrete pavement laid on a layer of quarry waste; Portland cement concrete curbs drop curbs, gutters, sidewalks and driveways; vit. clay pipe, sanitary sewers and wye branches; laterals; sanitary sewer manholes. Bond Act 1915, Imp. Act 1911.

(21-2) Santa Clara, Market, Poplar Sherwood, Isabella and Main Sts. and The Alameda involving grading, asphaltic concrete pavement on layer of quarry waste, Portland cement concrete curbs, drop curbs, gutters, sidewalks and driveways, vitrified clay pipe main sanitary sewers, vit. clay pipe wye branches, vit. clay pipe sewer laterals, brick manholes, cast iron frames and covers. 1911 Act. 1915 Bond Act.

Certified check 10% payable to city required with bid. Plans on file in office of clerk. Geo. Sullivan, city engineer.

OAKLAND, Cal.—Haley-Moore Co. 344 High St., Oakland, at 7½¢ per gal. submitted only bid to East Bay Municipal Utility District to furnish and deliver 30,000 gals. Grade "E" hot asphalt. Total bid \$2550. Taken under advisement.

OAKLAND, Calif.—W. H. Larson, 2650 Curtis St., Sacramento, at 44.8¢ sq. ft. submitted low bid to East Bay Municipal Utility District, for 40,000 sq. ft. asphaltic street paving. Hutchinson Co., Oakland, at 50¢ sq. ft. only other bidder. Taken under advisement.

SAN MATEO, San Mateo Co., Cal.—City council will start proceedings at once to widen B street from Baldwin to Ninth avenues including installation of an elevator system; estimated cost \$75,000. Street will be widened from 46 feet to 52 feet.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on January 28, 1931, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows: Los Angeles County, a bridge across Topanga Creek about 4 miles north of Santa Monica (VII-LA-60-B), to be widened by constructing eight 27-foot timber spans on pile bents adjoining the existing concrete bridge and grading and surfacing approaches with asphalt concrete, also a bridge across Las Flores Creek about 7 miles north of Santa Monica (VII-LA-60-A), to be widened by constructing two 26-foot reinforced concrete girder spans on a concrete pier and concrete abutments and grading and surfacing approaches with asphalt concrete.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS

C. H. PURCELL,

State Highway Engineer.

Dated: December 20, 1930.

NOTICE TO CONTRACTORS

General, Mechanical and Electrical Work

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, February 3, 1931, said bids thereafter on said day to be publicly opened and read for the erection and completion of Ward #7, Mendocino State Hospital, Talmage, California, in accordance with plans and specifications therefor.

The work consists of 5 one-story dormitories and connecting arcade, the buildings being of reinforced concrete with tile and wood partitions, wood roof construction, and tile roof similar to the existing buildings. The floor area of the buildings is approximately 10,000 square feet and of the arcade 4000 square feet.

Separate bids will be entertained as follows:

1. General Work.
2. Electrical Work.
3. Plumbing, Heating and Ventilation Work.
4. Complete Mechanical, including Plumbing, Heating, Ventilating, and Electrical Work.

The "General Work" bid will embrace all branches of work other than segregated above. Contractors must state clearly in their application the particular segregation of work that they desire plans for.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange offices.

Plans, specifications, and proposal forms may be secured by licensed Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 614, Statutes of 1928, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accord-

ance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF ARCHITECTURE,
GEO. B. McDOUGALL,

State Architect.

W. E. GARRISON,

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on January 21, 1931, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Imperial County, between Trifolium Canal and Kane Springs (VIII-IMP-26-B), about six and three-tenths (6.3) miles in length, to be graded and paved with asphalt concrete.

Proposal forms will be issued only to those Contractors who have furnished a verified statement of experience and financial condition in accordance with the provisions of Chapter 614, Statutes of 1928, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed

Bill Advocates Insurance Against Unemployment For California Workers

Insurance against unemployment is the objective of a bill Assemblyman William Hornblower, San Francisco, is having drafted for introduction in the legislature.

The insurance would be financed jointly by the employer and employee, the employer contributing 1 per cent per month of his wages toward the fund and the employer contributing 2 per cent of the wages paid the employee. The employer, in other words, would contribute twice the amount contributed by the employee.

Any person who had worked twenty six weeks in the two years prior to filing application for such insurance would be eligible.

After a lay-off of nine days or more, the worker thus insured would be entitled to \$9 a week if single and \$12 a week if married, with an additional \$1 for every minor child.

Unemployment due to drunkenness would not entitle the worker to insurance.

The act would be administered by the state industrial accident commission.

Hornblower says his bill is based on a study by insurance experts and is sound in principle.

OFFICERS NAMED BY BAKERSFIELD EXCH.

G. A. Graham, general contractor, was elected president of the Bakersfield Builders' Exchange at the annual meeting of that body held last week. Gene Gartley, electrical contractor, was elected vice-president; George Wilson, sheet metal contractor, was re-elected treasurer and D. T. Turner, secretary-manager.

Directors chosen were: G. A. Graham, V. A. Young and H. C. Evans, representing the general contractors; Thos. W. Fraser, representing the hardware floor and ornamental iron contractors; W. M. Fisher, representing the heating contractors; Ace Abbot, representing the plumbing contractors; A. J. Hendricks, representing the brick and tile contractors; George Wilson, representing the sheet metal contractors; Gene Gartley, representing the electrical contractors; R. L. Perry, representing the roofing and plastering contractors; P. J. Stevens, representing the painting contractors.

The Bakersfield Builders' Exchange recently opened larger quarters at 1200 Eighteenth Street, Bakersfield, to better serve the membership which now includes the leading contractors and material dealers in the Kern County section.

To be installed in a new substation at Herndon, Fresno County, four huge air-last transformers, costing \$250,000, have been ordered by the Pacific Gas & Electric Company from the Westinghouse Electric & Manufacturing Company at Pittsburgh, Pa.

HUNTINGTON, L. A. ATTORNEY, IS NAMED STANDARDS DIRECTOR

Governor Rolph has appointed Colonel Carlos Huntington, Los Angeles attorney, as director of the Department of Professional and Vocational Standards.

Colonel Huntington succeeds James Collins of Long Beach, who resigned.

The new director is an ex-service man, having served with the 16th ammunition train in the 1st division. He has lived in Los Angeles since 1919, and was very active in Rolph's campaign for the governorship.

As director of the Department of Professional and Vocational Standards he will be at the head of most of the professional boards of examiners, such as contractors, pharmacists, dentists, accountants, embalmers, architects, optometrists and barbers.

WESTERN SPRINKLER CHANGES FIRM NAME

The Western Automatic Sprinkler Company announces a change of name to the Viking Automatic Sprinkler Company with offices at 114 Sansome St., San Francisco. G. W. Greeley is the local manager.

Further announcement is made of this company's recent association with the Northwestern Sprinkler Company of Seattle, Washington, which has also changed its name to the Viking Automatic Sprinkler Company. The Northern Division will handle a complete line of Viking devices and operate in the entire Northwest territory, with R. L. Thorsdale, president and general manager, and S. F. Martin, vice-president. The Southern Division, with S. F. Martin, president, has its headquarters at 2715 East 12th St., where they recently moved into a new modern plant.

The Viking Automatic Sprinkler Company, a subsidiary of the Viking Corporation of Hastings, Michigan, announces a new Pre-action Device for the quick detection of fires, in advance of the operation of automatic sprinklers. This is in line with their practice of making many changes and improvements in the old style Automatic Sprinkler Devices.

Objections to building a jail or establishing a jail farm for San Francisco along the coast of San Mateo County have been raised by the directors of the Coastside Civic Union of San Mateo County. The organization declares that an undersize man already had obtained option on an old Valencia ranch, which includes within its boundaries historic Pillar Point.

OREGON REALTORS WILL MAKE STUDY OF STATE BUILDING CODE

To obtain all knowledge available on the proposed state building code and become thoroughly acquainted with all the measures involved, the Oregon Realty board has asked the legislation committee, of which Henry E. Reed is chairman, to study and prepare a report on the code.

This action followed a debate on the measure in which Francis H. Murphy, president of the Oregon Building Congress, took the affirmative side of the question: "The State should adopt the state building code," and Ernst Kroner, architect, stood for the negative.

In explaining the measure, Murphy stated the proposal was to combine an electrical and plumbing code with the building code, thereby obtaining a stricter surveillance of localities which otherwise are too loosely inspected.

The structural code in the measure has already been adopted by 50 cities in the West, and many cities in Oregon are now using the combined electrical, plumbing and building code. California has successfully operated under this law for some time. Murphy declared, and Washington is seriously considering the matter. The adoption of such a measure, according to Murphy, who represents an organization of builders, architects, engineers and subcontractors of Portland, would eliminate many of the dishonest and unsatisfactory contractors now operating throughout the state.

Kroner emphatically denied the benefit of such a code, claiming it to be one of the most dangerous measures at the time as it would give inexperienced inspectors and ignorant officials the authority to take steps which they are not fit to take intelligently.

HIGHWAY DISTRICT VALIDITY IS UPHOLD

The validity of Joint Highway District No. Six was upheld Jan. 13 by the State District Court of Appeal.

In confirming the judgment of Superior Court, the higher tribunal turned away the complaint of J. M. Sharp, property owner, who held "that the district was attempting the illegal collection of revenue and had no valid existence as a taxing agency."

The court found no merit in Sharp's main contention that he had had sufficient opportunity to protest—and held that his complaint thus became merely "another attack upon the statutes under which highway districts are formed."

The protested highway would run from Maricopa, Kern County, over the mountains to Ojal Valley, Ventura County, thence to Rincon Creek, Santa Barbara County.

STATE HIGHWAY BUDGET FOR 1931-1933 BIENNIUM PRESENTED TO STATE LEGISLATURE

REDWOOD HIGHWAY

(San Francisco to Oregon Line near Monumental)

Grading, structures, 17.3 miles, Cloverdale to Hopland (Mendocino and Sonoma counties), \$900,000. Beginning of construction on new line along the Russian River between Cloverdale and Hopland which will eliminate the present steep and crooked existing road. This section was never undertaken before through fear of slide conditions. The design of the road to be built there provides for these conditions, shortens the distance over 15 miles, substitutes a light winter grade for a long mileage of steep maximum grades.

Grading, structures, armor rock surfacing, 14 miles, Little Dum Creek to Leesett (Mendocino county), \$85,000.

Cedar Creek and Dunn Creek (Mendocino county), two bridges, concrete and steel, \$284,000.

Crescent City to Elk Valley (Del Norte county), 5.3 miles, grading, structures, oil rock surfacing, \$249,000.

This completes the present Redwood Highway gap in Del Norte county and locates the road via Crescent City, setting a long existing controversy.

Dyersville bridge and approaches (Humboldt county), \$196,400.

Bridge and approaches over east branch of Eel River at Ben Bow (Humboldt county), \$111,000.

Grading and trestle approaches, Robinson Ferry bridge (Humboldt county), \$51,400.

Slope protection, Hiouchi Bridge to north boundary of Del Norte county, \$50,000.

Grading, structures and armor rock surface, 5.5 miles, Pepperwood School to Farm House Inn (Mendocino county), \$561,000. This provides for the reconstruction of the present narrow, steep and tortuous Rattlesnake grade in Mendocino county.

Grading and macadam shoulders 11.3 miles, South Scotia bridge to Fortuna (Humboldt county), \$125,600. The present 15-ft. pavement will be widened and made safer for the increased traffic using this section of the road.

Grading and oil surfacing, Arnold to Pepperwood School, portions (Mendocino county), \$85,000.

Old surfacing, Loketa to two miles north of Beatrice, 5.3 miles (Humboldt county), \$60,000.

PACIFIC HIGHWAY

(Section from Red Bluff to Oregon Line)

Bridge at Clear Creek (Shasta county), \$67,800.

Bridge at Cottonwood Creek (Siskiyou county), \$18,500.

Oil surfacing, Loketa to two miles north of Yreka to Klamath River (Siskiyou county), \$22,400.

Grading, oil surfacing, Cottonwood Creek bridge, approaches (Siskiyou county), \$27,600.

PACIFIC HIGHWAY

(East Side—Sacramento to Tehama Junction via Marysville)

Grading and shoulders, 6.8 miles, Shasta Union School to 6 miles north (Butte county), \$28,350.

Grading and pavement, 8.4 miles, Lincoln to Shiden and Wheatland to Dry Creek (Placer and Yuba counties), \$63,000.

Bridge at Coon Creek (Placer county), \$27,500.

PACIFIC HIGHWAY

(West Side—Tehama Junction to Benicia)

Grading, structures, paving 0.5 of a mile in Willows (Glenn county), \$25,000.

The biennial state highway budget recommending expenditures of \$63,322,500 upon the state highway system for the ensuing two fiscal years was presented to the State Legislature on January 12, by Governor Rolph.

The budget covers contemplated expenditures for all state highway purposes including construction, reconstruction, maintenance, partially designed rights of way, engineering and administrative costs. The distribution of the money between northern and southern counties, and between primary and secondary highways is in accordance with the provisions of the Breed Bill.

While the budget is for the fiscal years of July 1, 1931, to June 30, 1933, if previous rulings are followed, the funds provided in the budget will be available for expenditure upon adoption by the Legislature and approved by the Governor. This will enable state highway work to proceed without interruption, more particularly desired by Governor Rolph and Colonel Garrison, director of the Department of Public Works.

Construction and reconstruction projects included in the budget, as submitted to the Legislature by Governor Rolph are as follows:

Oil rock surfacing, 8.9 miles, Williams to Maxwell (Colusa county), \$100,000.

Grading, gravel base and small structures, 4 miles, Williams to 4 miles south (Colusa county), \$80,000.

All three of these projects constitute the progressive improvement of the West Side Highway.

GOLDEN STATE HIGHWAY (Valley Route—Sacramento to Los Angeles)

Merced River Bridge and approaches (Merced county), \$215,000.

Brenda Slough Bridge (Madera county), \$38,000.

Grading, structures and pavement, 0.7 of a mile, Madera city limits northerly, \$46,500.

Bridge over Fresno River (Madera county), \$60,000.

Grading, structures, pavement and oiled shoulders, Turner's Station to Stockton (San Joaquin county), \$319,400. This provides for the improvement of the so-called "Hogan" Road from Stockton south.

Nine timber bridges (San Joaquin county), \$56,600.

Grading, filling borrow pits, pavement and structures, Cosumnes River bridge to 1.4 miles north of McConnell (Sacramento county), \$26,600.

McConnell grade separation, subway (Sacramento county), state's share, \$66,500.

Stanislaus River Bridge and approaches (Stanislaus county), \$105,300.

Grading and structures, 5.3 miles, Cotton Creek to Piru Creek, Ridge Route Alternate (Los Angeles county), \$500,000.

Grading and structures, 3.9 miles, Los Alamos Divide, Ridge Route Alternate (Los Angeles county), \$1,000,000. This item and the one immediately above provides for continuation of construction upon the Alternate Ridge Route.

Grading, structures and pavement, 3.1 miles, Fresno to Panache Creek (Fresno county), \$216,200. This completes the widening of pavement immediately north of the city of Fresno.

Grading, oil rock shoulder, 29.3 miles, Bakersfield to Grapevine (Kern

county), \$350,000. This widens the roadbed and improves conditions upon the "seventeen mile tangent."

Grading and resurfacing, 11.8 miles, Goshen to Kingsburg (Tulare county), \$473,000. This provides for widening the 15-ft. pavement in Tulare county.

Five bridges over Cross Creek (widen; bridge over canal near Traver (Tulare county), \$60,000.

Grading, structures, oil shoulders, pavement, 5.5 miles, Plaza Garage to Goshen; grading, structures, oil shoulders, Plaza Garage to 0.3 of a mile westerly (Tulare county), \$272,000. This with other work will complete the widening of the 15-ft. pavement in Tulare county and provide a grade separation at the junction of the Golden State Highway and the Hanford lateral.

Plaza Garage grade separation (subway) Tulare county, state's share, \$50,000.

Grading, structures, oil shoulders, pavement 2.9 miles, Union Avenue to Beardsley Canal (Kern county), \$236,000. This provides for improving and widening pavement at the north city limits of Bakersfield.

Bridge over Kern River (Kern county), \$400,000.

Bridge over Beardsley Canal (Kern county), \$16,000.

COAST HIGHWAY

(San Francisco to San Diego)

Grade separation with S. P. tracks at Madrone (Santa Clara county), state's share, \$110,000.

Soledad Grade separation and approaches (Monterey county), \$96,000.

Bridge over San Benito River (San Benito county), \$140,000.

Santa Clara River bridge (Ventura county), \$410,000. The original was washed out by the flood following the failure of the San Francisco Dam. The new bridge is on a new alignment, and is an improved structure.

Grading, structures, widening pavement, Fullerton to Los Angeles county line (Orange county), \$164,500. This will complete the 30-ft. width of pavement on the Coast Highway between Los Angeles and Santa Ana.

Grading, surfacing and structures, 3.9 miles, Wigmore to Los Alamos (Santa Barbara county), \$150,000. This provides for widening the existing 15-ft. pavement.

Repairing floor, Santa Ynez River bridge at Buellton (Santa Barbara county), \$18,000.

Grading, pavement, structures, widening 5.1 miles, Serra to San Diego county line (Orange county), \$382,500. This project increases the present 20-ft. pavement to 30 feet in the southern part of Orange county between the junction of the Coast Highway and the Oxnard-Capistrano Highway.

Grading, structures, pavement, widening 4.5 miles, Ventura to El Rio (Ventura county), \$106,000. This provides for a 30-ft. pavement south of Ventura to the junction of the Coast Highway and the Oxnard-Capistrano Highway.

Bridge and approaches, San Diego River bridge (San Diego county), \$224,500. This corrects alignment and substitutes an improved bridge for the present trestle.

Grading, structures, pavement, 16.8 miles, Santa Rita to San Benito River, 16 miles (Monterey and San Benito counties), \$1,046,700. This provides for grading and paving of the relocated San Juan grade.

Bridge over San Juan Creek (San Benito county), \$10,000.

VICTORY HIGHWAY

(Roseville to Nevada Line via Auburn) Grading, pavement and small structures, 4 miles, Newcastle to Auburn (Placer county), \$335,000. This project provides for correction of alignment and widening of 15-ft. pavement.

Oil rock surfacing, Alipor to Soda Springs, 10 miles (Placer and Nevada counties), \$39,000.

Oil rock surfacing, Colfax to Gold Run, 8.9 miles (Placer county), \$135,000.

Grading, structures, oil rock surf., Gold Run to Alipor, 12 miles (Placer county), \$780,000. This completes the remaining unimproved section east of Auburn.

Towle Grade separation (subway beneath S. P. tracks) (Placer county), state's share, \$29,000.

Oil rock surfacing, 1.8 miles near Bay View Rest (El Dorado county), \$7200.

Myers to Nevada Line via Truckee

Oil rock surfacing, Tahoe Junction to Hinton, 9 miles (Nevada county), \$135,000.

Oil surfacing Bay View, northerly, 1.8 miles (El Dorado county), \$7200.

MOHE UKIAH HIGHWAY
Armor top surface, Nevada City to Washington Road, 11.8 miles (Nevada county), \$41,000.

Bridge over Russian River (Mendocino county), \$30,000.

PLACERVILLE - TAHOE HIGHWAY
(Sacramento to Nevada Line via Placerville)

Grading and structures from Brighton to Mills (Sacramento county), \$339,000. This provides for placing a concrete pavement on the first section of the Placerville road from Sacramento to east.

Grading, structures, paving in Placerville (El Dorado county), \$40,000. (Cooperative project).

Oil rock surfacing Rivotto to Kyburz, Strawberry to Phillips (El Dorado county), \$51,200.

Oil rock surfacing, Mays to state line (El Dorado county), \$50,200.

Grading, structures, oil rock surfacing, Placerville to R R Xing (El Dorado county), \$59,000. This provides for grading and surfacing a section of the road immediately east of Placerville hitherto unimproved except for maintenance.

Oil surfacing, Clarks Corner to Placerville, 1.7 miles (El Dorado county), \$5450.

MOTHER LODE HIGHWAY

(Auburn to Sonora)

Grading, structures, armor top surfacing, 1.2 miles, San Andreas to 1.4 miles north of Calaveritas Creek (Calaveras county), \$35,000.

Armor top surfacing north and south of Calaveritas Creek, 2.9 miles (Calaveras county), \$13,300.

Armor top surfacing, 7.2 miles, Dry Town to Martell (Amador county), \$29,500.

FEATHER RIVER LATERAL

(From Pacific Highway to Quincy via Oroville)

Grading, structures and oil rock surface from Pulga to East Butte county line (Butte county), \$483,400. This continues construction on the Feather River lateral from the crossing at Pulga east to the Plumas county line.

Parades Bar bridge (Butte county), \$41,000.

Grading, structures and oil rock surfacing, 12 miles, Spanish Creek to Keddie (Plumas county), \$135,000.

Spanish Creek and D. P. tunnel, bridge and portal structures (Plumas county), \$100,000.

Bridge over West Branch Creek (Butte county), \$45,000.

Oiled surface, Oroville to Feather River, 4.1 miles (Butte county), \$16,600.

TRINITY LATERAL

(Redding to Arcata via Weaverville) Oiled surface, Weaverville to Tower

House, 32 miles (Trinity and Shasta counties), \$69,100.

Clear Creek bridge approaches (Shasta county), \$9300.

Bridge at Browns Creek and approaches (Trinity county), \$7000.

Bridge at Clear Creek (Shasta county), \$17,700.

Oil rock surfacing, 9 miles, Humboldt Creek to Willow Creek (Humboldt county), \$58,000.

DOWNIEVILLE LATERAL

(Nevada City to Downieville)

Grading, structures and surfacing, Nevada City to Downieville (Nevada, Yuba and Sierra counties), \$60,000. This starts the redevelopment and widening of the old highway originally built by convicts on standards not satisfactory for present traffic.

ALTURAS LATERAL

(Redding to Nevada Line via Alturas)

Oiled surface, Fall River to Hut Creek, 66 miles (Shasta, Lassen and Modoc counties), \$243,600.

Oiled rock surfacing, Diddy Hill to Old Mountain, 8.7 miles (Shasta county), \$115,000.

Oiled surface, 3 miles east of Alturas to railroad crossing, 1.4 miles (Modoc county), \$5600.

Oiled rock surfacing, Main Street to East City limits of Alturas (Modoc county), \$5500.

RED BLUFF - SUSANVILLE LATERAL

(Red Bluff to Nevada Line near Purdy's via Susanville)

Oiled surfacing, Mineral to Chester, 31 miles (Tehama and Plumas counties), \$55,600.

Oiled surfacing, Westwood to Willards, 12.8 miles (Lassen county), \$32,000.

Grading, oil rock surfacing, structures, 9.2 miles, Willards to Susanville (Lassen county), \$296,800. This provides for reconstructing and improving a section that is difficult both of maintenance and snow removal.

Oiled rock surfacing from 2 miles east of Dales to Paynes Creek, 7.3 miles (Tehama county), \$96,700.

Oil rock surfacing, 11.4 miles, Lake Almanor to Westwood (Lassen and Plumas counties), \$37,700.

Oil surfacing, Doyle to Long Valley Creek, 7.5 miles (Lassen county), \$18,800.

KLAMATH RIVER LATERAL

(Redwood Highway near Klamath River to Pacific Highway)

Walker bridge and approaches (Siskiyou county), Cooperative project, state's share, \$19,000.

Heaver Creek bridge and approaches (Siskiyou county), \$48,300.

Grading and bridge replacements, Welchpec to Happy Camp, \$105,000 (Siskiyou and Humboldt counties).

UKIAH TO MENDOCINO STATE HOSPITAL

Bridge over Russian River (Mendocino county), \$30,000.

BAYSHORE HIGHWAY

(San Francisco to San Jose)

Bituminous macadam pavement from Fifth Ave., San Mateo to Willows Road, 11.4 miles (San Mateo county), \$315,200.

Grading, structures, and bituminous macadam pavement, 9.3 miles, Willow Road to Alviso Road (San Mateo and Santa Clara counties), \$716,850.

Bridge over San Franciscoquito and Stevens Creek, \$65,000.

Concrete pavement, Broadway to 5th Ave., 1.5 miles (San Mateo county), \$272,450.

These projects continue present pavement activities to San Mateo and provide for construction and surfacing of the remaining sections of the road to a connection with the Alviso Road, 6 miles from San Jose.

SKYLINE BOULEVARD

(San Francisco to Glenwood)

Grading, structures and bituminous macadam, Saratoga Gap to Black Rd., portions, 4 miles (Santa Clara and Santa Cruz counties), \$300,000. This continues the construction of the Skyline Boulevard southerly.

SACRAMENTO-OAKLAND HIGHWAY

Grading, pavement, structures and oil shoulders, 1.7 miles west of Cordelia to 1.7 miles west of Fairfield (Solano county), \$29,600. This will eliminate the last piece of 15-ft. pavement existing on this highway.

Bridges over Ledgewood, Susan and Knightson creeks (Solano county), \$25,000.

Filling borrow pits, pavement, and oil shoulders, 1.3 miles, west of causeway (Yolo county), \$70,000.

ALBANY TO MARTINEZ

Grading, structures and pavement, San Pablo Creek to Crockett, excepting Pinole; "A" St. subway, Crockett Contra Costa county, \$296,000. This project provides for a 30-ft. asphaltic and concrete pavement on the existing macadam highway between Richmond and Crockett.

STOCKTON TO SANTA CRUZ VIA OAKLAND

Grading, structures, and pavement Castro Valley Road (Alameda county), \$50,000.

Grading, armor top surface, structures, French Camp via McKinley Ave. to Stockton (San Joaquin county), \$50,000. This completes the improvement of the south approach to Stockton through Altamont Pass.

Bridges over Homestead Canal and Walker Slough (San Joaquin county), \$16,500.

Grading, structures, pavement and shoulders, 5 miles, Greenville to Livermore (Alameda county), \$164,100. This project constitutes an improvement of the westerly side of the Altamont Pass.

Grading, structures, pavement, shoulders, 3.5 miles, Meridian Road to Ware Avenue (Santa Clara county), \$70,000. This will correct reverse curves near Johnson's Corner south of San Jose.

Grading, structures, surfacing (Santa Cruz county), Santa Cruz to 1 mile west, \$60,000.

Grading, structures, surfacing, 6.5 miles, Inspiration Point to Vine Hill Road, portions (Santa Cruz county), \$360,000. This with the item immediately preceding constitutes the first bridge in the relocation of the present highway congested Los Gatos-Santa Cruz highway.

SALIDA TO ROUTE 23 AT JUNCTION

(Salida on Valley Route North of Lodi, Through Sonora, Over Sonora Pass to Junction North of Bridgeport)

Grading, armor top surface, structures, Sonora to one-half mile east (Tuolumne county), \$27,400.

Grading, structures, and oil rock surfacing, Long Barn to Stoddard Springs (Tuolumne county), \$97,000. (Note an addition of \$20,000 will be spent on this section from Forest Highway Funds). This continues the improvement from the end of the surfaced road at Long Barn.

SAN ANDREAS LATERAL

(From Golden State Highway, Valley Route, Near Lodi, to Route 23, Near Silver Creek, Calaveras County)

Grading, structures and surfacing, 7.1 miles, Waterloo Road to 1.3 miles east of Clements (San Joaquin county), \$213,000. This project provides for the pavement of the present county-built macadam east of Lodi, taken over by the state when the road was admitted into the state system.

Grading, structures, oil rock surfacing, Big Trees to Dorrington, three miles (Calaveras county), \$104,000. (This is a cooperative project and \$36,000 of Forest Highway funds will be added to the state construction of \$104,000).

Grading, structures, surfacing near Lake Alpine, 5 miles, portions (Alpine county), \$50,000.

MANTECA TO ROUTE 5 NEAR MOSSDALE SCHOOL

Grading, pavement and structures, 4.2 miles, Mossdale to Manteca (San Joaquin county), \$174,000.

Grade separations, underpass, W. P. Ry. (San Joaquin county), state's share, \$20,000.

This provides for paving the remaining unimproved portion of the road with a grade separation structure beneath the tracks of the Western Pacific tracks.

PACHECO PASS LATERAL (Calif., on the Valley Highway to Gilroy on the Coast)

Three timber bridges with approaches over Highline Canal and San Joaquin overflow (Merced county), \$51,500.

REDWOOD PARK ROAD (Saratoa Gap Near Redwood Park to Big Bend)

Grading, structures and armor top surfacing, 3.6 miles, Saratoa Gap to Waterman Switch (Santa Cruz county), \$271,600. This completes the grading to a connection with the improved county road in San Lorenzo Canyon.

SAN LUCAS TO SEQUIA NATIONAL PARK

Grading, structures and 20-ft. bituminous macadam pavement from 1 mile west of Merryman to 2 miles east of Lemon Cove, 10.4 miles (Tulare county), \$350,000. This constitutes an improvement of the present unsatisfactory county paved road which was taken over by the state when this road was admitted into the state system.

Grading and oil shoulders west of Plaza Garage to county line, 3.5 miles (Tulare county), \$12,000.

CARMEL - SAN SIMEON HIGHWAY

Grading, structures and oil rock surfacing, 5.4 miles, San Remo Divide to Carmel (Monterey county), \$214,000.

Bridge over Carmel River, San Jose and Wild Cat Canyon Creeks (Monterey county), \$85,000.

Bridge over Granite Creek (Monterey county), \$45,000.

Bridge over Garrapata Creek (Monterey county), \$35,000.

Grading, structures and oil rock surfacing, 8.6 miles, Cambria to San Simeon (San Luis Obispo county), \$219,000. This completes the present state highway at southerly end connecting with convict construction to the north. These projects will complete the grading and surfacing of the highway with the exception of a 25 mile gap between convict camps.

Bridge over San Simeon Creek, Pico Creek, Little Pico Creek, near San Simeon (San Luis Obispo county), \$90,000.

EAST OF SIERRA HIGHWAY (Saugus to Route 11 at Alpine Junction)

Grading, structures and oil rock surfacing, Yerby's to McGee Creek, 7.3 miles (Mono county), \$243,600.

Grading, structures and oil rock surfacing, Convict Creek to Casa Diablo Hot Springs, 5.5 miles (Mono county), \$120,450.

Grading, structures and oil rock surfacing, Casa Diablo Hot Springs to Deadman Creek, 8.8 miles (Mono county), \$234,900.

Grading and structures from 1 mile north of Bridgeport to Sonora Pass Junction, 15 miles (Mono county), \$261,000.

Bridge over Walker River (Mono county), \$15,000.

All of these projects are in Mono county and located north of Bishop.

EL RIO TO SAN JUAN CAPISTRANO (Portion of the Coast Route)

Grading, structures and pavement, 7.4 miles, Los Flores Canyon to Santa Monica (Los Angeles county), \$510,200. This provides for widening pavement to 40 feet.

Widening pavement, Topanga Canyon to Los Flores Canyon, 3.2 miles (Los Angeles county), \$80,000.

Santa Ana River bridge, widening (Orange county), \$80,000.

Shore protection, Santa Monica to Pt. Mugu, 7.2 miles (Los Angeles and Ventura counties), \$240,000.

ARROYO SECO HIGHWAY (La Canada to Mt. Wilson Road via Arroyo Seco)

Grading and structures, La Canada to Mt. Wilson (Los Angeles county), \$520,000. This continues construction on this route.

BEAR LAKE HIGHWAY (San Bernardino end of County Pavement to Bear Lake)

Grading, structures, oil rock surfacing, 5 miles, near Camp Waterman to end of county pavement (San Bernardino county), \$650,000. This completes the grading and surfacing of this highway.

ARROWHEAD TRAIL (San Bernardino to Nevada Line Near Jean)

Alray grade separation, subway beneath Santa Fe tracks (San Bernardino county), state's share \$30,000.

Gish grade separation, subway beneath Santa Fe tracks (San Bernardino county), state's share \$30,000.

Grading, structures, rock surfacing, from point near Baker to 25 miles east (San Bernardino county), \$475,000.

Grading, structures, oil rock surfacing, 12 miles, beyond Alray (San Bernardino county), \$400,000.

These projects combine construction on the main highway leading to Boulder Dam.

COLTON-LOS ANGELES HIGHWAY

Grading, structures and pavement, Pomona to Los Angeles (Los Angeles county), \$540,000. This is one of the recommended additional highways.

WEST OF CLAREMONT TO RIVERSIDE

Widening bridge and approaches over Santa Ana River at Riverside (Riverside county), \$150,000.

SAN BERNARDINO TO EL CENTRO

Grading, structures, second story concrete pavement, shoulders, Imperial county line to 6 miles north (Riverside county), \$390,000.

This project provides for widening the 15-ft. pavement from the Salton Sea northerly on this route.

SAN DIEGO TO EL CENTRO

Pavement of unpaved portions, La Posta to Tecote Divide, 8.3 miles (San Diego county), \$332,000. This completes the paving of the entire distance on the San Diego - El Centro highway.

Grading, structures, pavement, 8 miles, 3 miles west of Coyote Wells to 7 miles west of Dixieland (Imperial county), \$492,400. This project provides for widening the east section of the old 15-ft. highway on this road.

EL CENTRO TO YUMA

Grading, structures, and pavement, 9 miles, Sand Hills to 5 miles west of Yuma (Imperial county), \$441,000. This provides paving the last unpaved section of this route.

MECCA - BLYTHE HIGHWAY

Grading, structures, oil rock surfacing, 16 miles, portion (Riverside county), \$300,000. This continues construction.

COOPERATIVE PROJECTS

The budget sets up a total of \$1,600,000 for cooperative projects in the southern portion of the state, and an amount of \$500,000 for similar work in the northern portion.

Legislation requesting that the entire elimination of billboards and overhanging signs outside property lines be put to a vote of the people at the August primary has been introduced in the Colorado city council. The legislation provides that in event such action is approved the elimination of billboards and signs be completed within 60 days. Factories and business places are exempted in the proposed ordinance. The bill has been referred to the rules committee of council, which has it under consideration.

ALONG THE LINE

H. L. Carnahan of Los Angeles, former lieutenant-governor, has been appointed State Building and Loan Commissioner by Governor Rolph. It will be a temporary service. Commissioner Carnahan has consented to remain on the job until September.

Edward K. Hussey has been appointed city engineer of Oakland, succeeding George D. Macomber who was elected to the office of surveyor of Stanislaus County at the last general election. R. T. Belcher of Oakland will be a member of Hussey's staff.

Washington County Commissioners (Reno, Nevada), have rejected the proposal of J. C. Durham, newly elected commissioner, to appoint a highway engineer for the county and place him in charge of road construction and maintenance.

A. C. Byer, engineer with the Wallace and Tiernan Co. of Newark, N. J., with Pacific Coast headquarters at San Francisco, spent two days with engineers for the Hawthorne Naval Ammunition Depot in Nevada state, planning the installation of a chlorination plant for the depot water supply.

W. H. Sloan, manager of the Hayward Lumber and Investment Co., at Los Banos, resigned Jan. 1 to devote his time to his farm properties. He will be succeeded by A. E. Anderson, formerly of Paso Robles.

According to word from Lincoln, Calif., A. L. Gladding has tendered his resignation to the firm of Gladding-McBean & Company, effective January 15, and will become associated with his brothers, Charles and Chandler Gladding, in San Jose.

H. J. Jackson has been installed as paid secretary of the San Joaquin Valley Master Plumbers' Association.

Ira B. Cross, professor of economics of the University of California, in addressing the Pacific Coast Electrical Bureau, pleaded for higher wages, stating that it was the wage earner who had the greater buying power.

A. M. Barton has been reappointed chief engineer and general manager of the State Reclamation Board by Governor Rolph. Mr. Barton, a former army engineer, is now completing his eighth year in the office. He also has served as chief engineer of the American River Flood Control District.

Fresno has fewer civil engineers than the normal ratio throughout the state, Donald M. Baker of Sacramento, president of the State Board of Registration for Civil Engineers, told the Fresno Engineers' Club at a recent luncheon meeting. "The average in the state is one engineer to every 1,000 people," he said. "In Fresno County there are only sixty. California has 5,000. We are planning stricter enforcement of the state law which requires men in charge of design to be registered with our board."

George C. Jacobs and Newton Ackerman, architect, operating under the firm name of George C. Jacobs Company, mill work and building materials, with headquarters at Anaheim, announces dissolution of the partnership. The business will be continued with Jacobs as sole owner.

THE OBSERVER

What He Hears and Sees on His Rounds

Because an automobile can stand the vagaries of the weather when being run or while waiting at the curb, sponsors for a new garage proposed for Providence, R. I., argue that it can stand being stored in a wall-less garage. They are planning a 4-story one with the first story of conventional construction, offering store rental space, with the upper 3 stories wide open to the winds. Other arguments are comparatively low building costs, freedom from carbon monoxide hazards.

According to word from New York City, the Lehigh Portland Cement Co. has reduced the price of cement 10c a barrel in Maryland and the District of Columbia. The cut is understood to meet price shading by smaller companies in the territory.

Under an ordinance adopted by the Redwood City Council, architects will pay the city a license fee of \$12 a year. The ordinance provides a penalty of \$300 and a 90-day jail sentence in the event of violation.

Bank executives of the country emphatically agree with President Hoover that home building and home buying form a great and desirable channel for return to normal creative employment of capital and to normal prosperity. Statements from executive heads of leading banks and trust companies made to the National Association of Real Estate Boards in response to a telegraphic inquiry sent out last week and made public by Herbert U. Nelson, executive secretary of the Association, heartily endorse the President's position. They assure the support of the financing agencies they represent in a continuing movement toward residential activity. The opening of such a movement is already indicated.

A proposal to create a method through which qualified real estate appraisers could be certified as such will come before the National Association of Real Estate Boards at its annual meeting, to be held in St. Petersburg, Florida, January 15, 16 and 17.

The proposal will come before the meeting in a report to be made to the executive committee of the Appraisal Division by Philip W. Kniskern, of New York. Mr. Kniskern is chairman of a special committee appointed some months ago by the Division to work out and bring before the coming meeting a tentative plan for certifying or otherwise attesting qualified valuers of real estate.

The proposed plan, after discussion by the Appraisal Division at a meeting of its executive committee, will be brought before the general delegate body of the Association.

Attestation of qualified appraisers by a group of their peers is proposed to advance the work of establishment of standards of practice for the appraisal of real property and to further safeguard the public in all matters in which the accuracy and soundness of the real estate appraisal is the key factor.

Threat to campaign against the proposed \$300,000 San Mateo Union High School bond issue for school extensions was made at a mass meeting held by citizens, unless steps are tak-

en to hire local workmen on the new building. Labor union representatives state that county workers have not been protected heretofore in public and civic projects.

If the opinion of members of the Fresno County Board of Supervisors are followed, the construction of additions to county hospital, for which bonds of \$250,000 were recently voted, will be carried on under the segregated contract plan rather than under a general contract. Each member of the board expressed himself as favoring the segregated bid system.

A survey of the operations of 29 retail lumber yards in Colorado and Wyoming by the University Extension Division, University of Colorado, in cooperation with the Mountain States Lumber Association, shows a gross business of \$3,449,169 for the year 1929. The total cost of merchandise was 73.5 per cent, the total expense was 13.5 per cent and the net profit was 6.95 per cent. The net profit of the same yards for 1928 was 7.2 per cent and for 1927 was 7.5 per cent.

Tacoma, Wash., Section of the American Society of Civil Engineers has gone on record as favoring the proposed state license law for the engineering profession to be submitted to the Washington State Legislature this month. The measure was killed in committee at several previous legislatures.

After several amicable meetings with employers of union journeymen, members of Plumbers' Local No. 78, Los Angeles, adopted the five-day week. Under the terms of the present agreement the old established rules of the local prohibiting members to contract labor or work on the piece work basis were reaffirmed.

Efforts will be made in Washington State to put a bill through the Legislature increasing the tenure of office of county commissioners of that state. The bill will be sponsored by the Washington State Association of County Commissioners and the Washington State Association of County Engineers. Under the present law, county commissioners may serve only two successive terms of two and four years, respectively. The commissioners' organization proposes to lengthen these terms to four and six years, respectively, increasing the possible tenure of office from six to ten years.

Underestimating the cost of the proposed improvements may seriously upset the financing arrangements of the property owner and may easily be the forerunner of many troubles, it is set forth in the lesson on financing the home in the general real estate course given jointly by the California Real Estate Association and the University of Southern California. One should never attempt to build without having a plan that satisfies him and that is complete in all details. The specifications in particular should be complete, especially as to those details which if overlooked, are likely to lead to extras which have not been included in the estimated or contract price.

The Oakland city council has approved final passage of an ordinance requiring the installation of gasoline storage tanks inside property occupied by service stations instead of under sidewalks. Trucks must load tanks while parked inside property lines instead of from the streets.

"Those who may be entertaining the belief that federal government officials at Washington are not doing all possible to expedite the nation's public building program are mistaken in such assumption," says John Graham, Seattle architect, who recently returned from Washington, after conferring with the U. S. Treasury Department on plans for the proposed Marine Hospital at Seattle. Mr. Graham, associated with Bebb & Gould, Seattle architects, is preparing plans for the new hospital which is estimated to cost \$1,750,000.

The Building Trades Employers Association of Pittsburgh, Pa., announces adoption of a plan of rotation of available employment in those trades among men now at work and those out of jobs. The plan, F. O. Reed, association secretary, said, is expected to provide part-time work for 5000 of the 11,000 building trades workers estimated to be unemployed in Pittsburgh. Under the scheme, the men will work on alternate weeks, preference being given former employees of individual concerns.

State participation in construction of the Golden Gate bridge, which would connect San Francisco with Marin County, is sought in a bill introduced in the assembly by Frank L. Gordon, Suisun.

Under provision of the proposed measure the state would participate with funds either now available or from a special appropriation to be asked of the legislature.

The amount of the money the state would expend under the provision of the bill has not been determined. The act would provide for allocation of costs by a committee composed of members of the bridge district, boards of supervisors of the counties which comprise the district and state department of public works.

Gordon said it was too much to expect for the counties and the district to stand the entire cost of the bridge and consequently he is asking the state to aid in the project.

Unemployed are urged to stay away from Sunnyside, Santa Clara County, the site of the proposed naval dirigible base. M. B. Eaton, secretary of the Sunnyside Chamber of Commerce, announces that the unemployed have been given to understand that the registration of men is underway for employment on the project. Such is not the case.

Under a decision just made public by the Interstate Commerce Commission in the case of the Blue Diamond Company of Nevada against the Santa Fe Railroad et al, the rate on gypsum in carloads from Arden, Nev., to Monmouth, Calif., is held unduly prejudicial to the complainant. An order has been issued that the rate in the future shall not exceed 12 cents per 100 pounds, subject to a carload minimum of 30,000 pounds.

Spanish Peak Lumber Company, operating a large mill in Meadow Valley, near Quincy, Plumas County, reduced wages 10 to 15 per cent effective as of January 1. Notices to employees said the reduction conformed to the downward trend in the price of manufactured lumber. Prices at the company boarding house also were reduced from \$1.35 a day to \$1.20.

TRADE NOTES

A. M. Mortensen, president of the San Jose Chamber of Commerce, announces the organization of A. M. Mortensen, Inc., for the manufacture of the Cuthbert air compressor, the invention of a San Jose man. In addition, the company will distribute a complete line of service station construction, management and maintenance. A plant has been leased at 138 Stockton avenue, San Jose.

Western Door & Sash Company of Oakland has opened a San Francisco office at 320 Santa Maria Building, 112 Market Street. R. S. Grant for many years connected with the old California Door Company, is manager of the San Francisco branch. The company carries a complete line of sash, windows, doors, panels and built-in fixtures.

Brownson Patents, Ltd. has been organized in Fresno to manufacture and market gas heater, appliances and devices. Stockholders in the company are Walter E. Bruns, W. H. Moeller, J. C. Hammel, M. L. Hoff, J. F. Moody, Charles G. Gonsors, Kenneth R. Brown, F. H. Conners, Warren G. Moody, J. Herrera, Hugh G. Rodgers, Arsen M. Thomas, Forest L. Brown, R. W. Millard, L. J. Kenalyan, Ernest Scrlon, Mrs. Waldo Shipman, W. G. Donovan, H. S. Cedarquist, M. K. Gibbs and W. B. Backlund.

Agency for the Pacific line of deep well turbine centrifugal pumps in the territories surrounding Tulare, Hanford, Visalia, Lindsay, Tipton, Corcoran, Exeter, Porterville, Pixley and Earlimart has been taken by the Lindsay Pump and Machinery Co. of Lindsay, Calif. A branch office has been opened in Tulare with Harvey Sherwood in charge.

The American Holist and Derrick Company, having closed their branch office in Emeryville, Calif., announce the appointment of Harro, Rickard & McCone Co. of 1600 Bryant St., San Francisco, and 2205 Santa Fe Ave., Los Angeles, as their exclusive representatives in the sale of their line of hoisting equipment, consisting of electric, steam and gasoline hoisting engines, slewing engines, derrick irons, sheaves and blocks. Stocks of equipment and repair parts will be carried in the San Francisco and Los Angeles warehouses of Harro, Rickard & McCone Company.

A machine to mix material on the road for oiled surfacing of highways has been successfully used on a state highway job in Montana, according to

Fowler & Myers Company, manufacturing concrete pipe, have started operations in the new plant in Kings City, Monterey County. The company also operates similar plants at Somas and San Fernando.

R. J. Cordner, Northwest manager of the Edison General Electric Appliance Co., Inc., 2032 Second Ave., has been named Pacific Coast manager of the company with headquarters in San Francisco. He succeeds Ray Turnbull who was promoted to the vice presidency of the Edison company and who hereafter will be located in Chicago. Cordner's place in the Seattle office will be filled by J. C. Platt.

BUILDING PERMIT STATISTICS OF PACIFIC COAST CITIES FOR THE MONTH OF DECEMBER, 1930 AND 1929, AND FOR THE YEARS 1929 AND 1930 AS REPORTED BY BUILDING DEPARTMENT EXECUTIVES OF THE CITIES REPORTED.

CALIFORNIA

City	December, 1930 No.	Cost	Dec. 1929 No.	Cost	Year, 1930 No.	Cost	Year, 1929 No.	Cost

HERE—THERE
EVERYWHERE

C. W. Fairbanks was elected president of the San Luis Obispo County Builders' Exchange at the annual meeting of that organization last Tuesday. W. J. Charters was elected vice-president and James Jepson, treasurer. H. J. Kyle was elected sergeant-at-arms. Directors are Jas. Quaglin, H. M. Holzinger, Robert Forbes, W. A. Charters and Ross McMillan.

Installation of officers of the San Luis Obispo County Builders' Exchange was held last week with a banquet at the Anderson Hotel in San Luis Obispo. Officers installed were: President, C. W. Fairbanks; Vice-President, W. J. Charters; Treasurer, James Jepson; Sergeant-at-Arms, H. J. Kyle. Board of Directors—Ross MacMillan, H. M. Holzinger, W. J. Charters, Robert Forbes, James Quaglin. Executive Secretary, J. F. Soback.

O. J. Amberg of Spokane was re-elected president of the Northwest Branch, Associated General Contractors of America, at the close of the annual convention held in Seattle, January 10. J. A. Lyon, Spokane, was elected treasurer, and J. M. Clifton, Spokane, corporate secretary. The heads of three chapters, Portland, Spokane and Seattle, will, as according to custom, serve as directors of the Northwest branch. Geo. D. Lyon is president of the Spokane chapter, James Murdoch of the Seattle group and W. T. Jacobsen of the Portland chapter.

Basalt Rock Company of Napa, has leased property in South Vallejo and will establish a plant to serve as an all-rail-and-water outlet to and from its plant near Napa.

TRADE LITERATURE

Durabilt Steel Locker Co., Aurora, Ill., has issued a 16-page illustrated catalogue with A. I. A. file cover featuring the solution of gymnasium storage problems which has been reprinted from recent issues of the Journal of Health and Physical Education. Copies of the booklet, of particular value to architects specializing in schools, halls and society buildings, churches and hospitals, will be sent upon request.

The complete line of Westinghouse electric service plants is described and illustrated in an eleven-page folder, identified as MK 1284, recently published by the Westinghouse Electric & Manufacturing Company. These electric plants are made in several sizes, from which the correct size for any of a number of applications may be chosen. Supplying power for farms, rural homes, camps, boats, stores, buildings, amusement parks, mines, quarries, and motion picture theatres are some of the applications of these plants. This new publication includes in addition to the electric plants, a brief description of Westinghouse Batteries for use with the service plants and a page on Westinghouse water systems.

During the past year 114 new industries were established in San Francisco as compared with 90 during 1929, according to the Industrial Department of the Chamber of Commerce. Although these new plants, with 1094 people on their pay rolls, employed 250 fewer people than those established during 1929 their estimated annual pay roll of \$2,299,860 exceeds by \$169,890 the estimated pay roll of the new plants started in the previous year.

ENGINEERING SOCIETIES
EMPLOYMENT SERVICE

Further information regarding positions listed in the column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone Sutter 1684).

R-3453-S SALESMAN, experienced, with a fair amount of technical training and good knowledge of chemistry of metals, to sell roundry products. Must have qualities of leadership in sales department. Salary open. Location, San Francisco.

R-3452-S SENIOR PERSONNEL EXAMINER for Engineering and Trades positions. Should be graduate civil or mechanical engineer with special training and experience to qualify for testing of applicants for technical position. Age limits, 25-50 years. Salary \$250-\$300 month. Apply by letter for full details. Location, California.

R-3369-S - ENGINEER, mechanical or electrical, not over 30, with 3-5 years experience on hydro-electric plant operation for service and testing. Must have mechanical skill, agreeable in field. Apply by letter. Headquarters, San Francisco.

R-3303-S ENGINEER, preferably mechanical or chemical graduate, with 5 to 10 years experience including considerable application of thermodynamics to solution of heat exchange problems as found in oil refinery equipment. Must have executive ability. Apply by letter with details of experience, references and photo. Salary \$200-\$250 per month to start. Location, Northern California.

K-337-W-2182-C-S SPECIALISTS on oil well drills, drilling machinery and equipment. One designer, technical graduate, experienced; one machine shop production man; one tool man for machining operation; one forge-shop foreman; one heat treater. Salaries open, will be based upon earnings in U. S., subject to Russian income tax, about 10%, payable in U. S. money to American bank. Contract for 1 or 2 years, renewable. Applications only by letter showing education and details of experience. Location, Russia.

K-338-W-2183-C-S SPECIALISTS on oil cracking equipment, boilers, bubble-towers, evaporators, piping, etc. One designer, graduate; one production foreman; one welder foreman and instructor; one field man for erection, etc. of stills, towers, etc.; one foreman for pipe fabrication and installation; one field man for installation of valves, etc.; one field man for installation and adjustment of control and measuring apparatus; one electric foreman for steel foundry; one open hearth steel foreman for melting and casting of alloy and special steel ingots. Salaries open, based on earnings in U. S. Entire salary subject to Russian income tax of about 10%. Contract for 1 or 2 years, renewable. Applications only by letter showing education and details of experience. Location, Russia.

Barnewitz Painting and Decorating Co. has opened new quarters at 521 Marin Street, Vallejo, and will carry a complete line of stocks for the wholesale and retail trade, including Super-lac Enamel and Morwer paints of the Friedman Paint Company of Oakland.

PURPOSES OF TIMBER STRESS COMMITTEE TOLD

F. O. Dufour of Philadelphia, Pa., chairman of the recently appointed subcommittee of the National Committee on Wood Utilization of the Department of Commerce, for the purpose of passing in working stresses for timber, believes that in the establishment of such a body an important step has been taken toward solving one of the most perplexing problems confronting the lumber and building industries.

"Through voluntary co-operation between the lumber industry on the one hand, and the consumer groups represented on the committee by some of the nation's foremost engineering talents on the other, it is hoped that many of the existing uncertainties pertaining to timber stresses may be eliminated," Mr. Dufour stated.

For centuries, it was pointed out, engineers and builders have struggled with the problem of the efficient use of wood. Unlike most other building materials, wood is not of a homogeneous nature. There are in this country alone more than on hundred different species, most of which are used in building and construction. Each has its own peculiar characteristics and properties with which the consumer must be familiar in order to obtain the most effective and economical use of the material. Fortunately, the problem is somewhat simplified by the fact that only a few of the most important species are commonly used for structural purposes where stress values play an essential part. "Realizing the great need for definite data on the strength properties of the various species of wood," Mr. Dufour continued, "the United States Governments through its Forest Product Laboratory at Madison, Wisconsin, has conducted hundreds of thousands of tests. Consequently, there is available in the subject of timber stresses a mass of information which now needs to be adapted to current grades of lumber produced."

It was explained that some years ago the Forest Products Laboratory recommended definite working stresses applicable to the various basic grades of timber of the different species. These recommended stresses, however, do not apply in most instances to present day grading practices, for the lumber manufacturers during recent years have made certain changes of grades in order to make their product more adaptable to the specific needs of consumers. Confusion as to working stresses of commercial grades has developed.

"It is obvious that the Forest Products Laboratory, which primarily is a research organization, with its multitudinous responsibilities cannot be expected to bear the burden of interpreting and applying to commercial grading practices the stress data which it develops. The new Timber Stress Committee, therefore, will be a valuable aid to the laboratory in making practical use of its findings," Mr. Dufour concluded.

Establishment of such a body as the Timber Stress Committee, while a new departure in the lumber field, is not an experiment in other industries. The steel industry, for one, has had for a number of years the advantages of a similar organization, passing on the stress values of structural steel.

The new subcommittee, according to officials of the National Committee on Wood Utilization, is a logical follow-up to the successful consummation of the standardization program of the Department of Commerce definitely

fixing lumber sizes and grades in accordance with American Lumber Standards. It is difficult to conceive of another item on the program of the Wood Utilization Committee which would have a more important bearing on the proper utilization of the country's timber resources, it was said.

PORTLAND PLANS MUNY POWER PLANT

Portland, Oregon, city council has adopted a resolution providing for "immediate action" that Portland might have a municipally owned power and light plant. The resolution was introduced by Ralph C. Clyde who was elected on a public ownership platform. The vote was 3 to 2.

The resolution declared the council in favor of a municipally owned and operated power system; authorized Clyde as commissioner of public utilities to proceed immediately with investigation of a feasible method, and called on the council to make available any or all of the \$25,000 recently appropriated for power survey purposes.

JACOBSEN HEADS MONTEREY EXCHANGE

Andrew Jacobsen was re-elected president of the Builders' Exchange of Monterey County at the annual meeting of that organization last Wednesday evening.

Other officers re-elected include Fred Ruhl, Pebble Beach, vice president; Dio Dawson, Carmel, secretary; Harold Prince, Monterey, treasurer; and Joseph Goodrich, Monterey, sergeant at arms. The executive board will consist of Ed Simpson, Pacific Grove, Ruhl, John McNeil, Monterey, and Fred Prince, Monterey and Hugh Comstock, Carmel.

In addition to selecting officers for the year the exchange organized its 1931 program of activities.

GLASS DEVELOPED AS A BUILDING MATERIAL

America knows glass as something with which to fill window frames. In Europe, particularly in Germany, it is being used to replace concrete blocks, brick, hollow tile, plaster, and other materials commonly employed for exterior and interior walls and partitions, the Business Week reports.

The Siemens Glass Works of Dresden, Germany, has been especially active in developing new types of glass, and through its American representatives, the Structural Glass Corp. of New York, American builders will be able to include this new material in their plans. The Siemens Co. supplies prisms for sidewalks, floors, and roof lights; tile for windows, walls, and partitions; hollow block for walls and partitions.

MASTER PLUMBERS OF S. F. ELECT OFFICERS

I. V. Young of the Gilley-Schmid Co. was re-elected president of the Master Plumbers' Association of San Francisco, at the annual meeting held last month. Chas. Mayer of Albhach & Mayer was re-elected vice-president, Alexander Coleman, treasurer and Jack Camp, re-elected secretary.

Directors of the association, including the above named, are: Wm. J. Monihan, Louis Bernstein, Jas. H. Pinkerton, Jos. Rohr, A. C. Trezise, J. D. Vecchio, N. J. Cohen, Wm. F. Gross, Chas. Noury, Roy Murray and V. J. Peterson.

MONTEREY BUILDERS TO WORK WITH UNIONS

Continuation and strengthening of the amicable relations which exist between the Builders' Exchange of Monterey county and the Building Trades Council, representing organized labor, occupies first place in the exchange program for 1931 according to Andy Jacobsen, president.

"We have been operating harmoniously for a year now with committees of the Builders' Exchange and Building Trades Council co-operating," Jacobsen said, "and we shall do everything in our power to continue this satisfactory relationship."

Jacobsen, who was president of the exchange in 1926 was re-elected at a meeting last week. Other officers re-elected include Fred Ruhl, Pebble Beach, vice-president; Dio Dawson, secretary; Harold Prince, Monterey, treasurer; and Joseph Goodrich, Monterey, sergeant at arms. The executive board is composed of Ruhl, Ed Simpson, Pacific Grove; Charles Frost Monterey; John McNeil, Monterey, and Hugh Comstock, Carmel.

ADVERTISING URGED TO WIN THE PUBLIC

Speaking at the recent meeting of the Millwork Institute of California, C. H. White, vice-president and general manager of White Bros., San Francisco, said:

"Is it not a fact that the woodworking industry is down because the general public does not understand it, isn't even interested in it, and doesn't know that it exists? The people who are competing against us have taken the pains to put themselves before the public in a favorable light."

"When times resume, I think we will all admit that times are bad, but we hope they are convalescing; and our competitors in substitutes are looking for these general times, too, and are preparing for them; I believe that the woodworking industry must increase its advertising efforts to the general public. I might say in passing that one of the principal things which will bring on normal conditions of business is the passing on to the consumer of the reduction in wholesale prices of material. The hardwood dealers are passing the reduced sawmill prices on to the planning mills, and I just want to leave this little thought with you—that is, you should pass these reduced prices to your customer. I think this is a necessary thing to do. When good times resume, when everybody does it, we will be back to normal again."

CELOTAX ANNUAL REPORT IS ISSUED

Earnings of the Celotax Company for the fiscal year ended October 31, 1930, amounted to \$1,017,437.50 before depreciation, fixed charges and Federal taxes, the annual report to stockholders states. After writing off \$479,970 for depreciation, \$255,448 for interest charges, including amortization of discount and expense on funded debt, and \$38,000 for Federal income taxes, a net profit of \$234,079 was carried to surplus.

During the fiscal year total net sales decreased 17 per cent.

The balance sheet as of October 31, shows total assets of \$17,129,094. Current assets of \$2,982,094 compare with \$1,144,393 of current liabilities.

FACTO. ARCHITECTS FORM ORGANIZATION

Practicing architects in the Capitol City have completed organization of a new association known as the Society of Sacramento Architects.

Leonard F. Starks of the firm of Starks & Flanders, is president of the society, Harry J. Devine is secretary, and Charles P. Dean is treasurer.

The organization has an initial membership of nine practicing architects. There are about twenty-three architects in Sacramento County.

In discussing the aims of the society, Mr. Starks said the organization will make a strong effort to have the federal government distribute to architects the jobs of preparing plans and specifications for new federal buildings, thereby speeding construction.

The society also will favor legislation beneficial to the building trades and aid in the revision of several existing ordinances governing the erection of buildings, which were deemed inadequate to meet current needs and which, in many cases, work a hardship on the public as well as creating many unnecessary responsibilities on the part of city officials.

It will work as a sub-committee on legislation concerning highway beautification, involving landscaping, sign-board regulation and the erection of small business buildings along the sides of roads.

The society will favor standard contract documents and standard practices of payments to contractors on building projects, so sub-contractors and material dealers will be protected properly and the building industry, in general, will be placed upon a thirty-day cash basis.

Mr. Starks said the organization will work in conjunction with the State Association of California Architects and the State Board of Architects.

STATE'S MINERAL PRODUCTION IN 1930

The total value of the mineral production of California for the year 1930 is conservatively estimated by the statistical division of the State Division of Mines under the direction of Walter W. Bradley, State Mineralogist, to have been \$347,797,000. This is, in part, detailed in the tabulation below, but, as there are more than fifty mineral substances on California's commercial list, it is impracticable at this early date to obtain definite figures on other than the more important items. The tabular report, however, being mailed to the operators in all mineral lines, and the detailed and complete report will be compiled and published later.

The estimated total of \$347,797,000 is a decrease of approximately \$84,450,000 from the value of 1929 production. The decrease is due mainly to petroleum and in a smaller measure to cement, copper, structural materials in general, industrial materials, and salines. Increases in value were shown by natural gas, gold, and lead. There was a decrease of approximately 64,000,000 barrels in quantity of crude oil, with the average per barrel practically the same as for 1929.

The structural group showed about a 20% decrease throughout on account of lesser construction work during the year. The industrial and saline groups will show decreased totals.

The estimated values and quantities for 1930 are as follows: \$9,034,000, gold; \$557,000 (1,445,000 fine oz.), silver; \$3,238,000 (26,113,000 lbs.), copper; \$17,000 (3,423,000 lbs.), lead; \$11,700 (10,500 flasks), quicksilver; \$125,-

nese, platinum, tungsten; \$251,600,000 (228,300,000 lbs.), petroleum; \$30,855,000 (425,000,000 M cu. ft.), natural gas; \$16,862,000 (10,282 M. lbs.), cement; \$15,000,000, crushed rock, sand, and gravel; \$1,500,000, brick and hollow building tile; \$173,000 (45,000 tons) magnesite; \$1,250,000, other structural materials including granite, lime, etc.; \$5,700,000, miscellaneous industrial minerals; \$8,000,000, salines, including borates, potash, salt, soda, etc.

PAINTERS ATTEMPT UNEMPLOYMENT AID

A resolution designed to aid the unemployment situation has been passed by the Seattle chapter of the Northwest Master Painters Association, Inc. The resolution follows:

Whereas, the unemployment situation in our industry is very acute and threatens to become worse in the approaching winter, and

Whereas, President Hoover has appointed a committee on unemployment headed by Paul Wood and

Whereas, this committee is doing everything possible to alleviate this unemployment situation, and

Whereas, the Seattle Chapter of the Northwest Council of the International Society of Master Painters and Decorators, Inc., as an employer's organization is desirous of assisting the President of the United States in his efforts to alleviate this situation, and

Whereas, the Seattle Chapter of the Northwest Council of the International Society of Master Painters and Decorators, Inc., at its meeting of December 10th expressed its sympathy with this movement,

Now, therefore, be it resolved that the Seattle Chapter of the Northwest Council of the International Society of Master Painters and Decorators, Inc., recommend to its membership that during the coming winter, they stagger the unemployment of their men to the end that as many men as possible may find employment, and be it further resolved that it shall be unethical for a member to employ a man temporarily unemployed as a result of this resolution.

And, be it further resolved that a copy of this resolution be read to the members at its next regular meeting and also that a copy be forwarded to the Secretary of the International Society and to the President.

MORTGAGE CONCERNS AND MATERIAL MEN WILL DISPUTE LIENS

A discussion between the mortgage companies and the building material dealers of Oregon state will be held on the floor of the legislature at Salem this month.

A bill, backed by several of the mortgage and loan companies, it is said, is to be presented providing for the amendment of section 10193, Oregon laws, to change the priority of the liens on material and make them subordinate to mortgages and other incumbrances.

If the amendment carries, according to many, material men will not be deprived of a lien, but will have one inferior to labor liens and mortgages.

A direct threat to the building trades is seen in the proposal by building material men who are combining efforts to combat the act in the legislature.

A direct mail appeal is being made by the material dealers of Portland urging that the measure be killed. The Portland Lumbermen's Association of Spokane, Wash., is said to have joined the Oregon dealers in the fight to kill the proposed legislation.

METAL CONGRESS PROGRAM OUTLINED

Numerous items of interest to the building industry have been included on programs of the Western National Metal Congress, to be held February 16 to 20 in the civic auditorium, San Francisco, according to officials of the American Society for Steel Treating.

Discussions of chromium steels, stainless products and rust resistants as applied to trims for structural work will be found in plenty on the five days of technical programs, according to W. H. Eisenman of Cleveland, secretary of the society.

One of the speakers, A. F. Davis, of Cleveland, has been assigned to talk on structural arc welding, as a substitute for the noisy riveting hammer in erecting building frames.

The Western National Metal & Machinery Exposition, according to Eisenman, will feature many new metals, especially designed for the building user. The show will take place on the same dates as the convention of technical men, and will be held in the same building.

Nitriding, new process by which extreme hardness and smoothness is obtained in steel by injecting nitrogen from ammonia gas into the metal's pores, will be discussed in full by several speakers, with a view to making the talks apply to building operations, it is said.

J. H. Knapp, of Los Angeles, and Dr. O. E. Harder, of Battelle Memorial Institute, Cleveland, have been assigned to cover this topic in detail.

Probably 50 talks will be included on the five days of technical sessions, according to Eisenman. These will be timed in such a way that they will not interfere with inspection of the exposition displays. In the exposition, many of the booths will have machines in operation to add to the clearness of the demonstrations.

Speakers will include J. H. Watson of Detroit; A. E. d'Arcambal, Hartford; A. G. Ford, Falmouth, Cambridge; E. F. Shepherd, Philadelphia; N. J. W. B. Coleman, Philadelphia; F. B. Drake, Berkeley, and Dr. Harder.

At least thirteen prominent technical societies will participate in the convention and exposition. They are, in addition to the steel treaters' group: American Welding Society, American Chemical Society, Institute of Metals, American Institute of Mining and Metallurgical Engineers, American Society of Mechanical Engineers, National Purchasing Agents' Association, Pacific Coast Electrical Association, Pacific Coast Gas Association, Society of Automotive Engineers, American Society for Testing Materials, National Association of Power Engineers and American Institute of Electrical Engineers.

STATE LABOR LAWS LAUDED BY FRENCH

Will J. French, State Director of Industrial Relations, last Monday outlined some of the work that labor legislation in California has accomplished in recent years in an address before members of the San Francisco Electrical Development League.

Principally, he said, it has established the security, promoted the welfare and prevented the exploitation of working men and women. In addition, it has made working conditions so much more sanitary and less dangerous that the death rate from accidents and other causes has been kept down to the same level it held fifteen years ago despite the enormous increase in the number of workers.

LIGHTING STANDARD REJECTION UPHELD BY LOS ANGELES JUDGE

Refusing a peremptory writ to compel City Engineer Hooper of Pasadena to accept the electric lighting and trolley posts installed on Lake Ave. in a \$160,000 improvement, Superior Judge Yankwich held that the courts will not substitute their judgment for that of a city official exercising discretionary power on reasonable grounds, says Southwest Builder and Contractor. The writ was sought by G. W. Bond & Son and Puccini & Breitenstein, contractors. The Marbelite Company was brought in as a defendant.

City Engineer Hooper refused to accept the posts installed on the ground that they were not in compliance with the specifications. A personal inspection of the posts was made by Judge Yankwich.

Judge Yankwich held the city engineer is sole judge as to interpretation of all specifications.

"Even if we should reach a different conclusion, the writ could not issue," Judge Yankwich said. "For we cannot substitute our judgment for his except where there is no reasonable ground to justify his decision other than one way."

The judge held that the engineer's position may be sustained on the assumption when the specification requirements are satisfied, Hooper would not deliberately refuse to accept the work upon a ground not sanctioned by law. The opinion sets forth:

"Mandamus is never granted in anticipation of a supposed omission of duty, however strong the presumption may be that the persons whom it is sought to coerce by writ will refuse to perform their duty when the proper time arrives. The problem cannot be solved by protecting ourselves into the future. If there be, among his grounds for refusal, grounds tenable or reasonable—they as completely constitute a sufficient defense to the issuance of the writ as if they were the sole grounds, not intermingled with others which have no legal significance."

He ruled there cannot be a reassessment and that he cannot compel acceptance of the curbing and other street work which is not disputed.

GOV'T. TO OBSERVE LOCAL WAGE SCALES

In announcing that the total expenditure by the federal government for public works during the calendar year 1931 will be \$724,658,000, President Hoover let it be understood that the government will insist that contractors on the work shall observe the prevailing wage scales in the various sections and communities.

This is in accordance with the more restrictive policy favored by the Senate in attempting to insert an amendment in the \$116,000,000 emergency construction bill stipulating that local wage rates be paid in all work done under the terms of the measure. This amendment, however, was taken out upon the insistence of the House.

It is pointed out that the President has preserved the spirit of the amendment but has left out its restrictions.

Oakland city council has approved an appropriation for \$400 to be used by the Building Trades Council of Alameda County to help in defraying expenses of the state convention to be held in Oakland in March.

BREACH OF CONTRACT IS ALLEGED IN SUIT

The \$586,059.90 suit of H. H. Boomer, contractor, against R. C. Storrie & Company, Robert C. Storrie, Robert B. Muir and others began last Tuesday in the court of Superior Judge, Franklin A. Griffin of San Francisco.

Coupled with this suit is the action brought by the defendants against Boomer, in which they ask damages of \$128,322.12, alleging breach of contract.

The actions arise from a contract entered into by the Storrie Company and Boomer in 1925 for Boomer to construct a dam and hydro-electric power project at Buck's ranch, Plumas county, as a unit of the Feather River Power Company. Boomer and the Storrie Company both allege that the other broke its part of the contract.

SEATTLE COUNCIL PLANS 5-DAY WEEK

Submission at the March 10 election of a proposed charter amendment limiting the work period of all city employees to five days per week is asked of the Seattle city council by the Central Labor Council.

"Economists agree that no permanent solution of the present unemployment problem is possible without a material lessening of the hours of work and an increase of compensation for the producers of the country," the petition filed by the labor council declared.

"Private employees cannot be expected to move faster in this direction than public employers."

The petition was referred by the city council to its judiciary and finance committees.

CLE ELUM DAM PLANS UNDER WAY

Plans for the Cle Elum dam, the sixth and last of the series forming the water-storage system of the Yakima reclamation project in Washington, are being prepared by engineers of the U. S. Bureau of Reclamation. An appropriation of \$15,500,000 is available and it is hoped that construction can be started in the spring.

The dam, which will be on the Cle Elum River near Ellensburg, Wash., will be 125 ft. high and 700 ft. long. It will form a reservoir of 4,680 acres, in which will be stored 435,000 acre-feet of water.

\$21,000,000 FOR POWER DEVELOPMENTS

Continuance of the expansion program of the Puget Sound Power and Light Co., Seattle, Washington, is announced. During 1931 the company will spend nearly \$21,000,000, inclusive of construction costs, operation and maintenance, taxes, and local dividends and interest. Construction plans to be carried out include expenditures totaling \$10,310,000. Most of this amount is for power plant, transmission and distributing system costs. In 1930 these items aggregated \$12,201,000; for 1931 the total is \$9,308,000. For carrying on work at Rock Island \$6,755,000 is allotted, and for the transmission line over the Cascade from Rock Island, \$17,000, bringing the total to be expended to that hydro-electric project to \$7,602,000.

L. A. COUNTY BUILDING PERMITS

During 1930 permits for 5331 buildings and structures estimated to cost \$12,566,187 were issued in the unincorporated territory of Los Angeles county. Following are the permits classified according to use or occupancy of buildings:

Residences	1863	\$ 5,681,000
Duplexes	50	312,900
Apartments	53	2,731,100
Bungalows	27	210,100
Commercial	391	1,684,055
Industrial	67	821,000
Hospitals	6	133,500
Schools	5	68,500
Private garages	1345	320,500
Miscellaneous	1229	1,385,971
Totals	5351	\$12,566,187

An interesting feature in the construction of Boulder dam, or Hoover dam, as it officially designated, will be a cooling system to dissipate the heat generated by the setting of cement in the concrete. Refrigerated water will be forced through pipes embedded in the concrete. This will be the first time such a system has been used. Due to the great depth of the structure at the base, 650 ft., it is quite necessary that something be done to reduce the temperature of the concrete and prevent serious cracks by subsequent contraction. The amount of heat to be dissipated will be approximately 700 British thermal units per cubic yard of concrete. About 800,000 ft. of 2-in. standard pipe will be required for the cooling system. This will be furnished by the government, but the contractor will install it and furnish and operate the cooling plant, which must have a capacity to reduce the temperature of a ton of 2000 lbs. of water per minute from 47 degrees to 40 degrees Fahrenheit.

Co-operating in a statewide campaign to restore confidence in the ranks of salaried employees, the San Francisco Chamber of Commerce is sending letters to more than nine hundred employers within the city asking them to assure their workers of the safety of their positions. The letter which is signed by President Cutler, emphasizes the depressing effect on business caused by the tendency of workers to hoard their salaries in anticipation of dismissal, and suggests that a return to normal spending might be accomplished through the elimination of this fear.

Harry A. Trueblood, master plumber, and a member of the Modesto city council, who died suddenly several weeks ago, left an estate valued at \$128,167.69, according to the report of Harry Windus, inheritance tax appraiser. The estate consists of \$38,527.40 in personal property; \$17,540.29 in cash, and real property valued at \$52,100.

Richmond Contra Costa County, will put 160 heads of families to work in the street, park and other municipal departments to relieve the unemployed men in that city. The men will work three days a week.

Brantley Miles, 20-year old elevator operator, found dead in a San Francisco apartment house, has been identified as the nephew of Roderick Miles, architectural designer and the State Department of Public Works at Sacramento.

Building News Section

APARTMENTS

Sub-Bids Being Taken.

APARTMENTS—Cost, approx. \$300,000
ALAMEDA, Alameda Co., Cal. NW
Webster and Taylor Sts.

Seven-story class B reinforced concrete and steel apartments (60 2- and 4-room apts.)

Owner—J. S. Bercoff, Actico Bldg., Oakland.

Plans by Thomas Keenan, 1440 Broadway, Oakland.

Contractor—G. P. W. Jensen, 320 Market St., San Francisco.

Contract Awarded.

ALTERATIONS—Cost, \$—
SAN FRANCISCO. No. 499 Buena Vista Avenue.

Alter residence for apartments

Owner—Mrs. J. A. Wilcox, Premises, Architect—Henry H. Guttersen, 526 Powell St., San Francisco.

Contractor—Clinton-Stephenson Construction Co., Monadnock Bldg., San Francisco

Sub-bids will be taken in about one week.

Plans Being Prepared.

APARTMENTS—Cost, \$—
SAN FRANCISCO. Clay Street.

Three-story and basement frame and stucco apts. (nine 3-room apts.)

Owner—Withheld. Architect—Masten & Hurd, 210 Post Street.

Owner Taking Sub-Bids.

APARTMENTS—Cost, \$25,000
BURLINGAME, San Mateo Co., Cal.

Two-story and basement frame and stucco apartments (17 2- and 3-room apts.) (tile garage 36x64 ft.)

Owner—E. Cobo, 375 N. Delaware St., San Mateo.

Plans by Grimes & Schoening, Balovich Bldg., San Mateo.

Sub-bids are desired on all portions of the work excepting carpentry and painting.

Sub-Contracts Awarded.

REMODELING—Cost, \$6000
OAKLAND, Alameda Co., Cal.

Remodel 2-story and basement frame and stucco store and apartments.

Owner—A. Tullanian, 2993 College Ave. Berkeley.

Plans by Mr. Yerrick. Contractor—A. J. Yerrick, 5263 College Ave., Oakland.

Plumbing—J. R. Pierce Co., 7109 East 14th St., Oakland.

Concrete and Excavation—Frank Salami, 5350 Manila, Oakland.

Sewer Work—Frank Gonsalves, 1671 Ninth St., Oakland.

Lumber—Loop Lumber Co., Broadway and Blanding, Alameda.

Architect Taking Heating Bids.

APARTMENTS—Cost, price, \$11,500
SAN FRANCISCO. SE Army and Alabama Streets.

Two-story and basement frame and stucco apartments (4 apts.)

Architect—G. A. Berger, 309 Valencia. Contractor—J. L. Cuneo and P. D. Martini, care architect.

Oil burning heating system is to be installed.

Completing Plans.

APARTMENTS—Cost, \$125,000
LOS ANGELES, Cal. Miller Drive near Sunset.

Two-story and basement reinforced

concrete and brick apartments (4, 6 and 6 room apts.)

Owner—F. J. Schwarz.

Architect—J. A. Schwarz, Black Bldg., Los Angeles.

Sub-Contracts Awarded.

APARTMENTS—Cost, \$45,000
SAN FRANCISCO. NW Thirtieth Ave. and Fulton St.

Three-story and basement frame and stucco apartments (15 apts.)

Owner and Builder—A. T. Morris & Sons, 3500 Fulton St., San Francisco.

Plans by Owner.

Brick Work—Sed Hoffman.

Concrete—Standard Concrete Co., 3025 Geary St., San Francisco.

Steel—Schrader Iron Works, 1247 Harrison St., San Francisco.

Hardware—T. G. Worman

Hardwood Flooring—Western Hardwood Floor Co., 21 Capistrano St., San Francisco.

Sub-bids are wanted on plumbing, electric wiring, heating, plastering, tile work, lighting fixtures, and roofing.

Plans Being Prepared—Contract Awarded.

APARTMENTS—Cost, \$1,500,000
SAN FRANCISCO. W Gough St. bet. Washington and Sacramento Sts.

Class A 16-story steel frame and concrete apartments.

Owner—Coast Bay Co., % contractors. Architect—Geo. Kelham, Sharon Bldg.

Structural Engineer—H. J. Brumfield, Sharon Bldg.

Mechanical Engineer—Hunter & Hudson, 41 Sutter St.

Contractor—Lindgren and Swinerton, Inc., 225 Bush St.

Sub-Bids Being Taken.

APARTMENTS—Cost, \$50,000
SAN FRANCISCO. 25th Avenue near Fulton Street.

Three-story and basement frame and stucco apartments (12 2- and 3-room apts.)

Owner and Builder—Fred. Anderson, 1320 22nd Avenue.

Architect—Irvine & Ebbets, Cal Bldg.

Sub-Contracts Awarded.

APARTMENTS—Cost, \$125,000
SAN FRANCISCO. NE Fair Oaks and 25th Sts.

SKILSAW Portable Electric Hand Saws (4 models).

SKILSAW Portable Electric Sander

SKILSAW Radial Arm Attachments.

SYNTRON Portable Electric Hammers (4 models, motorless).

MALL Flexible Shaft Machines (50 models).

Electric Drills, Grinders, Buffers, Routers, Lock Mortisers.

PETER H. NELSON

Labor Saving Portable Electric Tools.

1248 Mission St.

San Francisco

SALES . SERVICE . RENTALS

UNderhill

7662

Six-story and basement class C steel frame and concrete apartments 636 3-room apts.)

Owner—V. Gullines, 1293 Guerrero St. Plans by owner.

Engineer—J. M. Smith, 251 Kearny St. Steel—Golden Gate Iron Works, 1541 Howard St.

Plumbing—E. Sugarnan, 3621 Geary Street.

Concrete—Frank Vannucci, 55 Oakwood Street.

Electric Work—W. J. B. Parker, 270 6th Street.

Lumber—Roland Lbr. Co., 391 Berry Street.

Mill Work—Eureka Mill & Lbr. Co., 250 San Bruno Ave.

Reinforcing Steel—W. C. Hauck & Co., 250 San Bruno Ave.

Additional Sub-Contracts Awarded.

APARTMENTS—Cost, \$125,000
SAN FRANCISCO. S Broadway 157 E Webster Street.

Seven-story and basement class A apartments (7 apts.)

Owner—Wm. Helbing Co., 1310 Lombard Street.

Architect—H. S. Helbing, 1310 Lombard Street.

Contractor—The Helbing Co., 1310 Lombard Street.

Concrete—Transit Concrete Co., Cal Bldg. (Acme Concrete Co., 606 Mission St., is pouring the concrete).

Steel Joists—Truscon Steel Co., Cal Bldg.

Cases and Mill Work—Builders' Supply Depot, 390 9th St.

As previously reported, structural steel awarded to Judson Pacific Co., 609 Mission St.; electrical work to Acme Elec. Co., 1317 Webster St.

Lumber to Loop Lumber Co., Central Basin.

Contract Awarded.

APARTMENTS—Cost, \$50,000
OAKLAND, Alameda Co., Cal. East Erie St. North Mandana Blvd.

Three-story and basement frame and stucco apartments (48 rooms).

Owner—Louise B. Train, 3600 Lakeshore Ave., Oakland.

Architect—Clay N. Durrell, American Bank Bldg., Oakland.

Contractor—R. G. Roberts, 3001 Fulton St., Berkeley.

Sub-Contracts Awarded.

APARTMENTS—Cost, \$150,000
OAKLAND, Alameda Co., Cal. Crescent Avenue near Santa Clara.

Three-story frame and stucco apartments with class C concrete garage.

Owner and Builder—R. E. Mayer, 1129 McKinley St., Oakland.

Architect—Hugh L. Stone, 61 West-cro Power Bldg., Oakland.

Heating—Frank J. Edwards, 354 Hobart St., Oakland.

Elevators—Spencer Elevator Co., 166 7th St., San Francisco.

Plumbing—J. M. Dale, 372 24th St., Oakland.

Excavation—Ariss-Knapp Co., 961 41st St., Oakland.

Reinforcing Steel—McGrath Steel Co., 354 Hobart St., Oakland.

Concrete—Pacific Coast Aggregates, Inc., 82 2nd St., San Francisco.

Concrete in Place—George McMullin, 747 Victoria, Oakland.

Steel Pans—Concrete Eng. Co., 1289 Indiana St., San Francisco.

Lumber—E. K. Wood Lumber Co., Frederick and King Sts., Oakland.

BONDS

ALBANY, Alameda Co., Cal.—Election will be held February 14 in Albany School District to vote bonds of \$120,000 to finance erection of a ten-classroom addition to the Marin Ave. School and a six-classroom addition to the Cornell School, in addition to grading land, landscaping and additions; also a new heating plant for the Cornell School.

SALINAS, Monterey Co., Cal.—Election will be held February 7, in Salinas City School District to vote bonds of \$154,000 to finance erection of three new units to present school plant. Arthur Walter is City Superintendent of Schools.

CLEAR LAKE, Lake Co., Cal.—Stubs School District votes bonds of \$8000 to finance erection of a new school to house 40 pupils.

PITTSBURG, Contra Costa Co., Cal.—Petitions are being circulated seeking to have city council call an election to vote bonds to finance construction of a municipal hospital. The proposal has the support of the City Planning Commission and local business interests.

LAS VEGAS, Nev.—Dr. F. M. Ferguson, county health officer, has recommended to the Clark County Commissioners the erection of a modern county hospital. It is expected that the commissioners will present a bill to the state legislature seeking authorization for a bond issue to secure funds to finance the project.

SAUSALITO, Marin Co., Cal.—The Sausalito School District votes bonds of \$24,000 to finance beautification and general improvement of school playgrounds.

YUBA CITY, Sutter Co., Cal.—Trustees of Yuba City Grammar School District will call election shortly to vote bonds of \$86,000 to finance erection of a new main building and a wing extension in Plumas street school to comprise 10 classrooms, auditorium, cafeteria, and manual training department.

CHURCHES

Plans Being Completed.

MONASTERY Cost, \$200,000
SAN DIEGO, Cal. No. 5153 Hawley Avenue.

Two and three-story reinforced concrete monastery (160x200 feet).
Owner—Carmelite Sisters.
Architect—Frank L. Hope Jr., Bank of Italy Bldg., San Diego.

Preliminary estimated now being taken by the architect and general bids will be taken the end of January.

PORTERVILLE, Tulare Co., Cal.—C. E. Van de Mark, Porterville, at approximately \$2000 has contract to remodel First Methodist Church. A new pipe organ and pews will also be installed. Approximately \$25,000 will be expended in the improvements.

To Be Done By Day's Work By Owner.

CHURCH Cost, \$12,000
TAFT, Kern Co., Cal.
One-story frame and stucco church (70x50 ft.) auditorium to seat 250.
Owner—First Christian Church of Taft
Architect—Robert H. Orr, Corporation Bldg., Los Angeles

H. J. Kirschen is chairman of the building committee.

Composition shingle roof, steel sash, gas steam radiators, wood trusses, etc.

Sketches Being Prepared.

CHURCH Cost, \$22,000
HAYWARD, Alameda Co., Cal. Football Blvd. and A Street.
One-story and basement brick and cast stone church.

Owner—First Congregational Church, Premises.

Architect—E. P. Whitman, 192 Main St., Hayward.

Present church on site will probably be wrecked. Financing arrangements are now being made.

SANTA BARBARA, Cal.—First Congregational Church has referred to its Board of Trustees the matter of selecting a site for a new edifice to replace the building destroyed by fire two years ago.

Contracts Awarded.

CHURCH Cost, \$70,000
OAKLAND, Alameda Co., Cal. Emerson and Excelsior Avenues.

Reinforced concrete church.

Owner—Roman Catholic Archbishop of San Francisco, 1100 Franklin St., San Francisco.

Architect—W. E. Schirmer, 700 21st St., Oakland.

General Work

Thomas Furlong, 460 Jerome Ave., Oakland, \$42,000.

Lathing and Plastering

Wm. Makin, 1048 Excelsior Ave., Oakland, \$11,500.

Roofing

General Roofing Co., 2955 Beach St., Oakland, \$3,258.

FACTORIES AND WARE-HOUSES

Plans To Be Prepared.

TERMINAL Cos., \$—
TRACY, San Joaquin Co., Cal. Adam and 11th Streets.

Stage terminal and super service station.

Owner—Pacific Greyhound Lines, 9 Main St., San Francisco.

Architect—Not Selected.

Proposed project is in a preliminary stage.

January 14, 1930

Plans Being Prepared.

POULTRY BLDG. Cost, \$75,000
SACRAMENTO, Sacramento Co., Cal. State Fair Grounds.

One-story brick poultry building.

Owner—State of California.

Architect—Geo. McDougall, State Architect, Public Works Bldg., Sacramento.

Plans Being Prepared.

LIVESTOCK BLDG. Cost, \$125,000
SACRAMENTO, Sacramento Co., Cal. State Fair Grounds.

One-story brick livestock building.

Owner—State of California.

Architect—Geo. McDougall, State Architect, Public Works Bldg., Sacramento.

Contract Awarded.

LAUNDRY & APTS. Cost, \$15,000
SALINAS, Monterey Co., Cal. Central Avenue.

Two-story reinforced concrete laundry and apartments (2 apts.).

Owner—C. C. Pontacq, 27 Central Ave. Salinas.

Architect—A. W. Story, Pajaro Valley Bank Bldg., Watsonville.

Contractor—Fred McCrary, 506 Fremont St., Monterey.

Construction has just been started.

Prospective Bidders.

FACTORY Cost, \$70,000
OAKLAND, Alameda Co., Cal. Eighth—first Avenue near 14th St.

One-story reinforced concrete factory.

Owner—Blue Bird Potato Chips, Inc., 14th Ave. and Beck Sts., Oakland.

Architect—Charles W. McCall, 1404 Franklin St., Oakland.

Following contractors will submit bids:

Elbert & Hilp, 918 Harrison St., San Francisco.

A. Cedarborg, 1455 Excelsior Ave., Oakland.

G. P. W. Jensen, 320 Market Street, San Francisco.

C. M. Lawrence, 5321 Hill Rd., Oakland.

Clinton Stephenson Const. Co., Monadnock Bldg., San Francisco.

R. W. Littlefield, 337 17th St., Oakland.

Wm. Spilcock, Hobart Bldg., San Francisco.

H. L. Page, 5651 Oak Grove, Oakland.

A. A. Haskell, 4437 23rd Ave., San Francisco.

Austin Co. of California, 1921 Broadway, Oakland.

Jacobs & Pattiani, 337 17th Street, Oakland.

Garbert Bros., 4735 Brookfield, Oakland.

Chase, D. Vezey & Sons, 3220 Sacramento St., Oakland.

Chas. Heyer, Mills Bldg., San Francisco.

Bids are to be opened Jan. 20.

PITTSBURG, Contra Costa Co., Cal.—Columbia Steel Corp. has purchased 20.8 acres of land as an addition to the present Pittsburg holdings and will construct additional plant units as production warrants.

Owner Taking Bids.

PACKING HOUSE Cost, \$10,000
GILROY, Santa Clara Co., Calif.

One-story wood packing house (55x200-ft.; gravel roof).

Owner—Aiello Bros., North San Pedro San Jose.

Architect—Charles McKenzie, "wohy Bldg., San Jose.

Sub-Contracts Awarded.

HANGAR, ETC. Cost, \$75,000
ALAMEDA, Alameda Co., Cal. Webster Street.

Al steel hangar and administration building (160x130-ft.)

Owner—San Francisco Bay Airplane (R. U. St. John, field manager).

Contractor—Lindgren and Swinerton, Inc., 225 Bush St., San Francisco.

Structural Steel—Western Iron Wks., 141 Beale St., San Francisco.

Piling—Healy-Tibbitts Const. Co., 64 Pine St., San Francisco.

Hangar Doors, Steel Sash and Glazing—Herrick Iron Works, 18th and Campbell Sts., Oakland.

Reinforcing Steel—W. C. Hauck Co., 280 San Bruno Ave., San Francisco.

The structure will be 160 by 130 ft. and will house shops and offices, in addition to providing plane storage space for 70 small planes or 15 trimotored transports.

Contract Awarded.

HANGAR Cont. price, \$32,746
SACRAMENTO, Sacramento Co., Cal. Freeport Blvd. at Municipal Airport.

Steel frame and wood hangar and air terminal station, 80x100 feet.

Owner—City of Sacramento (to be leased to Boeing Air Transport Company).

Architect—Harry Devine, 1405 Forty-first St., Sacramento.

Contractor—Lindgren and Swinerton, Inc., California State Life Bldg., Sacramento.

Structure will be of steel frame and wood construction covering an area of 80 by 100 feet, with an exterior covering of corrugated iron.

VALLEJO, Solano Co., Cal.—Basalt Rock Co., Napa, has purchased a site in South Vallejo on the Will Smith holdings on the tidelands between the Southern Pacific holdings and the waterfront, and plans to establish a plant to serve as an all-rail-and-water outlet to and from its plant at Napa.

Segregated Bids Being Taken.
FACTORY Cost, \$—

Electric Fixtures—Boyd Lighting Fixture Co., 278 Post St.

Plans Being Completed.
THEATRE. Cost, \$200,000
MERCED, Merced Co., Cal. Seventh and J Sts. (150x150-ft.)

Two-story class C steel frame and reinforced concrete theatre, stores and office building (theatre to seat 1700).
 Owner—Golden State Theatres, Inc., 388 Market St., San Francisco.
 Architect—Reid Bros., 165 Montgomery St., San Francisco.
 Contractor—Salih Bros., Golden Gate Theatre Bldg., San Francisco.
 Sub-Bids will be taken in about two weeks.

As previously reported, excavation awarded to J. W. Huffman, Merced.

Plans Being Completed.
THEATRE. Cost, \$100,000
SAN MATEO, San Mateo Co., Cal.
 Two-story class C concrete and steel theatre and store (to seat 1000; contain four stores).
 Owner—W. S. Leadley, 207 2nd Street, San Mateo.
 Architect—S. Chas. Lee, 2104 W 7th St., Los Angeles.
 Contractor—Leadley & Wiseman, 207 2nd St., San Mateo.
 Sub-bids will be taken in about two weeks.

WHARVES AND DOCKS

January 9, 1931
Plans Being Prepared.
SHED. Cost, \$125,000
SAN FRANCISCO. Pier 15.
 Shed and bulkhead building (150x800-ft.; steel frame construction with concrete walls).
 Owner—State Board of Harbor Commissioners.
 Engineer—Frank White, Ferry Bldg.
 Sub-structure is nearing completion. Total cost of project, \$700,000. Bids will be called for about Feb. 15.

MISCELLANEOUS CONSTRUCTION

SAN FRANCISCO—Frank G. White, chief engineer, State Harbor Commission, Ferry Bldg., announces \$225,000 will be expended in raising the level of the Embarcadero sidewalk and bulkhead between the south end of the Southern Pacific waterfront baggage depot and Pier No. 24. The raise, which will average about three feet, will compensate for a gradual sinking resulting from the deterioration of the old 1912 seawall. Work on the project will start some time in February contingent on the approval of the incoming harbor board.

Sub-Contracts Awarded.
GRANDSTAND, ETC. Cost, \$1,250,000
SAN FRANCISCO. Fifteenth St. and Potrero Ave.
 Baseball Park, Class A steel and concrete grandstand, 1000 ft. long.
 Owner—San Francisco Baseball Club, 14th and Valencia Sts.
 Engineer—H. J. Brunnier, Sharon Bldg.
 Contractor—Lindgren and Swinerton, Inc., 225 Bush St.
Mill Work—Pacific Mfg. Co., Monadnock Bldg.
Light Towers—Pacific Coast Steel Co., 215 Market St.
Elevators—Spencer Elevator Co., 166 Seventh St.
 Ornamental iron bids are now being taken.
 As previously reported, plumbing awarded to Wm. J. Forster Co., 355 4th St.; steel sash to Tyne Bros., 656 Townsend St.; reinforcing steel to Pacific Coast Steel Co., 215 Market St.; lumber to Christensen Lbr. Co., Fifth and Hooper Sts.; lawn sprinkler system to The Turner Co., 329 Tehama St.; excavation to Shibley Grading and Teaming Co., 165 Lancers St.

UKIAH, Mendocino Co., Cal.—Due to a misunderstanding of the bidders with regard to time of delivery, the city council will ask new bids to fur-

nish f.o.b. cars, Ukiah, two 5000 cu. ft. riveted gas tanks, 6-ft. dia. by 30 ft. long, 3/4-in. shell and 1/2-in. heads. Equipped with one 11x15-manhole in head, three 2-in. forged steel flanges, one 1/4-in. dial pressure gauge, designed for 90 lb. per sq. in. working pressure and building in accordance with A. S. M. E. Code for Unfired Pressure Vessels. Further mention will be made of this project when a new date for opening bids is set. Fred L. Bosworth is city clerk.

Preliminary Plans Being Prepared.
CREMATORY, ETC. Cost, \$—
BAKERSFIELD, Kern Co., Cal.
Crematory, chapel and columbarium.
Owner—Bakersfield Memorial Park (J. K. McAlpine, promoter), Bakersfield.
Architect—Edwin J. Symmes, Habersfelde Bldg., Bakersfield

SAN FRANCISCO—Following bids received by Board of Supervisors for garbage disposal have been referred to City Engineer M. M. O'Shaughnessy for report:

San Francisco Disposal Company. (Floyd E. Harp, vice president).
Erect plant on company's own plans on city-owned land. Plant to be of Superior Incinerator Company's design. Bids \$100 for a twenty-five-year franchise; to erect plant to incinerate 800 tons a day. Will begin work in four months after award of contract, completing plant in one year. City given right to acquire plant at any time for \$900,000. Price to be \$1 per ton.

Octavius Torre Jr. and Antonio Fallano.

Bid No. 1—To erect plant on plans of the City Engineer, installing Sterling-type furnaces and equipment, capacity 800 tons daily. Price to be not in excess of \$2.32 a ton. Set recapture figure at \$1,300,000 less depreciation.

Bid No. 2—Build plant on own plans and specifications, using Sterling type equipment. Price per ton not in excess of \$2.05. Recapture figure \$1,038,700, less depreciation.

Above two bids provide for repeal of the initiative ordinance fixing \$1 a ton for incineration. Both bids offered \$1000 for the franchise.

Dumping at sea bids were submitted by J. H. Baxter & Co., who set a price of \$1 a ton, and offered to begin operations two to four months after award of contract, and from Walter C. O'Brien and Frank P. O'Kane. The latter offered a sliding scale of prices to be charged for dumping, running from 24 to 37 cents a ton. They offered to sell plant to city at any time for \$462,000, less depreciation. Two per cent of the total collections were offered the city in return for the franchise.

SAN FRANCISCO—Pacific Coast Steel Corp., 215 Market St., a \$1,785 awarded contract by Board of Supervisors to furnish and erect steel towers for radio broadcasting system for Police and Fire Departments. Gravar Electric Co., 9th and Howard Sts. at \$7,000 awarded to furnish tubes in connection with the same project.

ALAMEDA, Alameda Co., Calif.—All bids received by City Purchasing Agent have been rejected for painting and spraying fences at Lincoln Park Nursery on Fernside Blvd., pump house at Jackson Park, fence at McKinley Park and pump house, etc., at Washington Park.

Lowest bid was submitted by Hauck & Huber, 1012 Eagle Ave., Alameda, at \$1080. New bids will be called for shortly.

MISCELLANEOUS SUPPLIES AND MATERIALS

GLENDALE, Los Angeles Co., Cal.—Until 10 A. M., Jan. 22, bids will be received by the city council for furnishing f. o. b. warehouse by truck, 115 N. Howard St., Glendale:

Item 1—30,000 lbs. No. 2-0 stranded, 7 strands, bare, medium hard drawn copper wire.

Item 2—650 lbs. No. 4-0 stranded, 19 strands, bare, soft drawn copper wire. The quantity specified may be increased or decreased 25% at the option of the city, at any time before signing of contract. Certified check, 10%. G. E. Chapman, city clerk.

SAN FRANCISCO—Until Jan. 26, 2 P. M., bids will be received by U. S. Forest Service, Ferry Bldg., to furnish and deliver 2,176 metal porcelain enamel road and trail direction and miscellaneous signs. Specifications obtainable from above on request.

FRESNO, Fresno Co., Cal.—Until February 12, 5 P. M., bids will be received by L. L. Smith, Secretary, Board of Education, 2425 Fresno St., for the sale of 19 used typewriters and the purchase of 19 new typewriters. Bid bond or certified check 10% required with bid. Further information obtainable from mscretary.

SAN FRANCISCO—Following bids received by Board of Supervisors to furnish and deliver 35 radio receiving sets for the Department of Electricity:

Julius Brunson and Sons, \$94.71 each; alt. (a) \$80.06; (b) \$85.95. Delivery 60 days.

U. S. Motor Service, \$97.50 each; delivery 60 days.

Electric Lighting Supply Co., \$112; delivery 45 to 60 days.

Graybar Electric Co., \$99 each; delivery 30 days.

Sierra Equipment Co., \$171; delivery 90 days.

BUSINESS OPPORTUNITIES

Names and addresses of persons or firms concerned in the following opportunities will be furnished on request to Business Opportunity Department, Daily Pacific Builder, 547 Mission St., San Francisco or Phone GARfield 8744:

20761—Representation. Berlin, Germany. Firm offers to advise and to help San Francisco merchants or manufacturers for any current or intended business with merchants or manufacturers in Germany, Austria and Switzerland. Can correspond in German, English and French.

20762—Representation. Bremen, Germany. Firm established since 1895 is in a position to handle on a large scale any commodity for which a trade can be established on the German and continental markets.

20766—Business Machines. Honolulu, T. H. Firm wishes list of wholesalers, manufacturers and dealers of business machines, equipment and stationery.

20767—Single Phase Motors. Los Angeles, Calif. Firm is interested in contacting manufacturers of single phase motors from 1/2 to 1 1/2 horsepower.

The number of homes in the United States wired for electricity was estimated at 19,721,486 on January 1 of this year, the electrical division of the Department of Commerce reports. This figure now has very likely advanced to well over 20,000,000. The 1930 figure represents a substantial increase over the number of homes estimated to be wired on January 1, 1929, which was 19,012,664. Likewise, the 1929 number of wired homes increased over 1927, which totaled 15,925,000. In 1929, New York state led the Union with 2,977,426 electrified homes, followed in order by Pennsylvania, Illinois, California, and Ohio.

DAILY PACIFIC BUILDER

The only daily construction newspaper affording complete coverage of the construction activities in Central and Northern California — featuring work contemplated, bids wanted, bids opened, contracts awarded, sub-bids wanted and sub-contracts let on all types of building construction; bridges, dams and harbor works, irrigation projects; machinery and equipment; water works and supplies; business opportunities; building permits; building contracts, mechanics' liens; acceptances, etc., etc.

Keep informed on construction developments in Central and Northern California, and the major projects in Southern California, the states of Oregon, Washington, Nevada and Arizona.

Engineering News Section

BRIDGES

HILLSBOROUGH, San Mateo Co., Cal.—Town Clerk John A. Clark instructed to advertise for bids to widen bridge over San Mateo Creek on the Stonehedge road.

SONORA, Tuolumne Co., Cal.—City council has received to reconstruct Stockton Street bridge, involving widening to 18-ft. and lengthening same to eliminate "S" turn. Plans on file in office of city clerk.

NAPA, Napa Co., Cal.—City Engineer H. A. Harrold completes plans for Brown St. bridge; estimated cost \$11,000. City has \$6000 available for construction. Action on the plans deferred.

SANTA ROSA, Sonoma Co., Cal.—Frank Bryant, 2911 23rd Street, San Francisco, at \$17,344 awarded contract by county supervisors to construct a 140-ft. riveted steel truss bridge over Sonoma Creek near the Sonoma State Home in the First Supervisorial District. Project involves:

- (a) 185,000 lbs. struc. steel;
- (b) 292 cu. yds. class "A" concrete;
- (c) 225 cu. yds. struc. excav.;
- (d) 2500 lbs. reinf. steel;
- (e) 2,500 cu. yds. approach fills.

Following is a complete list of bids:

Frank Bryant	\$17,344
Cox & Whitehead	17,383
W. C. Colley	17,550
Fred Smith	18,383
Ralph Hunter	18,600
M. B. McGowan	18,659
Harry Thorsen	18,700
W. L. Proctor	19,720
Peter McHugh	19,665
Albert Helwig	19,856
Larsen Bros.	19,975
Ben. C. Gerwick	20,112
P. J. Miller & Son	20,317
A. T. Howe	20,700
Sciarino & Sneed	20,851
Sullivan & Sullivan	20,999
Wm. Spivock	21,300
Geo. Hudson	21,400
Smith Bros.	21,450
C. Emil Force	23,816

OAKLAND, Cal.—Until February 2, 10:30 A. M., bids will be received by George E. Gross, county clerk, to construct steel and concrete bridge on Redwood Road in Eden Township; estimated cost, \$10,000. Plans obtainable from County Surveyor George A. Posey.

PORTLAND, Ore.—Lindstrom & Pelgerson, Railway Exchange Bldg., Portland, at \$89,617.50 for fill piling and \$87,417.50 for cedar piling, submitted low bid to Multnomah County Commissioners to reconition the Hawthorne Bridge. Edlfeen-Weyand can Co., 280 Front St., Portland, at \$35,690.75 submitted low bid for abutments, paving and fill in connection with the same project. Taken under advisement.

DREDGING, HARBOR WORKS & EXCAVATIONS

VENTURA, Ventura Co., Cal.—Until Feb. 3, 10 A. M., bids will be received by county supervisors to construct four protection jetties, each 100 ft. long, made of r. r. rails fabricated into the forms of tetrahedrons, involving:

- (a) 28 tons used 60-lb. rails;
 - (b) 13 cu. yds. class B concrete.
- Cost Contract No. 718. Plans obtainable from Chas. W. Petit, county surveyor.

LONG BEACH, Cal.—The Standard Dredging Co., Central Bldg., Los Angeles at \$16.95 (\$113,195) awarded contract by U. S. Engineer Office for dredging in Long Beach Harbor and Cerritos Channel, involving 774,000 cu. yds.

RENO, Nevada—Disapproval of the request of the Newlands project board for \$200,000 in federal funds for the enlargement of the Labonton power plant has been expressed by Dr. Elwood Mead, commissioner of reclamation, who has addressed the board a letter upon the subject. The commissioner of reclamation makes the following objections:

That there is no sufficient money in the reclamation fund to permit the appropriation requested.

That it is contrary to the policy of the bureau, the department of the interior and of congress to advance federal funds for a long period of time, without making interest charges.

That it is also contrary to the policy of the government to make new contracts under which power revenues upon irrigation projects will accrue to the districts after repayment is made.

That it is likewise contrary to government policy to undertake further construction upon irrigation projects after such projects have been taken over for operation and maintenance by the water users.

In requesting the appropriation the project board asked that it be given the \$200,000 loan referred to for a period of forty years without interest. It also asked that the net revenues accruing from the new power unit accrue to the project after repayment of the loan should be made. Referring to the latter request Commissioner Mead said that it is now the policy of the government to convert all project power revenues into the reclamation fund after government loans for construction are fully repaid by the project.

RICHMOND, Contra Costa Co., Cal.—Following bids received January 8 by U. S. Engineer Office, San Francisco, for furnishing (a) 10,000 tons of core rock and (b) 18,000 tons of facing rock and building extension to the training wall in Richmond Harbor:

- (1) Healy-Tibbitts Const. Co., 64 Pine St., San Francisco
- (2) Kern and Kibbe, 280 E. Salmon St., Portland, Oregon.
- (3) Blake Bros., Balboa Bldg., San Francisco.

	(A)	(B)
(1)	\$8975	\$2.25
(2)	93	2.75
(3)	100	2.50

Taken under advisement.

LONG BEACH, Cal.—Standard Dredging Co., Central Bldg., Los Angeles, at 16.95 cu. yd., submitted low bid to U. S. Engineer's Office, Los Angeles, for dredging in Long Beach Harbor and in the Cerritos Channel turning basin. Project involves 774,000 cu. yds.

LANCHA PLANA, Amador Co., Cal.—California Debris Commission, California Fruit Bldg., Sacramento, will hold public hearing January 16 on the application of the Lancha Plana Gold Dredging Company to move by the hydraulic process approximately 700,000 cubic yards of debris located one mile from Lancha Plana, Amador County, draining into Mokelumne River, and to store debris in pits, resulting from removal of sand and gravel for construction of Paradise Dam.

LOS ANGELES, Calif.—San Francisco Bridge Co., 14 Montgomery St., San Francisco, was awarded the contract by the U. S. Engineer at \$255,599 (estimate) or 13.25 cu. yd. for dredging approx. 1,400,000 cu. yds. material in the East Basin Channel, Los Angeles Harbor, and in Cerritos Channel, to hook up with similar work to be done in Long Beach. Engineer's estimate, not including overhead, \$283,260.

REDWOOD CITY, San Mateo Co., Cal.—Standard Dredging Co., 414 13th St., Oakland, at 7.94 cu. yd., submitted low bid to U. S. Engineer Office, Custom House, San Francisco, for dredging in Redwood Creek, involving 614,750 cu. yds. Complete list of bids follows:

Standard Dredging Co.	7.94
Franks Contracting Co.	8.90c
Hydraulic Dredging Co.	13.25c
S. F. Bridge Co.	14.00c
Engineer's estimate	7.73c

Taken under advisement.

SAN DIEGO, Cal.—Western Dredging Co., 611 Security Title Insurance Bldg., Los Angeles, awarded contract by U. S. Engineer at \$297,000 (estimate) for dredging approx. 825,000 cu. yds. material from an area of about 185 acres in the NE portion of San Diego Harbor. The area lies westerly of the western waterfront of the city of San Diego, extending from Municipal Pier No. 1 to Spreckels Wharf. Other bids were: Standard Dredging Co., 37.9c; San Francisco Bridge Co., 39c; Morris & Cummings Dredging Co., New York City, 68c. The engineer's estimate was \$329,200.

STREET LIGHTING SYSTEMS

EUREKA, Humboldt Co., Cal.—City council starts proceedings to install electrolux system on Fourth St., bet. Broadway and J streets; estimated cost \$15,000. E. D. Gardner, city engineer.

SANTA ROSA, Sonoma Co., Cal.—City Manager C. O. Dunbar recommends extension of the present street lighting system.

SAN LEANDRO, Alameda Co., Cal.—R. Flatland, 1899 Mission St., San Francisco, at \$6200 submitted low bid to city trustees to install street lighting system in Dutton Ave., involving 29 electrolux standards with underground system. Other bids: City Improvement Co., (C. N. Chick), 2655 Center St., Berkeley, \$6400; Butte Electric & Mfg. Co., 956 Folsom St., San Francisco, \$7950. Taken under advisement.

SAN FRANCISCO—NePage-McKenney Co., 7 Front Street, at \$66 each, awarded contract by Board of Supervisors to furnish 500 concrete electrolier standards in connection with city's boulevard system.

Taper Tube Pole Co., Monadnock Bldg., at \$85 each, awarded contract to furnish 600 metal standards.

MACHINERY AND EQUIPMENT

MONTEREY, Monterey Co., Cal.—Until January 23, 10 A. M., bids will be received by Monterey Union High School District to furnish and install machinery, equipment and fixtures in shop department of high school. Swartz & Ryland, architects, Spazier Bldg., Monterey. Certified check 10% required with bid. Specifications obtainable from clerk.

SACRAMENTO, Cal.—Moeller Auto Co., Sacramento, at \$691 awarded contract by city council to furnish station wagon, and at \$592 to furnish one coupe automobile from City Engineering Department.

WANTED

TO PURCHASE used Linn Tractor Truck. Lidlal-Wiley, Inc., 208 Columbia St., Seattle Washington.

SAN JOSE, Santa Clara Co., Cal.—Until February 2, 10 A. M., bids will be received by Henry A. Pfister, county clerk, for the purchase of a 60-Best Caterpillar Tractor, no longer required by the county. Further information obtainable from county clerk or Robert Chandler, county surveyor.

OAKLAND, Cal.—Hap Alzina, 217 12th St., Oakland, at \$2700 awarded contract by city council to furnish six 4-cylinder motorcycles for traffic unit of the Police Department.

TOLEDO, Oregon—Until February 2, 8 P. M., bids will be received by C. S. Welborn, city clerk, to construct 15-inch suction dredge for Port of Toledo; engineer's estimate \$45,000. Specifications obtainable from city clerk on deposit of \$25, returnable.

WASHINGTON, D. C.—See "Government Work and Supplies," this issue. Bids wanted for miscellaneous supplies and equipment for Pacific Coast Navy Yards and Stations.

SACRAMENTO, Cal.—Until Jan. 29, 2 P. M., bids will be received by D. H. Greeley, Superintendent of Equipment, Shop No. 3, State Highway Commission, 1802 84th St., Sacramento for the purchase of the following equipment no longer required:
 CHC 2295 Indiana 1½-ton truck.
 CHC 2618 Ford Express Model A.
 CHC 2670 Ford Express Model A.
 CHC 142-150 Gallon Alco Kettle, asph.
 CHC 143-150 Gal. Alco Kettle, asph.
 CHC 180-71 McCormick-Deering 10-20 Tractor and Spearvels Grader attachment.

Bidders may make offers for one or more items, but must state price offered for each item. No lump sum bids will be considered.

All equipment may be inspected at the Division of Highways yards at 1852 34th St., Sacramento.

RAILROADS

LAS VEGAS, Nevada—(By Special Wire)—Lewis Const. Co., 300 S. Julian St., Los Angeles, at \$455,509.50,

submitted the lowest of 12 bids to the U. S. Bureau of Reclamation, Las Vegas, for the construction of a railway from Boulder City to the Hoover Dam site. This work will involve construction of 10.5 miles of railroad construction with heavy construction in solid rock formation, including five tunnels within one mile. The project will extend from the summit of the end of the L. A. & Salt Lake Ry. section, down to the dam site. The principal items and quantities follow:

15,000 cu. yds. common excav.; 364,000 cu. yds. rock excav.; 150,000 cu. yds. unclass. borrow; 803,000 sta. yds. overhaul; 287,000 cu. yds. long haul unclass. borrow "loaded into hauling equipment"; 705,000 yd. mi. haul and spread "long haul unclass. borrow"; 29,000 cu. yds. tunnel excav.; 200,000 ft. b.m. permanent tunnel timbering; 800 cu. yds. struc. excav. common; 1,200 cu. yds. struc. excav. rock; 6,000 cu. yds. rock fill; 220 cu. yds. concrete; 16,000 lbs. reinf. steel; 2,100 cu. yds. rock riprap; 2600 cu. yds. concrete crib wall; 1600 ft. 24-in. corr. pipe; 120 lin. ft. 36-in. do; 180 lin. ft. 36-in. do; 280 lin. ft. 42-in. do; 200 lin. 48-in. do; 600 lin. ft. 60-in. do; 20,000 ft. b.m. bridges or trestle timbering; 200 lbs. rail stringers in rail top trestle; 2,000 lin. ft. piling; 80 pile point shoes; 22,800 cu. yds. ballasting; 7 miles laying track (tie plated); 10 miles laying track (not tie plated); J. C. Page is office engineer at Las Vegas. S. O. Harper, acting chief engineer, Denver.

FIRE ALARM SYSTEMS

SANTA ROSA, Sonoma Co., Cal.—City Manager C. O. Dunbar recommends early extension of the municipal fire alarm system.

FIRE EQUIPMENT

NAPA, Napa Co., Calif.—American La France and Foamite Industries, at \$15,100 awarded contract by city council to furnish motor fire truck with the following equipment:

Complete set of ladders: one 50-ft., one 35-ft., one 28-ft., two 26-ft., one 24-ft., one 20-ft., one 16-ft. roof ladder and one 12-ft. roof ladder. It will have a pump, throw 750 gallons of water at 120 lbs. pressure as well as a booster tank of 100-gallon capacity. Will be equipped with a life-saving net, a life-saving gun and 700 feet of 2-in. hose. Allowance of \$200 on the old Scagraves chemical truck.

PITTSBURG, Contra Costa Co., Cal.—City Manager George Orrer authorizes by city council to purchase 500 ft. of fire hose at a cost of \$500.

HAWTHORNE, Nevada—Until January 27, 10 A. M., bids will be received by the Bureau of Supplies and Accounts, Navy Department, Wash-

ington, D. C., to furnish one motor ambulance for Naval Ammunition Depot at Hawthorne, Nev. Specifications obtainable from above office or from Navy Purchasing Office, 100 Harrison St., San Francisco.

RESERVOIRS AND DAMS

SHASTA and Fresno Counties, Cal.—Immediate construction of an \$85,000,000 dam and reservoir at Kennett, on the Sacramento River, and a \$50,000,000 dam and reservoir, with lateral canals at Friant, Fresno County, on the San Joaquin River, has been recommended by the Joint Hoover-Young water resources commission.

A definite recommendation against construction of a salt water barrier across Carquinez Strait was made by the commission, which held that the Kennett dam and reservoir not only would satisfactorily solve the delta salinity problem and furnish fresh water for Suisun Bay industries, but also would be of material assistance in controlling Sacramento river floods. The Kennett dam also would help navigation and irrigation.

The commission further recommended that the federal government finance and construct both projects, with the state taking over their operation after guaranteeing payment of interest at 3½ per cent or less, and repayment of the \$135,000,000 principal over a period of fifty years. An agreed-upon federal government contribution for improvement of navigation and flood control on the Sacramento River would be deducted. The state in turn would look to those sections benefited by the project, either directly or indirectly, for its reimbursement.

The state also would be expected to meet the cost of relocating state highways, made necessary by the construction of the two reservoirs.

HAYWARD, Alameda Co., Cal.—City Engineer Jesse B. Holly is making surveys for proposed emergency reservoir in connection with the municipal water system. Will be constructed in upper D street.

SAN DIEGO, Cal.—H. N. Savage, city hydraulic engineer, inspected by the city council to prepare plans for a dam at El Capitán site on the San Diego River. Plans were ordered for two types of dams, viz. gravity-arch type and a rock fill structure.

YAKIMA, Wash.—U. S. Bureau of Reclamation, Yakima, preparing plans for proposed Cle Elum Dam, the last unit of the Yakima reclamation project. For this unit \$15,500,000 is available. Dam will be constructed on the Cle Elum river near Ellensburg and will be 125-ft. high and 700-ft. long. It will form a reservoir of 4,680 acres in which will be stored 435,000 acre-feet of water.

PIPE LINES, WELLS, ETC.

OAKLAND, Cal.—Until January 19, 4:30 P. M., bids will be received by G. B. Hegardt, secretary, City Port Commission, 424 Oakland Bank Bldg., to furnish and steel pontoon pipe, equipped with ball joints, delivered Outer Harbor. Certified check 10% required with bid. Specifications obtainable from secretary.

LOS ANGELES, Cal.—Western Pipe & Steel Co., 5717 Santa Fe Ave., awarded contract by city purchasing agent, at prices below for welded steel pipe under Specifications No. 2286. Bids were taken on the following items:

- (1) 1860 ft. laying length, 51-in. welded steel pipe;
- (2) 1560 ft. laying length, 61-in. welded steel pipe, double dipped in McEverlast steel water pipe coating;
- (3) 1360 ft. laying length, 51-in. welded steel pipe with not more than two girth seams and only one longitudinal seam;
- (4) 1660 ft. laying length, 51-in. welded steel pipe identical with Proposal No. 3, except that the dipping shall comply with Proposal No. 2.

The prices are: Electric welded—(1) \$6.55, (2) \$6.25, (3) \$7.65, (4) \$6.85; net. Delivery start Feb. 2, complete Feb. 12.

CARMICHAEL, Sacramento County Cal.—Western Pipe and Steel Co., 444 Market St., San Francisco, at \$41 lin. ft. awarded contract by Carmichael Irrigation District to furnish and deliver f.o.b. Fair Oaks, Sacramento Co., 4,300 ft. of welded steel pipe. Complete list of bids follows:

Western Pipe & Steel Co., \$41
Corrugated Pipe Co., S. F., \$42.23
Crane Co., Sacramento, \$51.2

SEWERS AND SEWAGE DISPOSAL PLANTS

OAKLAND, Cal.—Until January 12, noon, bids will be received by C. F. Merritt, city clerk, to construct storm sewer with appurtenances in Grove St. bet. 26th and 28th Sts.; est. cost \$17500. Certified check 10% payable to city required with bid. Plans on file in office of clerk. Walter N. Frickstad, city engineer.

HILLSBOROUGH, San Mateo Co., Cal.—Town Clerk John A. Hoey instructed to advertise for bids for construction of storm sewers and other miscellaneous improvements in the Brewer Drainage District.

GONZALES, Monterey Co., Calif.—Gonzales Sanitary District votes bonds of \$40,000 to finance construction of a new system. Directors of the district are: Enos DeCaccia, William Tavertetti, Bert M. Carner, M. H. Woodsworth and J. A. Morrill.

OAKLAND, Cal.—Robert B. McNair, 3745 Rhoda St., Oakland, at \$8686 awarded contract by city council to construct drainage structures in portions of E-8th and E-10th Sts. 4th, 6th and 8th Aves., involving:

- 375 ft. 10-in. pipe conduit, \$145.
- 652 ft. 12-in. do., \$135.
- 536 ft. 15-in. do., \$155.
- 329 ft. 18-in. do., \$220.
- 320 ft. 24-in. do., \$330.
- 800 ft. 18-in. pipe sewer, \$155.
- 389 ft. 18-in. do., \$220.
- 6 manholes, standard tops, \$70.
- 4 manholes, inlet top, 34-in., \$55.
- 4 catchbasins, 34-in., \$66.
- 2 catchbasins, 21-in., \$56.
- 4 storm water inlets, 34-in., \$41.
- 8 storm water inlets, 21-in., \$34.50.

Complete list of unit bids received published in issue of January 2.

SANTA MONICA, Cal.—Until Jan. 20, bids will be received by city council to dig trench, lay and connect 7,000 lin. ft. 30-in. sand cast iron pipe, together with one 30-in. by 20-in. reducer, gate valves, valve boxes and manholes in Sawtelle Blvd. Certified check 5% required with bid. Plans obtainable from John A. Morton, city commissioner of public works.

OAKLAND, Cal.—R. H. Downer, 709 East 24th Street, Oakland, at \$2,095 awarded contract by city council to sewer portions of Foothill Blvd., Iris, Dowling and Blanche Sts., and 84th Ave., involving:

- 285 lin. ft. 24-in. pipe sewer, \$3,76;
- 606 lin. ft. 8-in. pipe sewer, \$3,80;
- 6 manholes, \$75.00.

Complete list of unit bids received published January 2.

SANTA MARIA, Santa Barbara Co., Cal.—The city engineer is preparing plans for extensions to the city sewer system on Broadway to serve 200 additional families. The estimated cost is \$25,000.

OFFICIAL PROPOSALS

NOTICE TO CONTRACTORS

General, Mechanical and Electrical Work

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, Feb. 10, 1931, said bids thereafter on said day to be publicly opened and read for the erection and completion of the Cottage for Employees, Stockton State Hospital, Stockton, California, in accordance with plans and specifications

thereof.

The Building is to be a two-story reinforced concrete structure with wood partition, floor and roof construction, and tile roof. The total floor area is approximately 6,700 sq. ft. Separate bids will be entertained as follows:

1. General Work.
2. Electrical Work.
3. Plumbing and Heating Work.
4. Complete Plumbing, Heating and Electrical Work.

Contractors must state clearly in their application the particular segregation of work that they desire plans for.

Plans and specifications are on file for examination in the offices of the Division of Architecture, Public Works Building, Sacramento, and Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications, and proposal forms may be secured by licensed Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works" in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

DEPARTMENT OF PUBLIC WORKS
DIVISION OF ARCHITECTURE

GEO. B. McDOUGALL,
State Architect.
W. E. GARRISON,
Director of Public Works.

A. O. Smith Corporation of Milwaukee during 1930 shipped 472,000 tons of electrically welded pipe to all parts of the United States, compared with 425,000 tons in 1929. The 1930 tonnage, according to Carl C. Joys, Jr., manager of pipe sales, consisted of about 3,600 miles, or 24,272 carloads. The mileage was nearly the same as in 1929, and the carloads compared with 30,474 in 1929. More heavier pipe was made during the year just closed than in the previous year.

George Ulrich, general contractor of Modesto, has been elected president of the Modesto Chamber of Commerce.

Russian softwood, mostly spruce, amounting to some 7,000,000 board feet, arrived on consignment in Havana, Cuba, during the past year and approximately 56 per cent remains unsold, says a recent communication from Acting Commercial Attache Albert F. Nufer at Havana to the lumber division of the Department of Commerce. This Russian lumber consists of spruce and pine, the bulk of the shipments being spruce. Of the total quantity delivered, about 3,900,000 board feet remain unsold, of which 3,700,000 board feet are spruce. The Cuban trade reports that the primary use to date of this Russian lumber has been for box manufacture.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

Of The NEW
Daily Pacific Builder

The only daily construction newspaper affording complete coverage of the construction activities in Central and Northern California, featuring work contemplated, bids wanted, bids opened, contracts awarded, sub-bids wanted and sub-contracts let on all types of building construction, bridges, dams and harbor works, irrigation projects; machinery and equipment; water works and supplies business opportunities, building permits, building contracts, mechanics' liens, acceptances, etc., etc.

Keep informed on construction developments in Central and Northern California and the major projects in Southern California, the states of Oregon, Washington, Nevada and Arizona.

The new DAILY PACIFIC BUILDER will afford a service that serves—both in Quality and Quantity. You, as a member of the construction fraternity, should not be without it.

Subscription price \$1.50 per month, or \$15.00 a year, payable in advance.

SERIES OF LECTURES ON CONCRETE MIXING

New methods of mixing concrete to secure a definite strength will be explained and demonstrated with lantern slides by Mr. J. W. Kelly of Chicago in a series of lectures on design and control of concrete mixtures, it is announced by Arthur P. Denton, district engineer for the Portland Cement Association.

The first of these lectures will be held in the Jubilee Room of the Senator Hotel at Sacramento next Monday evening. The second lecture will be held in the auditorium of the Pacific Gas & Electric Building in San Francisco on January 28, the third at the Builders' Exchange, 254 Hobart St., Oakland on January 29 and the fourth in Room 120 of the State Teachers' College at San Jose on January 30. Each lecture will commence at 7:30 P. M.

These lectures are a continuation of a series of talks, given several years ago, to bring before architects, engineers and contractors the new developments in mixing and placing concrete which have been recently discovered. The discussion covers major research projects, improved methods now in use and new machinery for the control of quality concrete. The talk is illustrated by lantern slides. A few of the important local structures on which scientifically controlled concrete has been used are the Suisun Bay Bridge of the Southern Pacific, the B. B. Hunter-Dulin and Shell Buildings in San Francisco and the seven and a half mile San Mateo-Hayward Bridge.

There is no charge for attending these talks which are open to anyone interested.

PROTESTS PAYING WAGES BELOW SCALE

The executive council of the American Federation of Labor, in session at Miami, Fla., directed the sending of a telegraphic protest to President Hoover against the action of heads of departments who have awarded contracts for government work to contractors who pay wages below the prevailing rate in the different communities.

William Green, president of the Federation, said:

"The names of a number of these contractors who are following this policy will be submitted to the President with a vigorous protest against their low wage policy and their indefensible action in the payment of low wages which are known to be lower than the rates paid in private industry where government work is performed."

COURT RULES ON PAYMENT TO WRONG ACCOUNT BY DEALER

It is well settled that if no direction is given by a contractor to which account a materialman shall credit a payment, credit may be given by the creditor to the oldest account, says Leo T. Parker, attorney, in the General Building Contractor. So held the higher Court in Shreveport, Co., vs. Meek, 126 So. 513. In this case it was shown that a contractor, who had several accounts with a materialman, paid the latter a sum of money without directing what account should be credited. The materialman credited the payment to the oldest account and later sued to recover payment of the account which the contractor intended to pay when the payment was made.

However since the contractor testified that when the payment was made he instructed the bookkeeper of the materialman to credit the amount to a particular account the Court held the materialman should have credited the money to the named account instead of the oldest one.

NEW QUARTERS FOR STOCKTON BUILDERS

Confidently anticipating a marked upturn in the building industry in the San Joaquin Valley area, the Stockton Builders' Exchange in special meeting last Thursday night voted to move their offices from 29 North San Joaquin Street to more spacious quarters at 242 East Miner Avenue.

The change was voted, Secretary E. M. Lewis reported, in order that displaying windows and a display space on the main floor of the offices might be available to builders and architects for the exhibition of the latest designs, household implements, materials, etc. The remainder of the 40 by 50 foot quarters will be devoted to exchange offices, estimating quarters and a meeting room.

The Exchange also voted to change its meeting date from the first Monday of the month to the first Tuesday.

The annual election of officers will be held by the organization on February 3, according to L. S. Peletz, president of the Exchange.

As there is every indication that the building boom anticipated will materialize, members of the Exchange state. It is expected to develop principally in the construction of residential buildings.

As evidence of their faith in the future of Stockton, the Exchange has taken a five year lease on its new quarters.

Hoyt Heater Company of Northern California, Ltd., capitalized for \$75,000, has filed articles of incorporation in Oakland. Directors are: R. C. Hoyt, Ella M. Hoyt and M. M. Lannes, all of Oakland.

CEMENT PRODUCTION AT NEW HIGH RECORD

A new high record of more than 100,000,000 barrels' idle capacity was set by the Portland cement industry of the United States for the year 1930, according to production and used capacity figures of the U. S. Bureau of Mines.

Many plants throughout the country have reported weeks of idleness or partial idleness during previous years as well as during 1930. Last year, however, according to the government report, the 165 plants operating produced only 61.5 per cent of the approximately 300,000,000 barrels of cement that they were equipped to produce and the market been favorable. The 1930 production figure of 160,905,000 barrels is a drop of 9,233,000 barrels from 1929 production.

The cement industry had its biggest year in 1928, when a reader market permitted the production of 176,300,000 barrels. Even in that banner year, however, according to the Bureau of Mines, there was a surplus of 1,400,000 barrels' capacity, or nearly 28 per cent of total capacity.

The industry, according to successive Bureau reports, has built 97,000,000 barrels of new capacity since 1923, while production, which is held in check by market demands, has been gaining but 39,000,000 barrels. Thus unused capacity in the industry has climbed from 24,400,000 barrels, or 15 per cent of the total, in 1923, to 101,729,000 barrels, or nearly 40 per cent of the total capacity, for 1930, as just announced.

NICKERSON, R. R. ENGINEER, PASSES

G. H. Nickerson, chief engineer for the Yosemite Valley Railroad, died in a San Francisco hospital last Thursday. Born in Lebanon, Oregon, in 1862, he entered railway work when a boy.

He went to Merced in 1906 to take charge of construction work for the then building Yosemite Valley railroad, having previously served as superintendent of bridges and buildings for the Santa Fe line.

He remained with the Yosemite Valley railroad as chief engineer from the time of the road's completion until 1911 when he resigned to enter the employ of the Yosemite Lumber Company, and for that concern was in charge of construction of the first incline road at El Portal.

Later he became superintendent of the Oakdale Irrigation District, returning to Merced County to become superintendent of construction in the office of the county engineer, then occupied by A. E. Cowell.

He then returned to the Yosemite Valley railroad as chief engineer to continue in that capacity until his death.

THE QUANTITY SURVEY AS ADAPTED TO BRICK ESTIMATING

(By C. L. Weeks, President, Alliance Engineers, Inc., and Vice-President American Institute of Quantity Surveyors)

Construction efficiency and success is dependent on economy in time and material. While great progress has been made in economy of design thru the scientific working out of engineering practice and the development of more suitable building material, there is still room for improvement in the methods of construction management, especially in the branch of Quantity Surveying.

Economy in Quantity Surveying is dependent upon its scientific development in line with a simple, unified plan. Such a plan would coordinate the various branches of construction which are all using different methods of arriving at their objective, namely, to provide a tabulated list of quantities for the primary purpose of arriving at a true cost, and for a secondary purpose of providing a list of the material which is required for the construction of the particular building.

This purpose is accomplished and a plan provided which can be used to advantage in all the various crafts which compose the entire building industry by patterning the various procedures in Quantity Survey on the following set of general rules.

1. Measurements of completed construction work in place are used as the standard of measurement in all cases and a separate Bill of Material is provided to serve for ordering material.

2. Unit of measurement to be the unit (number), lineal, and superficial area; the third dimension being taken as an element of description.
3. Actual measurements are taken, without addition or reduction for the purpose of equalizing or providing for additional labor or cost, or to take care of waste.

4. Measurements are taken to the nearest even lineal feet, and may be taken to the nearest even inch in section measurements. Exterior walls may be taken as outer measurements without making allowances for deductions or additions for openings. Openings may be taken at either opening size or sash and door size. In case, however, there is a deviation exceeding one per cent in the total amount in any one class of measurements, more accurate measurements shall be taken.

Sometimes the drawings give one, sometimes the other. Both must be eventually known, the opening size for laying out the construction, and the sash and door size for ordering. The latter is preferred, but it is more important to conform with the drawings for identification purposes. The Bill of Material must of course have the Sash and Door size.

5. Measurements of the members of a structure, or a group of structures, are taken in such manner that they may be segregated by separate structures, separate stories, by different types of construction, and by opening costs, which would necessarily include different thicknesses or widths.

6. Abbreviations in general use or in accordance with American Institute of Architects Document No. 12 (Piling System of Building Materials and Appliances) may be used.

7. A Quantity Survey should not include drawings or sketches. Reference should be made to the drawings of the architect or engineer, and it may be advisable to get the architect to furnish details essential for record or reference in such form that they

may be separately printed and attached to the Quantity Survey.

The Quantity Survey compiled in accordance with this set of measurements, providing the description is adequate, gives all the data on nearly all construction work that is necessary for one who has proper cost records to accurately price the work.

A further step is necessary when material is to be ordered. The measurements of the Quantity survey, when not in the form of material, are developed into a Bill of Material conforming to the usual trade requirements. This means that our Quantity Survey used for pricing gives the walls in terms of superficial measure, not "square foot area"; it does not give the number of brick or the yards of mortar. This information is to be found in the Bill of Material. One is the instrument used for the purpose of arriving at cost, the other that used for ordering.

Masonry construction in either brick work or stone work may involve a great number of different kinds of additional labor, especially in exterior wall construction for the purpose of ornamentation. These are taken care of by the notation, "extra on 17-inch face brick wall," etc., giving the description of the extra labor and reference to the drawings in such a way that identification may be made.

Care should be taken to avoid as much as possible the enumeration of extra labor if it can be included in the main items listed.

Segregation: In segregating by stories, it is customary to take off the work for basement and foundations to first floor level, and for each succeeding floor for all construction contained between the floor levels. Sometimes we find there are several different floor levels for a single story; in such a case the principal level is taken as datum, and all other measurements are taken to this datum regardless of whether they come above the finished floor or not. Another method may be used in certain cases. The building may be divided into different units, and the levels of the finished floors taken as the line of segregation, even though they may differ in elevation.

Basic Measurements: There are three main divisions in every building structure into which the entire structural part of the building and much of the finish may be separated, and the basic measurements compared in this manner, it will greatly simplify the take off. They are:

1. Floors, ceilings, roofs and all horizontal members.
2. Exterior walls.
3. Partitions.

In taking off these three classes of construction it is also necessary to list the respective openings contained within them.

It is important to total units and lineals as well as superficies.

In starting a take off it is good practice to begin at a certain point on a plan. A logical order is to start at the upper left hand corner and proceed as in reading a book, to the right and downwards.

Floors, Ceilings, Roofs and All Horizontal Members: Floors are taken off to outside measurements. The basic measurements form an accurate set of measurements of lineals and superficies, and duplication in take off is avoided. The structural measurements are these basic measurements less the openings for stairs, elevator shafts, etc.,

and with the lineals of walls and partitions multiplied by the thickness deducted in addition give the quantity for the interior finish. Ceilings and roofs, if flat, are equivalent to the floors below them; if pitched, arched or vaulted, the flat horizontal measurement is multiplied by the proper constant, give the surface area. Lineal measure of exterior walls multiplied by overhang must be added for pitched roofs. The different segregations added together must equal the result of the extreme over-all dimensions within one per cent, or corrections should be made. This method of checking makes large errors in take-off nearly impossible. The rule of unit square within one per cent can usually be checked mentally and avoids useless splitting of hairs.

As we are not considering concrete as masonry construction, we are limited to certain types of floor construction where clay tile is used, and to brick flooring and paving.

The foot, lineal or square, should suffice as the unit of measurement until such time as the metric system may be adopted. It is customary to measure roofing by squares of 100 feet, paving by yards of 9 feet, but we should be consistent, pointing off to the hundredth place, and making our unit the square for everything in superficial area.

How Many Brick to a Foot: There can be only a certain definite number of brick of a known size, laid with a specified thickness of a joint, in a given space. Quantity Surveyors should be scientific and deal only with actualities. There is no room for argument as to how many brick should be figured for a given area of floor, wall, or partition. That is determined mathematically from the thickness of the members, the size of the brick, the thickness of the joint, and whether the brick are laid on edge, side or on end.

Exterior Walls: The measurements for the exterior walls when totaled correspond with the actual perimeter of the building; in detail they coincide with the measurements taken for the floors. The length of the building corresponds with the length of the wall on that particular elevation and the width of the building corresponds with the length of the elevation abutting. Twice the length of the building plus its width, with the sum of indentations added, gives the total perimeter. Corners may be disregarded, as a rule, and still keep within the allowance of one per cent area but if it is desired to obtain absolute accuracy in arriving at the cubic contents for the Bill of Material, projecting corners must be deducted, and indented corners must be added. The amount multiplied by the height represents the exact superficial area, and is used for structural and finish measurements if within one per cent accurate.

Measurements may be taken under a description based on a greater thickness of wall. In this case it is necessary to add the amount of projection when exterior surface is measured, such as the quantity of pointing and cleaning, unless the amount is less than one per cent.

The description states the kind of brick, the mix of the mortar, the thickness of the joints, the method of pointing and cleaning, and if the wall is a veneer the description should state whether it is on wood or concrete, and the kind of anchors or ties to be used.

All extras in the form of additional cost of labor required for corbels, channels, skirtings, etc., which mean additional cost, must be measured and listed in units, lineals or superficies. The lineal feet of the side of projecting pilasters and panels must be given, also the lineal feet of reveals. Partitions: The partitions should be taken off running all the way through in one direction, and between partitions in the other direction. This will give the structural work accurately and an excess in finish amounting to two times the section area of the partition for each four-way intersection and once the section area for each three-way intersection. This may be disregarded if it amounts to less than one percent.

Openings: All openings should be totaled for deductions, and in the take off they should be arranged in the same order as the take off of the walls and partitions. Notations should be made of the nature of the work from which they are to be deducted, so that deductions may be made from the right quantities.

While it is true that in many cases there is much or more to leave an opening in brickwork, the quantities are necessary in order to calculate the Bill of Material accurately, and even in pricing the work from the Quantity Survey it is important to know the number of openings and the relation of area in openings to the entire surface. It is a matter of adjustment of pricing methods to a more accurate basis.

Hollow Tile and Gypsum Blocks: Hollow tile construction is taken off in the same general way as brick. It is also necessary to take the lineal feet of lintels from the measurements of the openings, which have a total for lineals as well as for area.

The Bill of Material lists the tile as they are to be ordered, allowing for waste and breakage, and taking care of the different shapes required in the case of the bearing or interlocking tile, special shapes for reveals, wire mesh for reinforcing, mortar, and concrete aggregate, cement and reinforcing for lintels.

Architectural Terra Cotta: As the cost of architectural terra cotta varies greatly from the number of pieces to be made from each model, it is necessary to list not only the superficial area of the terra cotta, but also the lineal feet or number of units of all lintels, copings and all special ornamentalments.

The usual method used by the general contractor in arriving at the labor cost on setting terra-cotta is to cube up over-all dimensions and allow about 70 pounds to the cubic foot, extend to tons and price by the ton. This method can be improved on by listing in units, lineals and superficies.

The terra cotta manufacturers, however, will require a detailed list prepared by an experienced terra cotta detailer, or will get one out themselves before they bid, from the architect's drawings. If this is undertaken by the Quantity Surveyor, he must be an expert in this line.

Cut Stonework: In general, what applies to architectural terra cotta also applies to stonework. Here we have the cost of the rough stone as it comes from the quarry, the cost of machine cutting and polishing, the cost of hand cutting and hammering, carving and the cost of erection.

With all this to be considered in order to get exact prices, all information must be furnished, and this can be done only by detailing, and listing every piece. It is the work of a specialist.

Artificial Stonework: The Quantity Survey of artificial stone does not differ in principle from that for the cut stone and terra cotta. In fact, these crafts the basic measurements are valuable for approximate costs and to

give a perspective of the requirements or a check on the totals, and are an improvement on usual rule of thumb methods, but exact prices can be obtained only by detailing. These details should be prepared under the supervision of the architect by a qualified specialist, and furnished with the other drawings. Too often this duty of the architect, just as that of furnishing efficient and economical mechanical engineering drawings and specifications for the benefit of the owner, is omitted and left to the contractors, with the result that the owner may pay more or get less for his money than he would if his interests were properly protected.

The Quantity Surveyor should not be called on to furnish structural or mechanical engineering, or to detail stonework as part of his duty in furnishing Quantity Survey Service.

Marble and Tile Work: Marble and tile work are considered as separate trades, and therefore will not be discussed at this time.

Miscellaneous Items: There are a number of items which may be included in the description for the structural work, and omitted from the Quantity Survey listing. This means that allowance should be made in the pricing of the structural work to cover them. They should be taken care of in the Bill of Material, when material is involved. Some of these items are bonds, joints, and pointing, cleaning, reinforcements, mortar color, clamps and anchors, pointing.

There are certain items which must be specially listed such as flues and flue linings, fireproofing, fire stopping, arches, chimbleys, chimney pots, raggle blocks, fireplaces, fireplace linings and hearths.

The simple rule for all these items is to give them separate listing in the Quantity Survey if necessary to cover an added cost; but to omit listing them if mention in the description will assure allowance being made to cover their cost when the principal work is priced.

Some items involve extra labor only, such as the many types of corbels, mouldings and ornamentation. If so, they should be listed in the Quantity Survey as extra labor, and they are omitted in the Bill of Material, unless extra material is required.

Document 172: There should be a revision of the Filing System Document 172, to conform it to general use for Quantity Survey and Cost Accounting purposes. As a Materials Catalogue Filing Index it does very well, but it is too bad that its compilers did not visualize its possibilities as the basis of a more extended use, and make it less complicated and more in accordance with the customary segregation of the different crafts.

CANNOT LIEN U. OF C. BUILDING

What courses are open to a sub-contractor to secure collection of moneys due him on account of a contract on University of California construction?

"Mechanics liens have been filed against University work but the Attorney for the Regents contends that such liens cannot constitute a lien against State property," says L. A. Nichols, Comptroller of the University. "More frequently we have received notices of stop payment and it has been the practice of the Regents to co-operate with the sub-contractors in withholding the amount due pending a settlement of the case by the contractor. It has been the practices of the University for years to see that all obligations of a general contractor are properly met."

PRIVATE ARCHITECTS FOR STATE BUILDINGS

Selection of private architects to speed California's \$5,000,000 program of public building is expected to result from a conference last Tuesday attended by Governor James Rolph Jr., other state officials and Frederick H. Meyer of San Francisco, president of the northern division, state board of architecture.

"It is our intention," said the governor, "to expedite this building program as much as possible, so that it may be of practical benefit in alleviating unemployment."

"The private architects will supplement the usual work of the state division of architecture in order that the plans and specifications may be prepared as early as possible for the letting of private contracts."

The governor stated that the architects are going to be chosen on the basis of merit only, and not out of any political consideration.

"We will select only well-qualified architects," he said. "They will be responsible men and those only who can be held responsible."

PREVAILING WAGE AND 8-HOUR LAW IS UPHELD IN NEW YORK

The validity of the act passed last year by the New York state legislature providing that the eight-hour law and prevailing wage rate law should apply to all grade-crossing elimination work performed under the \$300,000,000 state bond issue was upheld in part by a decision handed down Jan. 2 by Justice Ellis J. Staley of the state supreme court, according to Engineering News-Record.

The law was held valid in so far as it applies to private contractors on grade-elimination work, but was held invalid concerning employees of railroads on similar work on the ground that railroad employees are already subject to wage and time restrictions imposed by acts of Congress. Suits to test the constitutionality of the law have been brought by all of the railroads operating in the state, declaring that the act would increase the cost of grade separation, of which the railroad pays 50 per cent. In a lengthy decision Justice Staley establishes grade-crossing elimination work as public work and therefore subject to acts of the legislature.

An appeal will probably be taken.

SEATTLE PAVING WORKERS FILE WAGE SCALE WITH COUNCIL

Organized paving workers in Seattle have filed with the city council through J. H. Coulson, secretary of Street Pavers' Local No. 440, a list of wage scales and working conditions during 1931.

A continuance of the eight-hour day is asked with a five-and-a-half-day week.

A wage of \$9 is asked for manhole and catchbasin men, cement finishers, dummy men and ribbon settlers. Rodders, sloat men, spreaders and mixers ask \$8 a day. Roller men, concrete wheelers, curb men, dummy helpers, ribbon helpers, and fine subgraders, ask \$6.60 a day, while all other laborers on paving jobs will demand \$5.60, the same wage now paid building laborers, compared with \$4.50 paid ordinary labor.

THE OBSERVER

What He Hears and Sees on His Rounds

The city trustees of Crescent City will shortly enact an ordinance requiring that all contractors on public work employ local labor wherever possible.

"Don't bid too low," says Thos. D. Hunt, county engineer of King County, Washington. "The county, city or state doesn't want work done for nothing nor at prices that jeopardize success."

Contractors, particularly those engaged in public works construction, should memorize that advice.

Uncle Sam finds it profitable to build now. In answer to a call for bids to erect the Santa Ana postoffice the Treasury Department received 34 figures, the lowest being \$148,710, and the highest \$196,400. The second low bid called for \$149,000, the third \$152,450 and the fourth \$153,000. The remaining bids ran closely between \$154,000 and \$170,000.

Repeal of the Matton act, under which virtually all public improvement projects are authorized, is sought in a bill introduced in the assembly by Ed L. Head, San Diego, formerly of Sacramento. A series of other bills affecting the Matton act are pending before the legislature.

Building and construction work generally took first place in 1930 as a consumer of steel, forcing the automobile industry into second place from first position which it occupied in 1929. This was shown in an analysis of steel consumption recently published by the Iron Age.

The compilation was based on returns from steel companies which produced 98 per cent of the estimated total for the entire steel industry.

The building industry was the largest user of steel in 1927, but was displaced by the automobile industry in both 1928 and 1929. The railroads were the third largest users of steel in 1930, having occupied second position in 1929.

The executive council of the American Federation of Labor in session at Miami, Fla., Jan. 14, adopted a resolution urging the immediate placing of federal employes on a five-day week basis to relieve unemployment. The resolution said the government should keep step with private employers who already have done so and immediately inaugurate a five-day week for government employes.

To expedite the letting of contracts undertaken in connection with the emergency construction appropriation bill, the Corps of Engineers is insisting that bidding be limited to contracting firms with sufficient capital and plant to start operations immediately, says Paul Wooton, Washington correspondent for Engineering News-Record.

District engineers have been reminded that the work is being undertaken in order to accelerate such construction projects as will increase public employment. They have been instructed to reject a bid unless the bidder can show that he has the necessary capital, equipment and experience and that he is not already obligated for the performance of as much work as he will probably be able to do during the period contemplated by the advertisement.

A profit on a project for the contractor is justifiable, and the tendency of contractors to bid against each other instead of on the job adds to the grief of both engineer and builder, decreasing the fair profit and making performance of the contract a question, says Major O. A. Piper, chief assistant city engineer of Seattle.

"The public demands service from a contractor on city, county and state work, but this cannot be given if the work is being done below cost," Maj. Piper declares. Explaining the relation of the contractor to city engineer, he seriously out that experience and cooperation alone can spell success for each, assuring good work, a fair profit, and the job completed on time.

"Engineers as a whole heartily approve of the prequalification of contractors," Engineer Piper declares. Such a law, he says, would assure public work being done by capable contractors with a background that assured the best service.

The penalties and liquidation damages attached to failure to complete a job on time are an important consideration of a contract, but are rarely taken seriously until the occasion arises to actually exact the penalty and damages, Major Piper says. He states that contractors should remember such clauses are enforceable and should be considered step by step on the work being done.

Colonel Walter E. Garrison, state director of public works, has requested contractors to employ only California residents as labor in the state's \$5,000,000 public building program as far as possible.

"This building program is mapped and is being speedily carried on aid in relieving the unemployment crisis in the state," remarked Garrison. "Therefore, to realize this objective, it is necessary that residents of the state be employed on the jobs."

"While it is not legally possible for the state to restrict labor used by private contractors to Californians, we may decline to consider bids on future jobs submitted by contractors who persistently refuse to give California labor the first opportunity of employment."

Definite limitation of debts on street improvement projects is called for in a bill introduced by Assemblyman Walter J. Little of Santa Monica and other members of the Southern California delegation. The measure would prohibit local legislative bodies from going ahead with public improvement undertakings when the proposed cost totals more than 50 per cent of the actual value of property involved.

Public work contracts entered into by the city of Portland, Oregon, will carry a clause that will insure maintenance of the pavements for five years, the city council having passed an ordinance inserting the clause in all contracts hereafter. The ordinance carries an emergency clause and was urged by Commissioner Barbur because of numerous contracts that will be before the city shortly.

The clause provides that the discovery of a defect in a street pavement will be accepted by the contractor as prima facie evidence of a defect in material or workmanship,

despite the fact that the work was done under city inspection and accepted by the city.

While only two contractors have refused to maintain their work for five years, some bonding companies have taken the stand that when the city inspects the work and accepts it the city then must prove defective workmanship. The new provision is intended to meet that position.

CONTROL BILLBOARDS VIA VOLUNTARY ZONING

A proposal for voluntary zoning of portions of rural highways having high scenic value against defacement by billboards, posters, hot dog stands, filling stations and other forms of wayside commercial enterprise was advanced by Herbert U. Nelson, of Chicago, executive secretary of the National Association of Real Estate Boards, at a national conference on roadside business and rural beauty held in Washington, D. C.

The proposal was put forth as a method of conserving to the public both aesthetic values and proper commercial values along rural highways. It is novel in that it obviates the necessity for arbitrary action by state authorities, and in that it gives owners of property abutting scenic highway a quid pro quo for the property rights they would give up where such zoning was put into effect.

The plan proposes that an enabling act be passed by the various states under which there might be set up in connection with the state highway department a special zoning board for non-urban regions of the state. This board would have the right to zone any stretch of roadway as a scenic region upon petition of 75% of the owners of abutting property. Along the highway so zoned wayside commercial business of all kinds would be banned, not only on the highway itself but on abutting property, except at such intervals as may be established to meet public necessity and convenience.

The plan proposes further that on roads along which the owners of abutting property voluntarily forego the commercial use of their properties in this manner the state highway commission would undertake a definite program of beautification, through the planting of trees and shrubs, through care that bridges erected should harmonize with the general scenic effect, through the adaptation of the highway to the natural contours of the landscape, and through similar measures which would aid in the conservation of the recreational values of the region.

A total of \$30,974,630 may be spent in the State of Washington for highway work during the 1931-33 biennium if the state legislature approves the road budget submitted by Governor Ronald Hartley. Of this total \$29,746,030 is contained in the budget, the remainder will be raised by the state to spend on lateral highways and by the various counties. Expenditures by the counties will probably total \$4,000,000, and for lateral work by the state about \$5,000,000 will be expended. Also in the total \$30,974,630 federal aid funds which will be spent by the state highway department. Work planned by the state with the \$21,974,630 asked of the legislature includes 146 miles of paving, 610 miles of grading and surfacing and 1699 miles of oiling during the next two years.

HERE—THERE EVERYWHERE

James A. Farrell, president of the United States Steel Corporation, declares that in his opinion the peak of the financial depression had been passed thirty days ago and the pendulum of industrial activity was now swinging back to normalcy. Mr. Farrell asserts that "the last thirty days have given ample evidence of a considerable increase not only in the business of the steel industry, but in collateral and unrelated lines."

The ensuing year will be elected at the January 26 meeting of the Sacramento Builders' Exchange, it is announced by Secretary Patterson. The meeting will be addressed by a speaker yet to be selected. Refreshments will be a part of the program.

The State Senate adopted unanimously a resolution by Senator Roy F. Brown, of San Francisco, urging congress to adopt legislation consenting to the construction of a bridge across San Francisco Bay from Rincon Hill by way of Goat Island to Alameda County. This route was declared by Senator A. H. Breed of Piedmont to be the most practical and the least expensive to span the bay. The project calls for an expenditure of \$72,000,000. A toll bridge would be built.

A. F. Davis of the Lincoln Electric Company is scheduled to provide a paper revealing the latest steps made in electric arc welding at the Western Metal Congress to be held in the San Francisco Municipal Auditorium February 16-20.

By a vote of eight to one the Seattle city council decided to place upon the March election ballot a proposed charter amendment that will empower the city light department to do its own engineering work. Sponsors of the proposed amendment declare that if engineering work in connection with city light development is handled by that department it will be facilitated.

F. P. Basler, operating the Matthews Construction Company of Sacramento, has instituted suit in the Sacramento Superior Court to recover \$9,894.21 from C. Miles and the American Surety Company. Basler claims the amount is due for equipment which he rented to Miles to do road construction in Mono County.

Recognizing the seriousness of the present unemployment condition of the country, and in order to alleviate as far as possible that situation, the plumbers of Long Beach have inaugurated the five-day week. Negotiations to this end have been under way for some months between the contractors and the journeymen and an agreement was reached recently whereby the work week was shortened to five days.

Clyde Hickman has been elected president of the Long Beach Builders' Exchange. Other officers are: J. H. Pelkey, vice-president; A. G. Motach, secretary; W. M. McGrew, R. H. Horkin and E. L. Card, directors; Eugene C. Eradbury, executive secretary.

Samuel J. Humes, director of the Washington State Highway Department, urges that contractors keep the wage scale up. The present is not the time to cut wages, Humes declares, even though work is scarce and labor plentiful.

ALONG THE LINE

Raymond H. Holtzman, founder of the Shelton-Holtzman Lumber Company, and later manager of the Elv Lumber and Coal Company of Elv, Nev., died in Glendale, Cal., Jan. 15. He had been ill for several weeks. The deceased was 63 years of age and had been prominent in business circles of Nevada for more than twenty years.

Major William S. Post, designing engineer of the Los Angeles County Flood Control District, has been appointed chief engineer of the Irrigation service, United States Bureau of Indian Affairs, according to word received by Chief Flood Control Engineer E. C. Eaton. Major Post, who is now in Washington, has been engaged in designing a new type of rockfilled dam for the San Gabriel river.

Stephen Henry Reno, building contractor and a resident of Berkeley for 40 years, died in that city Jan. 15 following a brief illness. His widow and one daughter, Florence Helen Reno, survive.

J. B. Lippincott of Los Angeles has been retained by the city of Long Beach as consulting expert for the water department.

Nevada State Highway Commission has adopted a highway building budget involving the expenditure of \$2,988,447 for the year 1931.

C. H. Purcell, state highway engineer, has been appointed engineer for the proposed San Francisco Bay Bridge, according to an announcement of the State Department of Public Works.

John F. Collins, Oakland contractor, has filed a schedule in bankruptcy in the Federal Court, San Francisco, listing his debts at \$77,236 and assets at \$37,290.

H. A. Van Norman, formerly chief water engineer for the city of Los Angeles, has been appointed general manager of the entire department of the municipally-owned water and power department by the Municipal Water and Power Commission.

SEEKS TO AMEND ANTI-TRUST LAWS

The California State Chamber of Commerce has adopted a resolution urging the amending of the anti-trust laws of the U. S., declaring that the present laws are involved in so much uncertainty respecting their interpretation as to impede business and industrial progress, and are so restrictive in their nature that they encourage and foster an unbusinesslike, unfair and oftentimes ruthless competition which results in great hardship and losses to producer, wage earner and consumer alike, and their enforcement has been particularly detrimental to and destructive of our natural resources, both State and National.

The United States Chamber of Commerce will be asked to take such action as may be proper to procure such amendments and copies of the resolution adopted by the California body will be forwarded to Senators and Representatives of the state in Congress for their attention.

TRADE NOTES

Durwin McInnest, sales manager for the Pacific Coast Cement Company of Seattle, has been elevated to the position of vice-president in charge of sales, it is announced by E. C. Ward, president of the company.

A. L. Gladding, formerly of Gladding, McBean & Company, has resigned his position with that firm and is now associated with his two brothers, Chandler and Charles Gladding, in Gladding Brothers, clay products firm of San Jose. The three Gladding brothers have been in clay products manufacturing for years, having been brought up in the business. One and one-half years ago they purchased the Kartschoke Clay Products Company in San Jose and have since operated it as Gladding Brothers. The firm manufactures vitrified clay sewer pipe, roof tile, brick and terra cotta. The plant is located at Third and Keyes Streets, San Jose.

Indiana Limestone Co. of California, Ltd., with headquarters in San Francisco, has filed articles of incorporation with the county clerk. Directors are A. E. Preston, V. E. Fay and A. M. Johnson.

PHILIPPINE WOOD TRADE IN INFANCY

In a review of the Philippine hardwood situation, W. G. Serim of Los Angeles, president of the Philippine Mahogany Association, says:

"The trade in Philippine woods is still in its infancy as most of the woods used so far are the Philippine mahogany and Apitong varieties. Woods, such as Narra, Tinilao, Aci and many others, are ideal for furniture and cabinet purposes, while for automobile and other construction purposes there are available such woods as Yacal, Guio, Mungachapay, etc. A favorable decision by the Federal Trade Commission on the nomenclature of Philippine mahogany would stimulate trade in this wood as the investigation of the last five years had led a number of potential users to hesitate about using the term 'Philippine mahogany,' fearing that they were liable to prosecution by a government body. Hearings by the Federal Trade Commission are about completed and we shall soon know whether the term is applicable as a botanical or commercial term. Generally speaking, the state of business can be summed up as follows: Business, fair; stocks, low; prices, fair."

Construction of a veterans' hospital to care for former service men employed on the Boulder-Hoover Dam is asked by George Malone, Nevada State road commissioner who is in Washington to confer on the matter with General Frank T. Hines, administrator of veterans' affairs. The Nevada, who wants the hospital built near Las Vegas, is seeking authorization for immediate construction, on the grounds that more than one-third of the workers to be employed on the dam project will be war veterans. At present, there is no veterans' hospital within over a day's travel, he says.

TRADE LITERATURE

Details regarding pivoted industrial windows and projected windows of the commercial and architectural type are given in two recent bulletins of the Campbell Industrial Window Co., Inc., Pershing Square Building, New York City.

Type SSU centrifugal pumping unit, in which a single ball-bearing-mounted shaft serves both an electric motor and a centrifugal pump, are described in bulletin 1847 of the Allis-Chalmers Mfg. Co., Milwaukee, Wis.

Engineering data and price lists on continuous steel flooring are contained in a folder compiled by the Irving Iron Works Co., Long Island City, New York.

Recent publications of the engineering and research division, National Sand & Gravel Association, Munsey Building, Washington, D. C., are as follows: Circular 8—"Effect of Soft Particles of Coarse Aggregate on Strength of Concrete," by W. J. Emons; circular 7—"Effect of Addition of Finer Sizes to Gravel on Strength of Concrete," by Stanton Walker; and circular 8—"Effect of Grading of Gravel and Sand on Voids and Weights," by Stanton Walker.

STATE BUILDING CODE OPPOSED BY PORTLAND REALTORS

Disapproval of the proposed state building code was expressed by members of the Portland Realty Board in a resolution presented by Henry E. Reed, chairman of the committee on legislation. It was decided to refer the resolution to the proper committee of the state legislature to give them the board's opinion on the matter.

The decision was taken following a report submitted by Reed on behalf of his committee and concurred in by the committee of taxation on which A. C. Callan is chairman.

The report, which contained a lengthy survey of the proposed code stated that while it might be desirable that Oregon should have a state building code providing minimum requirements as to structure, plumbing and electricity, such a measure should be drafted by a representative statewide committee as was contemplated by the legislative resolution of 1927.

As the proposal stands now, according to the report, the sponsors of the code are not sufficiently representative of the sentiment and needs of the state; the code as proposed would be confusing to the building industry; it provides for amendment without notice to certain municipalities; it grants legislative powers to the labor commissioner and his advisory committee; it would cause needless expense, and the penal provisions are too drastic.

The state would be authorized to continue for two years with its negotiations with private capital for the construction of a dam on the American River at Polson under a bill introduced in the senate by Senator J. M. Inman of Sacramento.

The bill is identical to the present law, which has been in effect for four years, except that the date is extended to 1933 to allow further negotiations.

Provision is made for the reversion of the works to the state at the end of fifty years. The private concern would hold title under a lease.

SURVEY REVEALS 17% DECREASE IN 1930 CONSTRUCTION

A decrease of 17 per cent in the volume of construction performed in the United States during 1930, as compared with the previous year, is reported in the current issue of The Constructor, official publication of the Associated General Contractors of America. Charts prepared by the association show the average monthly performance during the year, as determined by shipments of basic construction materials, at index number 163, as compared with an average of 196 for the previous year and 188 for the preceding five-year period. December construction volume dropped to index number 123, a decrease of 29 per cent from the previous month and 27 per cent less than in December, 1929.

As yet there is no statistical indication that the bottom in construction activity has been reached or that the upturn is just ahead, according to "The Constructors' editorial comment. It points out that in all classifications, except those of educational and public buildings, reports of contemplated projects compiled by the F. W. Dodge Corp. continue to show lower totals than those of the corresponding months a year ago. Any future rise in construction activity will be needed for several months by a notable rise in the reports of contemplated projects, it states, and since this rise is not yet in evidence it appears patent that activity in private construction during 1931 probably will not exceed that of 1930.

"The Constructors' chart show that despite the fact that the monthly average of wages paid in the industry was higher than in any year on record, with the exception of 1920, the cost of construction in 1930 was the lowest in recent years. After a steady five-month decline in the cost of construction earlier in the year, the cost index remained stationary during the last five months at the low level of 1934.

Indications of a near record year in contract surface pavement awards are shown in the publication's chart of reports from the Portland Cement Association for the first eleven months of 1930. During this period a total of 137,012,000 square yards was awarded, as compared with 132,201,000 square yards during the same period of 1929. This total was only 2,888,000 square yards less than for the corresponding period during the peak year of 1928 and constituted the second largest on record for the period.

WASHINGTON STATE ARCHITECTS ELECT

Roland E. Borhek was re-elected president of the Washington State Chapter, American Institute of Architects, at the close of the annual meeting of the organization at the Washington Athletic Club in Seattle, last week.

Other officers elected were: First vice president, J. Listre Holmes; second vice president, Earl N. Dugan; third vice president, Stanley A. Smith; fourth vice president, John W. Maloney; secretary, Lance E. Gowen; treasurer, Albert M. Allen; executive board, three-year term, George W. Stoddard, and for delegates to the national convention, Lance E. Coken, Sherwood D. Ford and Nelson J. Morrison.

CONFERENCE CALLED ON ROAD BUILDING

A series of conferences between members of Congress, from states neighboring California are being arranged by Representative Albert A. Carter of Oakland. These conferences have for their purpose the formulation of plans for road construction and far reaching results are expected from the gatherings.

The California member took the initial step on being informed by officials of the Bureau of Public Roads that the \$30,000,000 recently appropriated by Congress for road building, plus an additional \$50,000,000 was available for immediate use. In making overtures for these meetings Congressman Carter states that he believed more benefit could be secured for the state involved by close cooperation. It is worthy of note that many of the road projects which will come up for discussion will have their terminus in Oakland or the vicinity.

In addition to this the monies released, in the opinion of the Californian, will render material aid in relieving unemployment. About half the money spent will go directly to labor, while another large percent will benefit employees in various industries allied to road building.

STATE PUBLIC WORKS CHIEF MAKES CHANGES

The first move toward a general shakeup in the State Department of Public Works was made last Tuesday by Col. Walter C. Garrison of Lodi, newly-appointed director of the department.

Garrison announced the reorganization of rights-of-way divisions in five California cities. These agencies have charge of the purchase of all properties required by state highway and other building operations, involving millions of dollars annually.

The changes follow: San Francisco—Holloway Jones, in place of George Geiger; John Howard, replacing Morgan A. Sanborn; Herbert Forbes, succeeding W. E. Cathie; Frank P. Webb, replacing Leo J. McCarthy; Harold J. Lorentzen to be displaced later.

Eureka—Phillip C. Eastman, replacing Paul Williamson.

Redding—Leland L. Rose, succeeding L. H. Williams.

Los Angeles—Adolph N. Sutro, succeeding Harold D. Dale.

Sacramento—George Paulich, succeeding A. M. Nash; Charles S. Smith, replacing John W. White; Bradford Perry, replacing J. F. O'Hara.

COMBINE FORCES TO SUBMIT BID ON HOOVER DAM PROJ.

Siems, Helms, Inc., St. Paul, Mo., contractors, with branch offices at 206 Sansome St., San Francisco, has formed a corporation with two other concerns to bid on the Hoover dam at Boulder City, Nevada. It is announced by Ralph Christofferson, San Francisco manager for the firm.

The corporation's bid will be submitted about March 1 to the Denver, Colo., offices of the Reclamation Bureau, Christofferson said.

The other concerns in the combine are: A. Guthrie & Co., also of St. Paul, and Woods Bros. of Lincoln, Nebraska.

The Siems, Helms Co. laid the foundations for the Southern Pacific bridge between Martinez and Benicia.

EMBRITTELEMENT IN BOILERS INVESTIGATED

Since the early days of steam boiler operation the industry has been encountering various types of boiler failures. A number of these have been eliminated, but there is one type of crack which still occurs. This is the cracking which takes place in the riveted areas of the boiler going from rivet hole to rivet hole, often unseen and undetected until a dangerous condition exists.

The purpose of the investigation reported in Bulletin No. 216 of the Engineering Experiment Station of the University of Illinois was to secure information relative to the occurrence of this type of cracking in boiler plate, in order to determine the cause of the difficulty and to devise methods of preventing it. The data were obtained from power plants which have experienced cracking in steam boilers, as well as from tests made in the laboratory.

The investigation was begun five years ago, and results were previously published in Bulletin No. 155 in 1926 and in Bulletin No. 177 in 1928. Since editions of these two bulletins have been exhausted it seemed desirable to include in the present bulletin a large part of the material already published in the previous bulletins together with the new material obtained. This bulletin, therefore, contains the complete results of the full five years' investigation of boiler plate embrittlement.

In addition to recording some more recent instances of embrittlement in steam boilers and caustic digesters, the new material deals chiefly with a study of the solubility of embrittlement-inhibiting agents in boiler water and of the concentrations of solutions in capillary spaces, as well as tests of inhibiting agents other than sulphate or carbonate.

Copies of Bulletin No. 216 may be obtained without charge by addressing the Engineering Experiment Station, Urbana, Illinois.

ARIZONA SUIT ON BOULDER DAM WILL BE HEARD MARCH 9

Setting of March 9 by the U. S. supreme court as the date for hearing the motion of the Federal government and the six states in the Colorado river pact to dismiss the suit of Arizona to block the building of Hoover (Boulder) dam, indicates that the legal phases of the project will be settled before the appropriation to be made by Congress for the coming fiscal year becomes effective on July 1.

The technical ground on which dismissal of the suit is asked is that in violation of the constitutional provision of the Act of Congress authorizing the construction of the dam Arizona erred in not making the Federal government a party defendant to the suit, since it is vitally concerned.

Issues raised in connection with the motion to dismiss the suit, however, have changed by the court on the constitutionality of the law providing for construction of the dam, on the validity of the pact between the six Colorado states—California, Nevada, Utah, Colorado and New Mexico; on the navigability of the Colorado river below Hoover dam, and on the powers of the government and its officials to proceed with the project.

Battista Cella will operate in San Francisco under the firm name of Marina Construction Company, according to articles filed for record with the county clerk.

METHOD TO CUT OFF PILES UNDER WATER DESCRIBED

Marine contractors are often faced with the necessity of pulling or cutting off wooden piling at the level of the bottom in order to clear a river or harbor for navigation purposes, says S. Standish of the Standish Engineering Corp., of Chicago, Ill., in Engineering News-Record. In many instances the cost of pulling the piling is excessive, especially where there is considerable penetration. The underwater saw can be used, but this, while much more economical than pulling, requires a special rig. The old method for cutting off piling with dynamite was to encircle the pile with a heavy wire ring, attach several sticks of dynamite to this ring and then lower it to the bottom where it was exploded. The difficulty with this method lies in the fact that two or three shots are usually required, and often obstacles, such as spikes, bolts, or knots on the body of the pile, prevent the ring from slipping all the way down.

The writer has found through experience that the simplest way to cut off wooden piles with dynamite is to prepare a bomb consisting of three or five sticks of dynamite with which are grouped a corresponding number of round steel bars of about the same length. The bomb is held together with several turns of wire. If this bomb is lowered in the water so that it rests on the bottom within 3 ft. of the pile, the explosion will cut the pile off clean at the bottom, as the bars act somewhat in the nature of shrapnel.

EFFECT OF CERTAIN FURNACE GASES ON ENAMELS REPORTED

The detrimental effect of certain furnace gases on enamels is fully realized, but practically no data are at the disposal of the enameler. The term "gassing" is quite generally heard among plant men, and it is usually associated in thought with the presence of sulphur gases, probably correctly so in most cases. That the presence of reducing gases is not favorable for the production of good enamels is also a generally accepted fact.

Bulletin No. 214 of the Engineering Experiment Station of the University of Illinois contains the results of an investigation to determine the effect of furnace gases on enamels for sheet steel. The compositions of the enamels used in the investigation were typical of those used in the industry. Tests were made to determine the effect of sulphur dioxide, nitrogen, carbon dioxide, oxygen and steam on enamels; also the effect of unburned city gas and of products of combustion of city gas on enamels.

The conclusions drawn as a result of the investigation are as follows: Very small amounts of sulphur dioxide, such as are sometimes found present in the atmosphere around industrial districts may be deleterious to enamels; the composition of sheet steel cover coats has an important bearing on their resistance to sulphur dioxide; oxygen is a necessary constituent of the furnace atmosphere if an enamel of the best quality is to be obtained; the presence of reducing gases in the furnace atmosphere causes blistering.

Copies of Bulletin No. 214 may be obtained without charge by addressing the Engineering Experiment Station, Urbana, Illinois.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 716, 87 Post Street, San Francisco. (Phone Sutter 1944).

R-3209-S ENGINEER, mechanical or electrical, not over 30, with 3 to 5 years' experience on hydro-electric plant operation for service and testing. Must have mechanical skill, agreeable personality and single. Salary about \$175 month and expenses in field. Apply by letter. Headquarters, San Francisco.

K-322-W-2934-C-S PROFESSOR of printing for school of industrial engineering; must be a college graduate with broad experience in printing. Position will involve research and application to courses in craftsmanship training. Salary \$5,000 a year. Apply by letter with full details of experience, references and photo. Location, East.

R-3459-S ELECTRICAL ENGINEER, graduate under 35 years of age, with 2 years G. E. or Westinghouse factory test training and some field experience for power plant safety economy inspection. Salary during preliminary training period \$150 month with increase on the road. Apply by letter. Headquarters, Colorado.

R-3429-S ENGINEER, preferably mechanical, 35-45 years old, with forceful personality and ability to handle men, for production manager of company operating several scattered plants in California. Must have good record as executive. Salary \$5,000-6,000 a year. Apply by letter with brief of experience and photo. Headquarters, San Francisco.

R-3303-S ENGINEER, preferably mechanical or chemical graduate, with 5 to 10 years' experience including considerable application of thermodynamics to solution of heat exchange problems as found in oil refinery equipment. Must have executive ability. Apply by letter with details of experience, references and photo. Salary \$100-250 per month to start. Location, Northern California.

R-3456-S MECHANICAL ENGINEER graduate, not over 32, with some practical knowledge of machine design for plant equipment development. Good opportunity for man with constructive ideas and initiative. Salary \$175-225, depending upon man. Location, San Francisco.

FREIGHT TERMINAL FOR NEW YORK WILL COST \$13,000,000

The Port of New York Authority has announced that it has completed negotiations with the twelve railroads service the port district for the operation of the \$13,000,000 New York freight terminal which it will build on the block bounded by Eighth and Ninth Aves. and Fifteenth and Sixteenth Sts., and that the railroads have signed an agreement to use the building as their central point in the delivery and collection of less-than-carload freight bound to and from New York.

Under the agreement it is stipulated that the railroads shall organize an agency to operate the terminal, and the Port Authority pledges itself to build other terminals if the first experiment proves successful and need for additional facilities arises.

ELECTRICAL INDUSTRY RESISTS DOWNWARD TENDENCY DURING 1930

While the business and industrial depression during 1930 had an adverse effect on the aggregate output of electrical equipment, says John Liston in the January issue of the General Electric Review, there were certain classes of electric apparatus which resisted the general downward tendency. In comparison with the record activity of 1929, and in fact created new high figures for both the volume and the dollar value of production as compared with any previous year.

In this group were included railway electric locomotives and electric equipment for street railway and railroad motor cars, electric propulsion equipment for merchant ships, mercury arc power rectifiers and high tension cable. The number of installations of household type electric refrigerators also showed a marked increase.

Developmental work was continued actively throughout the year in the laboratory, the factory and the field, with the result that improvements in design, materials and construction were secured in numerous classes of apparatus all tending toward increased efficiency or economy in the generation, transformation, distribution and application of electric energy for power systems, transportation, communication, industrial modernization and in the rapidly growing field of farm electrification.

Mercury arc power rectifiers installations increased both in number and capacity the largest unit produced being rated 6500 kw., 450 volts, 10,000 amperes. It was designed in connection with the production of electrolytic hydrogen. One railroad applied power rectifiers in all of its substations as the sole source of the supply of energy to its feeder system. This was the first exclusive use of this apparatus for this class of service.

Building construction utilized electric welding to a greater extent than heretofore and 84 cities and towns in the United States were added to the list of those permitting the use of this efficient and silent tool in place of the noisy riveter for this class of work. The tallest building so far by electric weld built for Ford Motor Co. in height. Automatic welding machines including those applying the atomic-hydrogen process were further improved for industrial use.

In order to facilitate a more extensive use of hydrogen atmospheres in electric furnaces, apparatus was developed for the economical production of gases, rich in hydrogen, from natural gas or illuminating gas. This apparatus can be conveniently located near the furnaces served and can thus form an integral part of an industrial process heating equipment.

A 110,000 kw., 1200 lb. steam turbine generator built for the Ford Motor Company was not only the largest high pressure steam unit so far constructed but also the highest rated generating unit ever designed for an industrial installation.

The requirements of electrical transportation both on land and sea called for a record production of equipment. In addition to the electric locomotives and motor cars produced for the electrification of important sections of large steam railway systems, there was a growing demand for motor and braking equipment for the rehabilitation of street railway rolling stock. Gas-electric buses were used for the first time for interurban service and there was renewed interest in the flexibility and economy of the trolley bus for operation in modern urban street traffic.

In December, the turbine electric liner, "Herbert Hoover" was launched.

She was at that time the largest merchant ship ever built in America and with her propelling motors rated 26,500 shaft horse power exceeded in power rating any electrically propelled merchant ship in the world.

Lighting is still the arch enemy of untimely electric service but laboratory and field investigations with improved recording instruments added greatly to our knowledge of the characteristics of lightning during the year, while the development of Thyrite material made it possible to utilize the data so secured in a practical way for power system protection. The Thyrite lightning arrester has already been installed on systems operating at the highest commercial voltage.

Perhaps the most interesting development from the standpoint of future possibilities was the greatly increased application of electronic tubes for purposes other than radio communication. Their remarkable versatility in rectifying, converting, inverting, regulating, measuring and controlling has resulted in numerous applications in substitution for electro-mechanical methods of current control.

Other work with vacuum tubes included tests of apparatus designed to produce artificial fevers by induction and the construction of an X-ray tube for operating at a potential of 500,000 volts or more than twice the maximum voltage previously used.

In presenting a review of these and many other developments which occurred during the year, all the apparatus referred to are products of the General Electric Company. These cover such a wide range that the references will serve as an indication of the tendencies in design and production as well as the general progress in the electrical manufacturing industry as a whole.

STATE TO GET FUNDS FOR NAT'L FOREST HIGHWAYS

Construction of 210 miles of approach roads to national parks in California, at a cost of more than \$7,250,000 is planned in the Leavitt bill, which will shortly be passed to the Senate for consideration, according to word from Washington.

Under the terms of the bill, which increases the appropriation for national park roads, the biggest project is planned for Yosemite Valley.

Approach roads totalling 107 miles at a cost of \$4,050,000 are planned for this area. Others included are: 17 miles of roads at Sequoia National Park, costing \$595,000; 69 miles of roads at Lassen Volcanic National Park, costing \$2,010,000, and 17 miles at General Grant National Park, costing, \$595,000.

The Leavitt bill has yet to pass the Senate, after which funds must be appropriated. The bill alone does not authorize sufficient funds to build all of the roads contemplated, but the funds will be supplemented by moneys spent by the National Forest Service and under the terms of the Colten-Oddie act, passed recently.

COMBUSTION TESTS WITH ILLINOIS COAL

Bulletin No. 213 of the Engineering Experiment Station of the University of Illinois contains the results of com-

bustion tests made with coal from four mining districts of the state of Illinois, two being representative of Northern Illinois coals and two of Southern Illinois coals. The tests were made using one of the boiler units in the University of Illinois Power Plant.

The principal objects of the investigation were to compare the performance characteristics of the various coals as determined by their influence on the overall efficiency, temperature of the flue gases, combustion rate and draft required when the boiler unit was operated at given steaming capacities; and to make a study of incidental factors, such as excess air, ash-pit loss, and flue-gas loss, as influenced by the physical and chemical characteristics of the various coals.

The bulletin includes a description of the plant, a discussion of the methods used in conducting the tests and making the computations, and a discussion of the results obtained.

Copies of Bulletin No. 213 may be obtained without charge by addressing the Engineering Experiment Station, Urbana, Illinois.

NEW PORTABLE AIR COMPRESSOR

Ingersoll-Rand Co., 11 Broadway, New York, has announced a new portable air compressor with a piston displacement of 500 cu. ft. per minute. This unit not only has a capacity 60 per cent greater than the largest portable previously offered, but follows a type of design that is distinctly different from that of smaller machines. It is designated the Type "XL."

The unit consists of a two-stage, horizontal compressor direct-connected to a 4-cylinder, 4-cycle Waukesha gasoline engine through spiral bevel reduction gears operating on ball bearings.

Two complete water cooling systems are provided—one for the compressor and one for the engine. Separate, automatic lubricating systems also are used. A radiator-type intercooler cools the air between the stages of compression. Regulation is automatic.

The complete unit, with gasoline tank and receiver, is mounted on a one-piece, cast-steel frame, equipped with rubber tire steel wheels. The steel top is fitted with removable steel side covers arranged for locking.

The Type "XL" is intended for use on jobs which require a considerable amount of air. It will do the work of two or more small portables, with resulting savings in operating costs.

PAVING FIRM ASKS \$7,994.20 IN SUIT

Charging breach of contract the National Pavement, Corporation of California has filed suit in Oakland for \$7994.20 damages against the Hutchinson Construction Company.

The action is based on the failure of the defendant to purchase agreed material from the plaintiff in connection with the pavement of East 14th Street between 12th and 23rd Aves.

It is alleged the Hutchinson Construction Company had agreed to pay \$21,296.50 for material, expert service and the paving patent but later cancelled the agreement, the city paying the defendant \$9523.55 for the cancellation.

H. J. Frunniere, San Francisco structural engineer and P. J. Walker, general contractor of San Francisco, have been elected to the Board of Directors of the California State Automobile Association. Both will serve three year terms.

Building News Section

APARTMENTS

Plans Being Figured.

APARTMENTS Cost Approx. \$20,000
SANTA ROSA, Sonoma Co., Cal. 7th and A Streets.

Two-story frame and stucco apartments (6 apts.)

Owner—P. Gambini and S. Testorelli, Santa Rosa.

Architect—Wm. Herbert, Rosenberg Bldg., Santa Rosa.
 Bids are being taken from selected list of local contractors.

Sub-Contracts Awarded

APARTMENTS Cost, \$125,000
SAN FRANCISCO, S Broadway 187 E Webster Street.

Seven-story and basement Class A apartments (7 apts.)

Owner—Wm. Helbing, Sr., 1310 Lombard St., San Francisco.

Architect—H. S. Helbing, 1310 Lombard St., San Francisco.

Contractor—The Helbing Co., 1310 Lombard St., San Francisco.

Concrete—Golden Gate Atlas Material Co., 16th and Harrison Sts., (Acme Concrete Co., 666 Mission St., is pouring the concrete).

As previously reported steel joists awarded Truscon Steel Co., Call Bldg., S. F.; cases and mill work to Builders' Supply Depot, 290 9th St., S. F.; structural steel to Judson-Pacific Co., 609 Mission St.; electrical work to Aetna Elec. Co., 1337 Webster St.; lumber to Loop Lumber Co., Central Basin.

Plans Being Figured.

APARTMENTS Cost, \$175,000
SAN FRANCISCO, N Sutter Street 1 1/2 W Franklin St.

Seven-story and basement class A steel frame, concrete and wood joist apartments.

Owner—Mutual Owners Association.

Architect—Jos. L. Stewart, 206 Sansome Street.

Bids are being taken for a general contract.

Completing Plans.

APARTMENTS Cost, \$175,000
LOS ANGELES, Cal. Detroit St. near Wilshire Blvd.

Seven-story and basement reinforced concrete apartments (60x125 ft.)

Owner—Ernest and Elizabeth McIntyre.

Architect—Fred Sward, Delta Bldg., Los Angeles.

Sub-bids will be taken Jan. 26.

Sub-Bids Wanted.

APARTMENTS Cost, \$50,000
OAKLAND, Alameda Co., Cal. East Erie St N Mandana Blvd.

Three-story and basement frame and stucco apartments (48 rooms).

Owner—Louise E. Erwin, 3600 Lakeshore Ave., Oakland.

Architect—Clay N. Burrell, American Bank Bldg., Oakland.

Contractor—R. G. Roberts, 3001 Fulton St., Berkeley.

Sub-bids are wanted on plumbing, hardwood floors, heating, insulation, roofing, the sinks and baths, painting, ornamental iron and plastering

Construction Started.

APARTMENTS Cont. price, \$11,500
SAN FRANCISCO SE Army and Alabama Streets.

Two-story and basement frame and stucco apartments (4 apts.)

Architect—G. A. Berger, 309 Valencia.

Contractor—J. L. Canino and F. D. Martini, care architect.

Architect is taking heating bids. Oil burning heating system is to be installed.

CHURCHES

NAPA, Napa Co., Cal.—St. Mary's Parish Church has voted to erect a new edifice to replace the present structure in Randolph St. The church has \$18,000 available for such a purpose and proposes to raise \$5,000 additional to finance the structure. The following have been appointed a building committee to secure a site for the proposed structure: Rev. W. Charles Pearson, H. E. Boudler, H. S. Davis, George W. Danforth and C. W. Merwin.

FRESNO, Fresno Co., Calif.—Until January 27, bids will be received by Rev. F. C. Zahl, pastor, Zion Congregational Church, E and Monterey Sts., to erect new church building. Plans and further information on file at 254 E St., Fresno.

LAS VEGAS, Nev.—Architect Jas. A. Fleming, Sr. Las Vegas, is completing plans and will take bids for the construction of additions to St. Joan of Arc Catholic church on Second Street.

Plans Being Completed.

CHURCH Cost, \$75,000
BERKELEY, Alameda County, Calif.

Scenic and Le Conte Avenues

One-story brick church (to seat 5000).

Owner—University Christian Church.

Architect—W. H. Hatchell, Jr., Chamber of Commerce Bldg., Berkeley.

Bids will be taken for a general contract in one week.

SAN JOSE, Santa Clara Co., Cal.—Rev. John T. Buckley, pastor of St. Leo's Catholic Church, announces that plans will be prepared for a new edifice to replace the present building at 1051 W San Fernando St. The cost of construction, according to tentative estimates, is placed at \$100,000.

RIVERSIDE, Calif.—First Christian Church, Rev. C. L. Waite, pastor, has appointed a building committee to

work out details preparatory to the erection of a new edifice to cost about \$50,000.

Bids To Be Taken In One Week.

CHURCH Cost, \$19,000
SAN FRANCISCO, 32nd Avenue and Ulloa Street.

One- and two-story frame and stucco church with slate roof (to seat 400).

Owner—St. Stephens Protestant Episcopal Church.

Architect—Chas. Strethoff, 2724 15th Street.

FACTORIES AND WARE-HOUSES

Contract Awarded.

CANNERY Cost, \$10,000
ISLETON, Sacramento Co., Cal.

Rebuild cannery.

Owner—Isleton Canning Co., 2 Pine St. San Francisco.

Architect—Eng. Dept. of Owner.

Contractor—J. F. Watson, Isleton.

Building was recently partially destroyed by fire. Equipment will be replaced to cost approximately \$12,000.

Sprinkler System Bids Wanted.

RECONSTRUCTION Cost, \$45,000
SAN FRANCISCO, 700-798 York St.

Reconstruct portions of plant.

Owner—Trevor & Co., 71 Sutter St.

Architect—Not Given.

Bids on other portions of the work will be taken shortly.

Contract Awarded.

DAIRY Cost approx. \$10,000
SAN MATEO, San Mateo Co., Calif.

One-story and mezzanine floor frame and stucco dairy bldg. (40x70-ft.; concrete floor, composition roof).

Owner—Jersey Dairy Farm, 833 South Idaho, San Mateo.

Plans by D. K. Dobkowitz, 424 Montemary Blvd., San Francisco.

Contractor—Castle Bldg. Co., 830 Market St., San Francisco.

NEAR BLYTHE, Riverside Co., Cal.—United States Gypsum Co., 300 W. Adams St., Chicago, contemplates erecting a wallboard factory at Midland, 22 miles north of Blythe.

SACRAMENTO, Cal.—Assembly has passed to the Senate a bill appropriating \$31,000 to finance construction of an addition and purchase of equipment for the state printing plant at 11th O Sts., Sacramento.

Preparing Plans

TERMINAL BLDG. Cost, \$300,000
AVALON, Los Angeles Co., Cal.

Three-story and tower Class A reinforced concrete terminal building.

Owner—Santa Catalina Island Co.

Architect—Earl T. Heitschmidt, Los Angeles.

Way Terminal Bldg., Los Angeles.

Contract Awarded—Sub - Bids Being Taken.

SERVICE BLDG. Cost, \$60,000
SAN MATEO, San Mateo Co., Cal.

Group of service buildings (concrete construction).

Owner—Pacific Gas & Electric Co., 245 Market St., San Francisco.

Marked by Eng. Dept. of Owner.

Contractor—H. H. Larsen Co., 64 So. Park St., San Francisco.

SKILSAW Portable Electric Hand Saws (4 models).

SKILSAW Portable Electric Sander

SKILSAW Radial Arm Attachments.

SYNTRON Portable Electric Hammers (4 models, motorless).

MALL Flexible Shaft Machines (50 models).

Electric Drills, Grinders, Buffers, Routers, Lock Mortisers.

PETER H. NELSON

Labor Saving Portable Electric Tools.

1248 Mission St. Underhill
 San Francisco 7652

SALES · SERVICE · RENTALS

Sub-Contracts Awarded.

HANGAR. Cost, price, \$32,746
SACRAMENTO, Sacramento Co., Cal.
Freight Blvd. at Municipal Air-
port.
Steel frame and wood hangar and air
terminal station, 80x100 feet.

Owner—City of Sacramento (to be
leased to Boeing Air Transport
Company).

Architect—Harry Devine, 1405 Forty-
first St., Sacramento.
Contractor—Lindgren and Swinerton,
Inc., California State Life Bldg.,
Sacramento.

Rock, Sand and Cement—American
Fuel Co., 2701 Stockton Blvd., Sacra-
mento.

Structural Steel—Palm Iron Works,
15th and S Sts., Sacramento.

Reinforcing Steel—W. S. Wetenhall,
17th and Wisconsin Streets, San
Francisco.

Lumber & Mill Work—Friend & Ter-
ry, 2nd and S Sts., Sacramento.

Plumbing and Heating—A. W. Sweet,
1436 Del Paso Blvd., Sacramento.

Electric Work—Sterling Electric Co.,
907 8th St., Sacramento.

Grading—J. E. Reeves Co., 12th and
American River, Sacramento.

Structure will be of steel frame and
wood construction covering an area of
80 by 100 feet, with an exterior cov-
ering of corrugated iron.

Plans Being Prepared.

PLANT. Cost, \$100,000
SAN JOSE, Santa Clara Co., Cal.

Three- or four-story concrete or brick
manufacturing and refining plant.
Owner—Liquid Sugar Corp., 637 Bat-
tery St., San Francisco

Plans by Eng. Dept. of Owner.

It is expected to start construction
about Feb. 1, 1931. Similar buildings
will be constructed at Los Angeles
and Stockton at a later date.

(4458) 4

Bids Opened.

FACTORY. Cost, \$—
OAKLAND, Alameda Co., Cal. Eighty-
first Avenue near 14th Street.

One-story reinforced concrete factory.
Owner—Blue Bird Potato Chips, Inc.,
68th Ave. and Hick Sts., Oakland.

Architect—Charles W. McCall, 1404
Franklin St., Oakland.

Following is a complete list of the
general bids received:

Havoc Paige, 5651 Oak Grove,	35,755
Oakland	35,755
Wm. Spivock, S. F.	35,950
Gambert Bros., Oakland	36,350
Chas. Vezev & Sons, Oakland	36,782
G. P. W. Jensen, S. F.	36,800
J. J. Moore, Oakland	37,255
Clinton-Stephenson Const. Co., San Francisco	37,474
C. H. Lawrence, Oakland	37,485
Chas. Heyer, S. F.	37,740
R. W. Littlefield, Oakland	37,926
A. A. Haskell, S. F.	37,955
Barrett & Hilp, S. F.	38,200
H. S. Shain, Oakland	38,379
A. Cedarburg, Oakland	39,650
Jacobs & Pattani, Oakland	39,670
Austin Co. of Calif., Oakland	40,400
Villadsen Bros., S. F.	41,150

A number of alternates were sub-
mitted which may change the low
bidder's figures.

Plans Being Prepared.

HANGAR, ETC. Cost, \$65,000
SACRAMENTO, Cal. Municipal Air-
port.

Steel frame and wood hangar and air
terminal station.

Owner—City of Sacramento, H. G.
Denton, city clerk.

Architect—Starks & Flanders, Forum
Bldg., Sacramento.

Construction Postponed.

CANNING PLANT. Cost, \$250,000
WATSONVILLE, Santa Cruz Co., Cal.
One-story reinforced concrete canning
plant (main structure 160x550-ft.)

Owner—Manuel A. Travers, et al.
Plans by Manuel Travers.

Manuel A. Travers, prime mover in
this project, is manager of the com-
mission house, Travers and Sakata,
Beach Road, Watsonville. Construc-
tion has been postponed for approxi-
mately one year.

Plans Being Figured.

LAUNDRY. Cost, \$10,000
SAN MATEO, San Mateo Co., Cal. No.
719 Woodside Ave.

One-story frame and stucco laundry
building.

Owner—Superior Service Laundry
(Theo. Ryerson, Mgr.), 719 Wood-
side Ave., San Mateo.

Architect—Not Given.

Building will house new machinery,
including water softener and purifying
plant.

Contract Awarded.

SHOP. Cost, \$—
RICHMOND, Contra Costa Co., Cal.
One-story steel frame and brick shop.

Owner—Santa Fe Railroad Co.
Architect—Eng. Dept. of Owner (M. C.
Blanchard, Chief Engr.), Kerckhoff
Bldg., Los Angeles.

Contractor—Villadsen Bros., 417 Mar-
ket St., San Francisco.

Plans Being Figured—Bids Close Feb.
3rd

PUBLISHING BLDG. Cost, \$—
LOS ANGELES, Cal. No. 113 S.
Broadway.

Three-story Class A steel frame and
reinforced concrete publishing build-
ing (110x165 feet).

Owner—Times Mirror Co.
Architect—Gordon Kaufmann, Union
Bank Bldg., Los Angeles.

Final Plans Approved.

SHOP BLDG. Cost, \$30,000
OAKLAND, Alameda Co., Cal. 52nd
Ave. and E 10th St.

Two-story reinforced concrete main-
tenance shop building.

Owner—City of Oakland School Dis-
trict, Oakland.

Bids will be advertised Jan. 26 and
will be opened Feb. 10.

Bids Wanted—To Be Opened Feb. 3,
12 Noon

WAREHOUSE, ETC. Cost, \$60,000
SANTA ROSA, Sonoma Co., Cal.

Service group (warehouse, garage,
shops, transformer house, meter
house, pole yard, etc.)

Owner—Pacific Gas & Electric Co., 245
Market St., San Francisco.

Plans by Eng. Dept. of Owner.

As previously reported, grading con-
tract awarded to Connors & Hansen,
Santa Rosa.

Sub-Contracts Awarded.

RECONSTRUCTION. Cost, \$—
TRACY, San Joaquin Co., Cal.

Reconstruct present warehouse (brick
walls, steel and wood roof).

Owner—Holly Sugar Co., West Chan-
nel St., Stockton.

Plans by Eng. Dept. of Owner.

Fabrication of steel trusses awarded
to the Herrick Iron Works, 18th
and Campbell Sts., Oakland. Remain-
ing work will be done by owners.

GARAGES AND SERVICE STATIONS

Contract Awarded

GARAGE. Cost, \$12,500
RENO, Washoe Co., Nevada. South
Virginia and Court Sts.

One-story brick garage, 50x100 feet.

Owner—H. C. Heldtman (Durham-
Chevrolet Co., lessee), Reno.

Architect—Geo. A. Ferris & Son, Clad-
inos Bldg., Reno.

Contractor—Wine & Williams, Reno.

OAKLAND, Cal.—David Barnes, 553
25th St., Oakland, at \$1,600 submitted
lowest bid to city clerk to furnish and
install four unit gas heaters in Mu-
nicipal Garage at 5th Ave. and E 7th
St. Council has appropriated \$2,000
for this work.

Following is a complete list of bids:
David Barnes, Oakland \$1,600
Geo. C. Bell, Oakland 1,749
East Bay Sheet Metal Works 1,837
George A. Schuster 1,845
Pacific Gas & Elec. Co. 1,910
Golden Gate Sheet Metal Works. 2,124
Fearey & Moll 2,179
H. S. Salsbery 2,200
(4352) 1st report Jan. 9, 1931. 6

Segregated Bids To Be Taken In One
Week.

GARAGE. Cost, \$15,000
SAN FRANCISCO. Third Street bet.
22nd and 23d Sts.

One-story and basement reinforced
concrete garage and service sta-
tion (150x50-ft.)

Owner—Samuel Ran, 238 5th St.
Plans by H. K. Dobkowitz, 425 Mont-
gomery Bldg.

Engineer—W. Adrian, 417 Market St.

As previously reported wood roof
trusses awarded to Summerbell Truss
Co., 354 Hobart St., Oakland. Con-
tractor awarded for furnishing and
erecting nine Summerbell wood roof
trusses.

Bids To Be Taken In A Few Days.

AUTO AGENCY. Cost, \$20,000
SACRAMENTO, Sacramento Co., Cal.
NE 22nd and Y Sts. (120x150-ft.)

One-story brick Ford automobile
agency.

Owner—Edward H. Harrold, 712 12th
St., Sacramento.

Architect—Chas. F. Dean, California
State Life Bldg., Sacramento.

Contract Awarded.

SERVICE STATION. Cost, \$10,000
SAN FRANCISCO. Masonic Ave. and
Turk Street.

Owner—Associated Oil Co., 79 New
Montgomery St., San Francisco.

Contractor—Reavey & Spivock, Shell
Oil Bldg., San Francisco.

Bids Close Jan. 31, 12 Noon.

AUTO SALES BLDG. Cost, \$70,000
SAN FRANCISCO. Mission Street
near Ney St.

One- and two-story steel frame and
reinforced auto sales and service
building.

Owner—W. E. Street, 251 Magellan
Avenue.

Architect—Irvine & Ebbs, Call Bldg.

Following contractors will submit
bids:

T. J. Broderick, 1305 Burlingame
Ave., Burlingame.

G. P. W. Jensen, 320 Market St.

H. W. Coburn, 2048 Market St.

Stoneson Bros. and Thorinsson, 279
Yerba Buena Ave.

Chas. Heyer, Mills Bldg.

Peter Sartorio, 2440 Greenwich St.

H. P. Hoyt, 45 2nd St.

Young & Horstmeier, 461 Market St.

T. B. Strand, 50 Castaneda.

L. M. Bruce, 3553 Divisadero St.

K. E. Parker, 135 South Park.

Lindgren & Swinerton Inc., 225 Bush
Street.

Reavey & Spivock, Shell Oil Bldg.

Wm. Spivock, Hobart Bldg.

Bids Opened—Held Under Advisement

SERVICE STATION. Cost, \$7500
SAN FRANCISCO. SW Pacific Ave.
and Franklin St.

Reinforced concrete service station.

Owner—E. Dodge, care Mr. Orth, Al-
len & Co., 168 Sutter St.

Architect—Not Given.

Announcement will be made in a
few days.

GOVERNMENT WORK AND SUPPLIES

MARE ISLAND, Calif.—Bureau of Yards and Docks, Navy Department, has set aside \$44,000 for improvements at Mare Island Navy Yard. The money will be expended as follows:

Repairs to timber wharf.....	\$ 3,000
Improve elec. wiring machine shops.....	2,200
Composition wood block roofing, Bldg. 271.....	10,000
Covered passageway, Bldgs. 69-71-25-71.....	1,500
Repair struc. shop floor.....	1,700
Drainage Bldg. 590, paint shop annex.....	1,000
Repair center track door, W. C. Bldg. 388.....	1,800
Hammerhead cranes, grid removal.....	750
Miscellaneous repairs to cranes 3292, 3134, 3033, 2422.....	1,500
Painting Bldgs. 123, 160-146-125 103 and outbuildings in rear quarters.....	8,000
Repair 5th St. bridge.....	500
Repair railroad trestle from causeway to Submarine Base Wharf.....	2,400
Renew springline, ferry slip.....	2,400

POMONA, Los Angeles Co., Cal.—U. S. Treasury Dept., office of the Supervising Architect, informs bidders for construction of the U. S. Post Office at Pomona, that specifications have been modified. The changes apply to bronze entrance door finish, tile work, inner vestibule doors, boiler room bolts, public entrance doors and other doors.

WASHINGTON, D. C.—Bids are being received by Bureau of Supplies & Accounts, Navy Department, Washington, D. C., to furnish and deliver miscellaneous supplies and equipment as noted in the following schedules, further information being available from the Navy Department Officer, 140 Harrison St., San Francisco:

Bids Open Feb. 3

Western yards, hammers and hatchets, sch. 4927.
San Diego, one motor driven hand milling machine; sch. 4935.
Mare Island, 4 electric refrigerators; sch. 4933.
Mare Island, 150 ft. flexible metallic hose, 4-in.; sch. 4931.
Mare Island, 130 waterproof vibrating horns, electric; sch. 4938.
San Diego, 1000 lbs. steel wool; sch. 4954.

San Diego, 3 subway type transformers; sch. 4963.
Mare Island, 3 electric drills; sch. 4953.

Bids Open Feb. 10

Mare Island, 13,200 ft. steel wire rope; sch. 4962.

Bids Open Feb. 17

Mare Island, 60,000 ft. b.m. teak; sch. 4928.

MARE ISLAND, Cal.—L. Hecht, 340 Pine St., San Francisco, (rep. Eastern Contracting Firm) (Tel. Exchange 4078) desires sub-bids in connection with the barracks buildings to be constructed at Mare Island for the U. S. Government. General bids are to be opened January 28 by the Bureau of Yards and Docks, Navy Department, Washington, D. C. Sub-bids desired on all portions of the work.

WASHINGTON, D. C.—Until February 11, 10:30 A. M., under Schedule No. 2625, bids will be received by Purchasing Officer, Panama Canal, for transmission line towers. Specifications obtainable from Assistant Purchasing Agent at Fort Mason, San Francisco.

SAN FRANCISCO—J. E. Rodgers, at \$2300 submitted lowest bid to Architect Wm. A. Smith, chairman of a committee of
local civic organization members, is
conducting a campaign for funds to
finance construction of a swimming
pool to be the first unit in the con-
struction of a community recreation
center. The cost of the pool is esti-
mated at \$10,000. Early construction
is planned.

MISCELLANEOUS SUPPLIES AND MATERIALS

LOS ANGELES, Cal.—See "Hospitals," this issue. Bids wanted for miscellaneous fixtures and equipment for installation in Acute Unit of the Los Angeles General Hospital; bids to be opened February 9 and 16.

SAN MATEO, San Mateo Co., Cal.—Until February 5, 4 P. M., bids will be received by John D. Bromfield, clerk, San Mateo Union High School District, to furnish and deliver fuel oil, lubricating oils and stove distillate, for the period beginning March 1, 1931, and ending February 23, 1932, as follows:

1. Fuel oil, commercial grade, in accordance with specification for Bunker Fuel "C" in United States Government Department of Commerce, Bureau of Mines, Technical Paper 323 B, except as to water and nonpetroleum sediment, delivered in tank truck load lots to the schools of the district as ordered.

2. Lubricating oils, Eastern and Western, light, medium, and heavy, delivered in barrel lots to San Mateo High Schools as ordered. Specify trade names.

3. Stove distillate, 30°-32° Gravity, 165° Flash, delivered in lots of two hundred gallons, more or less, to the schools of the district as ordered.

Bids may be submitted on any or all of the above items.

Further information obtainable from Superintendent of Schools, Bellevue Ave. and Delaware St., San Mateo.

SAN FRANCISCO—Until February 2, 3 P. M., bids on Proposal No. 679, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish 300 galvanized iron garbage cans for School Department. Specifications obtainable from above.

KENTFIELD, Marin Co., Cal.—Until February 2, 12 noon, bids will be received by Mary F. Seymour, secretary, Tamalpais Union High School District, to furnish and deliver:

(a) Standard Typewriters;
(b) Noiseless Typewriters (Standard Make).
Specifications obtainable from secretary.

SACRAMENTO, Cal.—Until January 22, 8:15 P. M., bids will be received by H. G. Denton, city clerk, to furnish one Moon-Hopkins Special Tax Billing Machine, for the office of the City Assessor-Collector. Certified check 5% payable to City Controller required with bid. Further information obtainable from clerk.

BUSINESS OPPORTUNITY

Frank O'Brien of O'Brien Sales Co., General Motors Bldg., Detroit, Mich., with patent rights on an electrically equipped advertising display is desirous of securing distributor.

R. P. Messer, sales manager for Trautman-Messer & Co., Inc., Wapakoneta, Ohio, manufacturers of cast iron and aluminum cooking utensils is interested in securing representation in San Francisco and adjacent territory.

I. Salkind, 253 Lake St., Albany, N. Y., wishes to make connection with concern in this section which is desirous of having an agent or a representative in the East.

E. W. Simons, vice-president of the Pittsburgh Reflector Co., 304 Ross St., Pittsburgh, Pa., wishes to appoint a

representative in the San Francisco district for the sale of reflectors designed to improve the lighting of store windows and displays.

Names and addresses of persons or firms concerned in the following opportunities will be furnished on request to Business Opportunity Department, Daily Pacific Builder, 547 Mission St., San Francisco or Phone GARfield 8744:

20775—Steel Materials. San Francisco. Firm in Germany is desirous of contacting local importers of steel beams, steel joists, angles, bars and other steel material.

20774—Calculating Machines. Berlin, Germany. Manufacturer of calculating machines of exceptional value at reasonable prices desires to get in touch with interested importers.

20772—Folding Boats. New York City. Manufacturers of folding boats are looking for local agents.

20776—Representation. Fiume, Italy. Party is anxious to represent local exporters or manufacturers, for Italy.

20790—Scrap Iron. Mexico, D. F. Party is anxious to contract firms interested in importing approximately ten thousand tons of mixed scrap iron.

D-3662—Eastern Representation. San Francisco. Gentleman wishes to contact local manufacturers or packers of products of distinctive Californian character who desire representation on Eastern seaboard.

D-3663—Representation. San Francisco. Local party interested in securing representation here for Eastern concerns, particularly mechanical or electrical lines.

D-3664—Representation. Seattle, Wash. Party interested in representing, in a sales capacity in the Pacific Northwest, a reliable manufacturer in San Francisco or California.

D-3665—Distribution. Portland, Ore. Sales Director interested in securing the names of those manufacturers, importers, and distributors who are interested in securing and maintaining distribution of their products throughout the Northwest.

D-3666—Distribution. Chicago, Ill. Firm wishes to contact reliable local man who is well enough acquainted with the department store and furniture store trade to get business on a few exceptional values in low priced furnishings and imports, including dollar day specials.

D-3667—West Bend, Wis. Manufacturer of brake testing machine wishes to contact with concern in this territory who would be interested in taking over the manufacture of this machine.

D-3669—Representation. San Antonio, Texas. Firm with established sales force is seeking new Californian products to handle.

D-3670—Distributor. Manufacturers of belt for power transmission in all the various types, also leather packings for pneumatic and hydraulic use; wish to secure distribution here.

D-3671—Dealers. Alexandria, Ind. Manufacturers of wool insulation for heat, cold and sound wish to contact with firms who would make good house insulating dealers.

The Department of Agriculture stands sixth in the number of employees of all the Government departments. The personnel numbers 25,736, according to figures compiled by the Civil Service Commission. There are 20,558 men and 5,178 women. One of the largest bureaus of the Department of Agriculture is the U. S. Forest Service, charged with the administration and protection of 159,750,000 acres of Government land included in 149 national forests, which has 2,710 permanent employees.

While detailed earnings figures are not available at this time, President Burnett of the Month Portland Cement Company, told stockholders at the annual meeting that the company had strengthened materially its current position during the year 1930. Current assets were 3.77 times current liabilities, as compared with a ratio of 2.1 at the end of the previous year. All officers and directors were re-elected.

DAILY PACIFIC BUILDER

The only daily construction newspaper affording complete coverage of the construction activities in Central and Northern California — featuring work contemplated, bids wanted, bids opened, contracts awarded, sub-bids wanted and sub-contracts let on all types of building construction; bridges, dams and harbor works, irrigation projects; machinery and equipment; water works and supplies; business opportunities; building permits; building contracts; mechanics' liens; acceptances, etc., etc.

Keep informed on construction developments in Central and Northern California, and the major projects in Southern California, the states of Oregon, Washington, Nevada and Arizona.

Engineering News Section

BRIDGES

VENTURA, Ventura Co., Cal.—Until 10 A. M., Feb. 3, bids will be received by county supervisors to construct timber bridge 20 ft. wide and 30 ft. long with concrete paving and earth fill approaches, including:

- (1) 15,000 ft. b. y. timber;
 - (2) 7 cu. yds. class A paving concrete;
 - (3) 850 lbs. reinf. steel;
 - (4) 339 cu. yds. earth fill.
- Cash Contract No. 716. This bridge will be built across the Canada Larga near the Walker Ranch. Chas. W. Pettit, county surveyor.

MODESTO, Stanislaus Co., Cal.—County Surveyor Geo. Macomber is preparing revised plans for proposed Okadale bridge over the Stanislaus river. This structure is in addition to that for which \$102,500 is sought in the state budget for a bridge over the Stanislaus river on the main highway between Ripon and Salida.

ALBANY, Alameda Co., Cal.—City Engineer H. I. Dygert is preparing plans for culvert over Cerrito Creek in Pomona Ave.; estimated cost \$100. Cost will be borne equally by the cities of Albany and El Cerrito.

PALO ALTO, Santa Clara Co., Cal.—City Planning Commission will recommend to the city council the construction of a subway under the Southern Pacific tracks at Embarcadero road, 8 blocks south of University Ave. A bond election is contemplated to finance the city's one-half share of the cost, the remaining half to be paid by the railroad. Tentative plans are also being considered by the Planning Commission for subways in University Ave. and at California Ave., 1 mile south of the University. The cost of the three subways is estimated at \$311,500 by City Engineer J. F. Byxbee.

SAN FRANCISCO—Formal application for a permit from the War Department to construct the proposed \$2,600,000 bridge over San Francisco Bay has been filed by Col. Walter E. Garrison, director of the State Department of Public Works, acting for the California Toll Bridge Authority, which will issue bonds and supervise construction of the bridge.

The application and plans prepared by State Highway Engineer C. H. Purcell call for an 800-foot span on the Oakland side, but this may be changed, if deemed necessary, without further hearings by the War Department, once the permit is granted. Maj. F. H. Ropes of the Army Engineering Corps, San Francisco, states that it will be necessary to advertise the plans and application for approximately three weeks, and hearings then will be started by three engineers from the War Department sent here from Washington.

JACKSON, Amador Co., Cal.—City council petitioned to construct bridge across South Jackson Creek to serve the Peck Hill Section. The council has ordered estimates of cost to be prepared.

PORTLAND, Ore.—Lindstrom & Feigenson, Railway Exchange Bldg.,

Portland, at \$87,417.50 for cedar piling, awarded contract by Multnomah County Commissioners to recondition the Hawthorne Bridge. Edelfesen-Weygrand Co., 250 Front St., Portland, at \$25,000.75 awarded contract for abutments, piling and fill in connection with the same project.

STOCKTON, San Joaquin Co., Cal.—County supervisors will ask bids at once to construct subway under Southern Pacific tracks on the Lower Sacramento road in the Forrest Lake district; estimated cost \$26,000. The bids will probably be opened Feb. 9. Southern Pacific R. R. will share cost. Details will be published shortly.

YUBA CITY, Sutter Co., Cal.—County Supervisors have authorized reconstruction of the Feather River Bridge at Nicolas to meet the demands of the War Department. The federal department, acting on a protest filed by the California Debris Commission, objected to the character of 160 feet of the causeway when the river cut a new channel during a flood period.

OAKLAND, Cal.—As previously reported, bids will be received February 3, 10:30 A. M., by George Gross, county clerk, to construct bridge on Redwood Road in Eden Township. The work involves the following approximate quantities:

- (1) 85 cu. yds. structure excav.
- (2) 1100 ft. steel piles;
- (3) 125 cu. yds. concrete;
- (4) 21,600 lbs. reinf. steel;
- (5) 60,500 lbs. structural steel;
- (6) 170 ft. timber guard rail

Plans and specifications obtainable from County Surveyor George Posey.

DREDGING, HARBOR WORKS & EXCAVATIONS

PORT BRAGG, Mendocino Co., Cal.—Dutton Dredge Co., Mills Bldg., San Francisco, awarded contract at \$178,720 by U. S. Engineer Office, San Francisco, to remove old jetty, construct new jetties and dredging in the Noyo river, approximately 1½ miles from Fort Bragg. Only other bidder was Healy-Thibbitts Const. Co., San Francisco. Project involves:

- (1) 110,000 cu. yds. dredging of sand, gravel, boulders and slats.
- (2) 1,820 cu. yds. rock to be removed from river;
- (3) 8,000 tons of rock (removed from old jetty and placed in inner jetty); 750 cu. yards concrete (removed from old jetty). Total sum for both;
- (4) 25,000 tons to be furnished and placed in 2,000 ton units;
- (5) 240 ft. sheet piling bulkhead (new jetties).

Unit figures follow:

	Dutton Dredge	Healy-Thibbitts
(1)	\$ 48	\$.60
(2)	3.10	10.00
(3)	21,200.00	45,000.00
(4)	3.75	4.50
(5)	21.00	20.00

PORTLAND, Ore.—Kern and Kibbe, 250 E. Salmon St., Portland, under Schedule A, at \$20,506.31 submitted low bid to U. S. Engineer Office, Portland, to construct three dikes at Martin Island bar.

Parker Schram, Couch Bldg., Portland, under Schedule B, at \$14,126.96 submitted low bid to construct one dike at Martin Island bar.

Gilpin Const. Co., Worcester Bldg., Portland, under Schedule C, at \$14,329.13 submitted low bid to construct two spur dikes at Dokelower bar.

The above work is in connection with the construction of 4,340 lin. ft. of pile dikes in the Columbia river below the mouth of the Willamette.

SACRAMENTO, Cal.—City Manager Jas. S. Dean has been authorized by the city council to make preliminary surveys for a vehicular tube beneath the Sacramento river. Crossings at M or Y streets are being considered.

OAKLAND, Cal.—Until January 26, 4:30 P. M., bids will be received by G. B. Hegardt, secretary, City Port Commission, 424 Oakland Bank Bldg., for dredging in slip of Inland Waterways Terminal at foot of Franklin and Webster Sts., involving 20,000 cu. yds. Specifications obtainable from above.

STREET LIGHTING SYSTEMS

ALAMEDA, Alameda Co., Cal.—City council will start proceedings shortly for ornamental electrolux system in Third Street, 50% of the property owners having petitioned for the work. Burnett Hamilton, city engineer.

BEVERLY HILLS, Los Angeles Co., Cal.—Until 5 P. M., Feb. 10, bids will be received by the city for approximately 1100 8x10-in. ball globes for street lights.

SAN MATEO, San Mateo Co., Cal.—See "Streets and Highways," this issue. Proceedings started by city to resurface streets and install electrolux.

MACHINERY AND EQUIPMENT

HANFORD, Kings Co., Cal.—Until February 4, 7 P. M., bids will be received by D. C. Williams, city clerk, to furnish one automobile for use of fire chief. Specifications on file in office of clerk.

HOLTVILLE, Imperial Co., Cal.—Until February 4, 5 P. M., bids will be received by E. M. Carpenter, city clerk, to furnish one 2-ton truck with flat rack, hydraulic hoist and dual rear wheels. Further information obtainable from above.

OAKLAND, Cal.—Until January 29, 12 noon, bids will be received by F. C. Merritt, city clerk, to furnish and deliver three motor trucks for use of street department. Specifications on file in office of clerk. Walter N. Erickstad, city engineer.

BUREKA, Humboldt Co., Cal.—Until January 29, 2 P. M., bids will be received by W. H. Pierce, superintendent of equipment, Shop No. 1, State Highway Commission, Bureka, for the purchase of the following equipment no longer required: CHC 2367 Ford Express Model A.

CHC 3027 Pontiac Sedan 4-door.

Bidders may make offers for one or more items, but must state price offered for each item. No lump sum bids will be considered.

All equipment may be inspected at the Division of Highways yards at Eureka from 8:30 A. M. to 4:30 P. M.

SACRAMENTO, Cal.—Until Jan. 24, 2 bids will be received by W. H. Reichel, superintendent of equipment, Shop No. 10, State Highway Commission, 1802 34th St., for the purchase of the following equipment no longer required:

CHC 2647 Ford Tudor Sedan.
CHC 2666 Ford Tudor Sedan.
CHC 41 Sullivan Portable Air Compressor, 170 cu. ft. capacity.
CHC 227 Austin 8-ft. Giant Grader.
CHC 486 Austin 8-ft. Jr. Rip Shor Grader.

Bidders may make offers for one or more items, but must state price offered for each item. No lump sum bids will be considered.

All equipment may be inspected at the Division of Highways yards at 1802 34th St., Sacramento, from 8:30 A. M. to 4:30 P. M.

MADERA, Madera Co., Cal.—Until February 2, 10 A. M., bids will be received by L. W. Cooper, county clerk, to furnish one new 35 Monarch Tractor, f. o. b. Madera and for the sale of one used 30-Best Tractor no longer required by the county. Further information obtainable from clerk.

REDDING, Shasta Co., Cal.—Until January 23, 2 P. M., bids will be received by J. M. O'Malley, superintendent of equipment, Shop No. 2, State Highway Commission, Redding, for the purchase of the following equipment, no longer required:

CHC 1855 Liberty Dump Truck.
CHC 1909 Dodge Touring Car, 1927 model.
CHC 2673, Dodge Touring Car, 1928 model.

CHC 54 Ingersoll-Rand Drill.
CHC 34 Royal Special Grader.
CHC 72, Spears-Wiles Grader Tractor Attachment.

CHC 6, Jaeger, 1-2 sack Concrete Mixer.

CHC 39, Marion 1 cu. yd. type 7 Gas Electric Shovel.
CHC 181, McCormick-Deering Tractor

Bidders may make offers for one or more items, but must state price offered for each item. No lump sum bids will be considered.

All of the above equipment, except CHC 39 Shovel, may be inspected at the Division of Highways' yards at Redding. CHC 39 Shovel may be inspected at Convict Camp 24, Oroville.

BEVERLY HILLS, Los Angeles Co., Cal.—Until 8 P. M., Feb. 10, bids will be received by the city for the construction of one hand derrick. Specifications are on file at office of Street Superintendent.

STOCKTON, San Joaquin Co., Cal.—Until January 26, 5 P. M., bids will be received by M. E. Page, city clerk, to furnish and deliver:

(a) 1½ ton truck with closed cab;

WANTED

TO PURCHASE used Linn Tractor Truck, Lidlair-Wiley, Inc., 208 Columbia St., Seattle, Washington.

RAILROADS

ISLETON, Sacramento Co., Calif.—Southern Pacific R. R., 65 Market St., San Francisco, authorized by Interstate Commerce Commission to construct 2½ mile feeder extension from Isleton to Georgiana Slough and the Mokelumne river. The railroad will cost \$96,000. A dock will be constructed at Isleton at a cost of \$55,000.

SAN FRANCISCO. Columbia Steel Corp. and Pacific Steel Corp., San Francisco, awarded contract by Southern Pacific R. R., 65 Market St., San Francisco, to furnish the bulk of an order for 63,764 tons of rail steel for the railroad's requirements during 1931. The remainder of the order has been let to the Colorado Steel & Iron Co., of Denver.

HOOVER DAM RAILWAY.—A complete list of the total bids for the construction of the Hoover Dam Railway, as submitted to the U. S. Bureau of Reclamation at Las Vegas, on January 12, follow:

Lewis Const. Co., Los Angeles, \$455,569.50 (low as previously announced).

J. F. Shea Co., Portland, \$469,028.

Merritt-Chapman & Scott Corp., San Pedro, \$486,536.

Utah Const. Co., Ogden Utah, and Morrison - Knudsen Co., Boise, Idaho, \$534,704.

General Const. Co., Seattle, \$537,262.50.

Healy-Thibbitts Construction Co., San Francisco, \$546,114.

O. A. Lindbergh, Stockton, \$557,713.

Siems-Spokane Co., Spokane, \$629,552.50.

Hamilton-Gleason Co., Denver, \$657,540.

L. Romano Eng. Corp., Seattle, \$719,548.

Schuler and McDonald, Inc., Oakland, \$732,567.50.

Mitty Bros. Const. Co., Los Angeles, \$802,109.

The bid of Merritt-Chapman & Scott Corp. contained a stipulation that the corporation would only accept the railway contract in the event it was also awarded the Hoover Dam Highway contract.

The proposed railway consists of 10.23 miles of track, using second-hand or relay rails, extending from Summit where a connection will be made with the Union Pacific Rr. from Las Vegas to the site of the Hoover

Dam. The work is located between 25 and 30 miles southeast of Las Vegas.

SACRAMENTO, Calif.—Interstate Commerce Commission is giving favorable consideration to the application of the Sacramento Northern R. R., electric subsidiary of the Western Pacific R. R., for authorization to extend its Westfield-lyde branch eight miles into the territory across the Sacramento river.

SEATTLE, Wash.—Bids will be asked at once by Board of Public Works to construct municipal street car line in 8th Avenue northwest from Leamy Way to West 55th St.; estimated cost \$160,000.

FIRE EQUIPMENT

OAKLAND, Cal.—Until January 29, 12 noon, bids will be received by F. C. Merritt, city clerk, to furnish:

(a) 16,000 ft. 2½-in. fire hose;
(b) 4,000 ft. 1½-in. fire hose.

Certified check 10% payable to city required with bid. Specifications obtainable from city clerk.

PACIFIC GROVE, Monterey Co., Cal.—Until February 5, 7:30 P. M., bids will be received by E. C. Hurlbert, city clerk, to furnish and deliver one 750-gallon pumping engine and hose car with booster tank. Certified check 10% payable to city required with bid. Specifications are on file in the office of Daily Pacific Builder and may be inspected by those interested.

LOS ANGELES, Cal.—Until 11 A. M., Feb. 4, bids will be received by the city purchasing agent, Thomas Ough-ton, for furnishing 20,000 ft. of 2½-in. fire hose; specifications No. 2315.

RESERVOIRS AND DAMS

GLENDALE, Los Angeles Co., Cal.—Mitty Bros. Constr. Co., 723 Detwiler Bldg., Los Angeles, awarded the contract by the city council at \$499,000 for construction of two reservoirs on the city reservoir site. The reservoir will be built of rectangular shape, 22 ft. deep, with an area of 233,322 sq. ft. The reservoirs will be constructed adjoining, providing a total capacity of 25,000,000 gallons. They will be of the retaining wall type with reinforced concrete roof. The construction involves:

26,000 cu. yds. reinforced concrete;
10,000 cu. yds. excavation;
10,000 cu. yds. tamped embankment;
22,000 cu. yds. earth placed on concrete roof.

PIPE LINES, WELLS, ETC.

OAKLAND, Cal.—Pacific Coast Engineering Co., foot of 14th St., Oakland, at \$4500 submitted only bid to City Port Commission to furnish and deliver fifteen 45-ft. lengths of 29-in. welded steel dredge pipe. Taken under advisement.

SAN FRANCISCO.—City Engineer M. M. O'Shaughnessy instructed by supervisors to prepare plans for Hetch Hetchy pipe line across the San Joaquin Valley from Oakdale portal on the east side to the Tesla portal on the west; also for the construction of a pipe line from the Tesla portal to Altamont Pass with a pumping plant, to get Hetch Hetchy water into San Francisco ahead of the completion of the Condit Range tunnel which will probably require another three years.

SEWERS AND SEWAGE DISPOSAL PLANTS

ESTIMATES SUBMITTED

ATHERTON, San Mateo Co., Cal.—Geo. A. Kneese, consulting engineer, Redwood City, in report to town trustees estimates cost of culverts, ditches and storm sewers for relief of storm waters at \$24,000. Taken under advisement.

33

BERKELEY, Alameda Co., Cal.—Until January 27, 10 A. M., bids will be received by Florence E. Turner, city clerk, to construct storm sewer in west side of Garfield School grounds from Hopkins street southerly; estimated cost \$2000. Certified check 10% payable to city required with bid. Plans obtainable from Harry Goodridge, city engineer, on deposit of \$10, returnable.

FAIRFIELD, Solano Co., Cal.—J. C. Parsons, engineer, will present plans to county supervisors shortly for proposed sewage system to serve the home Acres and Petaluma Farm districts adjoining the city of Vallejo. Details will be published shortly.

MODESTO, Stanislaus Co., Calif.—City Engineer Frank J. Rossi instructed by city council to proceed with the construction of sewers in the industrial section at a cost of \$16,000. The work will be done on a day labor basis with a view to relieving the unemployment situation. Materials will probably be purchased in the open market although this has not been definitely decided. This work will be the first unit of a \$55,000 sewer construction program.

HILLSBOROUGH, San Mateo Co., Cal.—Until February 3, 5 P. M., bids will be received by John A. Hoey, town clerk (20-2) to construct storm sewer system, consisting of 12-in., 15-in., 18-in. and 24-in. concrete pipe sewers; brick manholes and catch-basins. 1911 Act. Certified check 10% payable to mayor of town required with bid. Plans on file in office of clerk.

EL CENTRO, Imperial Co., Cal.—A straw vote will be held in the Imperial Irrigation District Feb. 4 on the proposal to vote \$1,000,000 in bonds to finance drainage extensions and storm water system.

REDWOOD CITY, San Mateo Co., Cal.—County supervisors petitioned to ask bids to construct sewer system for Lomita Park Sanitary District. Robert A. Klassen, engineer, 154 Arch St., Redwood City.

SANTA CRUZ, Santa Cruz Co., Cal.—February 7 is date set by county supervisors to consider proposal of property owners in the Soquel-Capitola sections for a sewer system, preliminary surveys for which have been completed by County Surveyor Lloyd Bowman. The cost is estimated at \$56,000 which include a pumping plant at a point near the water front at Capitola and an outfall system into the bay.

WATER WORKS

LOMPOC, Santa Barbara Co., Cal.—Until February 3, 7:30 P. M., bids will be received by city to furnish f.o.b. Lompoc, the following pipe:

(a) 2,800 ft. 8.625 in. O. D. by 8.249 in. I. D. lapwelded black steel pipe,

plain end beveled 45 deg. for welding, asphaltum dipped, weight 16.94 lbs. per foot;

(b) 100 ft. 8-in. O. D. by 7.628 in. I. D. lapwelded black steel pipe, plain end beveled 45 deg. for welding, asphaltum dipped, weight 15.522 lbs. per foot.

(c) 600 ft. 7-in. O. D. by 6.652 I. D. lapwelded black steel pipe, plain end beveled 45 deg. for welding, asphaltum dipped, weight 12.655 lbs. per foot.

Specifications obtainable from city clerk.

SACRAMENTO, Calif.—City council will set date shortly to vote on question of issuing and selling bonds of \$450,000 to finance construction of a new sedimentation basin in connection with municipal filtration plant. Fred J. Klaus is city engineer.

PALO ALTO, Santa Clara Co., Cal.—Santa Clara County Water Works District No. 1, just south of Palo Alto city limits, was organized at a recent election and authorized the sale of bonds of \$27,500 to finance construction of a water distributing system to be supplied from Spring Valley water lines, Palo Alto's municipal water system and domestic wells.

BOULDER CITY, Nev.—Lacy Mfg. Co., 1000 N. Main St., Los Angeles submitted low bid, f.o.b. destination, to U. S. Bureau of Reclamation, Wilda Bldg., 1411 Welton St., Denver, for the fabrication and erection of 2 arc-welded or riveted plate steel tanks for water supply, Boulder City, Nev. Boulder Canyon project. One tank will be 100 ft. in diameter and 34 ft. high, with No. 10 gauge sheet steel roof of 2,000,000 gallons capacity, to be erected in Boulder City. The other tank will be 40 ft. in diameter and 25 ft. high, without roof of 255,000 gallons capacity, to be erected at the site of the filter plant about 4 miles east of Boulder City. The tanks will be erected on oiled sand foundations constructed in advance of the government. Complete list of bids will be published shortly.

EXETER, Tulare Co., Calif.—City council, T. E. Aubrey, city clerk, adopts Resolution "A" declaring intention to construct improvements for additional water supply, involving drilling well, purchase of pumping plant with automatic control, motor and switchboard; 200,000-gallon surface steel storage tank, booster pump with automatic controls and water line extensions; estimated cost \$24,000.

CONTRA COSTA COUNTY, Cal.—Three projects aimed to provide adequate water systems at a cost of approximately \$200,000 are planned in Contra Costa County.

At Lafayette, the Lafayette Water Works District contemplates a domestic water system to tie-in with the

East Bay Municipal Utility District. The cost of construction is placed at \$100,000.

At Saranap, a district is to be organized to vote bonds of \$50,000 to finance construction of a domestic water distributing system.

At Walnut Creek, a bond election will be called shortly to vote bonds of \$60,000 to finance construction of a water distributing system. Should the bond issue fail to carry it is probable that funds to finance the project will be raised by direct tax.

HAWTHORNE, Los Angeles Co., Cal.—Pacific States Cast Iron Pipe Co., 417 S. Hill St., Los Angeles, awarded contract by city council to furnish cast iron pipe as follows:

5200 ft. 2-in. pipe at 19c ft.;

2500 ft. 4-in. pipe at 33.5c ft.;

2500 ft. 6-in. pipe at 59c ft.

OAKLAND, Cal.—Art Concrete Works 24th and Adeline Sts., Oakland, at \$3,380 awarded contract by East Bay Municipal Utility District to furnish concrete meter boxes and tops.

GLENDALE, Los Angeles Co., Cal.—Until 10 A. M., Jan. 29, bids will be received by the city council for delivering f. o. b. cars, equipment as follows:

Item 1. One (1) horizontal centrifugal pump capable of pumping 2000 gallons of water per minute against a total head of 320 feet. Pump to be constructed for direct connection to a four pole 50 cycle electric motor.

Item 2. One (1) 250 H. P. horizontal, 3 phase, 4 pole, 50 cycle, 4000 volt, 40 degree squirrel cage full voltage start induction motor for direct connection to Item 1.

Item 3. One (1) automatic, remote control magnetic switch, with overload and under-voltage release for a 250 H. P., 50 cycle, 4000 volt, 3 phase, full voltage start induction motor, operating coil for 230 volts.

Alternate bids will be received on Item 2, for a 250 H. P. horizontal, 3 phase, 4 pole, 50 cycle, 4000 volt, 40 degree unity power factor synchronous motor with direct connected exciter and exciter field rheostat.

Alternate bids will be received on Item 3, for automatic starting and control equipment for a 250 H. P., 3 phase, 4 pole, 50 cycle, 4000 volt, 40 degree synchronous motor. Equipment to include an A. C. line ammeter, D. C. field ammeter and power factor meter.

Alternate bids will be received on Item 3, for automatic starting and control equipment for a 250 H. P., 3 phase, 4 pole, 50 cycle, 4000 volt, 40 degree synchronous motor, with A. C. line ammeter, D. C. field ammeter power factor, meter and automatic equipment for maintaining any desired

OAKLAND, Cal.—Rensselaer Valve Co., Sharon Bldg., San Francisco, at \$350 awarded contract by East Bay Municipal Utility District to furnish and deliver assorted valves. Complete list of unit bids published in our issue of January 8.

OAKLAND, Cal.—U. S. Pipe & Foundry Co., Monadnock Bldg., San Francisco, at \$47,790 awarded contract by East Bay Municipal Utility District to furnish and deliver c. l. pipe for distributing system. Complete list of unit bids published in our issue of January 7.

PLAYGROUNDS & PARKS

BEVERLY HILLS, Los Angeles Co., Cal.—Until 8 P. M., February 10, bids will be received by the city council for planting a rose garden in the park strip along Santa Monica Blvd., Beverly Hills. Specifications on file at office of park supt.

STREETS AND HIGHWAYS

SAN MATEO, San Mateo Co., Cal.—City council starts proceedings to pave Poplar St., from Delaware to Humboldt St., and along south line of San Mateo High School grounds; estimated cost \$30,000. Details will be published shortly.

LODI, San Joaquin Co., Cal.—Petitions are being circulated seeking formation of road improvement district to complete paving of Cherokee Lane to a width of 76 feet where that thoroughfare forms the city boundary and for a distance of 1 mile. Julius Manthey is county surveyor.

OAKLAND, Cal.—Hutchinson Co., 1450 Harrison St., Oakland, at \$23,065 awarded contract by city council to improve portions of Eighth St., Fulton St., and the extension of Tenth street, cash job. Complete list of unit bids on this project were published in issue of January 16th. Successful bid follows:

- (1) 7,548 cu. yds. fill, \$1.08.
- (2) 1,326 cu. yds. excavation, \$4.0.
- (3) 100 cu. yds. material in excavation below subgrade to be removed and replaced with filling material, \$1.50.
- (4) 322 lin. ft. wood curb, \$2.31.
- (5) 4,779 lin. ft. concrete curb, \$4.8.
- (6) 4,781 sq. ft. concrete gutter, \$26.
- (7) 9,225 sq. ft. asphaltic concrete pavement (asphaltic concrete surf. course, 2-inch thick, laid upon a Portland cement concrete foundation, 6-in. thick), \$225.
- (8) 127,088 sq. ft. penetration macadam pavement, \$1.15.
- (9) 2,411 sq. ft. existing pave. to be resurfaced with asphalt, concrete, \$0.7
- (10) 21,662 sq. ft. cement sidewalk, \$15.
- (11) 235 lin. ft. 6-in. by 22-in. wooden culvert, \$1.60.
- (12) 2 manholes with inlet tops (34-inch opening), \$70.00.

YOSEMITE PARK, Cal.—The House of Representatives has passed the Leavitt bill, which directs the secretary of the Interior to spend an authorized appropriation of \$7,500,000 during each of the fiscal years 1932 and 1933 on building approach roads to national parks. These approaches

are limited to 60 miles, not more than 40 miles of which may be in any one county and must lead across land at least 90 per cent owned by the government. Amounts apportioned are: General Grant, \$595,000; Grand Canyon, \$1,600,000; Lassen Volcanic, \$2,010,000; Mesa Verde, \$30,000; Sequoia, \$595,000; Yellowstone, \$5,408,200; Yosemite, \$4,050,000. These amounts cover the two-year program for these national parks.

CLARK COUNTY, Nevada—As previously reported, bids will be received February 4, 2 P. M., by State Highway Commission, S. C. Durkee, chief engineer, Heroe's Memorial Bldg., Carson City, for 19.68 miles of grading; structures and gravel surfacing in Clark County between West Slope of Mormon Mesa to the Lower Virginia River Bridge. Project involves:

- (1) 77,000 cu. yds. excavation, unclassified;
- (2) 56,564 yds. sta. overhaul;
- (3) 12.95 miles prepare subgrade and shoulders;
- (4) 6.73 miles preparing shoulders;
- (5) 48,700 cu. yds. crushed rock or crushed gravel in place;
- (6) 1000 cu. yds. crushed rock or crushed gravel in stockpile;
- (7) 13 cu. yds. class A concrete;
- (8) 17 cu. yds. class B concrete;
- (9) 46 lin. ft. removing 18-in. corr. metal pipe;
- (10) 24 lin. ft. removing 24-in. corr. metal pipe;
- (11) 244 lin. ft. install 15-in. corr. metal pipe;
- (12) 552 lin. ft. install 18-in. corr. metal pipe;
- (13) 522 lin. ft. install 24-in. corr. metal pipe;
- (14) 46 lin. ft. install 30-in. corr. metal pipe;
- (15) 34 lin. ft. install 36-in. corr. metal pipe;
- (16) 4 corr. metal pipe culvert extensions;
- (17) 74 demolishing headwalls;
- (18) 55 monuments;
- (19) lump sum, furnish water equipment;
- (20) 728 M. gals. applying water;
- (21) 1024 lin. ft. remove wooden guard rail;
- (22) 1128 lin. ft. standard timber guard rail in place;
- (23) 2 furnish and install posts for F. A. markers;
- (24) 19.68 miles finishing roadway.

State will furnish corrugated metal pipe culverts and band couplings, f. o. b. cars, Arrowhead Siding, Clark County.

SAN FRANCISCO—C. L. Harney, Call Bldg., at \$54,063 submitted low bid to Board of Public Works to improve Montgomery St. bet. Union and Greenwich Sts., etc. A complete list of the unit bids received will be published in tomorrow's issue. Complete lump sum bid listing follows:

SAN MATEO, San Mateo Co., Cal.—City council declares intention (31-1) to improve E St. bet. 9th and Baldwin Aves.; 2nd Ave. from San Mateo Drive to Main St.; 3rd Ave. from Ellisworth to Railroad Aves., involving:

- (1) 24,510 sq. ft. grading;
- (2) 16,000 sq. ft. sidewalk;
- (3) 1,122 lin. ft. 12-in. curb, 24-in. gutter;
- (4) 4,538 lin. ft. 16-in. curb, 4-ft. 3-in. gutter;
- (5) 348 lin. ft. 16-in. curb, 4-ft. 9-in. gutter;
- (6) 2,334 lin. ft. 16-in. curb 5-ft. do;
- (7) 26 lin. ft. 16-in. reinf. curb 4-ft. 3-in. reinf. gutter;
- (8) 20 lin. ft. 16-in. reinf. curb, 4-ft. 9-in. reinf. gutter;
- (9) 189 lin. ft. 16-in. reinf. curb, 5-ft. reinf. gutter;
- (10) 2 cu. yds. reinf. columns and beams;
- (11) 21,660 sq. ft. 6-in. asph. conc. pavement;
- (12) 1,700 tons asph. concrete;
- (13) 613 lin. ft. 4-in. vit. pipe lateral sewers;
- (14) 940 lin. ft. 21-in. concrete pipe storm sewers;
- (15) 372 lin. ft. 18-in. do;
- (16) 594 lin. ft. 15-in. do;
- (17) 168 lin. ft. 12-in. do;
- (18) 4 manholes;
- (19) 2 catchbasins;
- (20) 89 electroliners;
- (21) 11,200 lin. ft. conduit;
- (22) 12,700 lin. ft. cable.

1911 Act. Bond Act 1915. Hearing Feb. 2. E. W. Foster, city clerk.

STOCKTON, San Joaquin Co., Cal.—As previously reported, bids will be received January 26, 11 A. M., by E. Graham, county clerk, to improve Miller Road from Acampo Road to Feltner Road. Project involves:

- (a) 1,500 cu. yds. grading;
 - (b) 3500 tons base course;
 - (c) 210 tons crushed rock;
 - (d) 52 tons rock chips;
 - (e) 75 tons pea gravel;
 - (f) 50 bbls. fuel oil;
 - (g) 18 tons asphaltic oil;
 - (h) 1 pipe to be installed, 0.83 mile in length.
- Certified check 10% payable to Chairman of the Board of Supervisors required with bid. Plans obtainable from Julius Manthey, county surveyor.

SANTA ROSA, Sonoma Co., Cal.—Until February 10, 12 noon, bids will be received by Geo. E. Sanborn, county clerk, for concrete pavement on the Petaluma to Point Reyes Highway, Section B in the Second Supervisorial District. Involving:

- (1) 9500 cu. yds. excavation;
 - (2) 2465 cu. yds. concrete in pavement;
 - (3) 70 cu. yds. concrete in structure and headwalls;
 - (4) 4000 lbs. reinforcing steel; metal pipe;
 - (5) 400 lin. ft. 12-in. corrugated
 - (6) 44 lin. ft. 18-in. do do do;
 - (7) 30 lin. ft. 24-in. do do do;
 - (8) 32 lin. ft. 30-in. do do do;
 - (9) 16 lin. ft. 36-in. do do do.
- Plans obtainable from E. A. Peugh, county surveyor.

See call for bids under official proposal section in this issue.

PLUMAS COUNTY, Cal.—Charles Harlowe Jr., 378 Belmont St., Oakland, at \$64,513.60 (using treated timber) awarded contract by District Engineer, U. S. Bureau of Public Roads, San Francisco, to grade Section F, Route 23, Quincy-Beckwith National Forest Highway in Plumas National Forest, 7.99 miles in length, involving: 29 acres clearing; 73,180 cu. yds. unclass. excav.; 660 cu. yds. unclass. excav. for struc.; 97,800 sta. yds. overhauled; 7,942 mi. finishing earth-graded road; 89 M.B.M. untreated tim-

ber in place; 85 M.B.M. treated timber in place; 11 cu. yds. class A concrete; 89 cu. yds. class B concrete; 1250 lbs. reinforcing steel 18 lin. ft. 12-in. corr. galv. metal pipe in place; 1618 lin. ft. 18-in. 366 lin. ft. 24-in. 90 lin. ft. 30-in. and 248 lin. ft. 36-in. corr. galv. metal pipe; 1600 lin. ft. untreated timber piling in place; 500 cu. yds. hand-laid riprap in place; (extra work) maintenance of sections accepted for traffic; 655 sq. yds. hitum. wearing surf. in place; 102 each right-of-way monuments in place.

OAKLAND, Cal.—Until January 29, 12 noon, bids will be received by F. C. Merritt, city clerk, to improve portions of E-8th St., E-10th St., 3rd Ave., 5th Ave., 6th Ave. and 7th Ave., involving:

- (1) 351,339 sq. ft. grading;
- (2) 7,947 lin. ft. conc. with steel curb guard;
- (3) 293,920 sq. ft. conc. pavement;
- (4) 22,663 sq. ft. cement sidewalk;
- (5) 3,576 sq. ft. concrete driveways
- (6) 261 lin. ft. of 8x29-in. corr. iron and conc. culvert;
- (7) 4 cast iron handholes;
- (8) 66 lin. ft. 10-inch vit. pipe conduit;
- (9) 38 lin. ft. 12-inch do;
- (10) 1 catchbasin (34-inch opening);
- (11) 1 catchbasin (21-inch opening);
- (12) 280 lin. ft. 8-in. vit. pipe sewer
- (13) 1 lamphole.

City will pay 2% of cost from the Treasury. Certified check 10% payable to city required with bid. Plans on file in office of clerk. Walter N. Frickstad, city engineer.

SANTA ANA, Orange Co., Cal.—Until February 3, 11 A. M., bids will be received by J. M. Backs, county clerk, to widen portions of Westminster Ave. in 2nd Rd. Dist., involving:

- (a) 8,460 cu. yds. excavation unclassified for roadway, shoulders and ditches;
- (b) 220,460 sq. ft. gravel base;
- (c) 78,735 sq. ft. gravel shoulders;
- (d) 4,666 cu. yds. cement concrete pavement.

Specifications obtainable from Nat H. Heller, county road commissioner.

CULVER CITY, Los Angeles Co., Cal.—Until February 16, 8 P. M., bids will be received by Paul Jarrett, city clerk, to improve Sepulveda Blvd., bet. Venice Blvd. and city limits, A & I No. 8, involving in the main 1,619,517 sq. ft. grading; 471,595 sq. ft. 6-in. asphaltic conc. base, 2-in. Warrenite surface paving; cement pipe; catchbasins, curbs, walks, gutters, etc.

Specifications obtainable from Geo. E. Lee, City Engineer.

FRESNO, Fresno Co., Cal.—Until January 29, 10:30 A. M., bids will be received by H. S. Foster, city clerk, (108-D) to improve Terrace Ave. bet. Palm and Wilson Aves., involving grading; cement concrete curbs, gutters and walks; corrugated metal culverts with manholes; 2½-in. asphalt concrete base with 1½-in. asphalt concrete surface and liquid asphalt and rock screening surface coat. 1911 Act. Certified check 10% payable to city required with bid. Plans on file in office of clerk. C. C. Valkenburg, city engineer.

OAKLAND, Cal.—Heafey-Moore Co., 344 High St., Oakland, at \$225,000 awarded contract by East Bay Municipal Utility District to furnish and deliver hot asphalt for year 1931.

SACRAMENTO, Calif.—W. H. Larson, 2650 Curtis Way, Sacramento, at \$17,920 awarded contract by East Bay Municipal Utility District for making asphalt street repairs to pavements.

SANTA BARBARA, Cal.—Until 1:30 P. M., Jan. 29, bids will be received by the City Council to improve Bath St., between Quinto St. and Alamar Ave., approximately one and one-half blocks, involving asphaltic concrete pavement, curb, gutter, combined curb and gutter, walk, concrete landing walk; 1911 Act. Geo. D. Geib, City Clerk. E. B. Brown, city engineer.

SAN DIEGO COUNTY, CALIF.—Triangle Rock and Gravel Co., San Bernardino, at \$32,715 awarded contract by U. S. Bureau of Public Roads, San Francisco, for grading Section B and placing selected material on Sections A and B of Route 75, Laguna National Forest Highway, in Cleveland National Forest, 10.86 miles in length, involving: 21 acres clearing; 28,750 cu. yds. excavation, unclass.; 200 cu. yds. excavation for structures; 5,000 cu. yds. overhauled; 6.5 miles preparing roadbed; 1,086 lin. ft. corr. metal pipe in place; 19,000 cu. yds. selected material in place.

SAN BERNARDINO COUNTY, CAL.—As previously reported, bids will be received February 11 by State Highway Commission to grade and surface with oil-treated crushed gravel or stone, 29.2 miles between 1.5 miles east of Essex and 1 mi. southeast of Kinefelter. Project involves:

- (1) 227,600 cu. yds. roadway excavation without class (Location A);
- (2) 132,000 cu. yds. roadway excavation without class (Location B);
- (3) 490,000 sta. yds. overhauled;
- (4) 106,000 cu. yds. imported borrow;
- (5) 97,000 cu. yds. ditch and channel excavation;
- (6) 42,800 cu. yds. pit run gravel sub-base;
- (7) 9170 cu. yds. structural excavation;
- (8) 80,000 tons oil-treated crushed gravel or stone surfacing;
- (9) 1900 cu. yds. crushed gravel or stone screenings (seal coat);
- (10) 1400 bbls. fuel oil (seal coat);
- (11) 346 lin. ft. 18-in. corr. metal pipe;
- (12) 2032 lin. ft. 24-in. corr. metal pipe;
- (13) 2838 lin. ft. 36-in. corr. metal pipe;
- (14) 648 lin. ft. 48-in. corr. metal pipe;
- (15) 8700 M. gals. water applied to sub-base;
- (16) 29,420 lin. ft. furnishing treated piles;
- (17) 1399 each. driving piles;
- (18) 588 M. ft. B. M. redwood timber, dense select all-heart structural grade;
- (19) 357 M. ft. B. M. redwood timber, select all-heart structural grade;
- (20) 1543 sta. finishing roadway;
- (21) 480 each. monuments, complete, in place.

The state will furnish corrugated metal pipe.

NEVADA STATE—State Highway Department, S. C. Durkee, Chief engineer, Heroes' Memorial Bldg., Carson City, has adopted the revised budget involving the expenditure of \$2,989,447 for improvements during the current year of which approximately \$1,900,000 will come from general funds as the construction and oiling work is on the Federal Aid system only. A summary of the improvements segregated by counties follows:

CHURCHILL COUNTY—New construction—none; reconstruction and oiling—5 miles south of Fallon to Salt Wells, 10.15 miles, \$86,275; general maintenance, 139.66 miles, \$36,192;

specific maintenance, \$4700. Total—\$127,617.

CLARK COUNTY—New construction—Las Vegas south toward Boulder Canyon Dam site, 10 miles, \$150,000; reconstruction and oiling—West slope Mormon Mesa to Lower Virgin river bridge, 19.89 miles, \$169,065; oiling—Jean to state line, 12.62 miles, \$31,550; construction of new Upper Virgin river bridge, \$125,000; general maintenance, 179.40 miles, \$39,527; specific maintenance, \$5900. Total—\$530,642.

COULAS COUNTY—New construction—None; reconstruction and oiling—5 miles east of Holbrook to 2 miles north of Carter's 15.02 miles, \$127,670; general maintenance—53.19 miles, \$13,450; specific maintenance, \$1750. Total—\$142,870.

ELKO COUNTY—New construction—Thousand Springs creek to Contact, 20.00 miles, \$160,000; new construction and reconstruction—Deeth to Wells, 17.81 miles, \$126,160; reconstruction and oiling—4 miles east of Silver Zone to Utah line, 16.86 miles, \$14,310; south county line to Wendover, 53.52 miles, \$165,912; oiling—Elko to Deeth, 31.44 miles, \$18,600; General maintenance—214.61 miles, \$56,442; specific maintenance, \$7350. Total—\$737,774.

ESMERALDA COUNTY—New construction—None; reconstruction and oiling—none; general maintenance—\$7.10 miles, \$22,258.65; specific maintenance, \$2900. Total—\$25,158.65.

EUREKA COUNTY—New construction—None; reconstruction and oiling—West county line to 2 miles east of Dunphy, 6.96 miles, \$59,100; general maintenance—72.57 miles, \$19,858.50; specific maintenance, \$2950. Total, \$151,608.50.

HUMBOLDT COUNTY—New construction—None; reconstruction and oiling—Winnemucca to 6½ miles west of Stonehouse, 27.33 miles, \$232,305; general maintenance—102.19 miles, \$27,595; specific maintenance, \$3600. Total—\$263,500.

LANDER COUNTY—New construction—None; reconstruction and oiling—Battle Mountain to East county line, 15.63 miles, \$167,280; general maintenance—124.44 miles, \$36,526.50; specific maintenance, \$4750. Total—\$208,556.50.

LINCOLN COUNTY—New construction—None; reconstruction and oiling—None; general maintenance—198.97 miles, \$18,022.50; specific maintenance \$2350. Total—\$20,372.50.

LYON COUNTY—New construction—None; reconstruction and oiling—None; general maintenance—104.60 miles, \$28,856; specific maintenance, \$3750. Total—\$32,606.

MINERAL COUNTY—New construction—Schurz to Dutch creek, 22.23 miles, \$56,760; reconstruction and oiling, none; general maintenance, 106.44 miles, \$27,810.75; specific maintenance, \$3625. Total—\$298,195.75.

NYE COUNTY—New construction, none; reconstruction and oiling, none; general maintenance, 277.71 miles, \$59,131.30; specific maintenance, \$7700. Total—\$66,831.30.

ORMSBY COUNTY—New construction, none; reconstruction and oiling, none; general maintenance, 20.27 miles, \$6142.50; specific maintenance, \$800. Total—\$6942.50.

PERSHING COUNTY—New construction—Overhead grade separation structure and approaches at Woolsey, 6.25 miles, \$50,000; reconstruction and oiling, none; general maintenance, 73.76 miles, \$14,752; specific maintenance, \$1900. Total \$66,652.

STOREY COUNTY—New construction—None; reconstruction and oiling, none; general maintenance, 6.54 miles, \$1843; specific maintenance, \$321.65. Total—\$2169.55.

WASHOE COUNTY—New construction, none; reconstruction—Washoe Summit to Huffaker's, 9.00 miles, \$270,000; general maintenance, 84.79 miles, \$30,788; specific maintenance, \$4000. Total \$304,788.

WHITE PINE COUNTY—New construction, none; oiling, Robinson Summit to Keystone, 12.16 miles, \$30,400; general maintenance, 158.92 miles, \$38,212.75; specific maintenance, \$5900. Total—\$73,612.75.

SAN BRUNO, San Mateo Co., Cal.—City Engineer Robert Klassen preparing plans for sewer in both sides of El Camino Real bet. 38th and 40th Ave. and San Felipe Ave. to replace sewer running in center of blocks facing the highway.

Progress in road construction throughout the world is indicated by the present mileage of 7,805,629, according to a survey made by Frank B. Curran and B. P. Root, of the Department of Commerce. The United States, not including Alaska and the outlying possessions, ranks first among the countries of the world with a total of 3,016,281 miles, or 38.7 per cent of the world total. Considering mileage in proportion to area, without regard to road surfaces, Japan leads all other countries of the world with 3 miles of road per square mile of area; the United States is in thirteenth position, with one mile for every square mile of area. The survey shows an increase of 1,223,628 miles throughout the world over last year's figures, or an increase of 18.6 per cent. The United States is first on the list in the matter of hard surface roads, having 167,155 miles.

Legislation looking to the removal of the requirement by the government of competitive bidding for surveys of building sites and for engineering services has been delayed awaiting the securing of a special rule, it is reported by Paul Wootton, Washington

Record. The bill also provides for correspondence for Engineering News, the obtaining of outside engineering, technical, architectural and other professional services so as to make it possible to speed up the federal building program. The measure also authorizes the secretary of the treasury to restrict bidders on construction to such persons, firms or corporations as possess the qualifications deemed necessary to carry forward the work in a manner that will be in the public interest.

As the present law has been interpreted by the controller general, the government must secure bids for engineering services. This is opposed by the contracting agencies of the government. Their representatives convinced members of the committee on public buildings and grounds that it is in the public interest to leave such services to the judgment of the department head having jurisdiction. At the same time, these agencies are anxious to have more authority under the provision for letting contracts. At present difficulties and delays always result when the contract is not let to the low bidder.

County and federal co-operation in the construction of highways with the proceeds of the gasoline tax funds, as well as the inter-county co-operation along those lines would be made possible under a bill introduced in the senate by Senator Charles H. Deuel of Chicago.

The purpose of the bill is to provide for the continuation of county road improvements which now frequently stop at the border line of a county and a bad stretch of road is the weak link in an otherwise attractive highway.

The various counties and the federal department of public roads would be authorized to co-operate in improving such weak links in order to provide uniformly good highways connecting the counties.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic"

Storage Systems and "Lyon" Tank Water Heaters.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be re-
ceived at the office of the State High-
way Engineer, Public Works Building,
Sacramento, California, until 2 o'clock
P. M. on February 11, 1931, at which
time they will be publicly opened and
read, for construction in accordance
with the specifications therefor, to
which special reference is made, of
portions of State Highway, as follows:
San Bernardino County, between
one and one-half miles east of Essex
and one mile southeast of Klinefelter
(VII-SBd-58-L,M,N), about twenty-
nine and two-tenths (29.2) miles in
length, to be graded and surfaced
with or of crushed gravel or stone.

Proposal forms will be issued to
those Contractors who have furnished
a verified statement of experience and
financial condition in accordance with
the provisions of Chapter 644, Statutes
of 1929, and whose statements so fur-
nished are satisfactory to the Depart-
ment of Public Works. Bids will not
be accepted from a Contractor to
whom a proposal form has not been
issued by the Department of Public
Works.

Plans may be seen, and forms of
proposal, bonds, contract and specifi-
cations may be obtained at the said
office, and they may be seen at the of-
fice of the District Engineers at Los
Angeles and San Francisco, and at the
office of the District Engineer of the
district in which the work is situated.
The District Engineers' offices are lo-
cated at Eureka, Redding, Sacramento,
San Francisco, San Luis Obispo,
Fresno, Los Angeles, San Bernardino
and Bishop.

A representative from the district
office will be available to accompany
prospective bidders for an inspection
of the work herein contemplated, and
Contractors are urged to investigate
the location, character and quantity
of work to be done, with a represen-
tative of the Division of Highways.
It is requested that arrangements for
joint field inspection be made as far
in advance as possible. Detailed in-
formation concerning the proposed
work may be obtained from the district
office.

No bid will be received unless it is
made on a blank form furnished by
the State Highway Engineer. The
special attention of prospective bidders

is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS

C. H. PURCELL,
State Highway Engineer.

Dated January 14, 1931

NOTICE TO CONTRACTORS

General, Electrical, Plumbing, Heating and Ventilating Work
Pacific Colony

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, February 17, 1931, said bids thereafter on said day to be publicly opened and read for the erection and completion of the Hospital Building, Administration Building and Girls' Industrial Building, Pacific Colony, Spadra, California, in accordance with plans and specifications therefor.

The Hospital Building is two-story reinforced walls and floors, the partitions and tile roof on wood construction. Total floor area is approximately 18,000 square feet. The Administration Building is one story reinforced concrete walls and floor, the partitions and tile roof on wood construction. Total floor area is approximately 4300 square feet. The Girls' Industrial Building is a one story addition with reinforced concrete walls, wood floor, partition and roof construction and tile roof. Total floor area is approximately 2200 square feet.

Separate bids will be entertained for the following segregate part of the work and combinations thereof:

1. General Work embracing all branches of the construction other than plumbing, heating, ventilating and electrical.
2. Electrical Work.
3. Plumbing, Heating and Ventilating Work.
4. Complete Plumbing, Heating, Ventilating and Electrical Work.

Contractors must state clearly in their application the particular segregation of work that they desire plans for.

Plans and specifications are on file for examination in the offices of the Division of Architecture, Public Works Building, Sacramento, and Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications and proposal forms may be secured by licensed Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes, 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition,

at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF ARCHITECTURE.

Geo. B. McDougall,
State Architect.

WALTER E. GARRISON,
Director of Public Works.

NOTICE TO CONTRACTORS

General, Electric, Plumbing and Heating Work
Norwalk State Hospital

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, February 17, 1931, said bids thereafter on said day to be publicly opened and read for the erection and completion of three buildings, namely, Quarters for Night Attendants, Quarters for Day Attendants and Assistant Physician's Residence, Norwalk State Hospital, Norwalk, California, in accordance with plans and specifications therefor.

The Quarters for Night Attendants is two story reinforced concrete walls and floors, tile partitions and tile roof on wood construction. Total floor area approximately 7600 square feet. The Quarters for Day Attendants is two story reinforced concrete walls, wood floor, partitions and roof construction and tile roof. Total floor area approximately 6800 square feet. The Residence is one-story frame, exterior stucco walls and shingle roof and of approximately 1800 square feet.

Separate bids will be entertained for the following segregate part of the work and combinations thereof:

1. General Work and Alternates, embracing all branches of the construction other than Plumbing, Heating and Electrical.
2. Electrical Work and Alternates.
3. Plumbing and Heating Work and Alternates.

4. Complete Mechanical including Plumbing, Heating and Electrical Work and Alternates.

Contractors shall state clearly in their application the particular segregation of work that they desire plans for.

Alternative bids, affecting both General and Mechanical Work, will be required, one for completing of Day Attendants' building before starting Night Attendants building, designated as Alternate #1, and one for adding a bed room, closet and bath wing to the Residence, designated as Alternate #2; all in accordance with specifications and drawings therefor.

Plans and specifications are on file for examination in the offices of the Division of Architecture, Public Works Building, Sacramento, and Room 1025 Associated Realty Building, Los Angeles, and at the principal California

Cities Builders' Exchange Offices.

Plans, specifications, and proposal forms may be secured by licensed Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes, 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF ARCHITECTURE.

Geo. B. McDougall,
State Architect.

WALTER E. GARRISON,
Director of Public Works.

Fifty-six employees of the Howard-Copper Corporation, manufacturers of road machinery, contractors' equipment and fire fighting apparatus, with headquarters at Portland, Ore., have recently acquired life insurance protection. The total amount of the policy involved is \$150,000, covering 56 workers. According to the terms of the policy the workers are insured in amounts ranging from \$1000 to \$4000, the amount being based on the rank or position held. The policy is of the contributory type, which means that the premiums will be shared by both the employees and the employing company.

Under a bill introduced in the senate by Senator J. M. Inman of Sacramento, the sale of electrical and gas appliances by public utility corporations would be prohibited.

Inman said the bill is sponsored by dealers in appliances, who complain that the activity of the public utility corporations in this field is injuring their business.

They feel the public utility corporations are organizing for the specific purpose of public service and they should not enter the merchandising field.

Power and gas companies have been enmeshed in the sale of appliances in California for some time.

The Cement Contractors' Association of Southern California has decided to adopt as its emblem a representation of a cement bag standing upright.

LAMONT SEES RESUMPTION OF U. S. PROSPERITY

Confidently looking to the future and a continuation of the forward march of business, Secretary of Commerce Lamont predicts that when the present recession is over the upward movement in industrial efficiency and production per man will be resumed.

His report to President Hoover on the status and progress of America industry and commerce during the fiscal year 1930 revealed clearly and conclusively the effects of the stock market crash of a year ago, but pointed out that "practically no cuts in wages have been made as a result of the recession."

Describing the advance in efficiency of production as the fundamental cause of the rise in the standards of living which has characterized every decade of our national existence, Lamont said:

"This progress in the production per man during recent years is conclusive evidence that the advance in economic activity has not been wholly or even chiefly a mere upswing in the business cycle to be followed by an equally great downward movement.

"It has marked a permanent achievement, and when the present recession is over the same upward movement will unquestionably be resumed."

Employment during the year declined 3.7 per cent, the secretary said, while wages fell off 5.3 per cent, the difference being accounted for by the prevalence of part-time work.

The cost of living declined about 5 per cent between November, 1929, and June, 1930, according to the report.

6-HR. DAY FOR SAN MATEO COUNTY PLASTERERS VOTED

Adoption of the six-hour day for plasterers and hod carriers was voted the solution of the unemployment problem in San Mateo County at a mass meeting of plasterers last Saturday.

Most plasterers at the meeting, however, strongly opposed the six-hour day proposal and declared that the unemployment crisis in building trades in San Mateo County could best be solved by working five days a week and shifting the jobs around so that each member of the union would have a chance to work.

The meeting was attended by nearly 100 plasterers and hod carriers. Speakers declared that 80 per cent of the plasterers and hod carriers in the district were out of work.

Thomas Price, president of the union, presided at the meeting. Among speakers for the boss plasterers were George Leith and Sam Rossi.

WILBUR DEFENDS RESTRICTIONS ON BOULDER LUMBER

Secretary Wilbur explains the procedure the Interior Department would follow in awarding contracts for ties for the Boulder City-Hoover Dam Railway in answer to protests by independent lumber operators of the Pacific Northwest.

The protests were made against the stipulation that the ties should meet grade marks established by the National Lumber Manufacturers' Association and followed by its various member groups, such as the West Coast Lumber Manufacturers' Association. (The protests were brought by independent operators who are not members of the associations.)

The low bid for supplying the ties was made by a non-member of the National Association. The contract for the ties has not been let.

Secretary Wilbur explained the department was required by the comptroller general and the chief coordinator to follow the grade marks of the association.

This, he said, was because the department had no authority to appoint inspectors, as the association said that all lumber bearing its grade marks met the requirements.

FELLOW SUBMITS S. F. HARBOR BILL

A bill, the effect of which would be to take control of San Francisco from the state and place it in the hands of a port district, has been introduced in the senate by Senator Roy Fellom of San Francisco.

The bill would create a port district of San Francisco, and provide for the appointment of nine port commissioners by the governor.

All of the commissioners would come from the port district, which would include the city of San Francisco. The city then would submit bond issues for needed improvements and any moneys received in revenues would be turned over to the control of the district.

A general manager would be appointed by the district commissioners.

DAYTON EXCHANGE PLANS CREDIT BUREAU

Plans for the establishment of a credit bureau have been announced by the Builders' Exchange, of Dayton, Ohio, and the Dayton Chapter of the Associated General Contractors. Credit bureau plans in other cities throughout the country have been analyzed and several meetings of the Dayton organizations have been held to consider them. A committee of the A. G. C. chapter, consisting of Ben Danis, chairman, Park Wineland and Louis Prinz has been appointed to outline a plan applicable to the situation in Dayton and in a short time it is expected to present its credit stabilization proposal.

CITY MANAGER SEEKS HIS DOLLAR PER YEAR SALARY

"It's not the principle of the thing, it's the dollar I want," declared W. A. Richmond, city manager of San Leandro, as he sought to obtain from the city his year's pay for the office of city engineer.

The city manager admits that he overlooked his annual payday last July, but holds that that is no reason why the money, with interest, shouldn't be forthcoming even at this late date.

"I think there's a law or something that dissolves such debts after six months have elapsed," City Clerk E. F. Hutchings informed Richmond, after the demand had been made. "How can I keep track of such little dinky salaries, particularly if you can't even remember them?"

When Richmond assumed the city manager's job, he also took over the city engineer's job, the \$1 a year salary being fixed for the sake of legality. He received his first check, which he turned over to a swimming pool fund, but the second was not forthcoming.

"I can use that dollar to good advantage right now, and I intend to get it if a special session of the city council has to be called," the city manager-engineer declared vehemently.

BALTIMORE BUILDERS KNOCK OFF PROFITS

In order to encourage private construction projects and to relieve unemployment, most of the contractors associated in the Baltimore Builders' Exchange have agreed to accept contracts for work this winter at cost without profit to themselves.

This decision of the builders was announced to Arthur Woods, chairman of the President's Emergency Committee for Employment.

This action has been opposed by the Baltimore Building Trades Council because its members feel that it is unsound economically and would easily lead to reduction in wages.

LIME PLANT IS PLANNED IN PLACER

Formation of a \$200,000 corporation, known as the Auburn Chemical Lime Co., Ltd., is announced by Hugh T. Dyer, Auburn engineer, who states that the company plans to develop lime properties near Rattlesnake Ear, where he believes a deposit of about 11,000,000 tons of lime rock is located.

Dyer is to be president and general manager of the corporation, and Charles Kemper, Auburn orchardist, is to be secretary. The rock runs better than 98 per cent pure calcium, it is stated by Dyer.

SAVINGS ACCOUNTS RELEASED FOR NORMAL SPENDING WOULD PROMPT BUILDING CONSTRUCTION

Recently the editor of The Constructor, official organ of the Associated General Contractors of America, discussed the formation of a Construction Development Bureau for promoting construction work of all kinds. The opinions of all branches of the industry were requested in regard to such a bureau. The reply of Lancelot Sukert, president of the Michigan State Society of Architects, is interesting. It is republished herewith.—Editor

By Lancelot Sukert

(a) It is urgent and necessary that some promotion work be done to acquaint bankers, trust company officials and other individuals controlling the sources of money supply, with the fact that there is considerable difference in the quality of construction work entering into buildings. Experience, in this locality at least, proves that loans are based upon the size of buildings rather than upon their quality.

In several instances, applicants for loans who inform the loaning officers of the amount which they expect to pay, based upon a specification requiring materials harmoniously selected for long service, hard wear and low upkeep, have been advised to go to another architect or to obtain bids from another contractor, naming in each instance individuals who have either designed or built buildings of similar size but at lower cost. Loaning officers have, by this manner, actually demanded shoddy and cheap construction, thereby creating short-lived collateral for their loans. As a result, when they have had to foreclose, they have taken back buildings requiring constant repairs and costly upkeep. Furthermore, by promoting shoddy building, they have found it necessary, year after year, to lower the loaning percentage.

It will take considerable promotion directed at financing institutions to educate them to consider favorably structures having built-in quality, honest value and materials selected for long life and low upkeep. Such structures maintain original home levels and practice over a sufficient period of years to amortize their erection cost, while the shoddy types which they have been promoting go to pieces and demand heavy upkeep expense long before their costs can be amortized.

(b) Promotion work should be done to inform the public of the high **eventual-cost** of low initial-cost materials. Architects generally have learned by experience that it is folly to specify shortlived materials, appliances, finishes, etc., in order to obtain low-initial-cost buildings, except in the cases of temporary structures. Some of the nationally advertised products are of such poor quality that they are not worth the trouble and cost of their manufacture. Many producers make shoddy products for no other reason than to meet price competition.

This condition has been engendered by speculative builders whose responsibility ends with the sale of the completed building. From the retail merchant on down, advertisers, both local

and national, have defied cheapness and have brought upon their own heads a public demand for low priced materials. This can be offset only by national publicity and a general change of policy.

(c) Promotion work should be done to correct many current practices among the contractors themselves. The architect can be the contractor's best friend, and always desires to have his work executed by the highest grade contractor who can be obtained for the money he is given to spend for the owner. Contractors should do everything possible to foster the success of the architect.

Many of our largest and most financially responsible contractors have taken it upon themselves to promote, advertise and sell architectural service, thereby engendering an antagonism on the part of many members of the architectural profession. We heard it repeated that one of our local contractors foretold that, within a few years, the general contractors organizations will have absorbed all of the architects. It is true that many of us are so broad-minded that, despite the efforts of contractors to supplant our services completely, we have believed it to the best interests of our clients to invite these same contractors to bid in our offices, thereby turning the other cheek.

The architects have found it necessary, in most cities, to take the initial step in bringing about closer co-operation between contractors and architects. We, in Detroit, have formed "The Architects-Contractors Joint Committee," a sort of grand jury and court of appeals rolled into one, formed for the purpose of clarifying the atmosphere generally, as well as for settling disputed questions concerning building practice. We hope to iron out, to some extent at least, various unfair bidding practices, the obnoxious practice of peddling among sub-contractors after general contracts have been let, as well as many similar unfair practices forced upon the building industry by incompetent and price-cutters. We hope further to allocate definitely responsibility and to standardize certain specification clauses covering the same.

(d) The architectural profession is awake to the fact that it must do its own house-cleaning. Together with the balance of the building industry, this profession is grossly underpaid. In the past 30 years the work and responsibility of the architect has increased a thousand fold. That this is a fact is easily proved by making comparison between a set of plans and specifications produced 30 years ago and similar work produced today. When payment to the architect is made on the basis of a percentage of the cost of the building, the percentage remains practically the same as it was 30 years ago.

Nevertheless it must be admitted that we suffer the same price-cutting competition that is rife among the general bidders. The public has no conception of the amount of work required on the part of the architect to complete the service which he conscientiously believes he should render.

For several years I have been a protagonist of national publicity to educate the public concerning the service of the architect. The number of disciples increases from year to year and we are led to suspect that it is only the staggering burden of initial expense that now restrains our national organization from entering upon a campaign of educational publicity.

(e) We must, unfortunately, resort to legislative lobbying, whether we like it or not. It is regrettable that our present system of government places prime importance upon maneuvering for political supremacy. From the National Congress, through the state legislatures and on down to city councils and village supervisors, the right and justice of many measures is often held secondary to political jockeying. Much urgently needed legislation becomes the object of political trading.

Even when politics momentarily take second place, it is always necessary to inform each member of any legislative body concerning all the arguments for and against any proposed measure. Indeed, it would be hopeless to introduce any legislative measure without first having obtained all the political influence possible to further its enactment, and then doing everything possible to inform properly each member of the legislative body concerning its intent. There are but few measures introduced without a background of selfish interest of some sort.

(f) Construction can not be promoted until the backbone of the depression has been broken. This will not occur until the vast sums of money lying dormant in savings accounts have been released for normal spending. Construction activity is bound to follow.

No one seems to have found the solution for this problem. On every hand we read various versions concerning the cause of the depression. The efforts to break it are as yet largely local, individual and unorganized. The banks will soon be forced to lower, perhaps even to cancel entirely the interest paid on savings, since they now have great difficulty in handling the money to produce a profit. Perhaps the reduction or cancellation of interest may bring about a release of the vast sums now deposited in savings. It may, however, effect a complete withdrawal, thereby causing a worse condition than exists at present, a condition similar to that prevalent during 1907, when printed script was resorted to as a substitute for currency.

At best the construction industry can not hope to lift itself by its own bootstraps. It must await and finally enthusiastically support a well-planned, concerted, nation-wide, nay, world-wide constructive effort to re-create a normal situation. Much intended building as well as upkeep work has been temporarily put off. The longer it takes, the more active we will be making up for lost time. If there is any way to make people put the savings back into normal circulation, let's get behind the scheme and push with all our might and main.

"CONSTRUCTION CONSULTANT AND BUILDER" NEED OF BUILDING INDUSTRY, SAYS ARCHITECT

(By Harlan Thomas, A.I.A., in an address before the Pacific Northwest Branch, Associated General Contractors of America)

I do not like the term "contractor" and care less for the word "contract." It has a metallic click to it, like the snap of a pair of handcuffs—like the click of a bail and chain.

I believe that the Building Industry is in a state of transition, that a salutary evolution is in progress, that the old fashioned "General Contractor" is gradually being supplanted with what we might call "The Construction Consultant and Builder." The elements and conditions involved in the various phases of the building industry of this generation furnish the cause for this evolution.

The Architect of today has a vastly different task in designing a building than the Architect of any previous generation. The old solid masonry walls, the thick construction of steel and reinforced concrete, thus introducing new and complicated elements of construction which involve in their fabrication the use of many mechanical devices and equipment.

The modern building as it is designed today is replete with mechanical equipment which must be the last word in a day which is labeled the "age of science and machinery." Elaborate systems of plumbing, heating and ventilation, electric wiring, vertical transportation and service and refrigeration as well as many other lesser items of mechanical contrivance all requiring that a mass of pipes and ducts must be worked in, around, over and under all kinds of structural sections without impairing them, crowded in and snuggled away in the narrow use of floor area, and without requiring expensive construction. A knowledge must be had of an ever increasing variety of building materials subject to a constantly fluctuating market as well as of the various building specialties to be sorted out and selected from. Also an intricate classification of labor is to be scanned, which is constantly subject to influences and conditions which make for increased efficiency or reduce it. The degree of consideration given and judgment used by the architect and his draftsmen in the preparation of the plans and specifications which incorporate and set forth the construction, mechanical equipment and finish of the enterprise will be reflected in the cost of the structure.

In the preparation of plans, the question of cost is an ever present ghost in the drafting room. In the building investment of today if the cost is out of balance with the rental value the enterprise is wrecked. After the average architect's office has cubed their building and multiplied by some fluctuating cost per cubic foot they have just about reached their limit in ascertaining costs. The most helpful thing to an architect is to have an accurate estimate of the cost of the project in the early stages of planning. Wanting this, he is very likely to exceed the appropriation. The resultant necessity for a revision of the plans after completion (with a dissatisfied owner in the background) is the rock which has wrecked many an enterprise and many an architect.

What we need today and what we are gradually getting is a "Construction Consultant and Builder" who will stand side by side with us from the first survey of the site to the day when the keys for the completed building are turned over to the owner.

We want the builder to be at home in our drafting room from the start, in constant consultation with our draftsmen, discussing with them all details of construction, finish and equipment from the contractors' point of view as one making for economy and efficiency.

There is much money wasted in building construction for want of collaboration between the architect's draftsmen and the one who is to have in charge construction of the building. Your continuous experience and daily contact with the myriad problems of construction, which you are seeking to solve in the interest of economy and efficiency in the buildings under your charge, your intimate knowledge of the building materials in the market and their relative prices and adaptability for various purposes, your practical knowledge of building specialties, their uses and manner of application or installation and which you have doubtless used in many buildings, gleaned from actual experience, makes you a most valuable consultant from the beginning to the completion of a set of plans, specifications and details.

Then there is the other phase, that of estimating the cost, not only as to segregated items but the aggregate as well. It is in the early stages of design, when the problem is in its formative period, when the architect's imagination and enthusiasm has led him into a grandiose conception of the solution of his problem, that he should be brought back to earth with the definite information that his layout will run 50 per cent over the estimation, or on the other hand that he will be able to proceed with confidence, knowing that his preliminary program can be realized within the limit of the means at hand.

By having the preliminary estimate of cost and during the preparation of the working drawings, the various phases of work as they are developed in the plans can be checked back against the preliminary estimate and brought into accord with it. We feel sure that this procedure would save in many building enterprises grief, and mutilation of an otherwise harmonious whole.

Upon completion of the plans and even before, if necessary, the construction consultant and builder could begin construction. The plans and specifications in every detail would be as an open book to him. His construction gains could be already organized, his plan of procedure worked out, and speed of construction with economy and efficiency would be guaranteed.

Thus there would come to the architect a service which in this day and age he could not be expected to provide within the confines of his office organization. It would be well impossible to include in an architect's office force a man who could be continuously your equal and keep "up to the minute" on all available materials and their relative costs, the fluctuating efficiency of labor, the latest methods of handling construction and the costs, the most economical and efficient mode of executing the many parts of the work and the proper cost to attach thereto.

Hence I am convinced that it is no discredit to the architect when he asks the owner to select his builder at the very beginning of the enter-

prise so that the architect may avail himself of the service I have described, which would prove so beneficial to the work and the owner's interest. I assume that there is not a builder here who would not be glad to perform all the functions of the "Construction Consultant and Builder" as I have outlined above, the problem at hand is to convince the owner to this program. Much progress has been and is being made in this direction. The best way to convince the owner is by demonstration. Every owner, before building, is likely to inquire as to what manner of procedure is followed by his neighbor and of its success or failure.

Under this plan it is assumed that the owner and architect will make a wise selection in their "Construction Consultant and Builder," taking into consideration integrity, skill and experience as well as organization and ability to perform commensurate with magnitude of the work. The owner, builder and architect, all with mutual concern for the work, will then select sub-builders who also will assist in a practical and economical layout of their particular part of the work and all shall be on a time and material basis, with a reasonable fixed fee covering the builders' compensation for handling the work.

It is my sincere belief that the day is fast approaching when this system will become general usage. When that day comes I believe that many of the bad conditions in the building industry from which all are suffering, will disappear. Then the relations between owner, architect and builder will be based upon trust and confidence and all can and will work for the common purpose, which is the completion of the job with sound workmanship, in the shortest possible time, for the least possible cost.

BUILDING OPPORTUNITY OFFERED BY LOW COSTS

The status of the building industry from the point of costs, rapidity of manufacture, transportation and general efficiency presents great opportunities to those wishing to build than has been the case for the last decade, according to Lou R. Crandall, president of the George A. Fuller Co.

This statement is based on an analysis recently completed by the company which shows that construction costs on large buildings are only 3 1/2 per cent above the lowest point for the last ten years and on monumental type buildings are one per cent below the lowest point.

As compared with peak figures for the decade, the analysis shows that costs on all type of large buildings, such as factories, hotel and apartment buildings, such as banks, theatres, hospitals, churches and similar educational and institutional buildings show a decline of 4 per cent.

The greater decline in the cost of monumental buildings, Mr. Crandall states, is caused by the fact that producers of special building materials, such as ornamental iron and bronze, tile, cut stone, granites, marble and ornamental plasters must make greater price concessions in times when the construction market shrinks in order to get business than the industries producing for more general demand. Therefore, those buildings which make the greatest use of this type of material may be constructed at a comparatively lower cost than the more conventional buildings.

Schafer Bros. Lumber & Shingle Company of Montezano, Wash., have opened an office in the Western Pacific Bldg., Los Angeles, with E. E. Schmidt of the company's sales department in charge.

THE OBSERVER

What He Hears and Sees on His Rounds

Two bills fixing the minimum wage on public buildings and public works at five dollars a day have been introduced in the Nevada State Assembly. A. B. No. 1 by FitzGerald fixes the minimum wage on public buildings at five dollars a day, while A. B. No. 3 by McAuliffe fixes the wages on all public works at five dollars a day.

Palo Alto labor now has the protection which an ordinance formally adopted by the city gives.

The city council is on record approving the giving of preference to resident labor in public work done for the city of Palo Alto. The new law required that contractors give first choice for employment to artisans who have been residents here for at least one year prior to their engagement on a public work.

It is provided that the preference be given when the laborers have the required skill to perform the specified work. If there are not sufficient local workers to do the jobs, outside labor may be brought in.

The eight-hour day is specified and standard wages paid for similar work by private employers are established.

Penalties are provided for violations of the provisions of the new law by contractors.

"A practical use for old, broken-down automobiles has been found at last. Decrepit, useless cars are now to be dumped into a breakwater to form a harbor. It is said that many motorists save their old razor blades to throw into the Grand Canyon on visits there, but now they may also tow their old autos to Ventura, where they will be dumped into the ocean to build the breakwater, it is stated, harbor," according to the Automobile Club of Southern California. "The city of Ventura has applied to the Federal war department for a permit to build the breakwater, it is stated. Old cars will be dumped into the ocean and allowed to fill with sand and rock to form the barrier, according to plans of City Engineer Donald D. McMillan, who declares that this method has been used successfully in building revetments along the Missouri river in Montana."

Salinas, Calif., is considering the adoption of the Uniform Building Code of the Pacific Coast Building Officials' Conference.

Cities with 25 per cent of the assessed value of any county would receive 25 per cent of the gasoline tax money apportioned to the county by the state under the terms of a bill introduced by Assemblyman Geo. Bliss of Santa Barbara. The intent of the bill is to enable the cities to use a portion of the gas tax for street improvements.

Today the percentage of the total volume of work being performed by responsible contractors is without question higher than it was during the apex of construction activity in 1928. During 1931 it will undoubtedly be still higher, says the Constructor. The problem of the responsible contractor today is one of weathering the storm and doing his bit to see that conditions are created in the in-

dustry which will prevent a return of irresponsible expansion, speculation and unsound competitive conditions which in the main are responsible for the present adverse conditions.

Frank C. MacDonald, general president of the California State Building Trades Council, has placed the Shell Oil Company on the "We don't patronize" list.

It is understood that the company will remain on the list until it assumes a different attitude toward organized labor.

In speaking of the boycott, MacDonald said:

"The recently constructed Shell Oil Company's office building in San Francisco was built under non-union conditions. At the present time the Shell chemical plant is being built in Contra Costa County under non-union conditions, and repeated complaints have been made that the erection, repair and maintenance work on Shell stations is being done under non-union conditions. Officials of the Shell Oil Company frankly state that the company operates under open shop conditions. Because of the aforesaid facts, the Building Trades Council of San Francisco has placed the Shell Oil Company on its 'We Don't Patronize' list."

The Keyes-Elliott bill designed to facilitate Federal building construction passed the House of Representatives and is now pending in the Senate. The measure has met with no opposition and will be passed at the present session of Congress. Under the provisions of the bill, the Secretary of the Treasury will be authorized to limit the issuance of plans and specifications to bidders of proven financial responsibility and to limit the time allowed for bidding by advertisements. Selection of sites for buildings will be made easier by allowing the Secretary to dispense with competitive bidding before the government obtains title to the land and employment of outside technical assistance in preparing plans is authorized.

The Oregon State Board of Architectural examiners is not authorized by state law to acquire a reference library for use of students preparing for examination, it was held in an attorney-general's opinion. Neither the board is permitted to conduct a contest for preparation of the best certificate, it was held. The opinion was requested by the State Board of Architectural Examiners in Portland.

Through J. M. Campbell, president, the Master Plumbers' Protective Association has requested the Oakland city council to reduce the present annual license fee of \$50 to \$25. It was stated that at least 15 members of the association are unable to pay the fee. It was referred to Commissioner Frank Colbourn.

According to an Associated Press dispatch from Madrid, under date of January 22, Louis Rodriguez Yrigoi, minister of finance, proposed at a cabinet meeting that steps be taken against the dumping of Russian prod-

ucts, particularly lumber. He said recently Russia sold a cargo of lumber in Tarragona under the prevailing Spanish prices.

Under the provisions of a bill introduced in the New York State Senate it is provided that manual labor shall be substituted for machinery and labor-saving devices upon all public work whenever practical or expedient during the unemployment emergency.

Branded as the "spoils system" by anti-administration forces, Governor James Rolph's bill to abolish definite terms for all appointive State officials, boards and commissions was introduced in the State Senate by Senator Roy Fellom of San Francisco.

The measure would affect, in addition to others, the following officials, now serving four-year terms, by making their positions "at the pleasure of the governor": California State board of architectural examiners, State board of harbor examiners, building and loan commissioner, insurance commissioner, State board of registration for civil engineers, civil service commission, State board of health, industrial accident commission.

Replying to a telegram from Col. Arthur H. Woods, of the President's Emergency Committee on Unemployment, outlining the committee's endorsement of the home modernizing movement as an aid to combat unemployment, the National Association of Real Estate Boards assured the committee of its readiness to co-operate with the administration in stimulating home ownership, home building, and replacements and improvements in buildings where such modernizing is economically sound for the owner. It stated, however, that a blanket recommendation to modernize old homes is, in the opinion of the Association, unsound.

As a possible connecting highway between Portland and the Pacific ocean the Oregon State Highway department engineers have recommended what is called the ridge route, a strip 72.1 miles long which will cost approximately \$2,510,002 to construct. As the name implies, the ridge highway would follow along a high ridge between the Coast range summit and Nehalem bay, in contrast to most of the other routes which follow river canyons to the sea.

It would follow either the present highway from Portland to Forest Grove creek, and thence to the coast via Gales creek or an entirely new and more direct route from Portland to Gales creek and thence to the coast.

Second choice of the engineers is the Wilson river route, which reaches the coast at the city of Tillamook. Third choice went to the Vernonia-Hamlet route, which strikes the Toosweet Coast highway at Necanicum, 13 miles south of Seaside.

To bring to holders of distressed properties, or old properties needing to be remodeled to meet present day competition the benefit of experienced property managers, the National Association of Real Estate Boards has set up an entirely new type of business service, a consultation Service bureau for distressed properties and for properties needing rehabilitation. The Bureau will go in to the whole situation, including the financing situation and the rental situation, in regard to any building as to which it is consulted, and give detailed and sound recommendations as to how it can be put into a position to produce its maximum income return.

ALONG THE LINE

HERE—THERE EVERYWHERE

TRADE LITERATURE

Adolph Telechert of Sacramento, was elected president of the Northern California Chapter A.C.C., at the annual election held in San Francisco, January 24. George Pollock, also of Sacramento, was elected to the board of directors.

Colonel Walter E. Garrison, state director of public works, has appointed William Clark, Sr., surveyor of the port of Eureka, succeeding F. B. Barnum. The appointment was made with the approval of Governor James Rolph, Jr.

George A. Lohrer, Seattle, Wash., for nineteen years construction superintendent for the W. T. Butler Construction Co. in Seattle, has withdrawn from that firm and is now engaged in general contracting business with offices in Seattle.

Gus Donovan of Santa Rosa, according to word from that city, has been named by the state administration, inspector of contractors' licenses for the northbay district. He will maintain headquarters in Santa Rosa.

H. I. Dygert, city engineer and building inspector of Albany, Calif., has been admitted to active membership in the Pacific Coast Building Officials' Conference.

W. B. Dean, for the past eight years general manager of lumber operations for the Diamond Match Company, with headquarters at Chico, has been elected vice-president of the company, to continue in charge of the company's lumber operations throughout California.

M. E. Armstrong, for 21 years city building inspector of Redlands, Calif., has resigned. L. H. Cooper, a contractor, has been named to fill the vacancy.

Yolo County clay is being tested by Gladding, McBean and Co., of San Francisco, with a view to using the substance for the manufacture of pottery, according to the Woodland Democrat.

Victor Shearer was elected president of the Portland, Oregon, Builders' Exchange at the annual meeting held last week. Other officers elected were Glenn Hord, vice-president; Hans Skibinski, treasurer, and V. H. Dent, secretary.

Chas. Butters, San Francisco, mining engineer, was given new recognition in New York when he was awarded the medal of the Mining and Metallurgical Society of Freiberg, Germany, for outstanding research work.

The Seattle city engineering department has been reorganized. Under a new arrangement, accomplished by City Engineer R. H. Thomson, Maj. O. A. Piper is chief assistant, a position he has been occupying for some time, but added to his duties is the supervision of bridge design. The bridge work was formerly handled by D. W. McCorris, who is now court engineer. T. H. Carver continues as engineer in charge of water supply work. The city, for engineering purposes, has been divided into three districts, with an engineer in charge of each. C. W. Wartelle is in the north district, L. R. Andrews in the central and I. W. Embury in the south district, which includes West Seattle.

Albert Pearson of San Diego, was elected president of the Master Painters and Decorators' Association of California at the annual convention held in Long Beach last week. Other officers are: Walter McKinley, San Jose, vice-president; A. S. Grant, Los Angeles, vice-president; Frank Magowan, Oakland, vice-president; Max Cohn, San Francisco, treasurer; A. M. Grant, Los Angeles, secretary; Paul Zallichoff, San Jose, secretary-at-large; Fred Kiesel, San Francisco, chaplain.

A recent ruling of the Industrial Accident Commission has made obsolete the ordinarily accepted types of disconnect switches on all motor circuits involving 300 volts or more. From now on, all installations will require the new switches.

Twelve plumbers in the Hayward district of Alameda County are working with Manuel G. Riggs, city plumbing inspector of Hayward, in framing a new city ordinance which shall be in accordance with a state-wide uniform code regulating plumbing installations.

Unofficial reports from San Rafael, Calif., are to the effect that a Builders' Exchange will be organized in that city in the immediate future.

At the annual meeting of the Ohio Contractor's Association held in Columbus last month, there was an overwhelming endorsement of proposals that the eight hour law be strengthened and enforced and that minimum wages be established to apply to each job and that these be determined upon and advertised at the time of advertising for bids.

Los Angeles City Council will submit to the voters in May or June of this year a proposal to issue bonds of \$6,000,000 to finance construction of sewers. The proposition was defeated at an election held last year.

Re-codifying of all building and loan laws of California is comprehended in a bill introduced by Senator J. M. Inman, chairman of the Senate building and loan committee.

The new measure carries suggestions made by H. L. Carnahan, State building and loan commissioner, the California Building Loan League and the Los Angeles county grand jury.

Senator Inman said: "The act gives greatly enlarged powers to the commissioner in reference to making rules governing building and loan associations, provides for a uniform system of accounts, gives the commissioner control over advertising by associations and provides for the publication of financial statements.

"The act provides for substantial cash reserves, the character of such reserves and the manner in which they shall be maintained; provides for the control by the commissioner over the organization of new associations and the establishment of branches; also stringent regulations in reference to the making of real estate loans."

The provision of competent and unprejudiced engineering assistance to develop specifications which assure real competition are necessary in the government purchasing organizations if the purchasing is to be conducted efficiently, according to L. E. Boffey, editor of the Purchasing Agent. Mr. Boffey also points out the need for testing and inspection facilities to insure compliance with specifications.

The Underwriters' Laboratories have just issued a standard covering requirements for electrically heated appliances. Sections of this standard deal with mechanical assembly of appliances, heating elements, wiring, terminals, heat and electrical insulation, switches, cords and plugs, rating, power input, temperatures, and markings. Copies are available from the Underwriters' Laboratories, 103 Leonard Street, New York.

The first issue of the trade publication "Lead," published by the Lead Industries Association, 420 Lexington Ave., New York City, is now being distributed.

"Wire Engineering" is the title of a new house magazine, the first issues of which are being distributed by the John A. Roebling's Sons Co., Trenton, N. J.

Advantages of Mastic woodblock flooring, which is placed directly on concrete, are outlined in a 24-page illustrated bulletin of the Wood-Mo; saie Co., Inc., Louisville, Ky.

The Underwriters' Laboratories has just published a new standard for enclosed switches. The standard covers enclosed switches and air-break switches, but does not cover snap switches. Copies may be obtained from the Underwriters' Laboratories, 103 Leonard St., New York.

A new and smaller model of the Caterpillar, bearing wheel grader, to be used with the Caterpillar 30 tractor, is described in a bulletin of the Caterpillar Tractor Co., Peoria, Ill.

Practical information on cast iron pipe-jointing practice is given in a 32-page illustrated bulletin of the Hydraulic Development Corp., 50 Church St., New York City. Not only does this publication describe the methods and materials used but it also contains specifications and tables applicable to this field of construction.

Buffalo Forge Co., Buffalo, N. Y., has issued a 20-page bulletin on the latest developments in its line of unit heaters. Five different types are described and illustrated.

Specifications of air-cooled air compressors for trailer, skid and tractor mounting are given in a 14-page bulletin of the Davey Compressor Co., Inc., Kent, Ohio.

Accessories and supplies used in welding, including rods, cables, goggles, helmets and gloves, are listed in a 12-page catalog of the Fusion Welding Corporation, 103rd St. and Torrence Ave., Chicago, Ill.

Westinghouse Electric & Mfg. Co., East Pittsburgh, Pa., has issued a large general catalog for 1931-32 containing 1,352 pages and describing many hundreds of pieces of electrical equipment. An illustrated introductory section presents a brief history of the company and its plants and a description of interesting research developments.

Model 52-B, the new 24-cu. yd. diesel shovel-dredge-line-clamshell-crane developed by the Bucyrus-Erie Co., South Milwaukee, Wis., is fully described in a 16-page illustrated bulletin issued by that company.

TRADE NOTES

E. K. Wood Company of Oakland is now marketing "Grade and Trade Marked" Douglas Fir (Oregon Pine) lumber, according to announcements to the trade. The company has secured a permit from the West Coast Lumbermen's Association under which it is able to furnish Douglas Fir officially grade marked under their supervision. Each piece of lumber will bear the official association stamp, clearly showing the grade furnished.

Schumacher Wall Board Corp. on Jan. 27 declared the regular quarterly dividend of 56¢ a share on the preferred stock, payable February 15 of record February 5. No action was taken toward resumption of dividends on common stock.

Star Roof Company of Sacramento, Ltd., has filed articles of incorporation with Secretary of State Frank C. Jordan. Directors are William A. Ficker of Sacramento and P. A. Adams and Winfield B. Thompson of Los Angeles.

O. H. Carter for several years manager of the Fresno Lumber Company at Fresno has purchased the lumber department of the Wasco Creamery Construction Company at Wasco, Kern County, which he will operate under the name of the Wasco Lumber Company.

J. C. Douglas, manager of the General Electric Refrigerator Agency at 1212 K Street, Sacramento, has been promoted to a new position as agent for the General Electric International in the entire South American field. Douglas is now in New York and will return to Sacramento prior to sailing for the southern continent. Roy E. Culp, former supervisor of the General Electric Company in San Jose will take over the Sacramento agency.

Bauer Lumber Company, Ltd. of Los Angeles, capitalized for \$200,000, has been incorporated. Directors are: A. L. and E. L. Bauer of Huntington Park, and J. J. Geib of San Gabriel.

Technical engineers and architects employed in various municipal departments at Seattle are asking a readjustment of salaries with pay set at the average of other Pacific Coast cities in a petition presented to the city council. The petition, presented by leaders of the group, asks that the council name a committee to study salary schedules and civil service ratings of corresponding employes in other Coast cities.

In eleven years there have been 1491 new homes built in Reno, Nev., while the average value is \$3179. In 1920, there were 53 new homes built, representing a total value of \$138,550, while in that year the average value for a home was \$2614. Two hundred and seven new homes, costing a total of \$311,050, were built in Reno during 1930, while the average value had increased to \$3918.

R. G. Stevenson was elected president of the Seattle Chapter, Western Public Works Contractors' Association, at the annual meeting of that body held last week. Other officers are: Joe Erickson, vice president; Magnus Espeland, secretary; and Frank N. Badalato, treasurer. Members selected to the executive board were: L. J. Dowell, C. L. Creelman, Joe Erickson, H. L. Goetz and John Otteson.

INMAN-POLSEN IN BIG LUMBER DEAL

George W. Thatcher, president and treasurer of Inman-Polsen Lumber Co. in Portland, Ore., last Friday confirmed the reported purchase by his company of about 600,000,000 ft. of standing timber on the Siletz river, west of Valsetz, Ore. He declined, in the absence of H. B. Van Duzer, vice-president, to confirm the reported purchase price of about \$1,500,000.

The purchase, with previous holdings, gives the company about 1,400,000,000 ft. of timber almost all in a single block, Thatcher said.

Cutting operations would not be started for some time, he said. Construction of a mill had been discussed, but was not definitely planned. The mill would probably be placed at Valsetz, terminus of the Valley & Siletz Railroad.

One of the two tracts in the new block of timber was purchased from Kansas City interests, Thatcher said. He declined to give the names of the previous owners.

ARMY ENGINEERS SET BRIDGE HEARING

U. S. Army Engineers will hold a public hearing on February 17 in the chambers of the San Francisco board of supervisors to hear protests, if any, on the construction of the proposed bridge over San Francisco Bay.

The order for the hearings points out that the plans for the bridge provide for four major spans between Goat Island and San Francisco with minimum horizontal clearances of 1,750 feet, 1,600 feet and two of 1,450 feet, with vertical clearance of 180 feet at highwater, for 1,900 feet in the center sections.

It is stated that the plans also call for a clearance of 180 feet in one 700 foot span between Goat Island and Calumet. The plans and specifications are on exhibition at the Army Engineers' office in the Customs House.

HOOVER DAM A "TERRIFIC BLUNDER"

The Muscle Shoals and Hoover dam projects were termed "terrific blunders" by William S. Lee, president of the American Institute of Electrical Engineers, in his opening address before the institute's winter convention in New York last Monday.

In support of his attack on Government ownership, he declared "there is no doubt that Muscle Shoals has been a colossal political and government blunder, but I fear that the next decade will see even greater blunders if some of the projects which are under way or projected are constructed."

"If Muscle Shoals, begun nearly fifteen years ago, is today earning nothing and has no policy, what will occur at Hoover dam? There is a tremendous development started and nobody knows where it is going?"

To enable the Pacific Coast Building Officials' Conference to continue with a full-time secretary and maintain a complete administrative organization, Southern California interests have volunteered to mobilize the manufacturers of building materials in support of the Conference financial program. Matt Bright, sales manager of the Davidson Brick Company of Los Angeles, Emil M. Gahrath, sales manager for the Schumacher Wallboard Corporation and Rex Starrett of the Monolith Portland Cement Co. are prime movers in the financial campaign.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 87 Post Street, San Francisco. (Phone SUTTER 1684).

R-3464-S MANUFACTURERS' Agent or salesman calling upon manufacturers, plants and power plants in S. P. territory is wanted as agent for Ohio company manufacturing a line of patent packing with good sales features. Name of company furnished on request.

R-3209-S ENGINEER, mechanical or electrical, not over 30, with 3 to 5 years' experience on hydro-electric plant operation for service as engineer. Must have mech. skill, agreeable personality and single. Salary about \$175 mo. and expenses in field. Apply by letter. Hdqtrs., S. F.

K-332-W-2034-C-S PROFESSOR of printing for school of industrial engineering; must be a college graduate with broad experience in printing. Position will involve research and application of courses in craftsmanship training. Salary \$5,000 a year. Apply by letter with full details of experience, references and photo. Location, East.

K-346-W-2251 - S REFRIGERATION Engineer who has had at least five years' experience in the preparation of specifications and designs, installation and servicing of refrigerating and ice making plants up to 100-ton capacity. Single man about 30 promising. Four year contract with option of renewal if services are satisfactory. Salary about \$300 a mo. and traveling expenses to and from China. Apply by letter. Headquarters, New York.

W-1874-C-S CONSULTING ENGINEER knowing garage operation, garage equipment, car repair, car utilization and manufacture of parts for repairs, to advise on equipment for service stations and repair shops, on schedule of operation of trucks, busses and passenger cars and to organize maintenance and repair of trucks, busses and passenger cars of various makes. Experience in responsible charge of fleet operation and maintenance of trucks and busses desirable. Contract for one year, renewable. Salary open. One-third to one-half in paper rub for living expenses. Balance in United States bank. Applications only by letter which will be forwarded to Miscow for decision. Location, Russia.

Approval of Senate Bill No. 46, now before the legislature, which provides for additions to the secondary road system of the state, as recommended by the department of public works, has been given by the Sacramento Valley Council of the California State Chamber of Commerce.

A trip to Las Vegas and the Hoover-Boulder Dam is being planned for members of the Orange County Builders' Exchange. The trip will start Friday, February 20, returning the following Sunday. The Southwestern Portland Cement Company will furnish the travelers with dinner Friday evening at the company's plant in Victorville.

Harry D. Jackson, district manager at Stockton for the California Canning Peach Growers' Association, has been appointed a member of the Stockton City Planning Commission by Mayor J. Carl Tremah.

PRIOR RIGHTS OF OWNER ARE CITED BY COURT

Since considerable legal controversies involve the prior rights of property owners, holders of mortgages, and contractors who perform work on the property, the recent higher Court case of Van Eppel Real Estate Co. vs. Sarasota, 129 So. 892, presents an unusually valuable legal information, says Leo T. Parker, attorney, in General Building Contractor.

Here it was disclosed that on Nov. 25 a mortgage was executed by the owner of property. The mortgage was recorded April 21. A contractor commenced work on the property on April 12 and completed the job on April 16. The contractor filed a mechanic's lien in the office of the clerk of the Circuit Court on July 7. In other words, the contractor commenced and completed his work after the execution of the mortgage but before it was recorded and without knowledge of the existence of the mortgage. Neither did the holder of the mortgage have notice, either actual or constructive, of the contractor's claim when the mortgage was recorded.

The Court promptly established the right of the parties, as follows:

"The mortgage came into existence and was a valid lien as between the mortgagor and the mortgagee upon its execution and delivery on November 25, several months prior to the time the contractor commenced work. It was of no effect, however, as against creditors or subsequent purchasers for value and without notice, until recorded, which recording occurred on April 21. Meanwhile, and while there was no mortgage of record, the contractor commenced and completed his work, thereby acquiring a statutory lien upon the property as against the owner. Thus the mortgagee and the contractor each held valid and effective liens upon the property so far as the interest of the mortgagor-owner was concerned, the lien of the mortgagee dating from November 25, the date of the delivery of the mortgage, and the statutory lien of the contractor dating from April 12, the date of the commencement of the work, so that, as against the owner, the lien of the mortgage was first in point of time. . . . On that date (April 21) the mortgage was recorded, and thereby became first in time of recording as against the mechanic's lien, notice of which was not recorded until July 7."

It is important to know that if, after the contractor had completed his work, but before he had filed notice of his lien, an innocent purchaser had acquired a valid deed to the property, such latter purchaser would prevail over the mechanic's lien because the contractor, by failing to record his mechanic's lien, assumes the hazard of the intervening rights of those who deal with the property in ignorance of the mechanic's unrecorded claim.

BUILDING HEIGHT ORDINANCE PASSED

The San Francisco Board of Supervisors has passed to print an ordinance limiting to a height of forty feet structures hereafter erected in the territory bounded by Fillmore Street on the west, Bay Street on the south, Buchanan Street on the east and the Marina Boulevard on the north and northeast.

The proposed ordinance is published herewith:

Section 1. No building, except as hereinafter provided, shall be erected in the City and County of San Francisco to a height greater than forty (40) feet, within the territory bounded by: Fillmore Street on the west, Bay Street on the south, Buchanan Street on the east, and by the Marina Boulevard on the north, and northeast.

Section 2. No addition to or alteration or improvement of any building within the above described district shall be made which shall increase the height of any building as limited by this ordinance.

Section 3. No limitation of the height of buildings in the City and County of San Francisco, as provided by this ordinance, shall apply to public buildings, churches, schools, steeples, towers, domes, cupolas, belfries (not used for human occupancy), nor to chimneys, skylights, ventilators, pent houses, water tanks, flag staffs, railings, weather vanes, nor to other similar structures such as are usually erected or maintained above the roof line of buildings.

Section 4. The method of determining the height of buildings, for the purpose of this ordinance, shall be the same as provided in Ordinance No. 1008 (New Series), and the provisions of Section 75 shall apply within said territory.

Section 5. No building permit shall be issued by the Board of Public Works for the erection or alteration of any building or structure contrary to the provisions of this ordinance, and any permit so issued shall be void.

Section 6. Any person, firm or corporation violating any provisions of the ordinance shall be guilty of a misdemeanor, and upon conviction thereof shall be punishable by a fine not exceeding \$500.00 or by imprisonment for a term of not exceeding six months or by both such fine and imprisonment.

Such person, firm or corporation shall be deemed guilty of a separate offense for each and every day during any portion of which any violation of this ordinance is committed, continued or permitted by such persons, firm or corporation, as hereinafter provided.

Section 7. This ordinance shall take effect immediately.

WHO IS OWNER? COURT DEFINES

Many legal controversies have arisen over the legal meaning of the word "owner" in mechanic's lien laws. Usually, an owner is the party in legal possession of the property when the construction contract is made, says Leo T. Parker, attorney, in General Building Contractor.

For illustration, in *Freidenbloom vs. Pecos Co.*, 290 Pac. 797, a person named Riddle agreed to purchase a lot and pay to the seller a stipulated amount each month. He erected a filling station on the lot and later defaulted in paying for the lot, the construction work, and the building materials including rock, sand, and cement. The materialman filed a mechanic's lien and the owner of the lot contested its validity. However, the Court held the lien valid, saying:

"We used the word 'owner' in the same sense as it is used in our mechanic's lien statute. It does not necessarily refer to the holder of the legal title to the property improved. It may have reference to one whose interest is less than a fee-simple estate, such as a lessee or a conditional vendee in possession. It means the party in interest who is the source of authority for the improvement. One who deals with such a party directly is contracting with the 'owner' and is not a sub-contractor, but is an 'original contractor.'"

Also in *Gray vs. Pumice Stone Co.*, 110 P. 603, it was held that one who deals directly with the owner of the property is an original contractor.

GRADED LUMBER PRODUCTS WILL BE MARKETED BY HOGAN

The T. P. Hogan Lumber Company of Oakland announces that they will specialize in Coos Bay Lumber Company's products. Under this arrangement they will be able to serve the construction industry with lumber products which are graded and trade marked under the supervision of the West Coast Lumbermen's Association, thus affording to discriminating architects and contractors kiln dried dimension lumber.

"Dependability, quality and conformity to standardized rules is an asset in any marketable product, and we can assure you that the Coos Bay Lumber Company's entire organization and huge resources will emphasize these desirable qualities," says T. P. Hogan, Jr., president of the East Bay firm.

"The Coos Bay Lumber Company operates and owns the largest single sawmill in the world, its source of supply being drawn from its own 80,000 acre tract of standing timber, estimated to contain over 4,500,000 feet of merchantable timber. Each day this company produces 650,000 board feet of well graded and well manufactured lumber. The company also maintains at Bay Point, California, a distributing yard, where about 20,000,000 board feet of lumber is always available for immediate shipment."

The T. P. Hogan Lumber Company maintains offices, mill, yards and docks at Second and Alice Streets, Oakland, and prides itself on prompt deliveries, due to the fact that its plant is served by motor truck, rail and water.

Readers are referred to the advertisement of the Hogan Lumber Company on page 3 of this issue.

Plans for developing a system whereby the home owner or prospective home purchaser may grade the quality of construction of the house in which he lives were outlined by Stan C. Davis, secretary of the Dayton Chapter of the Associated General Contractors and of the Dayton Builders' Exchange before the Dayton Chapter of the American Institute of Architects and a committee of architects was appointed to carry on further work on the plan. Mr. Davis also explained the proposal to the Dayton Building and Loan Association. It is expected that the joint action of these associations will be taken soon for carrying out the plan.

Orders received by the General Electric Company during the year 1930 amounted to \$341,829,312, compared with \$445,862,519 for 1929, a decrease of 23 per cent. President Gerard Swope has announced. Orders for the final quarter of 1930 amounted to \$74,168,496, compared with \$108,298,049 for the last quarter of 1929, a decrease of 32 per cent. As a result of the transfer of radio set and tube business, outlined in the company's 1929 annual report, orders received in 1930 did not include radio sets and tubes, except orders received for the new General Electric radios introduced in the latter part of the year.

LIEN EXTENSION CITED BY COURT

The law is well settled that, after completing a building, a contractor or materialman who fails to file a mechanic's lien within the period specified by statute, may automatically extend this period by showing that in good faith he performed work or delivered materials on the grounds after the original date of completion. However, it is important to know that testimony of this fact must be positive and convincing, otherwise the court will refuse to extend the lien, says Leo T. Parker, attorney at law in the General Building Contractor.

For instance, in *Weinberger vs. Goldstein*, 151 Atl. 397, it was disclosed that various contractors and materialmen failed to file liens within four months after their work was finished. Later suit was filed to validate the liens and some testimony was introduced to prove that labor and material had been furnished at a later date. However, the evidence was not positive and the Court held the claimants not entitled to liens, saying: "At best from the standpoint of the lien claimants they show no substantial amount of labor or material within the four months before the filing of the respective liens, and in some of the cases they show a deliberate attempt to revive a dead lien claim by a fictitious or nominal performance now claimed to have been under the original contract. Suspicion seems to attach to the good faith of all these claims as to the last time of performance. . . . The testimony of the various lien claimants is wholly unconvincing, and I am of the opinion from the testimony submitted that there was merely a pretense at furnishing materials and labor within the required four months' period."

VERBAL CONTRACT VOID, COURT RULES

Few persons realize that a verbal agreement to sell property ordinarily is void and unenforceable, unless one of the contracting parties proceeds to fulfill his obligations, says Leo T. Parker, attorney-at-law in the General Building Contractor.

For example, in *Forbes*, 282 Pac. 528, it was disclosed that an employee of a corporation made a verbal contract by the terms of which he agreed to sell the company's real estate. Later the corporation filed suit to rescind the agreement on the contention that the contract was void because it was not in writing. It is important to know that the higher Court held the oral contract void, stating the following important law:

"It was necessary to prove

either that the contract was in writing or that it had been partially performed."

The case is reduced to an action to enforce a parol contract to convey real estate. Such an action is maintainable only where there has been a part performance sufficient to take the agreement out of the statute of frauds."

The Seventh Annual Del Monte Iron and Steel Conference of the California State Chamber of Commerce will be held at Del Monte on February 12, 13 and 14. New standard practices will be considered as well as security standards to reduce rates of compensation insurance, improve methods of merchandising, and the importance of ethics in business. It is expected that 200 California exporters will be in attendance, representing the principal iron and steel industries throughout the State.

BILL AIMS TO PREVENT RUSSIAN LUMBER DUMPING

A bill has been introduced in the U. S. Senate (S. 5370) to prohibit the importation of products of convict, forced or indentured labor. The bill is aimed to prevent dumping of Russian lumber in this country. It is sponsored by Senator Frederick M. Steiwer of Oregon and endorsed by the West Coast Lumbermen's Association.

Forced labor is defined in Sec. 2 of the bill as follows: "Sec. 2. 'Forced labor,' as herein used, shall mean all work or service which is exacted from any person under the menace of any penalty for its nonperformance and for which the worker does not offer himself voluntarily, or from which he is not permitted voluntarily to withdraw. Labor, in the mining, production, transportation, handling, loading or manufacture of goods, or in the sale of merchandise, performed in any country in with the general governmental labor policy or the prevailing labor practice is forced labor, as herein defined, is for the purpose of this Act, forced labor."

Robert S. Odell, president, Pacific States Savings and Loan Company, has been named a member of the Executive Committee of the California Building-Loan League, according to Harry S. Wanzer, head of the organization. While on an European trip recently, Mr. Odell made an extensive study of building and loan societies in England, which have flourished there for more than 150 years. He heads the largest institution of its kind in the United States with administrative offices in San Francisco and branches in leading cities throughout the state. Other members of the Executive Committee include: C. H. Wade, Los Angeles; H. S. Wanzer, Sacramento; S. M. Anderson, Inglewood; P. A. Oliver, Santa Maria; Harold A. Noble, Stockton, and J. M. Abbott, Santa Barbara.

The American Institute of Electrical Engineers has issued a new standard covering switchboards and switching equipment for power and light, the standard having been approved by the Board of Directors of the A.I.E.E. on October 15, 1930. The standard covers switchboards and switching equipment not specifically covered elsewhere in the standards of the A.I.E.E., as apparatus, but does not apply to industrial control equipment or communication switchboards and switching equipment. The standard is divided into the following sections: service conditions, rating, temperature limitations, name plates. Copies of the standard may be secured from the American Standards Association, 29 West 39th St., New York City, for 30 cents per copy.

U. S. Bureau of Reclamation is rushing plans for the erection of cofferdams in Boulder City to house workers on the Hoover-Boulder Dam project. Bids have been called for the storage tanks and pumps will be advertised soon for material for construction of the water distribution system. The city will cost \$2,000,000.

The Oakland city council has accepted amendments to the meat ordinance submitted by Commissioner Frank Colbourn to permit meat markets to be installed in general open markets provided that the meat is enclosed in sanitary refrigerated glass cases approved by the chief meat inspector.

The index number of wholesale prices computed by the Bureau of Labor Statistics of the United States Department of Labor shows a further recession in December. This index number, which includes 550 price quotations weighted according to the importance of each article and based on prices in 1926 as 100.0, declined from 80.4 in November to 78.4 in December, a decrease of 2 1/2 per cent. The purchasing power of the 1926 dollar in December was \$1.276. Building materials were downward, as lumber, brick, cement, paint materials, and certain other building materials declined in price.

The most expensive lumber on the market today, says the U. S. Forest Service, is the wood of the yew tree. Archery experts agree with Robin Hood of Sherwood Forest and with the English bowmen who defeated the armored chivalry of France at Crecy and Poitiers over 600 years ago, that the yew furnishes the most ideal material for bows. Easing estimates, the cost of a stave of yew 2 by 2 inches thick and 6 feet long at \$10, the value per thousand board feet would be \$5,000, or fifty times the price of California's choicest sugar pine lumber.

Western Wood Products Co., Ltd., of San Francisco, has been reported with a capital stock of \$25,000. Directors are: Charles R. Neighbors, J. O. Crabb and Henry Weiss.

Announcement is made of a sale of a 1250-hp. "Simplex" synchronous motor and a magnetic control to the Marquette Cement Company. This motor will drive a tube mill and will be installed at their plant at l'ape Girardeau, Mo. This motor is a new idea in synchronous motors recently developed by Westinghouse for applications requiring high torque and load starting inrush. The motor's starting performance—torque and inrush—is very similar to that obtained on wound rotor induction motors. However, after the motor is synchronized, it operates as a standard salient pole synchronous motor with the inherent high efficiency of this type of motor.

A resolution urging that highway surveys relative to extension be based upon the need for development of various sections of the state, as well as upon traffic count, has been presented in the senate by Senator R. R. Ingels of Mendocino County.

Ingels would have a study of the need for good highways to develop the state agriculturally and industrially, as well as for the transportation of a new highway is contemplated.

Scenic routes also would be given consideration along with traffic needs in his plan.

A. R. Gallway, Jr., Sacramento real estate operator, has been elected president of the State Reclamation Board. Dan McCormick, Rio Vista, was elected vice president and Carlton Johnson, president of a North Sacramento land concern, was made secretary. John Bronner, Sacramento, is the newly-appointed assistant secretary, succeeding Charles Merry, Sacramento, former newspaper man. The board also elected Maj. A. M. Earton as chief engineer and Stephen W. Downey of Sacramento, attorney.

The transportation bureau of the Amtorg Trading Corporation has announced that it is organizing a group of about 150 railroad men to be sent to Russia to assist in modernizing the Russian railway system. The group, which will comprise engineers, yardmasters, switchmen and signalmen, will be under contract for one year.

ARCHITECTURAL CONTROL URGED TO PREVENT "UGLY" BUILDINGS

Marked advances in city and regional planning work were made through the United States during 1930, says a summary of the year's progress in this field by the Committee on City and Regional Planning of the American Institute of Architects, of which Charles H. Cheney of Los Angeles is chairman.

"While few new plans that might be called great were completed," the Committee declares, "much was accomplished to carry out existing plans, set up new planning agencies, acquire needed public lands, parks, etc., and above all, to establish architectural control and roadside improvement."

"The hope of the country must lie in the more than 800 city and regional planning commissions that now exist. To date there are 28 regional commissions, according to the United States Department of Commerce estimate."

"During the year 94 new cities and counties reported passing zoning ordinances, the greatest number being in New York, New Jersey and California. This brings the total number of cities comprehensively or partially zoned to over 900. The U. S. Chamber of Commerce finds that New York State appears to be in the lead, with 142 cities zoned, and Massachusetts follows for city plans, having 94 city schemes completed."

"With the new census showing approximately 69,000,000 people now living in cities and towns of over 2,500 inhabitants in this country, unemployment relief is largely a city and county problem. As a result, there have therefore been taken by many far-sighted leaders and commissions to speed up programs or readjust them to increase public work during the slack period until the country again gets back to a normal business condition."

"Mayors and city and county officials generally have readjusted their budgets and taken on as many extra men as possible for public improvements, parks, and clean up work. Where public funds are not available, huge amounts are being raised thru private subscription, and turned over to the mayor or park board for employment of men on park work as in New York and elsewhere."

"Good environment is the aim and desire of practically all families in America. It is demanded not only for homes but for working conditions. In such high standards of living, beauty is the key factor. Today real joy of living and pursuit of happiness are demanded with ever louder voice in all parts of the country."

"People can no longer be satisfied with the careless ugliness, banality, and off-color appearance of most of our communities, cities, and regions. There is a rising dissatisfaction, protest, and contempt for city plans and city officials that omit due provision for the essential qualities of beauty, charm and restfulness. The craving for attractiveness of environment lies deep in all of us."

"Production of good environment. The percentage of real architecture and good environment being constructed therefore be the aim of all city planners, architects, builders, realtors, etc. Their problem is to shut off the deluge of ugly, bad buildings. Competent machinery is essential to stop bad design and bad color before they get started, to ensure reasonably good architectural design before a building permit is issued."

"To accomplish this a new form of regulation called 'architectural control' is being established. It is ef-

fectuated by setting up an architectural board to scrutinize and pass upon plans for design with the same care that they are now passed upon for safety, under building codes, by building inspectors. Until such a protective barrier is set up, all city, community, or regional plans, even the best of them, are most likely to be spoiled in the construction stage."

"(Watch your architecture' is thus becoming the slogan of planning agencies."

structed unfortunately does not seem to have materially increased during 1930. No reports have come in to show that building inspectors are having better than the ten to fifteen per cent in number of plans filed with them as noted last year, that will produce good buildings of permanent neighborhood value."

"In other words we are still getting nearly ninety per cent in number of buildings (almost everywhere in the country) so ugly and off color, so badly arranged and inappropriately placed on account of bad street planning, lack of proper zoning, etc., that they form a liability instead of an asset, almost from the day they are completed. This, the most serious and probably greatest economic loss of our time, should be the first problem to solve in the coming decade."

"In 1929 \$5,000,000,000 in value of new buildings went up, and sixty per cent of that amount, or about \$3,000,000,000 in 1930. It is time investors and public awoke to the fact that nearly ninety per cent in number of these buildings of 1930, over \$2,000,000,000 in value, belong to that bad building class which have made our cities so intolerably ugly. There is therefore some consolation for the falling off in volume of building in 1930. Some way must be found to correct the situation before the volume of building materially increases again."

"Without benefit of clergy," as the old saying goes, or rather without the help of a trained architect, or any other competent designer, these buildings have been put up, (and are continuing to be put up) by the careless and thoughtless of the country. And the worst of it is that the much greater blight and loss must be suffered willfully by owners of property unfortunate enough to be in the immediate neighborhood into which these bad buildings intrude themselves."

"That is why architectural control is becoming such an important question in the country. A careful check-up of the plans of all buildings to see that they maintain 'reasonable decency of design' and appropriateness to their surroundings would in a few years reverse these very unfavorable percentages."

Ordinance No. 278 providing an Electrical Code and creating the office of Electrical inspector, was adopted by the Turlock city trustees Jan. 20. Another ordinance, No. 280, adopted by reference, the Building Code of 1930, was drawn up by the Pacific Coast Building Officials' Conference, was introduced for action at the first February council meeting. The new measure repeals all former building ordinances except No. 273, which provides for the compensation of the building inspector.

Airports and landing fields in the United States numbered 1782 at the close of 1930, as reported by the aeronautics branch of the department of commerce. An increase of 125 took place between July 15 and Dec. 31.

BUSINESS OPPORTUNITIES

Names and addresses of persons or firms concerned in the following opportunities will be furnished on request to Business Opportunity Department, Daily Pacific Builder, 647 Mission St., San Francisco or Phone GARfield 8744:

20791—Marble. San Francisco. French exporter of marble, seeks an agent for San Francisco.

20799—Crocker and Chinaware. Laredo, Texas. Wholesale commission company would like to communicate with importers of crockery and chinaware from Japan.

20802—Maschinen. Tel-Aviv, Palestine. Firm wishes to be put in touch with manufacturers of machines for assorting and wrapping oranges.

20805—Contractors' and Builders' Materials. Wabash, Indiana. Party inquires for list of exporters; or exporters' agents, handling contractors' and builders' materials.

T. M. Quinlan, general sales manager, Mayfair Range Oil Burner Co., 339 South Huntington Ave., Boston, Mass., manufacturing oil burners, desires to make contact in San Francisco with distributor, representative or sales organization, calling on jobbers, department and retail stores.

Chas. M. Best, 211 Olive St., Modesto, Calif., is interested in contracting with firms in San Francisco who desire representation in the San Joaquin Valley.

Walter Wilhelm of the Wilhelm Moss Co., Inc., Gowanda, N. Y., desires resident salesman in San Francisco section to handle well known side line on commission, to upholstered furniture manufacturers.

Frank Thomas, president, The San-Cedar Co., Youngstown, Ohio, manufacturing cedar lining for closets is desirous of establishing a distributing agency in the San Francisco Bay District.

H. J. Ayers of Howard J. Ayers & Co., 161 Howard Ave., Boston, Mass., sales representatives, desires to contact with local manufacturers with a view to representation.

MISCELLANEOUS SUPPLIES AND MATERIALS

PORTLAND, Ore.—Until February 4, 10:30 A. M., bids will be received by Multnomah County Commissioners, to furnish one Auto Clave Sterilizer, complete, size 2x18, with pressure recording gauge ready to install, type Castle, American or equal. Certified check or bond 10% payable to Bd. of County Commissioners required with bid. Specifications on file in office of county clerk.

SAN FRANCISCO.—California Metal Enameling Co., Los Angeles, at \$1,876.74 awarded contract by U. S. Forest Service, to furnish and deliver 2,175 metal porcelain enamel road and trail direction and miscellaneous signs.

Following is a complete list of the bidders:

California Metal Enameling Co., Los Angeles, \$1,876.74; 45 days.

Baltimore Enameling and Novelty Co., Baltimore, Md., \$1,763.68; 120 days.

Payne-Mahoney, Oakland, \$2,137.50; 45 days.

Pioneer Enamelled Steel Prod. Co., Seattle, \$2,202.89; 45 days.

"While low bidders time condition was not met."

Building News Section

APARTMENTS

Plans Being Completed.

APARTMENTS Cost, \$7000
OAKLAND, Alameda Co., Cal. NE
Glenview and Woodruff Streets.
One-story frame and stucco duplex (2
4-room apartments).
Owner and Builders—O. E. Jensen,
Premises.

Plans by Harry K. Jensen, 354 Hobart
St., Oakland.

Sub-bids will be taken within a few
days. Hardwood flooring, shingle roof,
stucco interior and exterior, gas fur-
nace, electric refrigeration.

Plans Being Prepared

APARTMENTS Cost, \$40,000
OAKLAND, Alameda Co., Cal. Mer-
ritt and Prospect Sts.
Three-story wood frame apartments
with concrete basement (12 2-rm
and 1-32room apts.)

Owner—A. Visser, 6008 Orchard St.,
El Cerrito.

Plans by L. F. Hyde, 372 Hanover St.,
Oakland.

Sub-Figures Being Taken.

APARTMENTS Cost, \$125,000
SANTA MONICA, Los Angeles Co.,
Cal. Fourth and Broadway.
Four-story Class B apartments.
Owner and Builder—D. S. McEwan.
Architect—Arthur S. Barnes.

Will contain five stores and thirty
apartments, will be equipped with

Bids held under advisement.

Plans Being Figured—Bids Close Feb. 24, 2 P. M.
BOYS' BLDG. Cost, \$—
WHITTIER, Los Angeles Co., Calif.
State School Grounds.
Two-story brick boys' building.
Owner—State of California.
Architect—State Department of Public Works, Division of Architecture, Geo. B. McDougall, state architect, Public Works Bldg., Sacramento.

The building is a two-story brick structure with frame interior construction and tile roof. The total floor area is approximately 8300 sq. ft.

Separate bids will be entertained for the following segregate parts of the work and combinations thereof:
1. General Work, embracing all branches of the construction other than Plumbing, Heating and Electrical.

2. Electrical Work.
3. Plumbing and Heating Work.
4. Complete Mechanical, including Plumbing, Heating and Electrical Work.

Preliminary Plans Approved.
HOSPITAL Cost, \$75,000
SANTA BARBARA, Santa Barbara Co., Cal.

Fireproof hospital (accommodate 72 patients).

Owner—County of Santa Barbara.
Architect—Soule, Murphy & Hastings, 116 E. Sola St., Santa Barbara.
Construction will be started about July 1st.

SANTA MARIA, Santa Barbara Co., Cal.—Until 10 A. M., February 9, bids will be received by the Santa Barbara County Supervisors for additions to and completion of the Santa Maria branch of the Santa Barbara County Hospital. Plans may be obtained at the hospital upon deposit of \$5. D. F. Hunt, county clerk. Work will consist of the addition of an X-ray room and an addition to dining room, remove and replace bracket lights, plaster patching, painting, concrete work, framing, linoleum floor covering, electric wiring and fixtures, etc. All work will be included in one contract.

Plans Being Figured—Bids Close Feb. 17, 2 P. M.

HOSPITAL Cost, \$250,000 (1st unit \$65,000)
COLUSA, Colusa Co., Calif. County Hospital Grounds.

One- and two-story reinforced concrete hospital (1-story wing and 2-story administration building).
Owner—County of Colusa.

Architect—Otto Deichmann, 110 Sutter St., San Francisco.

Only the first unit, having a 24-bed capacity, will be undertaken at this time. The structure, when completed, will have a capacity of 100 beds; \$25 deposit required for plans.

Bids Opened.

HEALTH CENTER Approx. \$10,000
SAN LEANDRO, Alameda Co., Cal. One-story frame and stucco health center.

Owner—City of San Leandro.
Architect—James Narbett, 466 31st St. Richmond.

Following is a complete list of bids:
W. H. Whitehead, San Leandro, \$ 5,600
J. Merriman, San Leandro, 5,703
P. J. Haven, San Leandro, 5,870
L. R. Martin, Oakland, 9,877
C. M. Fraser, 9,947
A. Faria, 10,680
Chester Gossett, Oakland, 11,000
Bids held under advisement.

January 24, 1931

Preparing Plans.
HOSPITAL Cost, \$100,000
LAS VEGAS, Nevada. Twelfth and Stewart Streets.

Two-story reinforced concrete hospital (19x54 feet).

Owner—Las Vegas Hospital (Roy W. Martin), Las Vegas.
Architect—Not Given.

LOS ANGELES, Cal.—Until 2 P. M., Feb. 16, bids will be received by the county supervisors for the lighting fixtures for the new Acute Unit of the Los Angeles General Hospital. Edwin Bergstrom, Myron Hunt, William Richards, Sumner P. Hunt and Pierpont Davis, architects.

SAN FRANCISCO—Board of Public Works rejects bids for electric work in connection with Class A roof ward addition to San Francisco Hospital and new bids will be opened February 4, 2:30 P. M. Rejected bids follow: Alta Electric Co., \$42,895; Superior Electric Co., \$43,200; Michels & Lucas, \$44,850. Plans obtainable from Bureau of Architecture, 2nd floor, City Hall.

SAN FRANCISCO—Until February 9, 3 P. M., under Proposal No. 645, bids will be received by Leonard S. Leavy, City Purchasing Agent, 207 City Hall to furnish and deliver 100 hospital beds for Laguna Honda Home. Specifications obtainable from above.

LOS ANGELES, Cal.—The Los Angeles Board of Supervisors has rescinded the order advertising for terrazzo for the new Acute Unit of the Los Angeles General Hospital. Miss

Mame B. Beatty, clerk of the board, will probably make a further announcement regarding this work within a few days.

Preparing Working Drawings.

HEALTH CENTER Cost, \$800,000
SAN FRANCISCO. Polk and Grove Streets.

Four-story and basement reinforced concrete class A health center emergency hospital and office (granite facing).

Owner—City and County of San Francisco.

Architect—S. Heiman, 57 Post St.

Plans will be completed in about 3 months. The structure will be financed through the \$3,000,000 bond issue voted for health buildings throughout the city. The present two-story Emergency Hospital will be used in the construction of the new building and additional property will be purchased for the new structure.

HOTELS

Preparing Plans.

HOTEL Cost, \$200,000
POMONA, Los Angeles Co., Cal. San Jose Hills (15-acre Site).

Two and three-story steel frame and reinforced concrete hotel (100 rooms).

Owner—California Realty Investment Corp., 615 Broadway Arcade Bldg. Los Angeles.

Architect—William Mooser Co., Santa Barbara and Nevada Bank Bldg., San Francisco.

Reinforced concrete walls and floor and roof slabs, stucco exterior, clay tile roofing, ornamental iron work, carpeted floors, tile bathrooms, elevator, steam heat, refrigeration system, pipe organ.

Low Bidder.

REMODELING Cost, \$20,000
MODESTO, Stanislaus Co., Cal. Remodel hotel (enlarge floor, new furnishings, etc.).

Owner—Henry Crow, Modesto Hotel, Modesto.

Architect—Davis-Pearce Co., Grant and Weber Sts., Stockton.

Low Bidder—Fred J. Westlund, 525 40th St., Oakland.

Complete list of bids will be published shortly.

POWER PLANTS

HERNDON, Fresno Co., Cal.—Construction has been started on field of-

fices, warehouses and miscellaneous minor construction, preliminary to starting construction on the proposed 70,000-horsepower steam electric plant to be erected by the San Joaquin Light and Power Corporation on the San Joaquin river near Herndon. H. K. Fox, construction engineer on the project, estimates the project will involve an expenditure of \$4,610,000 and is a unit of the expansion program of the company for the year 1931.

DALLAS, Ore.—Willamette Valley Lumber Co., plans early construction of a \$70,000 electric light plant, doubling the capacity of the present plant, it is announced by Eric Fulgham, assistant plant manager.

LAS VEGAS, Nevada—Construction of a \$250,000 power substation at the site of the Hoover Dam will be started by the Southern Sierras Power Co. within the next few weeks. Construction on the power line has passed Daggett and must be completed ready for service by June 25. E. J. Waugh of Riverside is construction engineer for the power company.

SEATTLE, Wash.—J. D. Ross, superintendent of Municipal Bureau of Lighting, has completed specifications and bids will be asked at once by the Board of Public Works to furnish approximately \$40,000 worth of submersible subway transformers. The equipment includes: 24 100-kva., single phase, 60 cycle, 4320/125-250 volt, submersible subway transformers; 36 150-kva., single phase, 60 cycle, 4320/125/250 volt submersible subway transformers and 252 cable external reactors, rated at 1200 amp. 60-cycle, 1.44 kva. 1.2 volts. G. W. Roberge is secretary of the Board of Public Works.

SAN FRANCISCO—Until February 3, 10 A. M., under Schedule No. 928-31-196, bids will be received by Quartermaster Supply Officer, General Depot, Fort Mason, to furnish and deliver f.o.b. Army Base, Brooklyn, N. Y., or f.o.b. Fort Mason, San Francisco, one turbine, of the following specifications:

Steam Turbine—Turbine to be multi-stage type and furnished with two bearings and to operate at a speed not to exceed 3600 R.P.M. Water rate when operating with steam conditions of steam pressure 200 lbs. gauge at boiler, Superheater 78 deg. F. and 2% in. vacuum. Will not exceed at 75 K. W. 26.4 lbs. per K.W. hour. Will not exceed at 112 K. W. 25.6 lbs. per K. W. H. Will not exceed at 150 K. W.

ORNAMENTAL WIRE AND IRON WORK

IRON
WIRE

Fence and Gates

TENNIS COURT ENCLOSURES
WIRE SCREENS AND GUARDS

WEST COAST WIRE & IRON WORKS

SAN FRANCISCO, CALIFORNIA

86-863 Howard Street * * * 'Phone Sutter 1136

Continuous Operation Since 1887

21.2 lbs. per K. W. hour. Will not exceed at 187 K. W. 23.4 lbs. per K. W. hour. The wheel casing, diaphragm bearing lining and packing boxes to be split horizontally for convenient inspection. Steam connection will be attached to lower half of casing, exhaust connection will be at bottom of casing and pass through bed plate. Turbine shaft to be of nickel steel and wheel disks steel forgings with buckets securely attached by means of dove tails, the revolving and stationary buckets shall be of corrosion resisting material. An oil operated governor is to be provided having its own oil pump and which will give good regulation. The gears will be single reduction herringbone type and balanced for axial thrust, the pinion will be a solid steel forging integral with the shaft, and made of carbon steel properly heat treated to obtain characteristics that insure long life. The low speed gear wheel will be of solid type and mounted on shaft, teeth to be involute type.

The gears will be entirely enclosed in a rigid semi-steel casing which will conform to the contour of gears. The casing will be split in two halves, on the horizontal center line of the gears. The joint between the two halves will be made tight without gaskets by an improve dapping process which will prevent the escape of oil vapor.

Generator—The generator will be designed for 150 K. W., at 120 volts and speed not to exceed 1200 R.P.M. and furnished with field rheostat.

General—The turbine, gears and generator shall all be mounted on heavy and rigid cast iron base, total length 11-ft., 6-in.; width 4-ft. To be equal and similar to those manufactured by the General Electric Co.

FRESNO, Fresno Co., Cal.—San Joaquin Light & Power Corporation's budget for 1931 provides \$6,248,312 for new construction according to A. Emory Wishon, president of the concern. Among the major items of new construction is the beginning of work this week on the new steam electric generating plant at Herndon, on the San Joaquin River. A substation, costing \$1,375,000, will be installed in connection with the plant, feeding heavy voltage transmission lines running north to Wilson substation, near Merced, and south to the Corcoran substation. Service in the territory west of Fresno is to be improved by a new transmission line from Madera substation to Biola substation, improvements aggregating \$500,000, will be made at the California Avenue substation, south of Fresno, Corcoran and Legrande substations, Sanger and Ashland substations and the Famosa substation will be rebuilt. Improvements in distribution lines in all districts, to take care of growing power loads, will cost \$417,000, while new business requirements in line extensions and betterments are estimated to cost \$1,705,830. Improvements in the San Joaquin Company's natural gas system will cost \$965,000, of which \$670,000 represents cost of the main now being laid from Fresno to Merced, bringing natural gas to the latter city. The balance of the appropriation will pay for extensions and betterments in Fresno, Bakersfield, Sanger, Selma and Fowler.

SEATTLE, Wash.—Until February 5 new bids will be received by G. W. Roberge, secretary, Board of Public Works, to furnish 736 miles of wire for the Diablo-Seattle transmission line. Estimated cost \$800,000. Bids previously received on this work were rejected. Specifications obtainable from secretary.

SAN FRANCISCO.—Until Feb. 13, 11 A. M., bids will be received by the Regents of the University of California, Berkeley, for the distribution system for electricity and steam and air on the San Francisco campus of the University of California, Parnassus and Third Avenues. Plans obtainable from Cashier's Window, California Hall, University of California, Berkeley, on deposit of \$50, returnable.

 to George Woolf, 795 Alcatraz Ave.,
 Oakland.

UKIAH, Mendocino Co., Cal.—Until
 February 18, 8 P. M., new bids will be
 received by Fred L. Bosworth, city
 clerk, to furnish:
 Two 2,500-cu. ft. riveted gas tanks
 6-ft. dia. by 30-ft. long, 3/8-inch shell,
 1/2- and 5/8-inch heads. Equipped with
 one 1 1/2x5 manhole in head, three 2-
 inch forged steel flanges, one 1/2-in.
 dial pressure gauge, designed for 90-
 lb. per sq. inch working pressure and
 built in accordance with A.S.M.E. Code
 for Unfired Pressure Vessels, i.e., b.
 cars, Ukiah; 90 days delivery.
 Certified check 10% payable to city
 required with bid. Further informa-
 tion obtainable from city clerk.

Engineering News Section

BRIDGES

SONOMA COUNTY, Cal.—Until February 18, 12 p. m., bids will be received by State Highway Commission to construct timber bridge across Mark West Creek about 4.5 miles north of Santa Rosa, consisting of six 19-ft. spans and two 16-ft. 10-in. spans, surfaced with Portland cement concrete, on pile bents and grading and paving approaches with Portland cement concrete pavement.

SANTA ANA, Orange Co., Cal.—Until February 9, 7:30 p. m., bids will be received by city council to construct reinforced concrete grade separation structure under tracks of the Southern Pacific Railway and the Santa Fe Railway at 14th St.; estimated cost, \$150,000. Project involves: (a) 22,400 cu. yds. excavation; (b) 168 ft. false work under railway track; (c) 1,557 cu. yds. concrete; 1:3-6 mix; (d) 370 cu. yds. concrete; 1:2-3 mix; (e) 1,205 cu. yds. concrete; 1:2-3 mix; (f) 49 cu. yds. concrete; 1:1½-3 mix; (g) 202,700 lbs. reinforcing steel; (h) 307,700 lbs. structural steel; (i) Pumping plant; (j) 12 No. 400-D Marbelite standards. Plans obtainable from C. L. Jenken, city engineer.

STOCKTON, San Joaquin Co., Cal.—As previously reported, bids will be received February 9, 11 a. m., by Eugene D. Graham, county clerk, to construct subway near Forrest Lake on the Lower Sacramento road in Road District No. 2 under the tracks of the Southern Pacific Railroad; estimated cost \$26,000. Railroad is to pay a portion of the cost. Project involves:

- (a) 536 cu. yds. excavation (earth unclassified).
- (b) 30 cu. yds. old concrete to be removed.
- (c) 227 cu. yds. reinforced concrete (1:1½-3).
- (d) 315 cu. yds. mass concrete
- (e) 70 cu. yds. deck concrete.
- (f) 70 lin. ft. concrete handrail.
- (g) 44,000 lbs. reinforced steel.
- (h) Drainage equipment.
- (i) Lighting and wiring.

Certified check, 10 per cent payable to Chairman of the Board of Supervisors required with bid. Plans obtainable from County Surveyor Julius Manthey on payment of \$15 deposit.

SAN JOSE, Santa Clara Co., Cal.—County Supervisors of Santa Clara and San Mateo Counties are planning joint construction of a new and wider bridge on the Middlefield road connecting the two counties. Robert Chandler is Santa Clara County Surveyor.

OAKLAND, Cal.—Until January 26 4:30 P. M. bids will be received by G. B. Hegardt secretary City Port Commission 424 Oakland Bank Bldg. to construct pile and timber trestle and power line to support pontoon dredge pipe in connection with dredging of Outer Harbor. Will be approximately 1000 ft. in length. Plans obtainable from above office.

SANTA CRUZ, Santa Cruz Co., Cal.—Until February 7, bids will be received by county supervisors to construct underpass at Chittenden. Details will be published shortly. Plans obtainable from Lloyd Bowman, county surveyor.

SANTA CRUZ, Santa Cruz Co., Cal.—C. C. Gildersleeve, 1508 G St., Napa, at \$33,853 awarded contract by county supervisors to construct steel bridge with concrete floor over the Southern Pacific tracks near Felton Station, Zayante creek and Zayante road in the San Lorenzo Road Dist. Complete list of unit bids received on this project published in our issue of January 13.

- SANTA CRUZ, Santa Cruz Co., Cal.**—As previously reported, bids will be received February 7, 11:15 A. M., by H. E. Miller, county clerk, to construct Chittenden Underpass in Pajaro Road District. Project involves:
- (1) 28,500 cu. yds. roadway excavation without classification;
 - (2) 800 cu. yds. structure excavation without classification;
 - (3) 8,800 sq. yds. subgrade;
 - (4) 1,425 cu. yds. Class "A" concrete pavement, in place;
 - (5) 10 cu. yds. Class "A" concrete structures, in place;
 - (6) 7 cu. yds. Class "A" concrete sidewalk, in place;
 - (7) 1,740 cu. yds. Class "B" concrete abutments, in place;
 - (8) 6,900 lbs. reinforcing steel, in place;
 - (9) 166 lin. ft. corrugated Metal culverts, 12" in dia., in place;
 - (10) 150 lin. ft. corrugated metal culverts, 18" in dia., in place;
 - (11) 516 lin. ft. corrugated metal culverts, 24" in dia., in place.
- Certified check 10% required with bid. Plans obtainable from County Surveyor Lloyd Bowman, on deposit of \$5, returnable.

LOS ANGELES COUNTY, Calif.—Following bids received Jan. 28 by State Highway Commission for the following bridge work in Los Angeles County:

Bridge over Topanga Creek, about 4 miles north of Santa Monica, to be widened by constructing eight 27-foot timber spans on pile bents adjoining the existing concrete bridge and grading and surfacing approaches with asphalt concrete.

Bridge over Las Flores Creek about 7 miles north of Santa Monica to be widened by constructing two 26-foot reinforced concrete girder spans on a concrete pier and concrete abutments and grading and surfacing approaches with asphalt concrete. Ouel Truck Co., Inc., Tompkins, \$27,369
F. A. Wellers, San Diego, 28,516
P. M. White, Santa Monica, 31,524
Obers Bros., Los Angeles, 32,790
Sidney Smith, Los Angeles, 33,796

SAN FRANCISCO—Bureau of Engineering, Department of Public Works 3rd floor City Hall, is conferring with State Harbor Commission, regarding construction of proposed Third Street Bridge over Islais Channel to replace the present bridge. The project will include dredging and widening the channel at a cost of \$550,000. The

State Harbor Commission will contribute approximately \$150,000 of the total cost, the balance to be paid by the city.

OAKLAND, Cal.—J. F. Knapp, Financial Center Bldg., Oakland, awarded contract by Southern Pacific R. R. to construct Seventh Street subway on a bid of \$123,462 desires sub-bids in connection with the project. Bids are wanted for sewer construction, pile driving, concrete, waterproofing and reinforcing steel. Subway will be 755-ft. in length. Level portion of subway will be 167-ft. long; roadway 23-ft. wide with 6-ft. pedestrian walks on north side. Ventilating system similar to the one now in use in the Geo. A. Posey tube of Alameda County will be installed.

SONOMA COUNTY, Calif.—As previously reported bids will be received Feb. 18 by State Highway Commission to construct timber bridge across Mark West Creek about 4.5 miles north of Santa Rosa, consisting of six 19-foot spans and two 16-foot 10-inch spans, surfaced with Portland cement concrete, on pile bents and grading and paving approaches with Portland cement concrete pavement. Project involves:

- (1) 1770 cu. yds. rdwy. excav., without class.;
- (2) 220 tons crushed gravel or stone (detour surface);
- (3) 36 bids, heavy fuel oil;
- (4) 1 only, detour bridge complete;
- (5) 1 only, existing bridge to be removed;
- (6) 720 sq. yds. existing pavement to be removed;
- (7) 2900 lin. ft. furnish redwood piles, including test piles;
- (8) 74 each, drive redwood piles, including test piles;
- (9) 42 M. ft. b.m. redwood timber, dense, select all-heart struc. grade;
- (10) 23 M. ft. b.m. redwood timber, select, all-heart struc. grade;
- (11) 890 sq. yds. subgrade for pave.;
- (12) 283 cu. yds. class A Portland cement concrete (pave.);
- (13) 17,500 lbs. reinf. steel;
- (14) 1 lot, misc. items of work.

OAKLAND, Cal.—J. F. Knapp, Financial Center Bldg., Oakland, at \$123,465 awarded contract by Southern Pacific Railroad to construct Seventh Street Subway of which the City of Oakland is to pay one-half the cost. Following are four low bidders:

J. F. Knapp, \$123,465
E. T. Lesure, 131,500
W. H. Hauser, 132,515
Hutchinson Co., 139,310

Subway will have a grade of 4% in east approach and 5% in west. Complete length will be 755 ft. Level portion of subway will be 167 ft. long; roadway 23 ft. wide with 6 ft. pedestrian walks on north side. Ventilating system similar to one now in use in the Geo. A. Posey Tube of Alameda County will be installed.

STOCKTON, San Joaquin Co., Cal.—Until February 10, 10 A. M., bids will be received by Eugene D. Graham, county clerk, to construct two bridges on Farmington-Bellota Road in Road District No. 1.

Certified check 10% payable to Chairman of the Board of Supervisors

required with bid. Plans on file in office of clerk. Julius Manthey, county surveyor.

DREDGING, HARBOR WORKS & EXCAVATIONS

EUREKA, Humboldt Co., Calif.—Longview Dredging and Construction Co., Longview, Wash., submitted low bid to the U. S. Engineer Office, Customhouse, San Francisco, for dredging in Humboldt Bay. Project involves 525,420 cubic yards.

Bidders and unit figures follow:

Longview Dredging and Construction Co.	32.25
San Francisco Bridge Co.	32.7
Hydredging Co.	37.00
Engineer estimate	34.23

All bids held under advisement.

RICHMOND, Contra Costa Co., Cal.—Olympian Dredging Co., 249 First St., San Francisco, at \$9,150.58 awarded contract by U. S. Engineer Office, San Francisco, for dredging 94,340 cu yds. material in Richmond Harbor.

RICHMOND, Contra Costa Co., Cal.—American Dredging Co., 255 California St., San Francisco, at 31c cu yd. awarded contract by U. S. Engineer Office, San Francisco, for dredging 195,000 cu yds. sand and fill in Richmond Harbor.

OAKLAND, Cal.—Following bids taken under advisement by City Port Commission to construct 1000 feet of trestle and power line to carry pontoon dredge pipe in connection with dredging Outer Harbor Channel: (a) pile, per lin. ft.; (b) lumber, per M.B.M.; (c) creosoted pile, per lin. ft.; (d) per pile:

Duncanson-Harrelson Co., DeYoung Bldg., S. F., (a) \$0.245; (b) \$64; (c) \$0.64; (d) \$6.70. (awarded contract).
Clinton-Stephenson Constr. Co., Ltd. Menadnock Bldg., S. F., (a) \$0.2775; (d) \$63.69; (c) \$0.74; (b) \$10.10.
E. B. McGowan, 174 New Montgomery St., S. F., (a) \$0.34; (b) \$65; (c) \$0.72; (d) \$12.

A. W. Kitchen, 110 Market St., S. F., (a) \$0.27; (b) \$48; (c) \$0.69; (d) \$6.
Healy-Thibbitts Constr. Co., 64 Pine St., S. F., (a) \$0.28; (b) \$48; (c) \$0.65; (d) \$7.

EUREKA, Humboldt Co., Calif.—Longview Dredging Co., Longview, Wash., at 32.25c cu yd. awarded contract by U. S. Engineer Office, Customhouse, San Francisco, for dredging in Humboldt Bay, involving 525,420 cu yds. Complete list of unit bids published in issue of January 23.

IRRIGATION PROJECTS

TURLOCK, Stanislaus Co., Calif.—Following contracts awarded by Turlock Irrigation District in connection with construction in Improvement District Nos. 53, 34, 35, 10, 82, 66, 34-28 Joint Spillway and Chatom Spillway, the work being divided into eight schedules and amounting in total to about 652,671 sq. ft. of 2-inch thick concrete canal lining and 473 cu yds. of concrete in canal structures and about 660 lin. ft. of 30-in. and 330 ft. of 36-in. dia. concrete pipe.

Alldrin & Anderson, Turlock, awarded work totalling \$25,744.44 and including: schedule 1 and 1 A, which is the McVey ditch, known as Improvement District No. 58; schedule 3, the Hedman ditch known as Improvement District No. 33; and schedule 4, the Casey-Hedman joint spillway, which is part of Improvement District No. 34.

Ed. Erickson, Turlock, awarded schedules 2 and 5, including the Casey ditch and the Chatom spillway, re-

spectively. Contracts total \$26,073.82.

Lloyd W. Terrell, Turlock, awarded contracts for work in schedules 5 and 8, including Improvement District No. 10, the Emminger ditch; and Improvement District No. 66, the Edwards ditch. Award of contract on schedule 7 is pending but it is expected that this will also be awarded to Terrell. The three schedules will amount to \$16,397.44.

STREET LIGHTING SYSTEMS

EUREKA, Humboldt Co., Cal.—City Council declares intention (233) to install cast iron lighting standards, to gother with underground system, in Fourth St. from Broadway to J St. Estimated cost \$15,000. 1911 Act, Bond Act 1915. Hearing February 3. A. Walter Kildale, city clerk. E. D. Gardner, city engineer.

ALAMEDA, Alameda Co., Cal.—Board of Public Utilities in a report to the city council estimates a cost of underground wiring system in connection with street lighting in Webster St. between the segregation line and Central Ave., at \$83,565. The cost of 48 2-lamp electrolights matching those on the Posey Tube approach is placed at \$18,062, which would require an assessment of \$3.92 per front foot for property affected by the improvement. Taken under advisement.

LOS ANGELES, Cal.—Walker-Martin Corp., Ltd., 1241 E. Florence Ave., at \$31,462 awarded contract by Board of Public Works to install ornamental street lighting system in Magnolia Blvd. bet. Cahuenga Blvd. and Tujunga Ave.

GLENDALE, Los Angeles Co., Cal.—The Glendale city council has under consideration a proposal to illuminate Brand Blvd. by use of flood lights instead of an electrolight system as planned by the Brand Boulevard Advisory Committee. Estimates of cost etc. have been furnished by Otto K. Olsen Illuminating Co. of Los Angeles. The approximate cost of flood lighting would be about \$125,000.

MACHINERY AND EQUIPMENT

AUBURN, Placer Co., Calif.—Until February 3, 10 A. M., bids will be received by A. S. Fleming, county clerk, to furnish one Caterpillar Thirty Tractor. Specifications on file in office of the clerk or obtainable from Supervisor of District No. 1.

DELANO, Kern Co., Calif.—Until February 6, 7 P. M., bids will be received by G. A. Swanson, clerk, Delano Union Grammar School District, to furnish and deliver one school etc. of at least 25-hp., with seating capacity of not less than 48 grammar school pupils. Certified check or bidder's bond 10% payable to clerk required with bid. Specifications obtainable from clerk.

SANTA ANA, Orange Co., Calif.—County purchasing agent authorized by supervisors to purchase one 3-ton truck for county road department.

WANTED

TO PURCHASE used Linn Truck Truk. Lidlal-Wiley, Inc., 208 Columbia St., Seattle Washington.

STOCKTON, San Joaquin Co., Cal.—Bids will be asked shortly by city council to furnish motor equipment for various municipal departments.

The automobiles to be purchased and the maximum amount budgeted for each are as follows: One three-window coupe, four- or six-cylinder, \$772; two four-door sedans, four- or six-cylinder, \$872; and two one and one-half-ton trucks, four- or six-cylinder of at least 150-inch wheelbase, \$825. The vehicles to be sold are one 1927 Chevrolet touring, one 1928 Chrysler coupe, one 1927 Studebaker-Erskine and two 1924 Chevrolet trucks.

SAN JOSE, Santa Clara Co., Cal.—Bids will be asked at once by city council to furnish four 1½-ton motor trucks for use of street department to replace horse-drawn trucks now in use. John J. Lynch, city clerk. Wm. Fopp, city engineer.

SAN FRANCISCO—Until Feb. 17, 2 P. M., bids will be received by Superintendent of Lighthouses, to furnish and install the principal machinery for the Tender of the Linden class. Specifications obtainable from above office, Customhouse, San Francisco.

RAILROADS

SAN FRANCISCO—Chief Engineer Frank G. White, State Harbor Commission, Ferry Bldg., is making surveys to extend Belt Line Railroad into the industrial area south of the Islais Channel.

LOS BANOS, Merced Co., Cal.—Until February 18, 8 P. M., bids will be received by V. G. Bryant, city clerk, to furnish one "pick-up" truck fully equipped; cost not to exceed \$750, for use of Municipal Water Department. Allowance to be made for truck no longer required by city.

SOUTH SAN FRANCISCO, San Mateo Co., Cal.—City council rejects bids to furnish and install safety signal installations at Grand Ave. and the Bayshore Highway. A change in specifications prompted the action. New bids will be asked.

STOCKTON, San Joaquin Co., Cal.—Examiners of the Interstate Commerce Commission have recommended that the application of the Southern Pacific Railroad for authority to construct 3.7 miles of road from a point near the westerly limits of Stockton, across the Boggs tract crossing the San Joaquin river to Rough and Ready Island, crossing the island to a point on the east bank of the Eurns cutoff, be denied. They also recommended that the Western Pacific and Santa Fe systems be authorized to jointly construct a line across Boggs Tract and Rough and Ready Island.

SAN FRANCISCO—Western Pacific R. R., Mills Bldg., through its subsidiary, the Western-Pacific California Railroad, has been authorized by the Interstate Commerce Commission to construct railroads in San Francisco, San Mateo and Alameda counties.

About 39 miles of construction will be involved, and in addition the Western Pacific was authorized to acquire a one-third interest in the so-called Quint street line in San Francisco.

The estimated construction costs are divided into two parts, the first embracing the line from San Francisco to Redwood City, and the second embracing the line from Redwood City to Niles, including a bridge across the southern end of San Francisco bay.

The cost of the first part is estimated at \$4,167,736, the second part is estimated at \$3,829,567.

FIRE ALARM SYSTEMS

SACRAMENTO, Calif.—Police Department suggests to City Manager Jas. Dean the installation of experimental electric traffic signals at school crossing near the Sutter Junior High School.

RESERVOIRS AND DAMS

HEALDSBURG, Sonoma Co., Cal.—City rejects bids to enlarge water reservoir and the work will be done by force account under the supervision of the city engineer, J. Galbraith bid \$2,300, and W. L. Proctor, \$3,554.

BOULDER CITY, Nevada—Contractors who have secured from the Chief Engineer of the Bureau of Reclamation at Denver, Colo., plans and specifications of the Hoover Dam, for which bids are to be opened at Denver on March 4 at 10 A. M., are:

Lynn S. Atkinson, Jr., Edwards & Wilder Bldg., Los Angeles, and 1935 Rpsset Ave., Oakland.

Fisher, Ross, McDonald & Kahn, 1204 Spring Arcade Bldg., Los Angeles.

Merritt-Chapman & Scott Corp., P. O. Box 698, San Pedro, Calif.

Utah Construction Co., Phelan Bldg., San Francisco.

W. A. Bechtel Co., 155 Sansome St., San Francisco.

Kaiser Paving Co., Latham Square Bldg., Oakland.

Winston Bros., 520 Alaska Bldg., Seattle, and Minneapolis, Minn.

General Constr. Co., 552 Colman Bldg., Seattle, Wash.

Bates, Rogers & Foley, St Paul, Minn.

Drundel Corp., Baltimore, Md.

The Carleton Co., New York, N. Y.

The Foundation Co., New York, N. Y.

Hydraulic Engineering Co., Chicago, Illinois.

T. E. Connolly, 461 Market St., San Francisco.

Mittry Bros. Constr. Co., Detweiler Bldg., Los Angeles.

Bent Bros., 418 S. Pecan, Los Angeles.

The Arundell Corp., pier 2, Pratt St., Baltimore.

Mason & Hanger Co., 52 Vanderbilt Ave., New York City.

Underpinning & Foundation Co., Inc., 342 Madison Ave., New York City.

R. S. Morrow & Son, Omaha, Neb.

Joseph Miele Constr. Co., 2261 Millburn Ave., Maplewood, N. J.

Ward Engineering Co., 215 Montgomery St., San Francisco.

Robert E. McKee, 1900 Texas St., El Paso, Texas.

States Corp., 38 S. Dearborn St., Chicago.

Paul J. Moranti, Inc., 115 Broad St., New York City.

Allied Engineers, Inc., 20 Pine St., New York City.

W. S. Lee Engineering Corp., Power Bldg., Charlotte, N. C.

A. Phelps & Son, 6319 Michigan Ave., Detroit, Mich.

Spencer, White & Prentiss, Inc., 10 E. 40th St., New York City.

Booth & Flinn Co., 1942 Forbes St., Pittsburgh, Pa.

Parker & Graham, Inc., R. F. D. 2, Slatton, Pa.

The Carleton Co., Inc., Broadway and 42nd St., New York City.

Harrison-Wright Co., Charlotte, N. C.

American Foundation, Inc., Mill St., between 2nd and 3rd Sts., Cincinnati, Ohio.

IRVINE, Orange Co., Cal.—Plans for \$750,000 storage dam in Santiago Canyon to be built by the Irvine Co. and the John T. Carpenter Water Co. and the Serrano Water Co., have been approved by the State Engineer. A meeting of the boards of the companies will be held on February 2 when a date for bids will probably be set. This dam, which will be 125 ft. in height, will be located at what is known as the "fourth crossing" above the Orange County Park. A Kemppe, Hobart Bldg., San Francisco, prepared the plans.

PIPE LINES, WELLS, ETC.

TURLOCK, Stanislaus Co., Calif.—Until February 17, 7:30 P. M., bids will be received by A. P. Ferguson, city clerk, to construct water well. Cert. check 10% payable to clerk required with bid. Specifications on file in office of clerk at 108 North Broadway.

LOS ANGELES, Cal.—Lacy Manufacturing Co., Washington Bldg., submitted low bid to city purchasing agent for dipping riveted steel water pipe as follows:

(1) 2520 ft. 48-in. x $\frac{3}{4}$ -in.

(2) 2620 ft. 45-in. x $\frac{3}{4}$ -in.

(3) 2941 ft. 42-in. x $\frac{3}{4}$ -in.

The bids were:

Santa Fe Pipe & Supply Co.—(1)—, (2) 35c, (3) 30c; 2% 30 days after date of invoice.

Western Pipe & Steel Co.—(1) Petrolastic 47c, McEverlast 68c, (2) 45c and 65c, (3) 42c and 62c; net

Consolidated Steel Corp.—(1) 35c, (2) 34c, (3) 33c; net.

Kelly Pipe Co.—(1) 50c, (2) 50c, (3) 50c; net.

Lacy Mfg. Co.—(1) 27c, (2) 27c, (3) 27c; net.

OAKLAND, Cal.—Pacific Coast Engineering Co., foot of 14th St., Oakland, at \$4500 awarded contract by City Port Commission to furnish and deliver fifteen 45-ft. lengths of 20-in. welded steel dredge pipe.

HUNTINGTON BEACH, Orange Co., Cal.—Bids for furnishing of approximately 50,000 tons of steel pipe to be used in the construction of a natural gas pipe line from Long Beach to Kettleman Hills, are being taken by the Southern California Edison Co. and the Pacific Lighting Co., joint builders of the line. This pipe line will be approximately 225 miles in length and work is scheduled to start about April 1. The total estimated cost is \$8,000,000.

OAKLAND, Cal.—Until February 2, 4:30 P. M., bids will be received by C. B. Hegardt, secretary, City Port Commission, 424 Oakland Bank Bldg.,

to furnish and deliver 4,000 feet of 20-in. steel dredge pipe. Specifications obtainable from above.

SEWERS AND SEWAGE DISPOSAL PLANTS

OAKLAND, Cal.—Until February 5, 12 noon, bids will be received by F. C. Merritt, city clerk, to construct sewer with appurtenances in Grove Street between 35th and 37th Streets. Bond of one-fourth of the contract price will be required of successful bidder. Plans on file in office of clerk. Walter N. Frickstad, city engineer.

SAN FRANCISCO.—Board of Public Works has requested the supervisors to adopt an ordinance authorizing the calling of bids to construct sewers in the Golden Gate Heights district, under Contract No. 1. Plans for the work are being completed by the Bureau of Engineering, 3rd floor, City Hall.

OAKLAND, Cal.—Louis J. Cohn, 1 De Haro St., San Francisco, at \$5,283 awarded contract by city council to construct storm sewer with appurtenances in Grove Street between 26th and 28th Streets. Complete list of unit bids received on this project published in issue of January 23.

SPARKS, Nev.—C. C. Taylor, city engineer, has completed plans to install sewage line extension into the west city limits to serve the "Coney Island" district. Estimated cost, \$15,000.

OAKLAND, Cal.—Oakland Sewer Const. Co., 10,003 82nd Ave., Oakland, at \$15,288 awarded contract by city council to construct storm sewers with appurtenances in 29th Street bet. E 12th St. and the U. S. Tidal Canal, to be financed from the General Fund. A complete list of the unit bids received on this project published in issue of January 23.

LOS ANGELES, Cal.—City council has voted to submit to voters either in May or June of this year the \$6,000,000 sewer bond issue which was defeated last year.

LAS VEGAS, Nevada—Butterfield Construction Co., San Diego, at \$4285 submitted low bid to U. S. Bureau of Reclamation to construct water tank foundation in connection with Boulder City water system. Pat Cline, Inc., second low bidder at \$4387.50.

SAN FRANCISCO.—Bureau of Engineering, Department of Public Works, 3rd floor, City Hall, preparing plans for reinforced concrete sewer across Sunset Blvd. at Lincoln Way. Project will be financed from the Blvd. Fund, Bond Issue of 1927.

CONTRACTORS' MACHINE WORKS

SPECIALISTS ON REPAIRING AND REBUILDING OF

Bunkers, Hoppers, Chuting, Conveyors, Rollers, Mixers, Hoists, Shovels, Tractors, Pavers, Crushers, Drag Lines, Elevators, Car Unloaders, and other Road and Building Equipments;

BLACKSMITHING AND WELDING

Builders of Rosenberg Portable Car Unloaders

CREAR & BATES

57 Zoe St., bet. 3rd and 4th, off Brannan St.

Phone GAfield 4374

San Francisco

OAKLAND, Cal.—Until February 5, 12 noon, bids will be received by Frank C. Merritt, city clerk, to construct sewer in south half of Sixth St. from Castro street easterly, involving:

- (a) 15 in. dia. 8-in. pipe sewer;
- (b) 1 12-in. manhole;
- (c) 1 8-in. manhole;
- (d) 3 wye branches.

Certified check, 10 per cent payable to city required with bid. Plans on file in office of clerk. Walter N. Erickland, city engineer.

SAN MATEO, San Mateo Co., Cal.—City Manager E. P. Wilsey authorized to make an agreement with Burns-McDonnell-Smith Engineering Co., 1031 S Broadway, Los Angeles, to make surveys for a joint sewage disposal system for San Mateo, Burlingame and Hillsborough. Under a tentative agreement the council suggested such a survey at a cost of \$2,500, San Mateo and Burlingame to pay \$1,000 each, and the town of Hillsborough, \$500.

TULARE, Tulare Co., Calif.—Until February 4, 7:30 P. M., bids will be received by R. M. Berryhill, city manager, to furnish:

2,500 ft. of 18-in. hydraulic concrete sewer pipe. Specifications obtainable from above.

BERKELEY, Alameda Co., Cal.—J. T. Clinch, 669 9th St., Richmond, at \$103.90 awarded contract by city council to construct storm sewer in west side of Garfield School grounds from Hopkins St. southerly. Following is a complete list of bids received:

- (a) 545 lin. ft. 15-in. vitrified pipe;
 - (b) 5 lin. ft. 10-in. do;
 - (c) 20 lin. ft. box culverts;
 - (d) 1 manhole;
 - (e) 2 cu. yds. class "B" concrete.
- J. T. Clinch (a) \$1.68; (b) \$.90; (c) \$2.34; (d) \$39; (e) \$14.00—\$103.90.
Lee J. Immel (a) \$1.75; (b) \$1.50; (c) \$.22; (d) \$.25; (e) \$10—\$104.25.
H. Sneed (a) \$1.70; (b) \$1.50; (c) \$2.50; (d) \$.50; (e) \$12—\$109.
L. J. Gage (a) \$2.95; (b) \$.22; (c) \$.50; (d) \$.65; (e) \$.25—\$102.75.

Oakland Sewer Construction Co. (a) \$1.91; (b) \$.90; (c) \$.61; (d) \$.40; (e) \$12.50—\$123.45.

M. Murphy (a) \$2.40; (b) \$1.50; (c) \$.50; (d) \$.50; (e) \$12—\$150.

T. B. Courtright bid \$128.

SAN JOSE, Santa Clara Co., Cal.—San Jose Paving Co., San Carlos and Dupont Sts., San Jose, at \$445.65 awarded contract by city council (\$275) to improve portions of 15th St., bet. Vestal Ave. and Rosa St., involving 6-in. sanitary sewer, one c. 1 flushing inlet, 5x6-in. wye branches, 4-in. vitrified sewer lateral connection.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be re-
ceived at the office of the State High-
way Engineer, Public Works Building,
Sacramento, California, until 2 o'clock
P. M. on February 18, 1931, at which
time they will be publicly opened and
read, for construction in accordance
with the specifications therefor to
which special reference is made, of
portions of State Highway, as follows:
Sonoma County, a timber bridge
across Mark West Creek about 4.5
miles north of Santa Rosa (IV-Son-1-
B), consisting of six 16' 0" spans and
two 16' 10" spans, surfaced with Port-
land cement concrete, on pile bents
and grading and paving approaches
with Portland cement concrete pave-
ment.

San Joaquin County, between Stock-
ton and one-half mile north of Hous-
ton School (X-S-J-1-C-D), about seven
and seven-tenths (7.7) miles in length,
to be graded and paved with Port-
land cement concrete.

Proposal forms will be issued only

those Contractors who have furnished a verified statement of experience and financial condition in accordance with the provisions of Chapter 614, Statutes of 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full direction as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.
DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS.
C. H. PURCELL,

State Highway Engineer.
Dated January 21, 1931.

NOTICE TO CONTRACTORS

General, Electrical, Plumbing and Heating Work

Whittier State School

SEALED BIDS will be received by Geo. E. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, February 24, 1931, said bids thereafter on said day to be publicly opened and read for the erection and completion of Building for Boys, Whittier State School, Whittier, California, in accordance with plans and specifications therefor.

The Building is a two-story brick structure with frame interior construction and tile roof. The total floor area is approximately 8800 square feet.

Separate bids will be entertained for the following segregate parts of the work and combinations thereof:

1. General Work, embracing all branches of the construction other than Plumbing, Heating and Electrical.

2. Electrical Work.

3. Plumbing and Heating Work.

4. Complete Mechanical including Plumbing, Heating and Electrical Work.

Contractors shall state clearly in their application the particular segre-

gation of work that they desire plans for.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California cities Builders' Exchange Offices.

Plans, specifications, and proposal forms may be secured by licensed Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 614, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, Department of Public Works, reserves the right to reject any or all bids and

to waive any informality in any bid received.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF ARCHITECTURE,
GEO. E. McDOUGALL,
State Architect.
W. E. GARRISON,
Director of Public Works.

More than 50 members of congress in caucus January 24 decided to request the state and treasury departments to send an American commission to Russia to investigate alleged use of convict labor on products exported to this country. The products which the commission would investigate are lumber, oil, wheat, cotton and manganese.

The sales of lime by producers in the United States in 1930 amounted to 3,384,000 short tons valued at \$24,950,000, according to estimates furnished by lime manufacturers to the United States Bureau of Mines, Department of Commerce. This is a decrease of 21 per cent in quantity and 25 per cent in value as compared with sales of 4,265,768 tons valued at \$35,478,848 in 1929. The estimated sales of hydrated lime, which are included in these figures, amounted to 1,306,000 tons in 1930 valued at \$10,102,000, a decrease of 16 per cent in quantity and 21 per cent in value from the production of 1,550,771 tons valued at \$12,771,525 in 1929. The average unit value of all lime showed a decrease from \$7.84 a ton in 1929 to \$7.37 in 1930. Smaller demand and unsettled conditions were generally reported in the lime industry in 1930. Lime for construction was apparently more adversely affected than other classes of lime.

A recommendation that the state provide more funds for the use of joint highway districts was made in the report of a special committee headed by Assemblyman Chris N. Jespersen of Paso Robles. Jespersen estimated that at least \$1,000,000 is needed to carry on the program of the districts.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

LUMBER INDUSTRY SEES BETTER YEAR

"Lumbermen in general feel 1931 as so poor a year for their product that 1931 cannot fail to do better," says the American Lumberman in its annual trade review.

"During the year the softwood mills an average of 492 reporting weekly produced 77 per cent as much as in 1929, and their sales also were 77 per cent. The hardwood mills reported production 71 per cent as much as in 1929 and sales 64 per cent as much. It is encouraging to know that economic authorities think the present deflation is too much below normal levels, in both volume of consumption and prices. The Harvard index of wholesale commodity prices dropped from 92.5 to 74.8 during the year, or about 19 per cent. Lumber prices declined at least that much. Recovery in general business, it is felt will be gradual from now on, especially as steps are being taken to release bank funds and thus stimulate activity. Authorities seem to agree that a present vicious circle of deflation will be broken principally by the undertaking of larger programs of public instruction, and in every political district, large and small, provision is being made for such work. Lumber could be one of the first and principal beneficiaries of such programs, because large amounts will be called for, he mills have accumulated stocks during the year, but their accumulations are not as burdensome as might be thought. Shipments of a weekly average of 636 softwood mills have in 1930 amounted to 97 per cent of their 1930 production, and those of the hardwood mills to 89 per cent of their production. The holdings of retailers and industrial consumers, on the other hand, are generally considered low."

LOW VOLT NEON TUBES AVAILABLE

The practical application of rare gas tubes, best commonly known as neon tubes, operate on standard 110-220 volt electric current, is announced by L. P. Sawyer, vice president of the Neon Lights, Inc., of New York.

These low voltage units have attained a luminosity as high as 2000 lumens per foot, compared with 60 to 120 lumens per foot for high voltage neon tubes.

These low voltage gaseous tubes are applicable to commercial, industrial and special residential lighting. Special high powered units of greater intensity have been developed for industrial lighting. The better quality of light and more even distribution of light with the lack of glare is of advantage for reading or close inspection work.

Memphis, Tennessee, contractors and material dealers are planning to organize a Building Congress in that city.

IRON-STEEL MEET SET FOR DEL MONTE

Under the auspices of the California State Chamber of Commerce, the Iron, Steel, and Allied Industries will hold their seventh annual convention at Del Monte, February 12, 13, and 14. Thursday, Friday and Saturday mornings will be devoted to presentation of papers and business, on the following subjects:

(1) Recent developments in our iron and steel industry; (2) new developments contemplated; (3) modern industrial management; (4) proposed legislation affecting California industries; (5) safety standards and other simplified practices as aids to reducing production costs; (6) world-wide industrial competition.

The usual golf tournament will be held on Thursday, Friday, and Saturday afternoons. There will be group dinner-meetings Thursday evening.

The 1930 officers are: Chairman, J. E. Webster, Southwestern Engineering Corp., Los Angeles; vice-chairman, R. M. Alvord, General Electric Co., San Francisco; and secretary, Chas. S. Knight, director, industrial department, California State Chamber of Commerce, San Francisco.

CONTRACTORS MAP DRIVE TO ASSIST BUSINESS REVIVAL

Action to throw the full force of the Associated General Contractors of America into the task of steadying the construction industry and stimulating business recovery was taken at the concluding session of the national convention in San Francisco Jan. 29. The contractors passed eight resolutions, voicing the minds of the 2000 representatives of the industry thus:

1.—Condemnation for the diversion of gasoline tax revenues from highway construction.

2.—Support for legislation to continue the construction census.

3.—Urging state officials to formulate a system of financing public buildings by bond issue.

4.—Urging concentration of industrial agencies in a drive to eliminate convict labor from competition with free labor, to be supplemented by employment of convicts in reforestation and like work.

5.—Recommending surety companies write no contracts on projects exceeding \$25,000 until records of bidders' performances are secured.

6.—Urging governmental bodies abandon purchases of material for public work, on the ground that such purchases are uneconomical and encourage bidding by irresponsible contractors, delay work and result in low quality of construction.

7.—Pledging co-operation with the United States Building and Loan League over the country in promotion of sound construction.

8.—Urging passage of national legislation barring convict-made goods from importation.

Subs and Dealers Guaranteed Payments By Sacramento Architects

The Society of Sacramento Architects, recently organized, has adopted a standard of terms governing the payment of money on contracts executed under the direction of its members.

The following architects have agreed to use the standard in drawing up "General Conditions" in the specifications: Starks & Flanders, Harry Devine, Frederick Harrison, Jens C. Peterson and Chas. Dean.

The standard rules adopted are published herewith:

"Monthly statements shall be made out in accordance with forms issued from the architects office and said forms shall be filled out so as to show the value of work done under each branch, trade or sub-contract, and these forms will be the basis upon which the General Contractor shall pay his sub-contractors each and every month when the architects certificate has been issued covering the amount listed on said form.

"Any sub-contractor who does not receive his payment in accordance with the amount of money collected by the General Contractor on his executed work may appeal to the Architect who will upon Owner's approval have the amount due the sub-contractor withheld from the next certificate and the General Contractor is accepting this contract hereby agrees, without reservations of any nature, to this method of payment unless specifically agreed otherwise in the Contract Agreement Document.

"It is understood that the Contractor will make payments to material companies and sub-contractors in accordance with the amounts shown on statement before making his request for additional payments. Failure to do so will constitute a breach of contract."

\$50,000,000 LUMBER MERGER IS PROPOSED

Merger of the Little River Redwood Lumber Company with Hammond Lumber Company is expected to be announced within the next few days.

The proposed consolidation would result in the formation of one of the largest redwood organizations in the world, involving more than \$50,000,000. Hammond interests would dominate.

Consumption of this merger would bring under single control 10,000,000 feet of standing redwood timber, valued at about \$20,000,000; three mills on Humboldt Bay, in northern California, and about \$5,000,000 in inventories, together with a fleet of steamers, logging railroads and other equipment.

ARCHITECT'S RESPONSIBILITY TO THE CONSTRUCTION INDUSTRY

(By Edwin Bergstrom, Los Angeles, Calif., Treasurer,
American Institute of Architects)

The Architects' responsibility to the Construction Industry is the subject which I have been asked to speak to you about. I shall not speak of the functions of an architect or of his responsibilities as an individual, but rather of his duties and obligations as an element of a great industry, and therefore of his responsibility to the other elements of that industry. To do this it is necessary to identify those elements.

The construction industry is most complex and the simplest building operation brings together many classes of labor and many kinds of materials.

Elements in Construction

There is no other single industrial operation that requires the thought of so many minds and the labor of so many hands. Every material that goes into the building operation must have been worked over and fabricated into a finished product before it can be wrought into the structure and finish of a building. To make these products, to bring them to the building site and to form them into the structure requires a vast amount of labor, and that labor is skilled labor, almost entirely. It is evident then that labor and the producers of the materials of construction are two fundamental elements of the construction industry.

The constructors who bring together the materials of construction and the equipment to erect them into a building and who bring together the labor to form and fit and fasten these materials are a third fundamental element of the construction industry. Those who plan and design the building are a fourth essential element, and the banker who supplies the money for the building and its construction is the fifth element. The owner is the final element, and the one on which the others depend.

There are then six fundamental elements in every building operation. The owner, the banker, the designer, the producer, the constructor, and labor must each and all function in order that a building shall be produced and are the elements that must be considered in every discussion relating to the construction industry. It is true that there are many other activities which relate to the industry, but they have been grafted on to or have grown out of these six fundamental elements, for better or for worse. What is important is that every discussion of the industry must comprehend and include all of the six essential activities, not as the efforts of individuals and not as the efforts of individual groups, but always as joint and collective efforts.

Need for Cooperation

The activities of each group must function cooperatively with the activities of every other group and synchronize therewith in order to produce a building. If there is a duplication of efforts or an overlap of activities, or if one group undertakes activities not within its understanding and sphere, or if there is a lack of collaboration between the groups and one group fails to recognize its dependence on the efforts of others, the result is that the industry is the important thing, then waste and confusion result, the public suffers and loses confidence, and the industry is harmed.

It is the function of the owner, one of the six fundamental elements of the building operation, to pay money out to all the five other elements. Four, if not five, of those other elements

Address delivered before the
Twelfth Annual Convention of the
Associated General Contractors of
America, in San Francisco, Jan-
uary 28, 1931.

are dependent on that one unit for their livelihood and their existence. If we think of what these four elements take from that one unit, and of all the other activities that take livelihood from the same source, then we realize how insatiable are the calls on the resources of that one unit, and how important it is to the five basic dependent groups that those resources shall not be dissipated or wasted. I submit that there is no problem before the building industry today which is more fundamental and important than the regulation, protection, and conservation of those resources.

It must be the duty and the immediate responsibility of your group and our group and of the four other elements of the industry to recognize and maintain the distinctive functions of the fundamental elements in the industry; to cut down the surfeit of overhead that obtains in the industry; to eliminate costly and wasteful methods from the industry; to adjust the number of working days or the working hours in the industry to the conditions that must soon obtain; to build up competency, proficiency and efficiency of the members of the groups; and to ensure the integrity of the building operation. To that end every one of the elements should examine not only its own aims and motives and activities, but their collaborating relations to a certain extent, their combined endeavors are leading the industry. The most cursory of such examinations should convince any of these elements that the conservation of these resources whereof the groups derive their sustenance has not been a prime consideration up to the present time. It would seem the most simple economies that none of the five groups should attempt or be permitted to take undue tribute from the common source, but that all thereof should collaborate to conserve those essential resources and to regulate their flow into the industry.

Functions Efficiently

Granting these basic elements and their combined responsibilities to the industry, it is not difficult to define and to differentiate the functions and responsibilities of each group.

The architect under this scheme of things has one function to perform in the industry and only one. That function is to practice architecture. It takes only three words to define that function, and beyond the field enclosed within those three words my profession should not go. The function of each of the other four groups that derive their livelihood from the owner can be as simply stated. The banker's function is to supply money; the producer is to supply materials; labor, to supply the hands; and the constructor is to construct the building. This is the construction industry stated in its simplest terms, and I think it is fundamental that each of those groups shall return to and perform only the basic activities which are so simply stated, and shall eliminate therefrom all that is unnecessary and extraneous, before the construction industry can hope to function efficiently and without waste.

Architectural Profession

The members of my profession have always practiced architecture, but the architect, historically, has not always been a professional man. Just what constitutes a profession today, as distinguished from a business, is not clearly defined. At one time it was held that the person practicing a profession had undertaken and passed through long years of study, preparation and apprenticeship, but today any one who can wield the clipper and the shears disposes that he has reached a professional status. I think it is important that the architects should practice as a profession and that the professional idea should be encouraged in the building industry. The professional man has a little different slant towards industry and business than has the business man. The professional man may not have more integrity and he may not be as efficient as the business man, but generally he is not quite so ruthless. His training and education are all the traditions of his profession inculcate in him a background of business and industry. He should not lose and that should make him want to see a job through and well done according to his light and his ability rather than to cut his performance to fit the compensation that is to receive for it. Generally, the architect is not aggressive, because the nature of his responsibilities lead to other attributes. But I think he has a very real, intangible something to give to the industry. I think it important that he inject into the business something of the professional attitude of mind. In doing so he will unconsciously absorb more of business into his profession. The American Institute of Architects has formed an affiliation with the Producers Council, just to bring this about.

The Producers Council

The Producers Council is a group, nearly one hundred of the producers of our principal building material organized nearly ten years ago by a few architects and producers who felt the lack of complete understanding between their groups and who had vision of bringing about the things we have set out. The direct collaboration has brought only good to both organizations. The professional viewpoint is surely permeating the members of the Council and I am certain that the will bear witness that their business has not suffered thereby. They are looking at industry in just a bit different way, and just as our organization has been absorbing from them the finest ideals of business. Some of us think that this sort of contact with the other elements of the construction industry would have far-reaching results in solving the fundamental problem I have submitted to you.

Right here I want to leave with you the thought that this Council of Producers meets annually in convention and simultaneously with the convention of the American Institute of Architects, and at the same place. I mingle freely in our meetings, and our discussions are common to the Architects without the Producers and the Producers meeting with the Architects could never have reached the mutual understanding we now have. I seriously earnestly commend to your consideration. It does not seem good that two of the most important collaborative groups in the industry should discuss the problem of that industry by themselves.

Architect's Responsibilities

To plan and design buildings is a fine function of the practice of architecture, and yet that may not be greater responsibility for the architect than to bring the professional expert into business, and to be the agency to bring the fundamental principles of the industry to the other groups and insist on their collaborative solution. But let us consider their responsibilities as planners and designers.

Technically it is the function and responsibility of the architect to grasp and interpret the wants of the owner and to translate the building into his imagination and build for that owner into words and plans, so that all the groups of the industry can visualize exactly that dream, and in their turn can translate it into terms of money and materials and labor and thereby build for the owner. The architect has dreamed. The plans of the architect are the key to the building operation, and the architect must always guide and synchronize the other elements of the building is to grow and function and be placed in the surroundings he dreamed.

The owner must always depend upon the planner of his building, and a planner can bring about the results the owner expects only if he controls the materials that are to be used to form the building and their use and incorporation in that building. Therefore, the architect's function and responsibility of the architect should not be lost sight of, it rather that it should be jealously guarded and insisted upon by all the other elements of the industry. The architect functions as the planning and the supervising element of the building operation is traditionally sound practice, and fundamentally it is a sound allocation of responsibility.

Warning With Planning When we plan to design a building safely not a monopoly of our profession, of the practice of architecture. Any person who understands the stresses and strains that are developed in a building, and who knows the strength of materials and their characteristics, and who has had the engineering knowledge to calculate those stresses and strains, and to use them to make the materials in the building so as to utilize their strength, should make the building and its construction safe, is certainly qualified to design the building. But to design a building that will be structurally safe is not practicing architecture, though it is an essential of that practice. The practitioner of architecture must always assume the full responsibility for making his building safe. He must have not the engineering qualifications himself to design it, so when he must employ those who have the knowledge. The practice of architecture requires that the architect should have much more than arrange the structural elements of the building so that they result in a stable structure. He must arrange those necessary structural elements so that they are in orderliness, a pleasing outline, proportion, and distinction. By these means the architect injects beauty into the structure, and beauty in a building does not impair its usefulness or add to its cost. Beauty in the building itself and beauty in its surroundings has a direct commercial value. Mr. Albert Kahn, architect of world-wide knowledge, said on this point in Cleveland last year:

"The importance of building handily is greater in this country today than ever because of the direct need for beauty in most of our cities' streets. What could be sadder in the aspect of many of our streets and boulevards? No system, no relation of one building to another, a

scandalous lack of respect for orderly grouping and consideration for one another, it falls within the domain of architecture to correct this evil so common in our country. Abroad, there is greater regulation, therefore a better order. Beauty is an important factor in the field of architecture as ever and he who does not recognize his obligations to the community, he who fails to discharge his duty in this respect, is unworthy of the title of Architect."

The addition of orderliness, proportion and distinction to structure is the distinctive contribution of the architect to a building problem, and this contribution distinguishes the practice of architecture. This sharp distinction between the practice of architecture by architects and the designing of buildings by those without the architectural training and background should be kept very clearly in mind. It has been said that the architecture begins where structure leaves off, but that is not quite so, for architecture is based on structural forms and uses and arranges them in pleasing outline and proportion. If by their practice of architecture, the architects do not invest the buildings with charm and if they neglect to consider them with reference to their surroundings and their placement on property, then they have been unjust to the owners and to their communities.

Business Procedure Necessary

The practice of architecture carries other grave responsibilities, and the responsibility increases as buildings grow more complicated in their details and appointments. To meet these increased obligations, the architects are being forced to abandon their cherished hopes to practice architecture as artists, and to make architecture a pure art. If the architects are to perform the duties imposed on them by the construction industry and to meet efficiently and promptly the obligations of the owner, in the practice of architecture, then they must use business procedure in their profession. It is the architect's duty and responsibility to give accurate and realistic estimates of costs; to eliminate visionary and idealistic planning; to effect economies in construction and designing, so that materials will not be wasted and so that the erection of the buildings will be speeded; to prepare accurate and complete specifications and other documents, and eliminate therefrom the ambiguity and looseness that invite trouble and extras; to prepare their drawings and to make their certificates and notices promptly, so that costly and inexcusable delays will be avoided; to forward the laws regulating the construction and use of buildings; to assume without equivocation the responsibility for the errors in the documents which they prepared, and to give the fullest cooperation, assistance and consideration to those who are operating under those documents. These are all grave and important duties which must be met by the architects.

Other Responsibilities

But there are still other responsibilities that are inherent in the practice of architecture. The architects should be consulting experts in regard to building laws and restrictions and real estate values, and in regard to the obsolescence and depreciation of buildings and their equipment; and in regard to the cost of operating buildings devoted to commercial and industrial uses and the income that may be derived therefrom. They should know and understand thoroughly the methods of financing buildings, and should be advisers in that regard, and particularly it is their responsibility to advise regarding the useful purposes of proposed construction, in order that the flow of the owner's resources shall be protected and conserved, and that investments in unnecessary, untimely and wasteful buildings shall be

avoided. This latter responsibility is a serious obligation that should be foremost in the minds of every element of the industry, and concerted pressure should be exercised by them continuously, in order to regulate the flow of money into the construction industry, and to make necessary adjustments that occur periodically in the construction of buildings. The sooner the industry recognizes that its stability and earning power is greater with an even flow of money into that industry, the quicker will the pressure of the groups be exerted to prevent uneconomic building. This is a major program that is commended to your earnest attention.

I think that Mr. Kahn in the address I have referred to summarized the architects' duties very clearly. He said it was their obligation

"To plan carefully so as to save waste and with a view to the future to make possible expansion when necessary, to construct economically without resorting to cheap materials which in the end prove costly, to encourage the development of new materials and make use of each after careful investigation, to design logically so as to gain maximum aesthetic results, to serve the owner's interests to the best of one's ability and in a thoroughly business-like manner, to see to it that he obtains that which he is entitled to, to treat both owner and contractor fairly, and to have in mind at all times the aesthetic and practical welfare of the community."

All these things I have set out seem to suggest the major responsibilities of the architectural profession to the construction industry. If I have set those responsibilities clearly before you, I hope you will get therefrom that our profession admits those responsibilities and assumes the obligations that are entailed. It intends to do its full duty to ever increase the competency and efficiency of its members and to make use of each effort to maintain their rightful position and undertake their full responsibilities as a group in the construction industry. But when that is said and done, we must remember, and you as a group must remember, that severally we are but parts of one great unit of human endeavor, and that our thoughts and activities and our actions must be as joint partners in an undertaking and must be for the industry as a whole. This is our great responsibility.

JANUARY BUILDING PERMITS \$1,831,083

Building operations undertaken in San Francisco during the month of January involved an expenditure of \$1,831,083 as compared with \$1,431,893 for the corresponding period in 1930. These figures are based on building permits issued by the Department of Public Works.

Private building construction undertaken during the past month, totals \$132,495 and public building construction, \$1,617,588.

December, 1930, operations involved an expenditure of \$2,292,388 as compared with \$1,617,591 for the same month in 1929.

The following is a segregated report of the January, 1931, activities as compiled by the Bureau of Building Inspection, Department of Public Works:

JANUARY, 1931		
Class	No. of Permits	Est. Cost
A	—	\$ —
B	2	65,000
C	13	79,050
Frames	100	409,865
Alterations	349	259,580
Public Bldgs.	4	1,017,588
Total	486	\$1,831,083

THE OBSERVER

What He Hears and Sees on His Rounds

O. W. Rosenthal, representing the National Building Industries Bureau, put the following questions up to the industry—What is the answer?

Why is it that the so-called construction industry always takes its licking "lying down"?

Why is it that the so-called construction industry does not recognize the fact that there should be brakes and accelerators to control business trends as well as automobiles?

Why is it that the so-called construction industry considers every business depression inevitable, and that resistance would be without avail?

Why is it that the so-called construction industry is so completely dominated by forces from the outside?

Why is it that the so-called construction industry is so lacking in "cooperation consciousness" that even emergencies do not arouse it to action?

Why is it that each factor of the so-called construction industry considers itself a separate industry?

Why is it that the so-called construction industry is accepted as the second largest industry in the world, when actually it is merely a lot of individual industries supplying materials and service to the second greatest demand in the world?

Why is it that these factors of the so-called construction industry are not aware of the tremendous influence of coordinated effort, and that a clearing house of intra-industry problems and information is vital to their interests?

Why is it that the so-called construction industry is so lacking in "advertising consciousness" that the entire industry spends less for advertising than is expended for advertising one article of food?

Dr. T. W. MacQuarrie, president of the San Jose State College, in response to attacks made from the pulpit and in the city council chambers at San Jose, tells why local building trades mechanics are not employed exclusively on the new \$128,000 college gymnasium now in course of construction.

Dr. MacQuarrie cites the following reasons for not employing San Jose labor exclusively:

1. Funds used in building the gymnasium come from corporations in all parts of the State. The money is not strictly San Jose money.

2. There is no specification in the contract stating whom should be employed. The low bidders competed with 11 other bidders and submitted a very low figure, in which they probably allowed for use of their own labor.

3. A contractor can build more economically using a nucleus of labor which is accustomed to working with him, not necessitating a great amount of instruction.

According to word from Carson City, Nevada, the house committee on the state prison and asylum has been instructed by an assembly resolution to investigate the feasibility of establishing a cement plant at the state prison. In introducing the bill, its author declared that employment for the prisoners is necessary for their well-being and asked that a thorough investigation be made to determine whether a cement plant would pay and what effect it would have on labor.

While the legality of an architectural award to a member of the State Board of Architectural Examiners is being investigated in Sacramento, Supervisor E. J. Spaulding of the San Francisco Board of Supervisors charges that "unbusinesslike methods are being pursued and that certain architects are being favored" with regard to public structures for the City and County of San Francisco.

At the state capital the legality of the commission given to Frederick H. Meyer, president of the State Board of Architectural Examiners in the Northern District, to prepare plans for the \$500,000 state veterans' hospital at Yountville, is under investigation.

The San Francisco city attorney has been asked to submit an opinion on the legality of the present system followed by the Board of Public Works in awarding work to architects.

"The Board of Works has contracted for plans for a school and two health buildings even before the sites have been acquired," said Supervisor Spaulding.

"I don't believe that this is the right way of doing business. Architects are hired even before anyone knows just what is to be built. It is about time that practice of giving this work to friends is stopped."

"Before accepting any plans submitted by architect or builder, submit them to your plumber," says a letter sent to prospective home builders in the San Francisco Bay District. The letter is sent out by the Domestic Research Bureau of the Gas Appliance Society, a bureau operated by Al Crane, under the direction of a committee composed of C. E. Babcock, Frank J. Klumpp, L. C. Myers and Frank Talcott. The letter is one of a series mailed out every week to prospective home builders, architects, real estate dealers and speculative builders. The letters impress upon their recipients the necessity for adequate gas stubs located throughout the house, properly constructed flues and vents of the right capacity and above all, the necessity of conferring with the plumbing and heating contractor before proceeding with any building plans.

Secretary of Labor Doak advises the House labor committee his department has discovered many instances where contractors on government projects have imported cheap labor and reduced wage levels, contrary to agreements made with President Hoover when the depression began. He urged enactment of a bill introduced by Representative Bacon, Republican, New York, requiring that contractors for public buildings pay the existing wage level of the community, saying it was needed as an emergency measure.

To outline plans for its current sales campaign to 14,000 employees scattered over 61,000 square miles of territory in north-central California, the Pacific Gas & Electric Co. is putting on a traveling road show which "pays" at each important point in the district. With all the scenery and properties packed on a 3-ton truck, the show is traveling from Eureka and Redding on

the north to Salinas on the south under the direction of H. M. Crawford, sales manager of the organization. Speeches by the top executives of the Pacific Gas & Electric are presented at each stop by means of electrical recordings. These are followed by one-act playlets which set forth the possibilities for sales in the domestic industrial, commercial, and agricultural fields.

Most of the social and human problems in industry are but surface symptoms of disorders deep-seated in the industrial structure, according to a belief of a committee of the American Society of Mechanical Engineers who have united with members of the Yale Institute of Human Relations to study human problems in industry. Professor Elliott D. Smith, of Yale, chairman of the new work, says "unemployment, for instance, is not a single disorder, but a common symptom of many, among others of seasonal production, cyclical depression and an unabsorbed increase in production efficiency."

Discrimination is discriminatory, L. D. Davis, gas appliance dealer, has filed suit inameda county court seeking to void the city's regulations governing the installation of types of gas appliances. Davis recites in his suit that the city resolution, adopted March 15, 1935, limits installation of gas appliances to those having the approval of the American Gas Association, which alleges is a business organized to profit under the jurisdiction of the state of Ohio.

Designed for greater facility a regulation of financing irrigation reclamation and water conservation districts throughout the state, creation of the California districts, curities commission of seven members appointed by the governor proposed in a legislative measure being studied today. The bill, introduced by Senator Bradford Crittenden, carries an appropriation of \$100,000.

"The month of January has justified expectations of an improvement in the business situation," says a report of the National City Bank of New York, just issued. "Activity in steel and automobile industries has increased and has been paralleled by a general broadening out of business in other important lines. Employment reports indicate a substantial expansion of payrolls in the manufacturing centers. Sentiment among business men is distinctly more confident and in general the business outlook is more hopeful than it has in some time."

A plan for a campaign of publicity for civil engineering work, as proposed by the committee on education of the public, was adopted by the board of directors of the American Society of Civil Engineers at a recent meeting in New York City. The directors authorized an appropriation for expenses in connection with this move. The committee has laid down an outline of radio talks and talks before technical groups, also newspaper articles for general distribution.

Charles R. McCormick Lumber Co. has filed a complaint with the Federal Commission against Southern Pacific Company, alleging that defendant carrier collected unjust and unreasonable rates for the transportation of fire carloads of lumber from San Francisco to Pennsylvania, including switching charges of \$2.70 per car. Complainant asks the Commission to order defendant carrier to refund the alleged excessive charges.

ALONG THE LINE

Geo. D. Macomber, former city engineer of Oakland and recently elected county surveyor of Stanislaus county, has sold his private practice to Edward K. Hussey, newly appointed city engineer of Oakland. Mr. Belcher of Oakland, will be associated with Hussey.

Robert D. Strauch succeeds Robert Com as county surveyor of Tuolumne county with headquarters at Colusa.

Asa G. Proctor, for the past sixteen years county surveyor of Yolo County, has entered a general engineering business to operate under the firm name of Proctor & Miller, with headquarters in the Bank of America building at Woodland. Proctor's associate is John C. Miller, for the past twelve years sanitary engineer for the city of Richmond.

Horace D. Gates, for nearly thirty years connected with the Bureau of Engineering, San Francisco Department of Public Works, died at Sherman, Calif., February 1.

D. P. Haggerty has been elected president of the San Francisco Labor Council. He will be assisted by S. T. Olson, vice-president; John A. O'Connell, secretary-treasurer, and Patrick O'Brien, sergeant-at-arms.

William G. Pennycook, inspector for the department of electricity, will retire on February 11 after 40 years in city service. Workers in the department will tender their retiring comrade a banquet at the Elks Club the evening of that day. From 1914 1917 Pennycook was chief inspector of the department. He will retire at the age of 70 under civil service regulations.

John S. Kenney, formerly San Francisco representative of Fairchild Aerial Surveys, Inc., is now associated with Steph A. Kitts Co., San Francisco, concrete technologists.

Donaldo Jose Blas, 251 Kearny St., San Francisco, has been granted a Provisional Certificate to practice architecture by the California State Board of Architectural Examiners, Northern District, it is announced by Bert J. Evers, secretary of the board.

Gordon E. Kaufmann has been appointed consulting architect for Boulder City, Boulder Canyon project, Nevada, for the Bureau of Reclamation.

L. R. Martel, professor of civil engineering at California Institute of Technology, Pasadena, and a member that faculty since 1918, has been promoted to professor of structural engineering.

Billboard companies operating in San Francisco failed to keep an agreement to use pictures of women in their advertisement. Mayor C. W. Wright declares. He has an ultimatum the mail demanding immediate removal of such cigaret advertising, or the alternative of having all billboards ordered out of Hanford.

HERE—THERE EVERYWHERE

A bill being considered in the Ohio legislature would place a tax of three cents a square foot on billboards. Ninety per cent of this revenue would go to the state and ten per cent to the county.

At the annual meeting of the Sacramento Builders' Exchange last Monday night the following directors were elected: Orland Chase, W. E. Truesdale, Al. W. Simmonds, E. B. Moor, A. H. Wagner, John Redmond, Earl Markwart, Fred Benton, Alfred Gustafson, John Hawley, P. D. Reese.

The Electrical Workers Union of Chicago recently loaned unemployed members an aggregate sum of \$20,000, this to be paid back when the men went to work again. The money was raised by assessing employed members of the unions ten per cent of their wages.

The National Home Modernizing Bureau is planning a re-organization. A new nation-wide drive will be made for support and active work for modernizing.

Six hundred and seventy-five registered master plumbers were doing an active business in Los Angeles and its annexed suburbs on January 1, 1931, according to data compiled by W. B. Jones of that city.

Oakland city council has given final passage to the ordinance permitting plumbers to pay their license fees quarterly instead of annually, as was demanded in the old ordinance.

An ordinance regulating the erection of frame buildings so as to guard against the destructive temite has been given final passage by the city council of Burlington.

William N. Doak, Secretary of Labor, has been elected chairman of the Federal Board of Vocational Training, succeeding Senator James J. Davis, who served in this capacity for nearly ten years.

Legislation requiring all labor employed on public buildings to be bona fide residents of the state, is recommended by Governor Douglass of Delaware in his message to the General Assembly.

BERKELEY BUILDING PERMITS IN JANUARY

Berkeley reports the issuance of 83 building permits during January, 1931, as compared with 107 for the corresponding period last year. January, 1931, valuation registered \$90,060, as compared with \$434,054 in 1930. Following is a segregated report of the January, 1931, activities:

No of Permits	Est. Cost
1-story dwlg.	9 \$31,250
2-story dwlg.	2 25,000
Private garages	8 1,965
Garages Class C	3 850
Garages, Class A	1 1,000
Miscellaneous	1 250
Additions Class C	1 100
Additions	12 16,710
Alter & repairs	15 12,935
Total	83 \$90,060

TRADE NOTES

F. H. Medart has again assumed management of the San Francisco branch of the Fred Medart Manufacturing Company, specializing in steel lockers, shelving and cabinets, gymnasium and playground apparatus.

John Ralla has opened quarters at 2335 Broadway, Redwood City, and will engage in a general electrical business, operating under the name of the Coast Electric Company.

Weaver-Henry Corp., of Los Angeles, specializing in asphalt roofings and shingles, has opened a branch at 101 North Fifth Street, Portland, Ore., with Charles E. Sand as manager. The Seattle branch is located at 2607-11 Second Avenue, with Harry S. Martin in charge.

With the closing of the United Paint Company in Stockton, Jack Ford, manager, announces that the Martin-Senour line of paints will hereafter be handled in that city by the San Francisco Lumber Company. Ford will be in charge of the lumber company's paint department.

\$680,447 FOR JANUARY BUILDING

A. S. Holmes, city building inspector of Oakland, reports the issuance of 258 permits in January, 1931, for improvements involving an expenditure of \$680,447 as compared with 263 permits for the corresponding period in 1930 when the total registered \$665,292. Following is a segregated report of the Oakland permit total for the month of January, 1931:

Class. of Bldgs.	No	P'mts	Cost
1-story dwellings	31	1	\$ 38,825
1 1/2-story dwellings	1	1	4,500
2-story dwellings	4	1	23,150
2-story flats	2	1	15,600
3-story apartments	4	1	280,000
1-story restaurant	1	1	2,000
1-story com. sta.	1	1	75
1-story warehouse	1	1	1,000
1-story stock room	1	1	700
1-story serv. sta.	1	1	300
1-story tile ser. sta.	1	1	150
1-story tile garage	1	1	500
1-story brick chapel	1	1	30,000
1-story brick ser. sta.	1	1	900
1-sty. br. gar. & shop	1	1	2,500
1-story brick garage	1	1	3,000
1-sty. steel ser. sta.	3	1	2,900
1-story conc. apts.	1	1	80,000
Concrete foundation	1	1	35,400
Billboards	6	1	630
Electric signs	47	1	14,225
Roof signs	3	1	2,500
1-story gar. & sheds	39	1	6,735
Additions	34	1	12,794
Alters. & repairs	71	1	59,063
Total	258		\$680,447

A city-wide campaign has been started by the Northwest Master Painters' Association of Portland, Ore., in cooperation with the Paint and Varnish Club with a view to relieving the unemployment situation.

Property owners are persuaded to have their interior decorating done now when it will stimulate business for the shops and thus create work for the unemployed journeymen and apprentices. By having their work done early it was pointed out, the householders will insure themselves more careful and painstaking decoration than they could hope for after the spring rush is on.

TRADE LITERATURE

Bulletin No. 152, issued by the Federal Board of Vocational Education, tells of present practices in vocational industrial teacher-training institutions of granting college credit for trade experience, for teaching experience in trade schools, and for supervisory and administrative experience in vocational education. The bulletin was prepared by Theodore Anthony Siegle, M. A. A limited number of copies of this bulletin are available for free distribution and will be mailed on individual request.

"Chemical and Mechanical Utilization of Activated Carbon in Water Purification," a paper presented by A. S. Behrman and H. B. Crane before the American Water Works Association, has been reprinted as technical bulletin 6603 by the International Filter Co., 59 East Van Buren St., Chicago, Ill. The paper deals with Hydroarco, the special brand of water-purification carbon sold by this company, and describes its field of usefulness. Underlying principles to be followed for proper design and operation are stressed, and mention is made of results secured from installations. The cost of treatment is discussed at length.

BUILDING CODE FOR OREGON STATE BEFORE LEGISLATURE

Another attempt is being made at the present session of the Oregon State Legislature to secure passage of a state building code for Oregon. The proposed code has been suggested by the Building Safety Code Committee of Oregon, cooperating with the Oregon League of Cities, the Oregon Building Congress, State Master Plumbers' Association, Journeymen Plumbers' organizations, State Electrical Contractors, and Journeymen Electricians, and is printed in the form of a 12-page printed pamphlet dated December 1, 1930.

A proposed state building code presented before the 1928 Oregon legislature failed of passage.

The present bill contains a structural, electrical, plumbing and sewer contractors' code, and provides an elaborate system of license requirements which, together with fees received for permits, are the means provided for expenses and salaries in the state building department.

Persons, firms, corporations or municipalities engaged in certain lines of endeavor are exempt from any of the provisions of the proposed code. This includes public utility companies which supply telephone service and electricity, also "municipalities which have a structural, electrical and plumbing code equal to this code."

The Pacific Coast Building Officials' Conference Uniform Building Code, "current edition" is taken as the structural part of the proposed building code with certain exceptions. For the electrical provisions, the rules of the Bureau of Standards, U. S. Department of Commerce, are referred to; and for plumbing provisions, the recommended minimum requirements for plumbing from the same source.

December wholesale prices of six standard plumbing fixtures for a six-room house, as ascertained by the Bureau of the Census from reports of 12 representative manufacturers and wholesalers, averaged \$98.52 as compared with \$96.68 in November and \$100.58 in December, 1929.

PURCELL, STATE HIGHWAY ENGINEER, TO RESIGN IS RUMOR

Persistent rumors that State Highway Engineer C. H. Purcell is considering flattering proffers of an executive position with a private organization has made Governor Ralph apprehensive lest he should lose the head of the California highway division at a crucial moment, according to word from Sacramento.

The reports that a danger exists

that Purcell may be wooed away from the state service continue in spite of the fact that a bill has been introduced in the legislature to increase the salary of the highway engineer from \$10,000 to \$15,000 a year. Governor Ralph, however, is credited with the statement that "the state cannot afford to allow any private company to take our highway engineer from the state service."

The state at the present time is in the midst of a tremendously large highway building program, planned principally and brought up to its current state of completion under Purcell's direction. The governor is known to be extremely desirous of retaining Purcell to continue this construction schedule, and will doubtless give his approval to the \$5000-a-year increase in salary if that would be an incentive for Purcell to continue in the service.

TWO BILLIONS FOR ROADS DURING 1931

Expenditure for road construction during 1931 will reach a new high record in the United States, J. T. Pauls of Washington, senior testing engineer of the United States Bureau of Public Roads, told the opening session of the Western States Asphalt Conference meeting in Salt Lake City last Monday.

He estimated more than two billion dollars would be spent on public roads in the 48 States and said thousands of men will be employed during the summer, relieving the unemployment situation.

COST ESTIMATES ON W. P. R. R. EXTENSIONS

Detailed cost estimates of the Western Pacific Railroad's extension from Niles to San Francisco, just authorized by the Interstate Commerce Commission, are revealed in dispatches received from Washington, D. C.

These figures show that the extension may cost \$7,997,353 or, if an agreement is reached with the Southern Pacific for use of that company's Dumlarton bridge and portions of approaching track, the cost will be cut to \$4,292,352.

Estimates prepared by Western Pacific engineers divide the proposed extension into two parts: the first embracing the line from San Francisco to Redwood City and including a branch to a cement plant near there and the second embracing the line from Redwood City to Niles and including the cost of a bridge across the southern end of San Francisco bay.

Most of the first part is estimated at \$4,167,756, of which \$533,822 is for right of way, \$1,094,026 for grading, excavation and filling; \$1,189,918 for bridges, trestles and culverts; \$222,759 for tunnels, and \$233,149 for interest during construction.

The cost of the Redwood City-Niles section is estimated at \$3,829,567, of which \$349,358 is for right of way; \$237,332 for grading, excavation and filling; \$2,226,457 for bay crossing and \$214,152 for interest during construction.

The Interstate Commerce Commission's decision estimates that 45 percent of the total cost could be eliminated if trackage rights over the Southern Pacific bridge and a few miles of track at each end of the span could be secured. By making a connection near Henderson station, west of the bay, and between Niles and Centerville on the east, it is pointed out, 11.57 miles of new construction would be eliminated and the total cost would be reduced by \$3,605,000.

The authorization provides that the bridge be built only in the event the Western Pacific is unable, by April 1 of this year, to secure trackage rights to its use from the Southern Pacific. It also provides that no portion of the extension may be operated until all of it has been built or trackage rights secured which will give "a continuous line from San Francisco to Niles."

Harry M. Adams, president of the Western Pacific, has announced that work on the extension will start as soon as possible after negotiation with the Western Pacific.

SACRAMENTO BUILDING PERMITS IN JANUARY

Eighty-seven building permits were issued in Sacramento during the month of January for improvement involving an expenditure of \$220,93 as compared with 115 permits for the corresponding period in 1930 when the total registered \$111,527. Follows is a segregated report of the January 1931 activities:

1-st 1-fmly dwelling	14	\$ 57.05
2-st 1-fmly dwelling	8	51.70
Business buildings	2	69.00
Service stations	2	3.20
Private garages	10	1.60
Sheds, etc.	2	1.20
Electric signs	8	2.79
Business Reprs & Add	17	25.53
Dwelling reprs & Add.	24	9.53
Total	87	\$220.93

IMPROVEMENT IN INDUSTRY REPORTED BY A.I.A. COMMITTEE

Improvement in the building industry, with rising prices, is seen by the architects' Emergency Committee for the Region of New York, of which Iwan Clarence Levi, fellow of the American Institute of Architects, is

This Committee, formed for the primary purpose of relieving unemployment among architectural draftsmen in the metropolitan district, has been sitting an investigation during the past few weeks to ascertain the state of the building market, especially with respect to private residential work in a vicinity of New York City.

It is the opinion of the Committee that buildings can be built today considerably cheaper than was possible a year ago, and in all probability at a lower average price than will prevail next year or two hence.

Whereas a few individuals always take advantage of the low prices prevailing at the bottom of a business depression, and profit handsomely from the exercise of their judgment in buying, it is pointed out, the vast majority wait until prices have advanced, and the bargains have gone. The Committee advises that a careful checking of present building costs is necessary for those who contemplate the erection of a building at a comparatively early date. If the project has not been started, it is suggested that the matter be discussed with a competent architect, and also that in those cases where the drawings have previously been made and prices secured within the past two years, that the contractors be invited to refigure the bids on the basis of the prevailing prices for the materials and items of equipment required for the building.

Though the scale of wages, according to the Committee, paid to skilled labor in the building trades has not been officially changed in the recent past, still by reason of the fact that contractors have greatly reduced their prices and in so doing have retained their best men, they are in a position to get the best results for the lowest cost.

"The best informed opinion in building circles," the Committee asserts, looks forward to a gradual resumption of building activity, and anticipates that, as this movement gathers momentum, prices will rise as they always have in corresponding periods of the past.

"Buildings today are a bargain, provided, of course, that there is need for the building. Nothing is cheap if you don't need it, but to those who are genuine requirements for new structures, either for residence or business, the present offers an exceptional opportunity. This is a buyer's market."

Reports of new orders for fabricated structural steel for the week ending January 10, 1931, were received by the U. S. Department of Commerce from 104 establishments, whose capacity represented 45.8 per cent of the total capacity of all plants in the United States. The bookings reported by these establishments amounted to 20,144 tons, representing 48.5 per cent of the total capacity of the reporting establishments. Reports of shipments of fabricated structural steel for the same week were received from 101 establishments, whose capacity represented 44.2 per cent of the total capacity of all plants in the United States. The shipments reported by these establishments amounted to 16,376 tons, representing 40.9 per cent of the total capacity of the reporting establishments.

PLUMBERS' BOND CUT AT PORTLAND

The city commissioners of Portland, Ore., have adopted an ordinance reducing the bond required by the city of master plumbers from \$4,000 to \$2,500, saving each master plumber \$15 a year. The ordinance was adopted on petition of the Portland Association of Master Plumbers.

In December, 1921, the city council passed an ordinance requiring each master plumber in business to file with the city auditor a \$4,000 bond, \$2,500 of which was to guarantee compliance with city ordinances in the construction, installation, alteration and repair of plumbing and drainage work, \$500 as a guarantee against water wastage and \$1,000 to guarantee street replacement.

Compliance bond is needed only for protection of residence owners and owners of small structures as on all larger jobs owners require a job bond to cover satisfactory performance of the work, and in the nine years since the enactment of the ordinance it is said about \$200 has been collected on such bonds. During that time Portland master plumbers have paid about \$20,000 needlessly. A \$1,000 bond, the minimum obtainable, has been proven more than ample. The new ordinance reduced this one item to \$1,000 and leaves the other two at \$500 and \$1,000 respectively, making a total of \$2,500 in place of \$4,000.

The new ordinance carried an emergency clause and became effective January 1, 1931.

STEEL PLATE INSTITUTE ELECTS

W. S. Wheeler of the Pennsylvania Engineering Co. of Newcastle, Pa., has been elected president of the Institute of Steel Plate Construction. Other officers elected to serve for the ensuing year are: Vice-President, Arthur Caverno, Lancaster Iron Works, New York; Treasurer, B. P. McDaniels, McClintic-Marshall Co., Pittsburgh, Pa.; Secretary, J. W. Poushey, New York.

The program outlined for the Institute includes the following:

1. Promoting among the members of the organization an intelligent and cordial understanding of the industry's problems.
2. Technical research to develop new uses and broader markets for steel plates.
3. Collection and dissemination of information on all matters of interest to the industry at large and about the industry in which the general public is concerned.
4. Establishment in the industry of uniform and ethical standards of practice, and in trade relations usages that are fair to all parties.

Promotion of uniform standards and specifications especially as relates to construction that affects the general welfare.

The Insurance Center Building of San Francisco, financed in 1926 by S. W. Straus & Co., reports net earnings, after all charges, of \$61,000 for 1930. Interest charges of \$20,000 were earned nearly three times. The company retired \$500 in principal during the year, reducing the total outstanding to \$255,000. S. W. Straus & Co. offered \$340,000 in first mortgage 6 1/2 per cent bonds in 1926. The issue matures in 1941. The building corporation reports that the structure is 100 per cent occupied.

GARRISON STATES HIS POSITION ON SECONDARY ROADS

Added assurance that the roads selected after careful survey by the State Highway engineers, for inclusion in the Secondary Highway System, would undoubtedly pass the Legislature as suggested, is given by Col. Walter E. Garrison, Director of the State Department of Public Works.

Colonel Garrison, addressing the members of the Sacramento Valley Council of the State Chamber of Commerce, spoke in response to a report by Carl Lammus of Sacramento, Chairman of the Highway Committee of the Council, who stated that the Regional Committee was unanimous in asking that the roads be included in the secondary system, as designated by the engineers.

"I was very glad to learn today that you had endorsed our program for Secondary Roads in California," Garrison stated. "During the last few days people have come to me from all over California, requesting that a road in their community be placed in the Secondary System. It would only mean that it would be a paper road, as the State has no money to take any more roads into the Secondary System. Therefore, it seems to me that it would be a very foolish thing to ask the State Highway System to take in roads on which they cannot do any work, because as soon as we take in roads, the County stops maintaining them. I do not want a mile of road in the State Highway system that I cannot maintain."

The adoption of the program by the present Legislature, it was pointed out by the State Chamber of Commerce, will conclude many years' endeavor to bring about the designation of secondary highways by engineering survey, and will bring together for the first time, all sections of the State in a declaration of satisfaction on a unified program.

The designated roads to be included in this program, it was further pointed out, would give the Southern section of the State a three to one ratio in mileage to be included in the secondary highway system over the Northern section, until such time as there is an equalization of mileage in all sections of the State.

BRIDGE RIGHTS ARE TRANSFERRED

Andrew Mahoney and Oliver Olson, San Francisco lumber operators and principal owners of stock in the Richmond-San Rafael Bridge Company, are reported to have taken over the franchise held by Oscar Klatt to construct a bridge from Richmond to San Rafael.

The franchise given to Klatt by the Contra Costa County Supervisors is nearly expired and the new franchise holders propose to ask the county officials for an extension of time.

Under the new state law, if the franchise is not extended by the supervisors, the franchise holders will be compelled to ask the state for a franchise. Under the new state law the supervisors can not grant bridge franchises.

If the necessary capital is not raised in this state, the backers plan to go to the East coast to raise the funds.

Klatt was given the franchise by the supervisors two years ago for a bridge estimated to cost \$15,000,000. Under the franchise grant the supervisors specified that construction of the span must be started within two years of its becoming effective, and this period expires on February 10,

Plans by E. Reichel, 303 University
Ave., Palo Alto.

Part tile and composition roofing,
steel sash, hot air heating system,

leaded glass and some plate glass.

Bids are being taken for a general contract.

SALINAS, Monterey Co., Cal.—American Legion Posts throughout the county will petition the county supervisors to levy a direct tax to finance improvements. Under the proposal to be advanced by the Legion supervisors districts of the county would be grouped according to the most convenient centers for veterans' activity, giving Salinas districts 1 and 2, the southern end of the county districts 3 and 4 and Monterey peninsula district 5. Assessed valuation of the combined districts would rise about 38 per cent to district 5; 24 per cent to districts 1 and 2; 37 per cent to districts 3 and 4. The supervisors will be requested to assess the three mill tax rate provided by state statute for financing veterans' memorial buildings, at the rate of one mill per year for three years and yielding about \$55,000 per year. Under the plan if division described, district 5 would receive approximately \$62,000; districts 1 and 2 \$56,000 and districts 3 and 4 \$47,000. Salinas, being anxious to apply its share to the state armory now under construction, would be given the first year's proceeds; Monterey peninsula the second year's and the third year's of the county. The county has its halls erected and desires the fund for a memorial park, the third year's fund.

RENO, Nevada.—Until March 2, 7:30 P. M., bids will be received by H. W. Miles, secretary, Washoe County Library Board of Trustees, for removal of brick library building at NE corner of Mill and Virginia Sts., in city of Reno. Further information obtainable from secretary.

POMONA, Los Angeles Co., Cal.—County Architect Karl Muck, 10th floor, Hall of Records, has been authorized by the Los Angeles County Supervisors to prepare plans for a grandstand to be built at the County Fair grounds at Pomona. The proposed stand will be of steel and concrete construction and will be designed to seat 10,000. The estimated cost is \$225,000. The structure will probably be built in sections.

OAKLAND, Cal.—Until February 11, 5 P. M., bids will be received by East Bay Municipal Utility District, 512 10th St., to furnish and deliver one typewriter, bookkeeping machine and specifications obtainable from above office.

WESTWOOD, Los Angeles Co., Cal.—The University Religious Conference is conducting a campaign to raise \$300,000 for the construction of a building at Le Conte and Riverston Aves., Westwood. It will provide quarters for various religious clubs of the University of California. Gordon B. Kaufmann, 610 Union Bank Bldg., will be the architect.

MISCELLANEOUS SUPPLIES AND MATERIALS

OAKLAND, Cal.—Cockran & Celli, Oakland, submitted low bid to E. C. Fisher, city clerk, at \$1,942.50 each for three motor trucks for the street department. Only other bidder was T. H. Daly, Oakland, at \$1057. All bids held under advisement.

SAN FRANCISCO.—Following have been awarded contracts by City Purchasing Agent Leonard S. Leavy to

furnish paints, painters' supplies and glass, as may be required by the city during the annual term commencing Jan. 1 and ending Dec. 31, 1931, under Proposal No. 641: Tyre Bros. Glass Co., Excelsior Chemical Co., Glidden Co. of California, National Lead Company of California, Cobbledick-Kubie Glass Co., W. P. Fuller & Co., Doldge-Koren Paint Co., Dan P. Mahler Paint Co.

LOS ANGELES, Cal.—Until Feb. 6, 11 A. M., bids will be received by Thos. Oughton, city purchasing agent, under Adv. No. 2324, to furnish and deliver to Department of Water and Power, L. O. S. Sages, approximately 442,000 ft. (approx. 19,815 pounds) No. 8 AWG telephone wire. Certified check or bond for 10 per cent. Specifications obtainable from above.

OAKLAND, Cal.—Until February 11, 12 noon, bids will be received by Frank C. Merritt, city clerk, to furnish and install inter-departmental telephone sets for use of fire alarm system. Specifications on file in office of clerk.

SAN FRANCISCO.—J. A. Nelson, 10th and Howard Sts., at \$5.50 submitted low bid to Leonard S. Leavy, city purchasing agent, under Proposal No. 679, to furnish 200 galvanized iron garbage cans for the School Department. The following is a complete list of bids received, and stated time of delivery:

J. A. Nelson, \$5.30; (30).
Harper Mfg. Co., \$6; (12).
Guilfoyle Corbin Works, \$6.66; (30).
Levenson Co., \$6.66; (30).
Baker, Hamilton & Pacific Co., \$6.64; (30).
H. B. Blakeway, \$6.72; (30).
Sellers Bros., \$6.72; (10).
Ferry Street Metal Works, \$7.25;

BUSINESS OPPORTUNITIES

Names and addresses of persons or firms concerned in the following opportunities will be furnished on request to Business Opportunity Department, Daily Pacific Builder, 547 Mission St., San Francisco or Phone Garfield 8741.

20312—Representatin. Oakland, Cal. Party who has represented a number of American manufacturers in Europe for many years is desirous of contacting San Francisco manufacturers or producers wishing representation in Switzerland.

20612—Representation. Oakland, Cal. Party leaving soon for China is anxious to represent local manufacturers there. References upon request.

20918—Hemp. San Francisco. Party is interested in contacting importers Sample of hemp from Guatemala on of hemp and manufacturers of bags. file.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 87 Post Street, San Francisco. (Phone Sutter 1064).

R-3470-S MECHANICAL ENGINEER thoroughly experienced in the production of farm machinery, for a combination job of designer and production engineer. Company also makes trailers. Prefer a man over 35 years old on account of experience required. Salary open, but not over \$250 per month to start. Location, San Francisco.

R-3456-S MECHANICAL ENGINEER graduate, not over 35, with practical knowledge of machine design, for plant equipment development. Experience on metal stamping and welding desirable. Good opportunity for man with initiative and constructive ideas. Salary about \$200 per month. Location, San Francisco.

R-2469-S JUNIOR ENGINEER, not necessarily college graduate, with sufficient skill as a typist to handle a certain amount of clerical work in sales department of company manufacturing hydraulic equipment, pipe, etc. Salary \$100-150 per month. Apply by letter. Location, East Bay.
R-2429-S ENGINEER graduate, mechanical, 35-45 years old, with forceful personality and ability to handle men, for production manager of company operating several scattered plants in California. Must have good record as executive. Salary \$5000 a year. Apply by letter with brief of experience and photo. Headquarters San Francisco.

W-1872-C-S CONSULTING ENGINEER knowing garage operation, garage equipment, car repair, car utilization and manufacture of parts for repairs, to advise on equipment for service stations and repair shops, on scheduling of operation of trucks, busses and passenger cars and to organize maintenance and repair of trucks, busses and passenger cars of various makes. Experience in responsible charge of fleet operation and maintenance of trucks and busses desirable. Contract for one year, renewable. Salary open. One-third to one-half in paper rubbles for living expenses, balance in United States money to American bank. Applications only by letter which will be forwarded to Moscow for decision. Location, Russia.
K-340-W-2251-S REFRIGERATION Engineer who has had at least five years' experience in the preparation of specifications and designs, installation and servicing of refrigerating and ice making plants up to 100-ton capacity. Single man about 30 preferred. Four years' contract with option of renewal if services are satisfactory. Salary about \$200 a mo., and traveling expenses to and from China. Apply by letter. Headquarters, New York.

CONSTRUCTION BODY TO STUDY PROBLEMS

Problems of the construction industries will be studied by the National Conference on Construction, which is a part of the National Business Survey Conference.

At a meeting of the executive committee of the former held at Washington, D. C., it was decided to select a limited number of problems which will lend themselves, step by step, to constructive inter-group action, for factual studies by committees to be appointed by Secretary of Commerce Robert P. Lamont, and Julius Barnes, chairman of the executive committee.

Five subjects were chosen for study as follows: (1) Business reports for the construction industries, including methods for improving the statistical and trade information in this field; (2) elimination of wastes and undesirable practices in the construction field; (3) on improved financing of income properties with particular attention to appraisals and inspection; (4) on organizations in the construction business, and (5) on the present organization of the building and construction business and the economic forces involved therein.

The carpenters of Chicago have secured the five-day week for an indefinite period with no increase.

Engineering News Section

BRIDGES

SACRAMENTO, Calif.—State Railroad Commission has authorized the city of Sacramento to proceed with construction of the proposed H Street subway; estimated cost, \$50,000, of which the Southern Pacific R. R. will pay one-half. Fred J. Klaus is city engineer.

OAKLAND, Cal.—Plans for the proposed new \$100,000 bridge over the estuary at Park Street were approved by officials of Oakland and Alameda at a recent meeting and have been forwarded to the War Department for final approval. According to plans prepared by George J. Posey, county surveyor, the bridge will be of the bascule type with a 250-foot channel span having a 15 foot clearance at mean high tide. The approaches to the bridge will not be more than 3 per cent.

SAN FRANCISCO.—U. S. Navy Department has officially notified Congress that it has no objection to the construction of the San Francisco-Alameda county bay bridge on the Rincon Hill-Yerba Buena-Key Route mole route. This sanction is a victory for the Kahn bill authorizing the permit for the building of structure as recommended by the Hoover-Young San Francisco Bay Bridge Commission.

The Kahn bill, in addition to granting permission to the California Toll Bridge Authority to construct the San Francisco bay bridge, also carries the permission of the Federal government to cross Yerba Buena Island in the erection of the huge project.

The War Department will hold public hearings at the San Francisco City Hall on February 17 on the application of the California Toll Bridge Authority for a permit to build the bridge. This will in no way affect the legislation now pending in the House. Permits both from Congress and from the War Department are being sought by the toll bridge since the permit of the latter is revocable. This double application adds to the security in the financing of the huge project.

SACRAMENTO, Cal.—City Engineer Fred J. Klaus has completed plans for the proposed H street subway and bids will be asked by the city council after April 1. The project will cost \$90,000 of which one-half will be borne by the city. The project involves:

- (1) 179 30-foot untreated wooden piles;
- (2) 7,250 cu. yds. excavation;
- (3) 700 cu. yds. backfill;
- (4) 9,000 cu. yds. bow levee fill;
- (5) 35,000 lbs reinforcing steel and mesh;
- (6) 950 cu. yds. Class "A" concrete;
- (7) 580 cu. yds. Class "B" concrete;
- (8) 66,25 tons 33-inch steel girder beams;
- (9) 6 tons structural steel flood gates;
- (10) 16,500 sq. ft. concrete pavement;
- (11) 3,960 sq. ft. 3 and 4-inch sidewalk;
- (12) 300 lin. ft. 2-inch, 2-rail pipe railing.

Project consists of an underpass, bow levee and flood gates.

Main structure, for underpass, to have gravity-type abutments built on

filling. Deck to provide for three tracks, and consisting of 16, 33-inch 292 lb. Bethlehem steel beams, with a clear span of 35 feet, topped with a 10-inch concrete slab with one-inch of bituminous waterproofing. Five foot concrete walkways outside of and paralleling tracks.

Vehicle portion to consist of 30-foot California State Highway Commission standard concrete pavement, with 14 feet of vertical clearance, and one 7-foot pedestrian walk. Drainage to be disposed of by means of a sump and an automatically controlled electric pump.

Bow levee to enclose the vehicular lane between the main structure and the flood gate structure—a distance of about 200 feet. Top of bow levee to be about 13 feet above natural ground, with crown width of 13 feet and 2:1 side slopes.

Flood gate structure to have counterforted retaining walls and to be equipped with two steel gates 10 feet high hinged at the walls and meeting at the roadway center line when closed.

RICHMOND, Contra Costa Co., Cal.—Andrew Mahoney and Oliver Perry of the Richmond-San Rafael Ferry Co., have taken over the franchise held by Oscar Klatt for the construction of a bridge from Richmond to San Rafael and plan to commence construction in the immediate future. The bridge, according to tentative estimates, will cost \$15,000,000.

SAN FRANCISCO.—Until Feb. 25, 3:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to construct bascule bridge over the Islals Creek Channel in 3rd St. Estimated cost, \$400,000. The structure will be a single leaf bascule bridge, 140 ft. span, 80 ft. overall width; 103 ft. between fenders with 6 ft. sidewalk. Provision will be made for two street railway tracks and the Belt Line Railroad in addition to vehicular traffic. Certified check 10% payable to the Clerk of the Board of Supervisors required with bid. Plans obtainable from the Bureau of Engineering, 3rd floor, City Hall.

DREDGING, HARBOR WORKS & EXCAVATIONS

RICHMOND, Contra Costa Co., Cal.—Healy-Thibault Const. Co., 54 Pine St., San Francisco, at approximately \$190,000 awarded contract by U. S. Engineer Office, San Francisco, to furnish 51,000 tons of core rock at \$3.875 and 18,000 tons facing rock and building extension to training wall in Richmond Harbor at \$2.25. Complete list of unit bids published in issue of January 9.

STOCKTON, San Joaquin Co., Cal.—Until February 13, 3 P. M., under proposal No. 31-225, Specifications No. 2699, bids will be received by U. S. Engineer Office, California Fruit Bldg., Sacramento, for dredging approximately 432,000 cubic yards of material in the Stockton 26-foot channel prism from the mouth of Mormon Channel in the City of Stockton to the mouth of Burnst Cut-off, in the

San Joaquin River. Specifications obtainable from above.

LOS ANGELES, Cal.—E. C. Eaton, chief engineer of the Los Angeles County Flood Control District, completing plans for Alamitos Bay outlet project and will probably present same to county supervisors shortly. The project involves channel, levees, jetties, bridges and dredging. The bridge will consist of one reinforced concrete structure and two pile trestle bridges. Approximately 500,000 cu. yds. dredging will be required. The total estimated cost is \$750,000.

SAN RAFAEL, Marin Co., Calif.—Franks Contracting Co., 260 California St., San Francisco, at \$31c cu. yd., awarded contract by U. S. Engineer Office, San Francisco, for dredging San Rafael Creek. Other bids: Pacific Coast Dredging Co., 32½c; Dutton Dredging Co., 34c cu. yd.

SUISUN, Solano Co., Cal.—Hydraulic Dredging Co., Central Bank Bldg., Oakland, at 12c cu. yd. submitted low bid to U. S. Engineer Office, San Francisco, for 416,150 cu. yds. dredging in Suisun Bay. Complete list of bids follow:

Hydraulic Dredging Co.	12c
S. F. Bridge Co.	125c
Engineer's estimate	98c

Taken under advisement.

SACRAMENTO, Cal.—L. K. Isham, Rio Vista, at \$8.20 each submitted low bid to U. S. Engineer Office, Sacramento, to drive and cap 100 redwood piles near Rio Vista, Solano County. Complete list of bids, all taken under advisement, follow:

L. K. Isham, Rio Vista	\$ 8.20
M. A. Jenkins, Sacramento	11.35
M. B. McGowan, S. F.	11.97
Ben C. Gerwick, S. F.	13.60

OAKLAND, Cal.—U. S. Engineer Office, Customhouse, San Francisco, announces a rehearing of the Federal development program in the Brooklyn Basin, Oakland Harbor, in the San Francisco Customhouse, on February 26. It was indicated that discussion would center on the routing of the channel through the area and on the elimination of the "marine graveyard" on the southern side of the estuary. Original plans called for extensive dredging in the area.

OAKLAND, Cal.—American Dredge Co., 255 California St., San Francisco, at (a) \$.82 cu. yd. for dredging and disposing of material and (b) at \$4 each to remove pile studs from water, submitted low bid to the City Port Commission for dredging slips fronting the Inland Waterways Pier at the foot of Webster and Franklin Sts.

Pacific Coast Dredging Co., San Francisco at (a) \$.625 and (b) \$.50, only other bidder.

Taken under advisement.

STREET LIGHTING SYSTEMS

CULVER CITY, Los Angeles Co., Cal.—Until 5 P. M., Feb. 15, bids will be received by city council to construct ornamental lighting system in

portions of Sepulveda Blvd. and Washington Blvd., about one mile, involving 91 No. 250 Marquette standards; a 1. No. 15. Geo. E. Lee, city engineer.

MACHINERY AND EQUIPMENT

SAN FRANCISCO.—Board of Supervisors has approved plans for a new \$25,000 boat for the Police Department and bids will be asked shortly.

LOS ANGELES, Calif.—Until 11 A. M., Feb. 11, bids will be received by the city purchasing agent, Thomas Oughton, for services of dump truck under Spec. No. 2330, as follows:
(1) 1½-yard water level capacity;
(2) 2-yard do;
(3) 5-yard do;
(4) 8-yard do or larger level capacity;
(5) flat bed trucks of not less than 22,000 lbs., gross capacity, stake body.

NEVADA CITY, Nevada Co., Cal.—City council plans immediate purchase of a new 2-ton fire truck chassis and the transfer of the body and equipment of the present truck.

OAKLAND, Calif.—Following bids taken under advisement by East Bay Municipal Utility District to furnish and deliver one compressor, Rix or equal.

R. C. Porter, 356 Adeline St., Oakland, \$1465 and \$1655.
P. R. Hackley, 623 Market St., San Francisco, \$1490.

Taylor and George, 50 Spear St., San Francisco, \$1502.40.
Following firms submitted identical bids at \$1655:

Contractors' Machinery Exchange, 1135 57th Ave., Oakland;
Harron, Rickard & McCone, San Francisco;
Rix Co., San Francisco;
Edw. R. Bacon Co., San Francisco;
Gardner, Denver Co., San Francisco;
Ingersoll-Rand Co., San Francisco.

ANAHEIM, Orange Co., Cal.—Until 8 P. M., Feb. 24, bids will be received by the Anaheim city council for furnishing one road grader. Specifications may be obtained from the office of the city manager. Certified or cashier's check, 10%. Edw. B. Merritt, city clerk.

SIMI, Ventura Co., Cal.—Until 8 P. M., Feb. 16, bids will be received by the Simi Valley Union Grammar School for furnishing one Ford 1½-ton truck chassis, equipped with a P. & C. school bus body of 36-passenger capacity. P. E. Bangnall, clerk.

SACRAMENTO, Cal.—Until February 5, 8:15 P. M., bids will be received by the city clerk, to furnish two 4- or 6-cylinder standard coupe type automobiles. Certified check 5% payable to City Controller required with bid. Further information obtainable from clerk.

LOS GATOS, Santa Clara Co., Cal.—City trustees order bids received, to be opened probably March 2, 8:30 P. M., to furnish a 4-cylinder motor truck. Specifications on file in office of city clerk.

SAN JOSE, Santa Clara Co., Cal.—County supervisors sell to San Jose Tractor & Equipment Co. for \$500, one Best 60-Tractor no longer required for county use.

OAKLAND, Cal.—Cochran & Celli, 419 6th St., at \$1042 each, awarded contract by city council to furnish three motor trucks for use of City Street Department.

SAN FRANCISCO.—Woodrich Mack Co., 219 North Los Angeles St., Los Angeles, at \$392 each (\$29,832) submitted low bid to the U. S. Forest Service, Ferry 1934, for the manufacture of 21 trail builders and installing same on government owned Cletrac tractors.

Davis Mfr. Co., Davis, Calif., at \$1010 each (\$21,210) only other bidder. Taken under advisement

WANTED

TO PURCHASE used Linn Tractor Truck, Liddell-Wiley, Inc., 208 Columbia St., Seattle Washington.

RAILROADS

LAS VEGAS, Nevada.—Lewis Const. Co., 300 S. Juana St., Los Angeles, at \$153,599 awarded contract by U. S. Reclamation Service to construct Boulder Dam Railway, 10.5 miles in length with heavy construction in solid rock formation, including five tunnels within one mile. The project will extend from the summit, the end of the L. A. & Salt Lake Ry. section, down to the dam site. The principal items and quantities follow:

115,000 cu. yds. of common excav.
264,000 cu. yds. of rock excav.;
162,000 cu. yds. of unclass. borrow;
502,000 sta. yds. of overhaul;
287,000 cu. yds. of long haul unclass. borrow
"loaded into hauling equipment";
705,000 yd. mi. of hauling and spreading "long haul unclass. borrow";
29,000 cu. yds. of tunnel excav.;
200,000 ft. b.m. permanent tunnel timbering;
800 cu. yds. struc. excav., common
1,200 cu. yds. of struc. excav., rock;
6,000 cu. yds. of rock fill;
220 cu. yds. of concrete;
16,000 lbs. of reinforcement steel;
2,100 cu. yds. of rock riprap;
2,600 cu. yds. of concrete crib wall;
1,600 lin. ft. 24-in. corr. pipe;
120 lin. ft. of 36-in. do;
180 lin. ft. of 48-in. do;
280 lin. ft. of 42-in. do;
200 lin. ft. of 48-in. do;
600 lin. ft. of 60-in. do;
36,000 ft. b.m. of bridges or trestle timbering;
200 lbs. of rail stringers in rail top trestle;
2,000 lin. ft. of piling;
80 pile point shoes;
22,800 cu. yds. of ballasting;
7 miles of laying tracks (tie plated);
10 miles of laying track (not tie plated);
J. C. Page is office engineer at Las Vegas. S. O. Harper is chief engineer at Denver.

BOULDER CITY, Nevada.—Contract for furnishing the U. S. Bureau of Reclamation with railroad ties for use in the construction of the Hoover Dam railway has been awarded to Coast Fir and Cedar Products Co., Denver, Colo., at \$12.088.

FIRE ALARM SYSTEMS

SOUTH SAN FRANCISCO, San Mateo Co., Cal.—Until February 16, 7:30 P. M., bids will be received by Daniel McSweeney, city clerk, to furnish and install traffic signals at intersection of Grand Ave. and Linden Ave., and at intersection of Grand Avenue and San Bruno Road. Certified check 10% payable to city of South San Francisco required with bid. Plans on file in office of clerk.

OAKLAND, Cal.—Until February 11, 12 noon, bids will be received by

Frank C. Merritt, city clerk, to furnish and install inter-departmental telephone sets for use of fire alarm system. Specifications on file in office of clerk.

FIRE EQUIPMENT

OAKLAND, Calif.—Hids opened by City Clerk F. C. Merritt for fire hose. Following is a complete list of the unit prices of the bids opened:

(A) 4,000 ft. 1½-in. fire hose;
(B) 10,000 ft. 2½-in. fire hose;
Fabric Fire Hose Co., (A) \$9.00 wax and gum treated; (B) \$1.30 wax and gum treated; (A) \$.90 white jacket; (B) \$1.20 white jacket.
Hewitt Gatta Percha Rubber Co., (A) \$4.44; (B) \$5.1.
American Rubber Mfg. Co., (A) \$.90 (B) \$1.30.
Pioneer Rubber Mill, (A) \$.23%; (B) \$.46%.

SACRAMENTO, Cal.—Until February 14, 10 A. M., bids will be received by E. D. Adams, city controller, for the purchase of two 80-gallon copper chemical engine tanks, no longer required by the city. Same may be inspected at City Corporation Yard, 33rd and S Streets.

LODI, San Joaquin Co., Cal.—City Clerk J. F. Blakely has been instructed by the city council to secure prices on 800 feet of fire hose. Fire Chief George Polenske reports that 1400 ft. of hose is needed.

RESERVOIRS AND DAMS

DENVER, Col.—Until 2 P. M., Feb. 11, bids will be received by the U. S. Bureau of Reclamation, Denver, for furnishing 60x12-ft. ring gate control apparatus complete in accordance with Specifications No. 502-D. Delivery to be within 90 calendar days, and time in excess of that period will be evaluated at the rate of \$10 per day, and bids will be compared on this basis. Proposal guaranty, 15%.

HAYWARD, Alameda Co., Calif.—City Engineer Jesse B. Holly completes plans for the construction of a reinforced concrete reservoir of 1,000,000-gals. capacity to be constructed in Upper D St. The project involves:
(1) 23.40 M.B.M. lumber;
(2) 12,670 sq. ft. 4-ply tar and gravel roofing;
(3) 4,860 cu. yds. excavation;
(4) 103.7 cu. yds. concrete in walls;
(5) 283 cu. yds. concrete in floor, footings and columns;
(6) 48,400 lbs. reinf. steel;
(7) 1,270 lbs. asph. sealing compound
(8) 201 lin. ft. 8-in. vit. clay E & S pipe;
(9) 590 sq. ft. ½-in. wire screening;
(10) 920 lin. ft. 12-in. C. I. supply main (to be laid only);
(11) 2 concrete valve boxes;
(12) 1 12-in. C. I. inlet pipe installed;
(13) 1 8-in. C. I. overflow pipe, " " ;
(14) 1 8-in. washout C. I. pipe;
(15) 1 wooden inlet divider.
NOTE: All C. I. pipe, specials and valves, furnished by the city.

PHOENIX, Arizona.—Worthington Company, New York City, with general offices at Harrison, New Jersey, is reported to have been awarded the contract for the construction of the 200-mile pipe line by which natural gas is to be brought to the smelter of the Phelps Dodge Corp. in Douglas, from the fields in New Mexico. The Worthington Company, a Virginia corporation, is a subsidiary of The Worthington Pump and Machinery Co. The amount of the contract, it is reported, is between \$6,000,000 and \$7,500,000. It is understood that work will begin at once on the construction of the line, which, under the contract between the Western Gas Company &

El Paso, Texas, and the Phelps Dodge Corporation, must be completed in time to begin delivery of gas June 1. The route of the 12-in. 900-lb. pressure line will be through Denning, New Mexico, and it is reported that it will be extended from Douglas to Sonora, Mexico, serving Phelps Dodge, Calumet and Arizona, Caananza Consolidated Copper Company and Arizona Edison Company.

PPIPE LINES, WELLS, ETC.

KETTLEMAN CITY, Cal.—Associated Oil Co., Associated Oil Bldg., San Francisco, announces preliminary work on the reconditioning of its Coalina-Monterey pipeline to fit for gasoline transportation has been started, and that an extension through Kettleman, Lost Hills and Belridge fields will be constructed at a cost of \$750,000. The pipe has been ordered from the Youngstown Sheet & Tube Company and actual laying will start about February 15.

COALINA, Fresno Co., Cal.—Lang Transportation Co., 5501 Santa Fe Ave., Los Angeles, awarded contract by Associated Oil Co. to construct 60 miles of new pipe line from the new Belridge oil fields into Coalina.

Hutchinson Co., 1450 Harrison St., Oakland, awarded contract to recondition the Coalina-Monterey Line, this work to include replacing damaged portions, re-lining and painting coating. This line is 106 mi. in length.

Contracts also call for the installation of electrically operated pump stations, one at Belridge to boost the oil this way, and the second one either at Station No. 1 or No. 2 to boost it over the mountains to the coast. The line is to be used for the transportation of Belridge and Kettleman high gravity crude oil to tide water at Monterey and will be removed from the tankage there by tanker to the company refineries. The entire construction work will be under the supervision of H. W. Wickstrom, who will maintain his headquarters in Coalina.

SANTA CLARA, Santa Clara Co., Cal.—Bids will be asked at once by A. J. Cronin, city clerk, to drill well in connection with municipal water system. Bids will be received for both 14 inch and 16 inch. Specifications on file in office of clerk.

OAKLAND, Cal.—Pacific Coast Engineering Co., Foot of 14th St., Oakland, awarded contract by City Port Commission to furnish 4000 feet of 20 inch steel dredge pipe of two weights (a) \$2.35; (b) \$2.25.

WALNUT CREEK, Contra Costa Co., Cal.—Construction will be started at once by the Pacific Gas & Electric Co. on a natural gas pipe line from the Stanpac line which now terminates at Walnut Creek into the San Ramon Valley. Estimated cost \$43,000.

SEWERS AND SEWAGE DISPOSAL PLANTS

BERKELEY, Alameda Co., Cal.—Until February 10, 10 A. M., bids will be received by Florence E. Turner, city clerk, to construct storm sewer from Contra Costa avenue to Yosemite road, through Lots 8 and 26 Block 2, Thousand Oaks Court. Certified check 10% payable to city required with bid. Plans obtainable from City Engineer Harry Goodridge on deposit of \$10, returnable.

SAN FRANCISCO—Until February 15, 2:30 P. M., bids will be received by Board of Public Works to improve

Quint St., bet. Evans and Newcomb Aves., involving:

- (a) 258 lin. ft. 12-in. V.C.P. sewer;
- (b) 2,386 lin. ft. 15-in. do do;
- (c) 96 lin. ft. 18-in. do do
- (d) 96 lin. ft. 21-in. do do
- (e) 96 lin. ft. 18-in. do do
- (f) 10 brick manholes, complete;
- (g) 2 12x18-inch Y or T branches
- (h) 34 15X8-inch Y or T branches

Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd Floor City Hall.

SAN FRANCISCO—Bureau of Engineering, Department of Public Works, 3rd floor, City Hall, is completing plans and supervisors will adopt an ordinance shortly authorizing a call for bids to construct sewer across Sunset Blvd at Lincoln Way, involving:

- (a) 884 ft. 7-ft. 3-in. by 9-ft. reinf. concrete sewer.
- (b) 380 ft. 5-ft. 6-in. circular reinf. concrete sewer.

S. J. Hester is secretary of the Board of Public Works.

SOQUEL, Santa Cruz Co., Cal.—Proceedings have been started for construction of a sanitary district to finance construction of a sewer system in the Soquel and Capitola districts; estimated cost \$56,000. Lloyd Bowman, county surveyor, has completed preliminary surveys for the project.

LAS VEGAS, Nevada—The Benham Engineering Co. of Kansas City and Oklahoma City has been retained by the Las Vegas city commission to furnish the city engineering services in connection with a proposed bond issue to provide sewers and a sewage disposal plant for a population of 15,000. Koebig & Koebig, Los Angeles engineers, who have done some work for the city, are reported to have disposed of their interest in a three-year contract which the city signed in September, 1929, to the Benham Co., which will be represented in Las Vegas by Ray Murray.

MODESTO, Stanislaus Co., Calif.—Until February 4, bids will be received by H. E. Gragg, city clerk, to furnish sewer pipe to be used in sewer extensions in the industrial section of the city, the work to be carried on by day labor under the supervision of Frank J. Rossi, city engineer, to relieve unemployment. Total estimated cost \$16,000. The approximate quantities of pipe on which bids are now being received follow:

- (1) 1650 ft. 18-in. sewer pipe, concrete or vitrified;
- (2) 160 ft. 15-in. do;
- (3) 1070 ft. 12-in. do.

Further information obtainable from the city engineer.

OAKLAND, Cal.—Until February 5, 12 noon, bids will be received by Frank C. Merritt, city clerk, to sewer Grove St., bet. 36th and 38th Sts., involving:

- (1) 848 lin. ft. 24-in. vitrified pipe;
- (2) 48 lin. ft. 10-in. do do conduit;
- (3) 116 lin. ft. 12-in. do do do;
- (4) 2 brick manholes;
- (5) 1 brick and concrete manhole;
- (6) 1 catchbasin (21-in. opening);
- (7) 2 catchbasins (24-in. opening);
- (8) 2 existing catchbasins (to be reconstructed).

Certified check 10% payable to city required with bid. Plans on file in office of clerk. Walter N. Frickstad, city engineer.

REDWOOD CITY, San Mateo Co., Cal.—Engineer R. A. Klassen, 164 Arch St., Redwood City, completes plans and bids will be asked by the

county supervisors about March 2 or March 9, to construct sewer system in the Lomita Park Sanitary District, involving:

Vitrified Clay Sewer

- (1) 2700 lin. ft. 4-in.;
- (2) 100 lin. ft. 6-in.;
- (3) 5300 lin. ft. 8-in.;
- (4) 6900 lin. ft. 10-in.;
- (5) 9300 lin. ft. 12-in.;
- (6) 1400 lin. ft. 15-in.;
- (7) 8400 lin. ft. 18-in.;
- (8) 3150 lin. ft. 21-in.;

Cast Iron Sewer

- (9) 96 lin. ft. 8-in.;
- (10) 3420 lin. ft. 10-in.;
- (11) 144 lin. ft. 12-in.;
- (12) 4272 lin. ft. 14-in.;
- (13) 120 lin. ft. 16-in.;

Vit. Clay Wyes

- (14) 60 4x 8-in. wyes;
- (15) 120 4x10-in. do;
- (16) 140 4x12-in. do;
- (17) 60 4x15-in. do;
- (18) 130 manholes;
- (19) 23 M bed. ft. trestles;
- (20) 2 sumps;
- (21) 2 pump houses;
- (22) 4 air and vacuum valves;
- (23) 4 pressure air valves;
- (24) 2 400 GPM pumps;
- (25) 2 1200 GPM pumps.

Further mention will be made of this project when bids are desired.

MISCELLANEOUS CONSTRUCTION

OAKLAND, Cal.—Alameda County Supervisors approve \$27,000 appropriation for preliminary surveys in connection with proposed Broadway low-level tunnel through the Contra Costa Hills. Supervisor Redmond C. Staats, chairman of the joint highway district which is to construct the bore, and County Surveyor George A. Posey, notified the board that the district is prepared to expend \$30,000 for surveys, maps and other preliminary work on the project. In accordance with the agreement with Contra Costa County, Alameda County is to appropriate 90 per cent of this sum or \$27,000, while Contra Costa County provides the balance. Preliminary work on the tunnel project has been under way for several months and includes the surveying of tentative routes for the Oakland approach to the proposed bore. A double tunnel is planned some 3000 feet in length and piercing the hills at a lower level than the present bore.

WATER WORKS

SAN FRANCISCO—Twenty-two identical bids were received by Leonard S. Leavy, city purchasing agent, under Proposal No. 682, to furnish San Francisco Water Department, standard weight galvanized steel pipe, made in U. S. A., in random lengths and coupled for mill shipment f.o.b. 689 Bryant St., San Francisco:

- (a) 35,000 ft. 3/4-in., \$603.
- (b) 3,000 ft. 1-in., \$853.

Bidders and the time of delivery specified follow:

Petroleum Equip. Co., (35); Walworth Calif. Co., (35-40); Marshall-Nowell, (35-40); Dunham, Carrigan & Hayden, (35-40); E. E. Newhouse Co., Inc., (35); Steam & Plumbing Service, (35-40); Crane Co., (35-40); Pacific Pipe Co., (35-40); Pacific Plumbing & Heating Co., (35-40); P. E. O'Hair, (35-40); Tay-Holbrook, (35-40); Pacific Plumbing & Supply Co., (35-40); Woodin and Little (35-40); Dalziel-Moller Co., (35-40); Richmond Sanitary Co., (35); Federal Pipe & Supply Co., (35-40); Olsen and Heffer-

man (40); The Turner Co., (35); C. G. Claussen, (35); Baker, Hamilton and Co., (30-40); Giddings Supply Co., (30-40); General Machinery and Supply Co., (30-40).

All bids taken under advisement.

GRIDLEY, Butte Co., Calif.—City trustees order bids called to furnish and deliver one carload of pipe to be used in replacements in connection with water system.

DENVER, Col.—Until 2 P. M., Feb. 25, bids will be received by the U. S. Bureau of Reclamation, Denver, for furnishing the following equipment:

(1) One clarifier unit suitable for a tank 55 feet square, top and bottom, with a net solution capacity of 32,175 cu. ft., complete;

(2a) Alt. of Item (1)—One clarifier unit suitable for use in a tank having square top and round bottom and having an average top and bottom area of 2925 sq. ft. with a net solution capacity of 32,175 cu. ft., complete;

(3a) Alt. of Item 1—One clarifier unit suitable for use in a round tank of such diameter that the area of an inscribed square shall be 2925 sq. ft. and a net solution volume inside the inscribed square of 32,175 cu. ft., complete.

(2) Two clarifier units each suitable for use in a tank 45 feet square, top and bottom, and having a net solution capacity of 19,550 cu. ft., complete;

(2a) Alt. of Item 2—Two clarifier units each suitable for use in a tank with a square top and bottom whose average area is 1955 square feet and having a net solution capacity of 19,550 cu. ft., complete;

(3) One clarifier unit suitable for use in a tank 30 feet square, top and bottom, and having a net solution capacity of 688 cu. ft., complete;

(3a) Alt. of Item 3—One clarifier unit suitable for use in a tank with a square top and round bottom, whose average area is 861 sq. ft. and having a net solution capacity of 688 cu. ft., complete;

(4) One digester mechanism, complete;

(5) Four agitator units of the impeller type, complete;

(6) Two dry chemical feeders, complete;

(7) One recarbonization plant using coke for fuel, complete;

(7a) Alt. of Item 7—One recarbonization plant using fuel oil, complete;

(8) One duplex suction sludge pump, with motor, complete;

(9) Three pressure sludge pumps, with motors;

(10) One 12-in. basin level regulator, complete;

(11) Four rate of flow controllers of the Venturi type;

(12) Four operating tables, complete;

(13) Four 4-in. hydraulically-operated valves, complete;

(14) Four 6-in. do;

(15) Four 8-in. do;

(16) Eight 1-in. do;

(17) Seven 16-in. iron body bronze mounted, double disc, flanged, gate valves, complete;

(18) One 12-in. iron body, bronze mounted double disc, flanged, gate valve, complete;

(19) Four 4-in. adjustable wedge type sluice gates, complete;

(20) Two chlorinators of the solution type, complete;

(21) One gravity type aerator, complete, with capacity to remove H₂S from 450 G. P. M.;

(22) One gravity type aerator, complete, with capacity to remove H₂S from 900 G. P. M.

Combination bids may be submitted on two or more items. Spec. No. 605-D.

DENVER, Colo.—As previously reported, L. A. C. Manufacturing Co., Washington Bldg., Los Angeles, at \$21,450 awarded contract by U. S. Reclamation Service for the fabrication and erection of two arc-welded or riveted plate steel tanks for water supply, Boulder City, Nev., Boulder Canyon project. One tank will be 100 ft. in diameter and 34 ft. high, with No. 10 gauge sheet steel roof of 2,000,000 gallons capacity, to be erected in Boulder City. The other tank will be 16 ft. in diameter and 25 ft. high, without roof, of 255,000 gallons capacity, to be erected at the site of the filter plant about 4 miles east of Boulder City. Complete list of bids follows:

Pittsburgh—Des Moines Steel Co., Pittsburgh, \$20,511.

Chicago Bridge and Iron Co., Chicago, \$20,710.

Pittsburgh—Des Moines Steel Co., Des Moines, \$20,753.

Lacey Mfg. Co., Los Angeles, \$21,650; accepted.

Western Pipe and Steel Co., Los Angeles, \$23,064.

Kirk—Morrow Iron Wrks Co., Iola, Kan., \$25,083.

Petroleum Iron Works Co. of Texas, Beaumont, \$23,369.

Graver Tank and Mfg. Corp., East Chicago, Ind., \$24,500.

McClintic—Marshall Co., Leetsdale, Pa., \$24,790.

Consolidated Steel Corp., Los Angeles, \$24,935.

Lakeside Bridge and Steel Co., Milwaukee, \$28,644.

Stacy Mfg. Co., Cincinnati, \$29,550.

Standard Boiler and Steel Works, Los Angeles, \$30,491.

Stacey Pros. Const. Co., Cincinnati, \$32,000.

Vernon Tool Co., Los Angeles, \$34,350.

Freeman Mfg. Co., Racine, Wis., \$64,847.

SAN JOSE, Santa Clara Co., Cal.—Wallace & Tiernan, 7 Front St., San Francisco, at \$570 awarded contract by city council to furnish and install chlorinator for Alum Rock natatorium.

SAN FRANCISCO—Installation of facilities for pumping Hetch Hetchy water over Altamont pass, pending completion of the Coast Range tunnels of the Hetch Hetchy system, would cost the city \$1,000,000, with \$100,000 for the annual operating cost, City Engineer O'Shaughnessy has reported to the Board of Supervisors.

This is in addition to the cost of laying the pipeline across the San Joaquin valley, which is part of the entire Hetch Hetchy aqueduct system. O'Shaughnessy recently submitted an estimate of \$7,700,000 to lay the San Joaquin line, allowing eighteen months for the job, with an added 10 per cent if the work speeded up.

In his setup of cost of the line, the City Engineer gave the following figures:

Relaying Newark-San Lorenzo pipe and buying new pipe for added mileage, \$575,000; pumping station, \$75,000; transmission line eight miles to substitution, \$40,000; bridges, culverts, damage rights, fences, etc., \$100,000; right-of-way for pipeline and transmission line, \$40,000; administration, engineering and emergencies, \$66,444; total, \$896,594.

The figures do not include payments to be made to the East Bay Water Company for annulment of contract or for possible damage to lands.

SEATTLE, Wash.—A. Del Guzzo, Seattle, at \$41,122, bidding on dipped steel pipe with Dresser couplers, submitted low bid to Miller Engineering Co., Burke Bldg., Seattle, to construct

water supply system in Water District No. 38; pipe 1-inch to 6-inches in diameter. Taken under advisement.

SEATTLE, Wash.—Olen & Co., New York, N. Y., granted a 35-year franchise by the King County Commissioners for a water system to be constructed in the territory from the north limits of Seattle to the Snohomish county line. The New York firm, represented by John D. Bird, a Snohomish county engineer, will construct a system costing \$1,000,000. Water for the system will be drawn from the Tolt river and it is planned to construct a reservoir at the highest point between Seattle and Everett so that not only the territory between these two cities may be served, but in order that if necessary in case of emergency the supply of Seattle and Everett may be augmented by the system. The state department of hydrology has granted Olen & Co. a permit to use water from the Tolt river. The system will be capable of serving the industrial and domestic needs of 1,000,000 people in the district specified by the franchise.

DENVER, Colo.—Until 2 P. M., Feb. 13, bids will be received by the U. S. Bureau of Reclamation, 1411 Welton St., Denver, to furnish three motor-driven, centrifugal pumps, each having a discharge capacity of 250 P. M., when operating under a total effective head of 115 ft. Period of time for delivery is not to exceed 20 calendar days after receipt of notice of award. Each day in excess of that time will be evaluated at the rate of \$50, and bids will be compared on this basis. Specifications No. 594-D. S. O. Harper, chief acting engineer. Proposal guaranty, 10%.

EXETER, Tulare Co., Cal.—Election will be held February 26 to vote bonds of \$24,000 to finance improvements to municipal water system, involving 200,000-gal. storage tank, well drilling, installation of a deep well and booster pumps and extensions to mains. Irving H. Altshouse, engineer, Porterville.

SAN BERNARDINO, Cal.—American Cast Iron Pipe Co., Los Angeles, awarded contract by city water commission at \$4.40 per ft. for 2100 ft. 20-in. class 250, cast iron pipe, bell and spigot, in 16-ft. lengths, of .38-in. thickness, f o. h. trenchside. Other bids were:

National Cast Iron Pipe Co., \$4.36 ft., 12-ft. lengths, .36-in. thickness.

U. S. Pipe & Foundry Co., \$4.39 ft., Delavaud, 0.36-in. thickness, in 12-ft. lengths.

SAN FRANCISCO—Until February 11, 10 A. M., under Schedule No. 98-11-197, bids will be received by Quartermaster Supply Officer, General Depot, Fort Mason, to furnish and deliver:

3216 lin. ft. Pipe, water, bell and spigot, centrifugally cast iron, in lengths to lay 15 ft. as follows:

2016 lin. ft. 4-in. diameter;

1200 lin. ft. 6-in. diameter;

33 Fittings, pipe, water, cast iron, class "D", for above pipe, bells must fit pipe in above items.

Six one-fourth (90 deg.), 4-in., bell and spigot;

Six one-fourth (90 deg.), 6-in. do;

Four one-eighth (45 deg.), 4-in. do;

Four one-eighth (45 deg.), 6-in. do;

Two one-sixteenth (23 1/2 deg.) 4-in. bell and spigot.

One cross, size 6x6x4-in., bells all around;

Six tees, size 4x4x4-in., bells all around.

One tee, size 6x6x4-in., do;

Two 4-in. and one 6-in. Gate Valves (water gates) hub - ends, iron body, with brass trimmings, wedge gate non rising or stationary stem, for 175

lb. water working pressure. Hubs to be rough cast. To be equal and similar to Crane Co.'s No. 402.

Nine valves, angle, size 2½-in. for five hydrants, heavy pattern cast brass, for 250 lbs. working pressure, union bonnet, iron hand wheel, bronze seat, lather valve disc. Complete with cast brass cap and brass chain. To be equal and similar to Fig. No. 118 as manufactured by M. Greenberg's Sons.

SAN FRANCISCO—Until Feb. 11, 10 A. M., under Schedule No. 928-31-197, bids will be received by Quartermaster Supply Officer, General Depot, Fort Mason, to furnish and deliver:

One Pump, centrifugal, motor driven, direct connected, single stage, double suction, vertically split, with bronze impeller of enclosed type, ball bearing equipment with renewable casing wearing rings, water sealed stuffing box, stainless steel shaft. Pumps so arranged that it may be dissembled without disturbing pipe connections. Motor to be 5 horse power capacity, 3500 R.P.M., 60 cycle, 2 phase, 220 volt. To be equal and similar to motor manufactured by Ideal Electric and Mfg. Co., Mansfield, O. To be complete with a float switch operated by a magnetic switch, similar and equal to figures No. 10 and No. C. R. 7006 D-30 General Electric Co.'s respectively. It is contemplated to install pump at a well 260 feet deep, lined with 14½-in. dia. casing. Capacity 60 gals. per minute, drawn down 10 feet and for lift above ground 75 feet. Conservative friction head 30 feet. Pump to be equal and similar to Class W.H.D. as manufactured by the Pennsylvania Pump and Compressor Co., Easton, Pa.

One Pump: turbine, motor driven. Pump to be standard water or lubricated, but bids will be entertained for oil lubricated pump. A guarantee must be furnished that the pump supplied will have no leakage of grease or oil below the water surface. Motor to be 5 horse power capacity, 1750 R.P.M. (which must not be exceeded), 60 cycle, 220 volt. Pump to include 1 control box, or magnetic starter with push button control; also 1 safety switch, 3 pole, fused type, for 20 volt, A.C. current. It is contemplated to install pump at a well 300 feet deep, and to be fitted inside of 6-in. casing. Capacity 40 gals. per minute, static water level 6 ft., drawn down, driving dry weather, and for lift above ground 75 feet, friction head 10 feet. Pump to be equal and similar to Pomona pump as manufactured by Pomona Pump Co., Pomona, Calif.

GLENDAL, Los Angeles Co., Cal.—Pacific Pipe & Supply Co., 1002 Santa Fe Ave., awarded contract by city council January 29 for hub end gate valves, as follows:

- (1) six 30-in. at \$279.39 each;
 - (2) one 24-in. at \$173.95;
 - (3) four 30-in. flanges at \$297.39 ea.
 - (4) two 20-in. flange at \$147 ea.
- All bids on item (5) were rejected.

SACRAMENTO, Cal.—Until Feb. 13, bids will be received by H. G. Denton, city clerk, to furnish and deliver gate valves for municipal water department; estimated cost \$1,800. Specifications on file in office of clerk. Fred J. Klaus, city engineer.

COLUSA, Colusa Co., Calif.—City council plans to extend municipal water system to new county hospital site, involving 6-inch pipe; estimated cost, \$4500. The county supervisors will share the cost.

GRIDLEY, Butte Co., Calif.—Because of "engineering technicalities" bids to furnish and install one Diesel engine generating plant with auxiliary pumps, motors, equipment and materials, in connection with the Munic-

ipal Light and Water Plant, have been rejected and new bids will be asked as once. Bidders under the previous call were: Worthington Co., San Francisco, \$10,648 for 100-hp., and \$11,898 for 125-hp.; Fairbanks, Morse Co., San Francisco, \$15,893; U. S. Machinery Co., San Francisco, \$17,519.

STREETS AND HIGHWAYS

SAN FRANCISCO—Until February 18, 2:30 P. M., bids will be received by Board of Public Works to improve crossing of Bancroft, Quint and Thornton Aves., involving:

- (a) 106 lin. ft. armored concrete curb;
- (b) 70 lin. ft. 10-inch V.C.P. culvert
- (c) 775 sq. ft. 1-course concrete sidewalks;
- (d) 3 brick catchbasins;
- (e) 5,340 sq. ft. asphalt. conc. pavement,

2-in. asphalt. conc. surface on 6-in. class "F" concrete base. Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd Floor, City Hall.

SAN FRANCISCO—Until February 18, 2:30 P. M., bids will be received by Board of Public Works to improve crossing of Jennings and Underwood Aves., involving:

- (a) 95 lin. ft. armored concrete curb;
- (b) 660 sq. ft. 1-course concrete side walks;
- (c) 62 lin. ft. 10-in. V.C.P. culvert;
- (d) 2 brick catchbasins;
- (e) 4,412 sq. ft. asphalt. conc. pavement,

2-in. asphalt. conc. surface on 6-in. Class "F" conc. base. Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd Floor, City Hall.

SAN FRANCISCO—Until February 18, 2:30 P. M., bids will be received by Board of Public Works to improve University Ave. bet. Silver and Silliman Aves., involving:

- (a) 96 lin. ft. armored concrete curb;
- (b) 1,926 sq. ft. asphalt. conc. pavement,

2-in. asphalt. conc. surface on 6-in. Class "F" conc. base. Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd Floor, City Hall.

OAKLAND, Cal.—Hutchinson Co., 1450 Harrison St., Oakland, at \$1693 awarded contract by City Port Commission for 11,000 sq. ft. bituminous surface paving on extension of Fourteenth Street Wharf.

SONOMA-NAPA COUNTIES, Cal.—Directors of Joint Highway District No. 7, for the construction of the Calistoga-Headlands road, meeting in Napa, voted to ask the State Highway Commission for \$50,000 and Sonoma County for \$160,000 to finance completion of the 10½ miles of paved highway through Knights and Alexander Valleys to Sonol Creek in Sonoma County, involving grading and asphaltic concrete surfacing. E. A. Peugh, Courthouse, Santa Rosa, is engineer for the district.

SAN FRANCISCO—E. J. Treacy, Call Bldg., at \$112,510 submitted only bid to Board of Public Works to improve Madison St. bet. Burrows and Felton Sts. (where not), involving:

- (a) 125 lin. ft. armored conc. curb, \$125;
- (b) 100 lin. ft. 6-in. V.C.P. side sewer, \$1;
- (c) 2,495 sq. ft. asphalt. conc. pavement,

1½-in. asphalt. conc. surface on 6-in. class "F" conc. base, \$35.

SAN RAFAEL, Marin Co., Cal.—Property owners in the Forbes Avenue District adjacent to I and J Streets seek authorization of city council to pave with 3-inch asphaltic concrete under private contract. Referred to City Manager Herbert K. Brainerd for report.

SALINAS, Monterey Co., Cal.—Until February 19, 10 A. M., bids will be received by C. F. Joy, county clerk, for grading a portion of the Monterey-Castroville Road, 1 mile north of Seaside in Supervisor District No. 5, involving 14,000 cu. yds. Plans obtainable from County Surveyor Howard Cozzens on deposit of \$10, returnable.

SALINAS, Monterey Co., Cal.—Until February 19, 10 A. M., bids will be received by C. F. Joy, county clerk, for grading a portion of the Soledad-King City Road from a point 5 miles south of Soledad to a point 2 miles north of Colburn, in Supervisor District No. 3, involving 35,000 cu. yds. Plans obtainable from County Surveyor Howard Cozzens on deposit of \$10, returnable.

SAN FRANCISCO—E. J. Treacy, Call Bldg., at \$127,114 submitted low bid to Board of Public Works to improve crossing of Oxford and Silliman Sts., involving:

- (a) 65 lin. ft. armored concrete curb;
 - (b) 3 brick catchbasins;
 - (c) 90 lin. ft. 10-in. V.C.P. culvert;
 - (d) 284 sq. ft. 1-course conc. sidewalks;
 - (e) 3288 sq. ft. asphalt. concrete pavement, 2-in. asphalt. conc. surface on 6-in. Class "F" concrete base.
- Complete list of bids follows:
E. J. Treacy (a) \$1; (b) \$80; (c) \$1; (d) \$15; (e) \$25; total \$127,114.
W. J. Tobin (a) \$1; (b) \$100; (c) \$1; (d) \$18; (e) \$25; total \$1,325.62.

SAN FRANCISCO.—Pay Improvement Co., L'helan Bldg., at \$2,423.96, awarded contract by Board of Public Works to improve Duncan Street bet. Douglass St. and Hoffman Ave., involving:

- 234 lin. ft. concrete curb, \$1.48;
- 80 lin. ft. V.C.P. side sewers, \$1.89;
- 4,072 sq. ft. asphalt. conc. pave., \$9.484.

SAN FRANCISCO.—Until February 18, 2:30 P. M., bids will be received by Board of Public Works to improve Quesada Ave., bet. Hawes and Griffith Aves., involving:

- (a) 125 lin. ft. armored concrete curbs;
- (b) 125 lin. ft. 6-in. V.C.P. side sewer;
- (c) 3,125 sq. ft. asphalt concrete pavement, 2-in. asphalt conc. surface and 6-inch Class "B" concrete base.

Certified check 10% payable to Clerk of the Board of Supervisors required with bids. Plans obtainable from Bureau of Engineering, 3rd Floor, City Hall.

PLUMAS COUNTY, Cal.—Until February 25, 2 P. M., bids will be received by State Highway Commission to grade 0.7 mile between Paxton and Keddie.

See call for bids under official proposal section in this issue.

OAKLAND, Cal.—Until Feb. 12, 12 noon, bids will be received by Frank C. Merritt, city clerk, to improve Patterson Ave. adjacent to Harbor View Ave. Project involves:

- (1) 608 cu. yds. excavation;
- (2) 305 lin. ft. concrete curb;
- (3) 616 sq. ft. concrete gutter;
- (4) 4,474 sq. ft. of penetration macadam pavement;
- (5) 1,413 sq. ft. cement sidewalk;
- (6) 136 lin. ft. 6-in. pipe sewer;
- (7) 1 manhole;
- (8) 1 lamphole;
- (9) 6 Y branches.

Certified check 10% payable to city required with bid. Plans on file in office of clerk. Walter N. Frickstad, city engineer.

MENLO PARK, San Mateo Co., Cal.—City Engineer Bert J. Mehl ordered to prepare plans to improve four streets in district lying mainly east of the Southern Pacific tracks; estimated cost \$27,500.

CALIFORNIA.—Bids will be asked in the immediate future by the State Highway Commission, C. H. Purcell, state highway engineer, for the following projects for which plans have already been completed:

Grading and paving 18 miles between Los Alamos and Santa Maria, Santa Barbara County, including construction of Los Alamos Creek bridge on the Coast Route, \$931,600.

Placing oil surface for 19.1 miles between the Abbott Mine and five miles west of Williams, Lake and Colusa Counties, on the Tahoe-Ukiah highway, \$292,000.

Grading and paving five miles between Claydell station and the west end of Bostonia line change, Las Caches line change, and Flynn Springs line change on the San Diego-EI Centro Highway, San Diego County, \$240,000.

Grading and paving 8.3 miles between a point six miles north of the southerly county line of Riverside

County and Avenue 62 of the San Bernardino-EI Centro highway, \$481,400.

Grading and widening pavement to 20 feet between Highline Canal and Sand Hills, a distance of 29.9 miles in Imperial County, on the EI Centro-Yuma highway, \$150,000.

Grading and surfacing shoulders for 19.4 miles between Yuba City and Biggs, Sutter and Butte Counties, on the Pacific Highway, east side, \$57,300.

Grading and paving the west entrance to San Bernardino, including provisions for payment of State's share of viaduct on San Fernando-San Bernardino Highway, San Bernardino County, \$15,000.

- (14) 112 lin. ft. 30-in. do.;
- (15) 144 lin. ft. 36-in. do.;
- (16) 22 monuments;
- (17) lump sum, furnish water equip.;
- (18) 1750 M. gal. applying water;
- (19) 2 furnish and install posts for Federal road markers.

Certified check, 5%. Plans may be obtained upon deposit of \$15, of which \$10 will be returned. S. C. Durkee, state highway engineer.

The largest single compartment aluminum truck tank ever built in America was completed last week by the Industrial Steel Products, Ltd., 1301 59th St., Oakland. Weighing only 2150 pounds, the great truck has capacity of more than 3200 gallons and was made for Harm & Frasher, commercial haulers of Fresno. The tank is 18 feet long and is supported by six bolsters, two of which are steel. Two other similar tanks are being constructed by the Oakland concern, of which Howard Spreckels is president, J. J. Hurley is vice-president and general manager, R. C. Callaway is vice-president and A. C. Mohr, secretary.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on February 25, 1931, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highways, as follows: Plumas County, between Paxton and Keddle (11-Plu-21-B), about seventenths (0.7) mile in length to be graded.

Proposal forms will be issued to those Contractors who have furnished a verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes of 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc. The Department of Public Works reserves the right to reject any or all

bids or to accept the bid deemed for the best interests of the State.
DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS.
C. H. PURCELL,
State Highway Engineer.
Dated January 28, 1931.

February 5, 1931
NOTICE TO CONTRACTORS

General, Electric, Plumbing and Heating Work
Pacific Colony

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, March 3, 1931 said bids thereafter on said day to be publicly opened and read for the erection and completion of two buildings, namely, Employees' Quarters and Garages, Pacific Colony, Spadra, California, in accordance with plans and specifications therefor.

The Employees' Quarters building is two stories with concrete walls and wood frame interior construction and tile roof. The total floor area is approximately 8600 square feet.

The Garage is a building of 30 single-car compartments with concrete walls and floor and composition roof. The area is approximately 6000 square feet.

Separate bids will be entertained for the following segregate parts of the work and combinations thereof:

1. General Work, embracing all branches of the construction other than Plumbing, Heating and Electrical.
2. Electrical Work.
3. Plumbing and Heating Work.
4. Complete Mechanical, including Plumbing, Heating and Electrical Work.

Contractors must state clearly in their application the particular segregation of work that they desire plans for.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Bldg., Sacramento and also at Rm. 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications, and proposal forms may be secured by licensed Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, Department of Public Works, reserves

the right to reject any or all bids and to waive any informality in any bid received.

NOTICE TO CONTRACTORS

General, Electric and Plumbing Work
State Agricultural Park

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, March 3, 1931 said bids thereafter on said day to be publicly opened and read for the erection and completion of Additional Livestock Building No. 2, State Agricultural Park, Sacramento, California, in accordance with plans and specifications therefor.

The Building is one-story with concrete foundations and floors, brick walls, steel roof construction with tile and composition roofs. The total floor area is approximately 63,000 square feet.

Separate bids will be entertained for the following segregate parts of the work and combinations thereof:

1. General Work, embracing all branches of the construction other than Plumbing and Electrical.
2. Electrical Work.
3. Plumbing Work.
4. Complete Mechanical, including Plumbing and Electrical Work.

Contractors shall state clearly in their application the particular segregation of work that they desire plans for.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, and also at Room 1025 Associated Realty Building,

Los Angeles, and at the principal California Cities Builders' Exchange offices.

Plans, specifications, and proposal forms may be secured by licensed Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, Department of Public Works, reserves the right to reject any bid and to waive any informality in any bid received.

BETHLEHEM ACQUIRES McCLINTIC-MARSHALL

Bethlehem Steel Corporation, thru
President Eugene C. Grace in New
York, announces that it had agreed
to acquire all fabricating properties
and business of McClintic-Marshall
Corporation of Pittsburgh, Pa.

Bethlehem will make the acquisition
as stated, for 240,000 shares of
Bethlehem Steel common stock and
\$2,000,000 of 4½ per cent serial notes
maturing in ten equal serial annual-
ties, commencing January 1, 1932.
Bethlehem also will assume all li-
abilities of McClintic-Marshall, in-
cluding \$12,000,000 of bonds now out-
standing. The 240,000 shares of Beth-
lehem common are in the treasury
and will not represent any increase
in capitalization.

Mellon interests of Pittsburgh,
which have owned controlling inter-
est in McClintic-Marshall, will as a
result of this purchase become large
stockholders in Bethlehem Steel.
The newly-acquired plants will be
operated as subsidiaries of Bethlehem
Steel.

McClintic-Marshall Corporation was
incorporated in Pennsylvania March
9, 1900. It is engaged in fabrication
and erection of all types of steel
bridges and buildings. It has large
interests in the Steel Frame House
Company. Its plants are located at
Anklem, Leetsdale, Pottsdam and
Aerie, Pa., Buffalo, N. Y., Chicago,
Los Angeles and San Francisco. Its
normal capacity, according to latest
reports, is 400,000 tons.

HAYWARD PLUMBERS FORM ORGANIZATION

The Hayward Master Plumbers' As-
sociation of Hayward, Alameda Coun-
ty, was organized at a meeting held
at that city last Tuesday evening.
A. Kruse Jr., was elected president,
James Simmons, vice-president and
Wallace P. Haskell, secretary-treas-
urer.

The organization meeting was held
at the shop of the Hayward Plumbing
Company, 1661 A St., Hayward.

The first action of the new organi-
zation was to notify Manuel C. Riggs,
Hayward city plumbing inspector, of
the association's support of the pro-
posed ordinance now before the city
council seeking regulation of plum-
ing and the installation of gas fixtures
and appliances.

The proposed plumbing ordinance,
modeled after the Berkeley law, pro-
vides for conveniences and sanitation
of all plumbing installed as well as
for the licensing of plumbers. It also
provides that plumbing must be in-
stalled in such a way as to be reached
easily for cleaning.

The gas ordinance provides standard
methods for installing gas appliances,
provides that all gas stove vents
must be vented in the outside air.

UNFILLED STEEL TONNAGE IS HIGH

U. S. Steel unfilled tonnage on Jan-
31 showed an increase of 183,735 tons
to a total of 4,132,351 tons, as against
3,943,596 on December 31, 3,629,636 on
November 20, 3,491,763 on October 31
and 1,468,710 tons on January 31, 1930.
The total volume of unfilled busi-
ness on the books at the end of Jan-
uary was the largest since April of
1930, and a little better than the aver-
age for the past twelve months, which
was about 4,000,000 tons.

Although the steel industry has ac-
celerated activity but slightly in the
past fortnight, the volume of busi-
ness booked by the leading producers
was regarded in steel circles as lend-
ing substance to reports that a fur-
ther increase in steel prices was plan-
ned.

SEVERE TEST FOR DOUGLAS FIR

Douglas fir timbers which recently
supported a crushing live load of 11,-
000 tons came through the experience
undamaged and every piece was sal-
vaged for further construction uses,
according to information received by
the West Coast Lumbermen's Asso-
ciation.

The timbers were used as a carpet
between a concrete base and steel
rails used in moving an 8-story office
building, said to be the heaviest struc-
ture ever moved, 51 feet and pivoting
it a quarter turn to place it in a new
location. The building was the central
plant and office of the Indiana
Bell Telephone Co., Indianapolis, Ind.
Douglas fir was chosen for the job
because of its great strength, resili-
ency and lightness.

In preparing for moving, an 8-inch
solid concrete slab, reinforced every
12 inches in each direction, was laid
over the entire area to be crossed
by the building. On top of this slab
was laid 125,000 feet of 6x8-inch Doug-
las fir timbers. The timbers were
spaced eight inches apart. Over these
were laid cross ties to support the
steel rails. Three-inch rollers were
placed on the rails.

FEDERAL BUREAU ASKS ROAD BIDS

Bids will be considered by the U.
S. Bureau of Public Roads in San
Francisco on February 26 for grading
Section A of Route 11, Lava Beds
National Forest Highway in the Mo-
doc National Forest, for a distance of
10.32 miles.

The project will involve 78 acres of
clearing; 95,290 cubic yards of un-
classified excavation; 366 cubic yards
of excavation for structures; 17,200
station yards of overhaul; 10.32 miles
of finishing earth graded road; 93 cu.
yds. of Class B concrete; 914 pounds
of reinforcing steel and the placing
of 33 right of way monuments, ac-
cording to estimates compiled by C.
H. Sweetser, district engineer for the
bureau.

FRESNO ELECTRICAL ORDINANCE INVALID

Holding that the Fresno City ordi-
nance which forced the employment by
contractors on city jobs of licensed
electrical foremen is illegal, the
court in its opinion in the state 1911
street improvement act, the fourth
district court of appeals returned an
opinion ordering C. Van Valkenburg,
city commissioner, to approve an
assessment roll for the installation
of electric lines on Fresno Avenue, thus
approving the work. The writ was
granted to Walker & Martin, con-
tractors who in filed the writ.

The opinion was pronounced by As-
sociated Justice Emerson J. Marks
who held that the city could not pass
any ordinance which affects the in-
stallation of street work.

The city ordinance, which became
effective March 1, 1929, provided for
the hiring of licensed electrical fore-
men on city jobs. Walker & Martin,
who were the successful bidders on the
Fresno Avenue electrical installation,
refused to obtain a license for
their foreman, holding that he did
not have to undergo the city exami-
nation.

Van Valkenburg, in order to de-
termine the legality of the law, re-
fused to approve the assessment rolls,
with the result that the lights were
not turned on. The construction men
went to the appeals court for the writ
of mandate.

ARCHITECTS OF SACRAMENTO FAVOR FILTER REBUILDING

The Society of Sacramento Archi-
tects is on record by unanimous vote
as favoring the proposed \$480,000 bond
issue for additions and repairs at the
municipal water filtration plant.

In a letter filed with the city coun-
cil the architects say they realize the
work at the plant is absolutely neces-
sary to safeguard Sacramento against
financial loss in case of a shut-down
or other possible calamity.

The society compliments the coun-
cil for the method employed to obtain
professional advice before preparing
the bond issue.

"We concur with the city manager
that there is no better time to under-
take a construction program than at
the present," the letter said.

"We also realize and agree with the
consulting engineers that the present
plant, with the proposed additions,
will still be a necessary stand-by unit
even though the Silver Creek project
should become a reality within the
next few years."

William Clark Marshall, Oakland
contractor, has filed a voluntary peti-
tion in bankruptcy in the Federal
Court setting his debts at \$148,524.
His assets are approximately \$11,000,
the petition says.

CONTRACTOR'S LIABILITY FOR DAMAGE TO ADJOINING PROPERTY

By HERMAN J. GALLOWAY

Question: Where the owner of a lot procures a contractor to erect a building on such lot including the excavation for and building of a foundation and the contractor sublets the excavation and foundation work, is there any legal liability upon any of such persons or firms because of cracks subsequently appearing in the walls of a building on an adjoining lot?—R. R. Florida.

The Facts. "A," the owner of a city lot, desired to erect an apartment house thereon and engaged "B," the general contractor, "B" in turn sublet the piling to "C." "C" jettied and drove the piling foundation, the entire operation taking place on A's lot and in accordance with building regulations. There were large apartment houses on the lots on either side of A's lot. Some time after the piling had been driven, and when A's house was almost completed, the owner of one of the adjoining houses claimed damages stating that the operation had caused settlement cracks in the walls and ceilings of his building. It is desired to know whether any liability exists in this situation and, if so, upon whom does it fall.

It is a general rule of law that one has a right to use and enjoy his property in any reasonable manner he may desire, but this rule is subject to certain qualifications, among them being that, if the owner of the property in doing a lawful act upon his own land fails to use ordinary and reasonable care, he will be held liable for damages resulting to other property because of such failure. He will also be held liable for damages resulting to adjoining property because of doing an unlawful act upon his own property.

If the owner of property engages an independent contractor to do a lawful thing upon such owner's land, the owner will not be held liable for damages because of the negligent doing of such act unless the owner directed the doing of the thing in a negligent manner or was himself negligent in engaging an incompetent contractor. The contractor will be held liable in the doing of such work only where he has performed it in a negligent manner.

The following discussion of decided cases fully illustrates these principles:

In *Larson v. Metropolitan Street Railway Co.*, 110 Mo. 234, 242, a case involving damages resulting from excavation, the court said:

"For present purposes it will suffice to say, it is settled law that the unquestionable right of a landowner to remove the earth from his own premises, adjacent to another's building, is subject to the qualification that he shall use ordinary care to cause no unnecessary damage to his neighbor's property in so doing."

In *Radloff's Executors v. Mayor, Etc., Brooklyn*, 4 N. Y. 152, 209, a claim for damages caused by excavation, the court said:

"But a man may do things under a lawful authority, or in his own land, which may result in an injury to the property of others, without being answerable for the consequences. Indeed, an act done under lawful authority, if done in a proper manner, can never subject the party to an action, whatever consequences may follow. Nor will a man be answerable for the consequences of enjoying his own property in the way such property is usually enjoyed; unless an in-

Mr. Galloway is the legal editor for "The Contractor," the official publication of the Associated General Contractors of America. The article published herewith is reproduced with the special permission of the editors of *The Contractor*.

jury has resulted to another from the want of proper care or skill on his part."

In *Thompson v. Railroad*, 137 Mo. A. 42, 68, the court said:

"The mere fact that an improvement erected by an owner on his premises may inflict an injury to the adjoining property, of itself, does not create a liability on the part of the owner to recompense his injured neighbor. To create a liability there must exist some abuse of the lawful right of an owner to use his property as he would. If the injury results alone from the exercise of a right of ownership, it is *damnum absque injuria*. But if the right be exercised in a wanton, reckless or negligent manner and such perversion causes the injury, then the actor becomes a wrongdoer, since he violates the maxim, *'sic utere tuo ut alienum non laedas.'*"

To the same effect are *Niagara Oil Co. v. Jackson*, 91 N. E. 825; *St. Joseph Ice Co. v. Berlich*, 53 Ind. A. 15; *Swisher v. Sippis*, 13 Pa. Super 43; *Walker v. Stroschneider*, 49 Vt. 49.

It is also equally well settled that if the owner has retained no control over the work and has not interfered therewith, and the work is lawful and necessary for the enjoyment of his property, he is not liable for resulting injuries in the absence of a statute binding him to perform the work efficiently.

In *Berg v. Parsons*, 156 N. Y. 109, 112, an action brought for damages to adjoining property resulting from the blasting of a cellar, the court said:

"There are certain exceptional cases where a person employing a contractor is liable, which, briefly stated, are: Where the employer personally interferes with the work, and the acts performed by him occasion the injury; where the thing contracted to be done is unlawful; where the acts performed create a public nuisance; and where an employer is bound by contract to do a thing to the injury of an adjacent owner, and an injury results from its inefficiency. Manifestly, this case falls within none of the exceptions to which we have referred. There was no interference by the defendant. The thing contracted to be done was lawful. The work did not constitute a public nuisance, and there was no statute binding the defendant to perform it efficiently. In none of those exceptional cases does the question of negligence arise. There the action is based upon the wrongful act of the party, and may be maintained against the author or the person performing or continuing it. In the case at bar the work contracted for was lawful and necessary for the improvement and use of the defendant's property. Consequently no liability can be based upon the illegality of the transaction, but it must stand upon the negligence of the contractor or his employee alone."

To the same effect are *Roemer v. Striker*, 142 N. Y. 134; *Gourdiere v. Kansas*, California, Colorado, Florida,

Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, New Hampshire, New Jersey, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Vermont, Virginia, Washington, West Virginia, Wisconsin and Wyoming.

The rule above stated has been carried further so as to exempt the owner from liability for the negligent acts of a subcontractor or his servants.

In *Hayes v. Chicago Etc. Co.*, 203 Ill. A. 472, 481, involving blasting of stumps by a subcontractor, the court exempted the contractor and the owner, saying:

"It is clear, therefore, that the men McCormack, 2 E. D. Smith (N. Y.) 254; *Edmondson v. Pittsburgh, Etc. R. Co.*, 111 Pa. 316.

In *French v. Vix*, 143 N. Y. 90 (Aff. 21 N. Y. S. 1014), the following principle was applied in a case involving blasting where the contractor sublet the blasting work.

If the negligent or unskillful act is done by a contractor, the ordinary rules of master and servant apply. The contractor is merely a servant of the owner, carrying out his instructions, the weight of authority is that a joint action against the owner and contractor may be maintained for injuries resulting from the negligence of the unskillful act of the contractor for which the owner is liable under the doctrine of *respondent superior*. *Central of Georgia v. Carlock*, 196 Ala. 659; *Stinson Etc. Co. v. Prevatt*, 84 Fla. 416; *Weaver v. Hale*, 52 Fla. 88; *Wright v. Conner*, 53 Ind. 337, and many other cases.

If, however, the work is undertaken by an independent contractor, the rule is different. An independent contractor is one who in rendering services exercises an independent employment or occupation and represents his employer only as to the results of his work and not as to the means whereby it is done.

In *Casement v. Brown*, 148 U. S. 615, 622, 623, a case involving the erection of piers for a bridge, the Supreme Court said:

"With reference to the first contention: Obviously, the defendants were independent contractors. The plans and specifications were prepared and set by the railroad companies; the size, form and place of the piers were determined by them, and the defendants contracted to build piers of the prescribed form and size at the place fixed. They selected their own servants and employees. Their contract was to produce a specified result. They were to furnish all the material and do the work, and by the use of the material and the means of that work were to produce the completed structures. The will of the companies was represented only in the result of the work, and not in the means by which it was accomplished. This gave to the defendants the status of independent contractors, and that status was not affected by the fact that, instead of waiting until the close of the work for acceptance by the engineers or the companies, the contract provided for their daily superintending and approval of both material and work."

"It is enough for this case that these defendants contracted to do the work, and to produce a finished structure according to certain plans and

this state there is no such statute. At common law, therefore, it was not the plaintiff's duty to support or protect the defendant's building, and the latter, had he built the foundation and furnished the support which the plaintiff provided, could not have re-

covered for it in an action against him."

In *Clemens v. Speed*, 93 Ky. 284, 288-289, the court said:

"The adjoining owner can not by changing the natural condition of his land take away his neighbor's right to the use he could have made of it in the absence of such change. He can not load down his own soil so as to require the support of his neighbor's."

"It is difficult to see how an easement, or prescriptive right, can be acquired to the lateral support of another's building, when that of each owner is altogether upon his own land. Each has a right to build, and the one can not prevent the other from deriving the benefit of such support. It can not be said it has existed with his consent, and that a grant and right to the use is to be presumed from lapse of time, because the owner of the alleged servient estate has had no right in the meantime to prevent such a benefit. He can not with any effect raise his voice against it. It must result, or he can not use his own property or have a building of his own."

In *Gilmore v. Driscoll*, 122 Mass. 139, 201, the court said:

"While each owner may build upon and improve his own estate at his pleasure, provided he does not infringe upon the natural right of his neighbor, no one can by his own act enlarge the liability of his neighbor for an interference with this natural right. If a man is not content to enjoy his land in its natural condition, but wishes to build upon or improve it, he must either make an agreement with his neighbor, or dig his foundations so deep, or take such other precautions, as to insure the stability of his buildings or improvements, whatever excavations the neighbor may afterwards make upon his own land in the exercise of his right."

In *Schultz v. Byers*, 53 N. J. L. 442, 443, the court said:

"As to land in its natural condition there is a right to such support from the adjoining land, to buildings on or near the boundary line, injured by excavating on the adjoining land, there is no right of action, in the absence of improper motive, or of carelessness in the execution of the work. This is the law as established by the cases prior to that decision; it has remained the unquestioned law in this state since that time, and it has been confirmed by many cases since in other courts."

To the same effect are: *Mamer v. Lussem*, 65 Ill. 484; *Block v. Haseltine*, 3 Ind. A. 492; *Winn v. Abeles*, 35 Kan. 85; *Serio v. Murphy*, 99, 545; *Thurston v. Hancock*, 12 Mass. 220; *Obert v. Dunn*, 140 Mo. 476; *Radcliffe's Ex. v. Mayor*, 4 N. Y. 194; *Davis v. Summerville*, 131 N. C. 352; *Weiss v. Kohlhagen*, 58 Or. 144; *Sharpless v. Boldt*, 218 Pa. 372; *Hannicker v. Lepper*, 20 S. D. 371; *Graves v. Mattison*, 67 Vt. 630.

The general right to excavate, however, does not relieve an owner, or his contractor, from taking reasonable precaution against injuring adjoining land upon which there are buildings, and it is his duty to proceed with excavations in an ordinarily skillful and careful manner, but he is bound to use only reasonable and ordinary care to prevent injury to buildings, and if he does so and injury results it is what is known in law as *dammum absque injuria*, or damage without injury.

In *Bohrer v. Duenhart Harness Co.*, 19 Ind. App. 489, 498-9, the court said:

"Where one, in making improvements on his own land, excavates it and thereby endangers the support of a building upon the adjoining land of another, the former, by giving notice to the latter, may relieve himself of the necessity of using extraordinary efforts to protect the building; but in making such excavation ordinary care must be exercised to avoid such danger, and the person making it will be responsible for the consequences of negligence therein of himself or his servants."

In *City of Quincy v. Jones*, 76 Ill. 231, 241, the court said:

"If injury is sustained to a building in consequence of the withdrawal of the lateral support of the neighboring soil, when it has been withdrawn with reasonable skill and care to avoid unnecessary injury, there can be no recovery; but if the injury is done the building by the careless and negligent manner in which the soil is withdrawn, the owner is entitled to recover to the extent of the injury thus occasioned."

In *Myer v. Hobbs*, 57 Ala. 175, 176-7, the court said:

"We have no disposition to discuss or re-examine the principles settled in *Moody v. McClelland*, 39 Ala. 45. That case was thoroughly considered, and embraces an elaborate collation of authorities, English and American, and we are satisfied with the principle then announced, 'that every man has a right to lateral support for his land from the adjacent lands of other proprietors, and that the latter can not impair or destroy this right by excavations on their own lands; but this principle applies only to the land itself in its natural state, and does not extend to houses, or other artificial structures thereon erected, which increase the lateral pressure on the adjacent lands. Yet, if a person making a lawful excavation on his own land, performs the work so negligently and unskillfully that injury thereby results to the land or house of an adjacent proprietor, he is liable to an action for damages at the suit of the injured person.' Under this principle, the present case is narrowed to the inquiry, was the defendant guilty of negligence or want of skill in making the excavation? If he was, and if damage ensued, therefrom to the plaintiff, the action was well brought."

To the same effect are: *Kramer v. Northern Hotel Co.*, 85 Ill. A. 264; *Moellering v. Evans*, 121 Ind. 195; *Louisville Etc. R. Co. v. Bonhays*, 94 Ky. 67; *Serio v. Murphy*, 99 Md. 545; *Shafer v. Wilson*, 44 Md. 268; *Gildersleeve v. Hammond*, 109 Mich. 431; *Rau v. Minnesota, Etc. R. Co.*, 13 Minn. 442; *Charles v. Rankin*, 22 Mo. 566; *Booth v. Rome, Etc. R. Co.*, 140 N. Y. 267; *Novotny v. Danforth*, 9 S. D. 301.

Also, it has been held that the mere fact that an adjacent building suffers injury is not sufficient to show negligence on the part of the excavator, for the injury may have been the result of defects in the building.

In *Schultz v. Byers*, 53 N. J. L. 442, 444, the court said:

"There was no proof, or offer to prove, at the trial, that the defendant was negligent in digging his cellar, whereby the plaintiffs' house was caused to settle and the walls to crack, beyond the mere fact that this was the result. This result alone was not sufficient, for it may have

been caused by defects in the plain tiffs' house."

In *Serio v. Murphy*, 99 Md. 545, 556 the court said:

"In the first place negligence cannot be shown because the wall cracked or fell. I. Thompson on Negligence, 277. And that seems to be the situation before us in this case. Nor is the highest degree of care required."

The facts stated do not specifically show whether the work was done in a careful or a negligent manner, nor whether the contractor or subcontractor were competent. It is stated that the work complied with the building code and this, at least, creates an inference that there was no negligence. It seems clear that in the absence of negligence, reasonable care having been taken during the operation to prevent injury to buildings on adjoining property, an assumption that there is no statute or municipal ordinance imposing upon the owner or his contractor any greater obligations than exist at common law, neither the owner, the contractor, nor the subcontractor can be held liable for cracks subsequently appearing in the adjoining property.

CAMPBELL AGENCY PLACED WITH FIRE PROTECTION PROI

Appointment of the Fire Protection Products Company of San Francisco as Northern California representative for the Campbell Industrial Window Company of New York is announced by Alvin M. Karstensen, Pacific Coast district manager of the Campbell Industrial Window Company.

The Campbell Industrial Window Company specializes in the manufacture of solid section steel window and patented weatherstripped windows of steel.

Products of the Campbell Industrial Window Company to be handled by the Fire Protection Products Company will include horizontally pivoted windows, commercial and architectural projected windows, office type projected windows, continuous window mechanical operators for both manual or electrical control of pivoted continuous windows, industrial derrick and wharf doors, airplane hangar doors, cast-iron basement windows, utility windows, standard steel doors and frames, standard casement windows and screens, and double leaf windows.

This completes the window line which also includes solid section double hung, hollow metal double hung, light and heavy casements in either steel, aluminum or bronze. E. Bowen, formerly with the G. E. Kelham, architect, and late of the Campbell Steel Company, will be in charge of the sales of all products of the Campbell Industrial Window Company according to J. E. Schultheis, manager for the Fire Protection Products Company.

In addition to carrying a complete line of the Campbell products, the Fire Protection Products Company will continue to manufacture and make their own line consisting of doors, Kalamein copper and brass doors and trim, ornamental entrance and sheet metal work of every description.

The firm will also continue its manufacture and installation of fireproof doors labeled "Eyre-R-Wal" metal fire doors.

The Fire Protection Products Company will carry a complete line of the above products for immediate delivery in their warehouse which is located at 1101 16th Street, San Francisco.

THE OBSERVER

What He Hears and Sees on His Rounds

Newspaper dispatches from Washington report the House Territories Committee has approved a bill to make \$500,000 available immediately for Federal aid in road building in the fall.

With a view to relieving unemployment conditions and to provide necessary school improvements a one million dollar bond issue is proposed by the Pasadena Board of Education. The improvements would consist of new buildings at the junior college grounds.

A. S. Davies, plumber of Santa Cruz, will be a candidate for the office of city commissioner of that city at the coming election. Davies has never held public office and declares he has been arrested three times on technical charges for refusing to take out a plumber's license and believes that his efficient experience for him to try to be a commissioner.

A bill barring motor trucks other than those transporting perishables from using state highways on Sundays, Memorial Day, July 4 and Labor Day between the hours of 11 A. M. and 11 P. M. was passed by a wide margin in the Washington State Senate last week. The measure will now go to the house for action. Motor trucks carrying sweet milk, soft fruits, dry milk cans, berries, fresh vegetables and other perishables may use the highway during the hours prohibited to other uses by trucks.

A bill introduced into the New York State Senate by Minority Leader James C. McGowan, of New York City, to amend the public welfare law by providing that all wage earners above the age of 21 unemployed due to business depression shall be given two weeks work each week on public work at \$5 per day from the date of the passage of the bill until May 15. It is estimated that it would cost \$8,000,000 a week to give employment in this way to the estimated 800,000 out of work in New York State. The measure is sponsored by the State Federation of Labor.

A five-day work week for all city officials and all city employees, including employees of contractors engaged on public work, is provided for in a charter amendment to be voted in Seattle on March 10. If this ordinance passes, Seattle will be the first city in the United States to put municipal employees on a five-day work basis.

Officials of the Red River Lumber Co. at Westwood, Calif., have issued denial of persistent rumors that the concern has been eliminating Mexicans from its employment rolls. The company's statement is that the employment of Mexican labor for certain classes of work has been found satisfactory, particularly in that they do not move from one job to another frequently, thereby lessening the labor turnover. The company's policy is stated as being not to employ outside Mexicans during the period of drought, but to take care of those Mexican workmen who had been in the woodwork for some time and had been found satisfactory as workers.

Seattle's city council has refused, 6 to 2, to submit to popular vote, on March 10, an amendment giving the City Light Department jurisdiction over its own engineering work, relieving the city's engineering department of that task. Referendum petitions forcing a popular vote are being circulated, City Light charging that lack of co-ordination between the two offices resulted in a \$1,000,000 loss when the Hixson power house, on the Skagit River development, was not completed by the time the dam was ready for use. On this score, the Citizens' Municipal Utilities Protective League, petition circulator, declares the engineering department is "either patently inefficient, or deliberately obstructing the light department's development work."

A home modernizing bureau to aid those who may desire to build or to remodel homes has been organized at Whittier, Calif., was headquarters at 136 North Greenleaf Ave., with Irwin Dunbar, architect, in charge. The Chamber of Commerce sponsored the movement and more than 50 manufacturers and business firms represented in Whittier have co-operated.

Frank G. White, chief engineer for the State Harbor Commission, in a communication forwarded to Building Trades Council, states that "in connection with the preparation of specifications for new construction projects, we are now attempting to prepare a paragraph dealing with the five-day week plan, which will satisfactorily meet the situation which exists at this time."

The San Francisco Bay District Council of Carpenters is on record endorsing the Inman bill, providing for the payment of the highest prevailing wage scale on all work contracted for and performed by the State of California. The council has also endorsed the Maloney bill, which provides that on all state work only citizens of the United States and bona-fide residents of California shall be employed.

A comprehensive plan for relief of the unemployed is announced by the Arizona state highway department in reporting that highway construction involving expenditure of more than \$4,000,000 would be under way before July 1. About \$2,000,000 will be expended the next 90 days, when double shifts will be worked on the projects, the report indicated.

Woodland Plumbing & Supply Co., will shortly open new quarters at 427 Main St., Woodland. With the opening of the new building the firm name will be changed to Woodland Plumbing & Hardware Company.

G. W. Price Pump & Engine Co., 1360 Polson St., are making alterations and additions to provide for increasing the capacity of their manufacturing plant. A new one-story Class C brick addition is being erected at a cost exceeding \$11,000. The new structure will provide 9500 additional feet of shop space.

TRADE NOTES

Van Fleet Frear Co., San Francisco dealer for Armstrong's cork products, has been appointed exclusive distributor of the United States Rubber Company's line of rubber flooring.

Western Plumbing Supply Co., Ltd., of San Francisco, capitalized for \$50,000, has been incorporated. Directors are Maurice D. L. Fuller, Charles A. Ruggles and Dudley F. Miller.

J. S. Spelman has been named general manager of the Cutter Mill and Lumber Co., of Sacramento. It is announced by Curtis H. Cutter, president of the concern. Spelman was formerly connected with the Superior Building-Loan Association of Sacramento and continued with that association when it merged last April with the Mercantile Building-Loan Association of Oakland.

Maydwell and Hartzell, Inc., with offices in San Francisco, Los Angeles and Seattle, have been appointed by the Lapp Insulator Company to represent the Lapp line in the states of California, Oregon, Washington, Idaho, Nevada and Arizona. The Lapp Insulator Company manufactures a complete line of suspension and pin type insulators and a wide variety of special porcelain pieces. In addition recently they have developed the fog type insulator design which has been used extensively on the Pacific Coast.

Guy A. Barker, former sales manager of the power products department, Pacific Division, Johns-Manville Sales Corp., with headquarters in San Francisco on February became sales manager of the power products department in the company's Western division with headquarters in Chicago. Barker was an active worker in the San Francisco Electrical Development League, a member of its board of directors for two years, and served as chairman of its program committee.

Hig Electric Ventilating Company, through its Pacific Coast manager, Andrew G. Grear of Los Angeles, announces the opening of a branch office in San Francisco with E. D. Price in charge. The San Francisco branch will cover the Northern California section. Price was formerly associated with Westinghouse Electric & Supply Company in Chicago in charge of its ventilation business and for five years prior to that was a ventilation specialist for the Westinghouse Electric Company in Los Angeles.

H. Bruce Wiscomb of Los Angeles, representative of the Harbor Plywood Corp., of the Pacific Northwest, announces his territory has been extended to cover the entire state of California.

December shipments of steel-furniture stock goods, as reported to the Bureau of the Census by 34 manufacturers in the "business group," totaled \$1,890,179, as compared with \$1,672,518 in November, \$2,781,610 in December, 1929, \$3,117,139 in December, 1928, and \$2,740,692 in December, 1927. December shipments of shelving, compiled from reports of 16 companies, totaled \$468,232, as compared with \$457,659 in November, \$856,011 in December, 1929, \$791,376 in December, 1928, and \$577,910 in December, 1927.

HERE—THERE EVERYWHERE

R. H. Thompson, city engineer, of Seattle, has endorsed a movement to have a commission of capable engineers make a survey regarding the feasibility, practicability and costs of the proposed tunnel through the Cascade Mountains. Thompson would have the governor name a state commission to study the project inasmuch as money for the work must come from the state.

Julian W. Silliman has been elected president of the Stanford Chapter, American Society of Civil Engineers, succeeding Larry Bryan. Other officers are: Cyril Thomas, vice-president; Tom Bedford, treasurer; J. G. Sutherland and Michael Kerner, secretaries.

Daniel R. Waggoner was elected president of the Santa Barbara Builders' Exchange for 1931. Fred C. White was elected vice-president; W. W. Fitkin, treasurer; C. W. Carpenter, secretary, and S. J. McKinnon was retained as executive secretary and general manager. Directors for 1931 are: H. L. Sweeney, Carl S. Peterson, Albert E. Schuster, W. S. Fultz, H. G. Meyer, W. W. Fitkin, D. R. Wagner, R. M. Cameron, Ivor Davies, M. Maitland and C. W. Carpenter.

Lumbermen's Post No. 403, American Legion, has been formed in Los Angeles with the following temporary officers: J. A. Brush of the W. L. Cooper Lumber Co., acting commander; Lloyd Cole of Hammond Lumber Company, acting adjutant, and J. L. Cunningham of the Hayward Lumber & Investment Co., acting finance officer.

Chas. F. Biolotti was re-elected president of the San Francisco Machinery Dealers' Association at the annual meeting of that organization at the St. Francis Yacht Club last Thursday evening. Other officials continued in office were H. L. Terwilliger, vice-president; J. E. Stott, treasurer; Joseph Shaddick, secretary, and Miss N. G. Lawrence, assistant secretary.

Twenty firms comprising Tacoma's Electrical Contractors and Dealers Association have adopted a seven-hour working day to relieve unemployment among electrical workers.

George C. Foss, electrical contractor of Sacramento, has been installed as president of the Sacramento Exchange Club.

E. R. Cherryman, 50, building contractor of Oakland, was killed in that city last Sunday night when run down by an automobile at E 12th St. and 4th Ave.

John Thomas, manager of the Los Angeles office of the Coos Bay Lumber Company, has been transferred to the San Francisco office of the company.

J. W. Farrington, 57, president of the Carpenters' Union of Sacramento, committed suicide Feb. 7 by firing a shotgun into his head. Financial difficulties, caused by three years of unemployment, are said to have prompted the act.

PACIFIC COAST BUILDING SLACKENS DURING JANUARY

The following is a tabulation of building permit totals for Pacific Coast states during the month of January, 1931, as reported by building department executives in the cities listed, together with the January, 1930, listing for comparative purposes:

CALIFORNIA

City	No.	Cost	January 1930
Alameda	26	\$ 104,721	\$ 24,795
Alhambra	54	89,375	170,120
Anaheim		47,550	120,870

SLIGHT CHANGE IN UNIT BUILDING COSTS OF YEAR AGO

The following schedule of unit building costs as prepared by a committee appointed by the Southern California Chapter, Associated General Contractors of America, Los Angeles, is corrected to January, 1931.

In using these figures, it should be remembered that application of an average estimate of cost to any given locality is always open to question, even where prices are uniform—which they never are. For these reasons the committee has provided a range of costs in each item which should cover all ordinary conditions, but cannot be compared with cost estimates based upon a detailed study of plans and specifications, as regularly made by a general contractor. The costs published herewith do not include the architect's fee.

TOTAL UNIT COSTS PER CUBIC FOOT

Class A Steel Frame Buildings Class A Reinforced Concrete Buildings

Office buildings	\$.42 to \$.64	Office buildings	\$.40 to \$.60
Hotels50 to .62	Hotels45 to .61
Apartments45 to .60	Apartments44 to .60
Lofts18 to .33	Lofts15 to .29
Warehouses16 to .26	Warehouses14 to .24

Class C Brick Buildings

Stores on ground, apts. above, cubic foot	\$.19 to \$.39
Apartments, cubic foot25 to .50
Hotels, cubic foot22 to .45
Lofts, cubic foot15 to .29
Warehouses, cubic foot14 to .24
One-story garages, per square foot	1.40 to 2.00
One-story stores, per square foot	1.65 to 3.00
Two-story stores, apartments above, per sq. ft. of floor area	2.40 to 3.80

NOTE: Volume (cu. ft.) is average floor area times the total height from lowest basement floor to high point of roof.

TOTAL UNIT COSTS PER SQUARE FOOT Frame Buildings

California Houses:		Residences, two-story*:	
Good	\$2.40 to \$3.05	Good	\$5.50 to \$7.80
Medium	1.90 to 2.65	Medium	3.80 to 4.75
Cheap	1.20 to 2.30	Cheap	2.10 to 3.05

Bungalow Court—Frame Apartments

Special	\$4.65 to \$5.90	Medium	\$3.05 to \$1.25
Good	3.60 to 5.00	Cheap	2.50 to 3.80

Frame Buildings

Bungalows, special	\$4.50 to \$5.50	Outbuildings, frame:	
Good	3.95 to 2.50	Good	\$1.70 to \$2.40
Medium	2.25 to 3.95	Medium	1.35 to 2.00
Cheap	2.00 to 2.50	Cheap85 to 1.50

Four-flat Buildings, Two-story*

Special	\$4.55 to \$5.90	Medium	\$3.10 to \$4.05
Good	3.75 to 4.65	Cheap	2.60 to 3.70

*Use ground floor area for determining estimated cost.

Corrugated Iron Buildings, all kinds

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco. (Phone SUtter 1684).

R-2303-S. ENGINEER, preferably mechanical or chemical graduate, with 5 to 10 years' experience, including considerable application of thermodynamics to solution of heat exchange problems in oil refinery equipment. Must have executive ability. Apply by letter with details of experience, references and photo. Salary \$200-\$250 per month to start. Location, Northern California.

R-2467-S. STENOGRAPHER, with several years' experience in office of paving contractor or department of public works, where she would have learned street improvement assessment and tax problems. Must have executive ability. Salary depends on experience. Apply by letter. Location, San Francisco.

K-340-W - 251-S. REFRIGERATION Engineer who has had at least five years' experience in the preparation of specifications and designs, installation and servicing of refrigerating and ice-making plants up to 100-ton capacity. Single man about 30 preferred. Four-year contract with option of renewal if services are satisfactory. Salary about \$200 a month and traveling expenses to and from China. Apply by letter. Headquarters, New York.

R-3470-S. MECHANICAL ENGINEER preferably over 25 years old, with several years experience as production engineer in the equipment of company manufacturing farm machinery. Only this experience considered. Man will be given full charge of small shop and office after demonstration of ability to produce results. Must be willing to accept small salary to start. Apply by letter with full details of experience, etc. Location, San Francisco.

W-1873-C-S. CONSULTING ENGINEER knowing garage operation, garage equipment, car repair, car utilization and manufacture of parts for repairs, to advise on equipment for service stations and repair shops, on schedule of operation of trucks, busses and passenger cars and to organize maintenance and repair of trucks, busses and passenger cars of various makes. Experience in responsible charge of fleet operation and maintenance of trucks and busses desirable. Contract for one year, renewable. Salary open. One-third to one-half in paper money for living expenses, balance in United States money to American bank. Applications only by letter which will be forwarded to Moscow for decision. Location, Russia.

W-2251 ENGINEER with technical engineering training, to act as sales engineer in connection with the sale and demonstration of a new type of mine drill. Should preferably have some experience and familiarity with explosives. Reasonable drawing account, plus a bonus, depending upon the results accomplished. Apply by letter. Hdqrs., Midwest.

Foot Note: In a careful study of unit building costs for the current period, the Committee found only a slight change in unit costs for buildings as compared with costs of one year ago. While several materials and labor advanced in price, certain materials were correspondingly reduced, thus rendering a very slight change in the unit costs.

The Brown Instrument Company, Philadelphia, has ready for distribution catalog No. 46 covering indicating and recording tachometers in various models and the electric generators used in their operation.

APARTMENTS

Plans Being Prepared.
APARTMENTS Cost, \$175,000
STOCKTON, San Joaquin Co., Cal.
 No. 945 N. El Dorado Street.
 Rebuild apartment (destroyed by fire)
 5-story and basement brick structure.
 Owner—Senator Frank S. Boggs, 925
 N. El Dorado St., Stockton.
 Architect—Joseph Losekann, 1215 W.
 Harding St., Stockton.
 Wrecking will be started shortly.

Contract Awarded.
APARTMENTS Cost, \$60,000
OAKLAND, Alameda Co., Cal. SW
 50th St. and Shattuck Ave.
 Three-story and basement frame and
 stucco apartments (57 apts).
 Owner—R. E. Bartlett, Rock Lane,
 Berkeley.
 Architect—Not Given.
 Contractor—N. E. Rockwell, 349 38th
 St., Oakland.

Plans Complete.
APARTMENTS Cost, \$15,000
SAN FRANCISCO, SW 43rd Avenue
 and Geary Street.
 Two-story and basement frame and
 stucco apartments (4 apts).
 Owner—Mrs. E. Petersen, 1625 Bal-
 boa Street.
 Architect—A. H. Larsen, 447 Sutter
 Street.

To Be Done By Day's Work.
APARTMENTS Cost, \$60,000
SAN FRANCISCO, E Laguna Street
 E Waller.
 Six-story and basement class C con-
 crete apartments (18 apts.)
 Owner and Builder—W. Van Herrick,
 50 Laguna Street.
 Engineer—J. G. Little, 251 Kearny St.

Plans Being Figured.
APARTMENTS Cost, \$15,000
SAN FRANCISCO, SW Forty-third
 Ave. and Geary St.
 Two-story and basement frame and
 stucco apartments (4 apts).
 Owner—Mrs. E. Petersen, 1625 Bal-
 boa St., San Francisco.
 Architect—A. H. Larsen, 447 Sutter
 St., San Francisco.
 Bids will be opened about Feb. 18.

Preparing Plans.
APARTMENTS Cost, \$100,000
LOS ANGELES, Cal. 1407-09½ North
 Catalina Street.
 Four-story and basement class C brick
 apartments (60x122-ft.).
 Owner—Ann Litchfield.
 Architect—Theodore R. Jacobs, 1281
 Sunset Blvd., Los Angeles.

BONDS

ONTARIO, San Bernardino Co., Cal.
 —Ontario elementary school district will
 hold an election on February 24 at
 which time it is proposed to vote
 bonds of \$55,000 for new elementary
 schools in Ontario. Program includes
 erection of new building at corner of
 Sultana and Sixth Sts., additions to
 the Lincoln school, enlarge San An-
 tonio school, remodel a portion of
 South Euclid school and enlarge junior
 high school. Architect not retained.

SAN MATEO, San Mateo Co., Cal.
 —Trustees of the San Mateo Union
 High School District have decided to

postpone the proposed \$300,000 bond
 election for at least six months due
 to protests of the Burlingame Tax-
 payers Association and residents of
 Lomita Park.

COVINA, Los Angeles Co., Cal.—
 Covina Union High School District de-
 feated a \$75,000 bond issue on Feb.
 3. Proceeds were to have been used
 for the construction of an additional
 unit at the Covina high school. It
 is not likely the proposition will be
 resubmitted to the electorate this
 year.

PORTERVILLE, Tulare Co., Cal.—
 City council voted to include an \$80,-
 000 bond issue on the municipal ballot
 at the April election to finance the
 erection of a city hall and fire sta-
 tion at Main and Cleveland Sts. Ar-
 chitect W. D. Coates Jr., 626 Rowell
 Bldg., Fresno, has prepared sketches
 for the structure.

CARMEL, Monterey Co., Cal.—Pro-
 ceedings will be started shortly by
 the trustees of the Sunset School
 District for a bond election to secure
 funds to finance erection of additional
 units at the present school plant.

BRENTWOOD, Contra Costa Co.,
 Cal.—Election will be held March 10
 in the Brentwood-Deer Valley School
 District to vote bonds of \$15,000 to
 finance erection of an addition to the
 present school.

the "arena type" and will provide seating for between 600 and 650 persons. A new heating and ventilating system will be installed and the interior finished in "Celotex".

WHARVES AND DOCKS

Plans To Be Prepared.
WHARF Cost, \$—
LAKEPORT, Lake Co., Cal. Foot of Third Street.
Municipal Wharf (steel girder type; concrete piles; 60x90-ft.)
Owner—City of Lakeport.
Engineer—Not Selected.
A concrete abutment, 40 ft. long is contemplated in connection with the wharf.

MISCELLANEOUS CONSTRUCTION

Plans Being Prepared.
BUILDING Cost, \$50,000
FRESNO, Fresno Co., Cal. Belmont Memorial Park (Tellman Ave.)
Steel, concrete and brick pipe organ building.
Owner—Belmont Memorial Park Assn. Architect—C. E. Butner, Cory Bldg., Fresno.

The building is designed as a tower or campanile 80 feet high. The lower portion will be a memorial hall and will house the console of the organ. This floor will house the air conditioning and humidifying equipment as well as equipment to carry the programs to all sections of the cemetery and other parts of the city by remote control.

The second floor will contain the pipes of the organ in an insulated chamber, with humidity and heat control to assure perfect tone effects. Above this floor will be the microphone room and broadcasting apparatus placed behind large, paneled grills.

The top story will be of sufficient height and size to contain a set of carillon chimes. Artistic lighting effects also will be provided.

The base of the tower will be terraced to accommodate outdoor memorial services.

The building will be constructed of steel, concrete and brick, with a terra cotta roof.

Construction Started.
MAUSOLEUM Cost, \$150,000
LONG BEACH, Los Angeles Co., Cal. Cherry Ave. and San Antonio St.
Two and three-story and basement reinforced concrete mausoleum (1000 crypts) (275x50 feet).
Owner—Sunnyside Mausoleum Co., 47 American Ave., Long Beach.
Architect—Clarence L. Jay, 871 E. Washington St., Pasadena.

SUISUN, Solano Co., Cal. — City Engineer Warren S. Egbert has completed plans and bids have been ordered received by the city trustees for roofing the municipal reservoir. Plans are obtainable from the city clerk.

SAN FRANCISCO—Until February 20, P. M., bids will be received by U. S. Forest Service, Ferry Bldg., for furnishing approximately 200 tons of structural bridge steel. Specifications obtainable from the above office on or after February 10. Deposit of \$5 required for specifications which is refundable.

EL NIDO, Merced Co., Cal.—Until February 25, 2:30 P. M., bids will be received by A. L. Cowell, secretary, El Nido Irrigation District, to fur-

nish approximately:
(a) 122,000 board feet of redwood lumber;
(b) 95,000 board feet Oregon pine lumber;
f.o.b. cars at Merced or f.o.b. trucks at El Nido. G. E. Winton, chief engineer for district, Shaffer Bldg., Merced. Certified check 5% required with bid. Spec. obtainable from engineer.

MISCELLANEOUS SUPPLIES AND MATERIALS

OAKLAND, Cal.—Western Aluminum Foundries, Inc., 760 23rd Ave., a \$1.97 per button and \$0.1345 per marker, awarded contract by city council to furnish traffic buttons and traffic lane markers during the balance of the fiscal year.

BUSINESS OPPORTUNITIES

Names and addresses of persons or firms concerned in the following opportunities will be furnished on request to Business Opportunity Department, Daily Pacific Builder, 5 Mission St., San Francisco, oh phone GA 8744.

20825—Wooden Electric Fixture Delmold, Germany. Manufacturers' wooden electric fixtures wish to enter into business relations with merchant of this state. Catalogue on file.

20826—Crystal Glass, San Francisco. German manufacturer of crystal glass seeks local connections.

20829—Hardwood. San Francisco Corporation inquires for list of hardwood lumber buyers who may be interested in importing this commodity from U. S. S. R.

20833—Pencil Slats Cedar. Seattle Wash. Firm asks to be put in touch with exporters of pencil slats ced to Japan.

20835—Amusement Concessions Mexico, D. F. Firm wishes to be put in touch with manufacturers amusement concessions such as a pear on our beaches.

20836—Mineral White Ground. Monterey, Mexico. Exporters of mineral white ground, used in the manufacture of paints, seek a local market. Sample on file.

20837—Representation. San Francisco. Party in San Francisco for several days is desirous of representing local manufacturers in Vancouver.

Mr. A. Cheney, President, The Cheney Co., 359 Main St., Winchester, Mass., desires to contact with architects and sheet metal contractors or manufacturers agents to handle new line.

Carl S. Petzer, Vice-President, The Scott & Petzer Co., West 11th St. and Locust Ave., Cleveland, Ohio, manufacturer of household appliance is seeking an exclusive distributor for San Francisco territory.

Mr. R. B. Woodard, 1649 Beverly Boulevard, Hollywood, Calif., is in a position to take on a good specialty line for Southern California.

E. J. Roche, 609 City National Bank Bldg., 26 O'Farrell St., San Francisco, wishes to connect with firm in Rocky Mountain Region, in the merchandising, advertising or financial field.

Mr. H. H. Oldfield, Com-For-Lator Co., 1044 So. Olive St., Inglewood, Calif., is interested in securing jobber distribution in San Francisco for fan-blown electric heaters.

Mr. M. E. Tice, Ice-O-Matic Division, Williams Oil-O-Matic Heating Corp., Bloomington, Ill., wishes to connect radio distributors with view to establishing connection for refrigerator.

Mr. J. G. Riser, P. O. Box 1411, Salt Lake City, Utah, is desirous of communicating with any business houses in this locality wishing representation or distribution in Salt Lake Territory.

Mr. E. E. Pratt, California Commodity Exchange, Inc., Board of Trade Bldg., Los Angeles, manufacturer of sporting goods, particularly tennis supplies, is desirous of connecting live representative of the salesman type to represent them in this territory.

Mr. V. P. McMurdo, Westwood Agent, Luckenbach Co., 201 California St., San Francisco, has particulars of a new firm producing other clay or ground other which is desirous of securing connection on Pacific Coast.

Fred Wright, 967 Russ Bldg., San Francisco, is interested in securing representation for Eastern concern here on the Pacific Coast.

Mr. H. F. Hatch, Haskell & Hatch Co., 47 Union Ave., Boston, Mass., is interested in contacting with an energetic and responsible concern to handle their products in San Francisco territory on a dealer basis.

Mr. G. Graves, Geoffrey Bros. & Co., San Pedro and Bassett Sts., San Jose, Calif., offers facilities of his office for firm in this city wishing to secure representation in that territory.

Mr. F. C. Siese, Commercial Service Corp., 74 N. Fourth St., Milwaukee, Wis., is looking for some worth while commodities to handle.

P. N. Smelling, The Marine Mfg. & Supply Co., 158 South St., New York City, manufacturers of marine machinery, desires to secure representative in this territory.

Morton D. Wainwright, 37 Floyd St., Withrop, Mass., has available facilities for concerns in this territory desiring representation.

The Hunt Co., Milltown, N. J., wishes to negotiate with manufacturers agent covering the automobile repair shop and accessory trade, for representation.

Acme Sheet Metal Works, formerly located at 155 East Santa Clara St., announces removal to larger quarters at 167-169 East Santa Clara St. In addition to engaging in a general sheet metal business the company will carry a complete line of hardware.

"BALES OF STATISTICS" SHOW THAT BUSINESS WILL IMPROVE

Marc A. Rose, editor of The Business Week, in addressing the mid-winter meeting of the National Association of Real Estate Boards in Chicago, said there are indications that the tide of business generally is beginning to rise and beyond this there are fundamental factors now at work that will bring new activity to the real estate market. He bases his improvement predictions on observations and "bales of statistics" gathered by him and ten other business publications covering finance, banking, construction, the power and light industry and other economic life.

Speaking on the economic factors favorable to real estate at present, he gave his audience an imposing list. Chief among the factors emphasized was "evidence" that the Federal Reserve Board intent to liberalize its policy, and signs that in an indirect way the system may be sending a flow of money into banks, thus vigorously stimulating business.

He deplored the constant "prattle" about checks and balances. "Money," he said during the past year, said that the long term funds required for realty development have been neither cheap nor abundant, but that they are getting so now.

He told the realtors that while business in general has been hovering about 90 per cent of normal, that 80 per cent of our normal is more business than all the rest of the world transacts, and that there are unexplored fields right here for real estate and many other businesses.

Scoring talk of overproduction as a lazy dodging of the issue, Mr. Rose asserted that there can be no overproduction when thousands of people in this country are without homes, when several million homes have no bathtubs, and when one million homes within reach of power stations, are without electricity.

Here he listed the provision of home financing plans for \$2,000 families a major potential source of new demands for real estate, pointing out that 40 per cent of the American people have incomes of this amount or less, and yet have the desire for home ownership.

"The country needs Ford volume in decent housing at a price the average man can afford," said Mr. Rose.

"A certain amount of activity must go on. We must eat, we must be warmed, we must be housed somehow, we must be clothed. Business doubles about every twenty years. Interruptions are only interruptions."

Tracing the depression history of American credit, the speaker described how the stock market drew important funds from production, construction and trade, sent up interest rates, then the avalanche. Commercial paper interest rates went down and down. Now the curve of building volume is merely the curve of money rates inverted. Or it was until 1929. And in normal times the price of long term money will move exactly with the price of short term money. But in 1929 long term funds behaved in a highly unstatistical manner, and refused to go to work, and a perfectly beautiful chart of interest rate movements was spoiled. Short term money grew cheaper and cheaper. Long term money grew more and more expensive because, for the first time for years and years, greatly shattered public confidence kept these funds from going anywhere.

He pointed out that many finance building projects with four to six months paper. Building is financed with long term mortgages. At present new public confidence is shown in a really "encouraging" improvement in the bond mar-

ket, provides a promising omen for a new availability of long term financing. He said:

"There are five factors that point to general business improvement, and as real estate is so closely yoked to business, these should please the real estate man.

1. Sentiment is better. This is most important of all.
2. There is plenty of money. It is idle; it hates to be unemployed. With long term borrowing expensive, there can be no revival of business. Long term money is getting cheaper.

3. Retail stores are exhausted. Things are wearing out. Replacement buying is beginning.

4. Consumer purchasing power will be better. The dollar buys more today.

5. Highly important is the attitude of the Federal Reserve Banks. There is evidence that the Board intends to liberalize its policy. If the system pumped money into the other banks, its pressure would improve the bond market, and there would stimulate business. There are signs * * * that this may be taking place."

Based on the above, which Mr. Rose said was supported by "bales of statistics, acres of charts, intimate survey of scores of industries," and which is the consensus of opinion of the most powerful and best-known of the prophets of business, the predictions for 1931 are:

Business will improve during the first quarter. March, April and May should show an upturn to anyone. We shall have a summer let-down which may discourage the faint-hearted. Business should turn upward again in the fall, this fall peak should be higher than the spring peak.

Business will taper off at the year-end; will be brisk in the spring of 1932—above normal.

"Cost of building is lower," said Mr. Rose. "This is more important to those who handle commercial property than to those who handle residential. It would be well to build now for commercial firms that will be in business for some time. A man buys a home usually not when it is cheap but when he can afford to buy one; demand is accumulating in this field; many families are impatiently waiting, but they must be sure of their jobs, must accumulate savings before they will buy. That time I firmly believe is near."

Mr. Rose also outlined the merits of devising a plan by which potential realty buyers could secure information on earnings on commercial offerings. He said that there is something about publicity that brings about confidence.

San Francisco will be one of nine regional headquarters of Frigidaire Corporation in key cities of the country under the 1931 program of this General Motors subsidiary, it is announced by J. L. Conover, who will manage the new headquarters. Offices have been opened at 808 Sharon Bldg., and all sales activity of Frigidaire in San Francisco, Spokane, Portland, Seattle, Los Angeles and Oakland, will be directed from San Francisco.

The city of Inglewood has made application to the Pacific Coast Building Officials' Conference for permission to use the Uniform Building Code prepared by the conference. It will be adopted with some modifications to meet local conditions, it is stated by Garfield Leftwich, building inspector of Inglewood.

Engineering News Section

BRIDGES

SAN MATEO-SANTA CLARA COUNTIES, Cal.—Until March 4, 2 P. M., bids will be received by the State Highway Commission to construct a reinforced concrete girder bridge across San Francisco Creek at Palo Alto, consisting of three 27-foot spans on concrete pile bents.

See call for bids under official proposal section in this issue.

SANTA BARBARA COUNTY, Cal.—Until March 12 P. M., bids will be received by the State Highway Commission to construct a reinforced concrete arch bridge across Gaviota Creek consisting of one 100-foot span.

See call for bids under official proposal section in this issue.

SANTA CRUZ, Santa Cruz Co., Cal.—C. N. Swenson, 1395 Shasta St., San Jose, at \$42,497.00 submitted low bid to county supervisors to construct Chittenden Underpass in the Pajaro Road District. Following is a complete list of lump bids received, all being taken under advisement:

C. N. Swenson, San Jose	\$42,497.05
F. W. Wallstrom Co., Watsonville	44,421.53
Granite Const. Co., Watsonville	44,781.25
Thermotite Const. Co., San Jose	45,915.50
Healy-Thibault Const. Co., S. F.	50,985.90
Leo. Cardwell Co., Santa Cruz	52,024.70
J. L. Connor, Monterey	52,274.50
A. W. Kitchen, S. F.	52,497.25
J. L. Eodenhamer, Oakland	52,982.82
Frederickson & Watson, Oakland	55,978.10

Merritt Chapman & Scott, San Pedro	55,171.60
M. B. McGowan, S. F.	55,199.00
Frank Bryant, S. F.	57,687.46
W. H. Hauser	59,431.05

A complete list of the unit bids received on this project will be published shortly. Construction involves:

- (1) 38,500 cu. yds. roadway excavation without classification;
- (2) 800 cu. yds. structure excavation without classification;
- (3) 8000 sq. yds. subgrade;
- (4) 125 cu. yds. class A concrete pavement, in place;
- (5) 10 cu. yds. class A do;
- (6) 7 cu. yds. class A concrete sidewalk, in place;
- (7) 1740 cu. yds. class B concrete abutments, in place;
- (8) 6000 lbs. reinf. steel, in place;
- (9) 166 lin. ft. corr. metal culverts, 12-in. dia., in place;
- (10) 150 lin. ft. corr. metal culverts, 18-in. dia., in place;
- (11) 516 lin. ft. corr. metal culverts, 24-in. dia., in place.

LOS ANGELES COUNTY, Calif.—Owl Truck Co., Inc., 117 N. Tamarind St., Compton, at \$27,365 awarded contract by State Highway Commission for the following bridge work in Los Angeles County:

Bridge over Topanica Creek, about 4 miles north of Santa Monica, to be widened by constructing eight 27-foot timber spans on pile bents adjoining the existing concrete bridge and grading and surfacing approaches with asphalt concrete.

Bridge over Las Flores Creek about 7 miles north of Santa Monica, to be

widened by constructing two 26-foot reinforced concrete girder spans on a concrete pier and concrete abutments and grading and surfacing approaches with asphalt concrete.

SAN FRANCISCO—Until February 20, 2 P. M., bids will be received by U. S. Forest Service, Ferry Bldg., for furnishing approximately 500 tons of structural bridge steel. Specifications obtainable from the above office on or after February 10. Deposit of \$5 required for specifications which is returnable.

SONORA, Tulumne Co., Cal.—John L. Whitely, Inc., Jamestown, at \$552 awarded contract by city council to reconstruct bridge over the Sonora Creek in Stockton Street. Other bids: D. R. Hanify, \$925; Perry L. Whitt, Columbia, \$1,115.

STOCKTON, San Joaquin Co., Cal.—E. R. Stokes, 933 S. Sierra Nevada St., Stockton, at \$12,227.25 submitted low bid to county supervisors to construct subway near Forrest Lake on the Lower Sacramento road in Road District No. 2 under the tracks of the Southern Pacific Railroad; estimated cost \$26,000. Railroad is to pay a portion of the cost. Project involves:

- (a) 530 cu. yds. excavation (earth unclassified);
- (b) 80 cu. yds. old concrete to be removed;
- (c) 227 cu. yds. reinforced concrete (1:1½:3);
- (d) 315 cu. yds. mass concrete;
- (e) 70 cu. yds. deck concrete;
- (f) 70 lin. ft. concrete handrail;
- (g) 41,000 lbs. reinforced steel;
- (h) drainage equipment;
- (i) Lighting and wiring.

Complete list of bids as follows:

E. R. Stokes	\$12,227.25
John Hackman	15,728.40
Ed. Reilly	16,272.40
C. W. Wood	17,356.50
Nelson Bros.	17,452.00
W. H. Hauser	17,635.50
Frederickson & Watson	17,743.50
Geo. J. Ulrich Const. Co.	17,846.50
J. W. Hoops	18,481.00
C. Emil Force	19,784.00
Lindgren-Svinsterton, Inc.	19,793.55
Ely & Bean	24,004.00
Engstrom Const. Co.	25,120.00

SAN MATEO AND SANTA CLARA COUNTIES, Cal.—As previously reported bids will be received March 4, 2:00 P. M., by State Commission to construct reinforced concrete girder bridge across San Francisco Creek at Palo Alto, consisting of three 27-ft. spans on concrete pile bents. Project involves:

- (1) 220 cu. yds. struc. excav.
- (2) 2350 lin. ft. reinf. concr. piles;
- (3) 403 cu. yds. class A Portland cement concrete;
- (4) 8 cu. yds. class E Portland cement concrete;
- (5) 95,000 lbs. reinforced steel;
- (6) 770 lbs. phosphor bronze expansion plates;
- (7) 1 lot, miscellaneous items of work.

MERCED COUNTY, Cal.—California Department of Public Works, Division of Highways, has applied to the Rail-

road Commission for authority to construct an overhead crossing of 11 tracks of The Atchison, Topeka and Santa Fe Railway at Bradley, abt. 2½ miles east of Merced in Merced County. It is stated that the existing grade crossing is dangerous to traffic, and upon completion of the overhead structure carrying the highway over the railroad tracks a feet west of the existing grade crossing, that the latter shall be abandoned and effectively closed to travel. The estimated cost of the proposed overhead crossing is \$184,000, which to be paid by the Highway Division and the Santa Fe in equal shares under an agreement tentatively reached by the principals.

DREDGING, HARBOR WORKS & EXCAVATION

RICHMOND, Contra Costa Co., Cal.—Franks Construction Co., 260 California St., San Francisco, submitted low bid to U. S. Engineer Office, Custom House, San Francisco, for dredging in Richmond Harbor at 1 cents per cu. yd. Project involves 525,500 cu. yds. San Francisco Bridge Co., San Francisco, was the only other bidder at 15.1 cents per cu. yd. Engineer's estimate was 12.38 cents, bids held under advisement.

YUBA CITY, Sutter Co., Cal.—Until February 27, 2 p. m., bids will be received by J. B. Heiken, secretary Joint Highway District No. 12, for making earth fill approaches to Robbins Bridge at Town of Robbins in the Central Canal Bridge, 7½ miles north of the City of Yuba City. Project involves 600 cubic yards of earth fill. Certified check 10% payable secretary required with bid. Plans obtainable from secretary, 2nd and C Sts., Yuba City.

SAN DIEGO, Cal.—Until 11 A. M. Feb. 24, bids will be received by Public Works Officer, 11th Naval District, San Diego, to construct quai wall at the Naval Operating Base (Destroyer Base), San Diego. Sp. No. 6400. The work consists of quai wall approx. 764 ft. long and 40 ft. high. Plans obtainable from Commandant, Headquarters, 11th Naval District, San Diego, upon deposit \$10. DeWitt C. Webb, Captain (CE) U. S. N. Public Works Officer.

IRRIGATION PROJECTS

EL NIDO, Merced Co., Cal.—Until Feb. 25, 2 P. M., bids will be received by A. L. Cowell, secretary, Nido Irrigation District, for the construction of a canal system and appurtenant works, involving:

- (a) small dam across Duck Slough;
- (b) Main canal approx. 11.2 miles long involving 111,000 cu. yds. excavation;
- (c) Distribution laterals aggregating in length approx. 18.6 miles with approx. 88,000 cu. yds. excavation;
- (d) Necessary siphons, drops, stop gates, bridges and other structure.

(e) Lining of approx. 64,100 sq. ft. of main canal with concrete.

(f) Drilling of from 1 to 3 drainage wells and furnishing complete pumping equipment for same.

Permit 557, required with bid. G. E. Watson, chief engineer for district, Shaffer Bldg., Merced. Plans obtainable from engineer.

CALIFORNIA -- Following permits were granted by the State Department of Public Works, Division of Water Resources, during the month of January, 1931, to appropriate water:

Permit 3643, Application 6412 (Yuba Co.) Issued to Maurice E. Lawton, Starbuck Valley, Calif., January 12, 1931, for 6,654 cubic foot per second from Stickler Spring for power purposes. Est. cost \$500.

Per. 3644, App. 2787 (Inyo Co.) The Southern Sierras Power Co., Riverdale, 2900 ac. ft. per annum from Middle and North Forks Bishop Creek, for power purposes. Est. cost \$60,000.

Per. 3645, App. 4543 (Inyo Co.) The Southern Sierras Power Co., 2,000 ac. ft. per annum from Green Lake Creek for power purposes. Est. cost \$10,000.

Per. 3646, App. 2788 (Inyo Co.) Nevada California Power Co., Riverdale, for 2999 ac. ft. per annum from Middle and North Forks of Bishop Creek for power purposes. Est. cost \$50,000.

Per. 3647, App. 6805 (Mercedino Co.) L. A. Howie, Redwood Valley, for 0.16 cu. ft. per sec. from Redwood Valley Creek for irrigation and domestic purposes on 12.9 acres. Est. cost \$500.

Per. 3648, App. 6725 (Monterey Co.) S. R. and C. C. Ayala, King City, for 0.17 cu. ft. per sec. from Carrizo spring for irrigation and domestic purposes on 15 acres. Est. cost \$2500.

Per. 3649, App. 6805 (Mercedino Co.) L. A. Howie, Redwood Valley, 0.16 cu. ft. per sec. from Redwood Valley Creek for irrigation and domestic purposes on 12.9 acres. Est. cost \$500.

Per. 3650, App. 6762 (Mariposa Co.) J. F. Fiske, Cutterville, 0.011 cu. ft. per sec. from unnamed spring for irrigation and domestic purposes on 4 acres. Est. cost \$100.

Per. 3651, App. 6589 (Ventura Co.) Julius Olander, Fresno, 0.029 cu. ft. per second from unnamed spring for mining purposes. Est. cost \$100.

Per. 3652, App. 6522 (San Joaquin, Stanislaus and Calaveras Counties) Linden Irrigation District., Stockton, for 40,000 ac. ft. per annum and 154 cu. ft. per sec. from Calaveras river for irrigation and domestic purposes on 12,330 acres. Est. cost \$105,000.

CALIFORNIA -- Following applications filed with the State Department of Public Works, Division of Water Resources, during the month of January, 1931, for permits to appropriate water:

Application 6857 (Kern and Ventura Counties) Florence L. Cuddy, Lebec, Kern County, for 100,000 g.p.d. from three unnamed spring tributary to San Joaquin Valley for domestic purposes. Est. cost \$5,000.

App. 6858 (Mono Co.) T. A. Somma, care J. T. Sharp, attorney, Alturas, for 0.02 c.f.s. from an unnamed spring tributary to Pit River, for domestic purposes.

App. 6859 (El Dorado Co.) Magnus Jensen, Camino, Cal., 0.025 c.f.s. from Fill Canyon tributary to Little Iowa Canyon, Big Iowa Canyon, South Fork American River, for irrigation and domestic purposes on 3 acres. Est. cost \$200.

App. 6860 (Inyo Co.) W. C. Pancher, Bishop, 2.5 c.f.s. from Green Creek tributary to Bishop Creek and Owens River, for power purposes, 1.6-hp. Est. cost \$250.

App. 6861 (Inyo Co.) W. C. Pancher, Bishop, 0.047 c.f.s. from Green Creek tributary to Bishop Creek and Owens River, for domestic purposes. Est. cost \$265.

App. 6862 (Nevada Co.) J. K. Williams, Nevada City, for 2.0 c.f.s. from Windup Canyon tributary to Greenhorn Creek, thence Bear River, for mining purposes. Est. cost \$150.

App. 6863 (Lake Co.) Leavitt M. McQuesten, care Division of Pomology University Farm, Davis, 0.31 c.f.s. from Clover Creek tributary to Middle Creek, for irrigation purposes on 25 acres. Est. cost \$250.

App. 6864 (San Diego Co.) C. M. Gray, care G. H. Stone, attorney, San Diego Trust & Savings Bldg., San Diego, 0.06 c.f.s. from Castro Creek tributary to San Luis Rey River, for irrigation purposes on 6 acres. Est. cost \$170.

App. 6865 (Alameda Co.) Sisters of the Sacred Name of Jesus and Mary, a corporation, care Hatfield, Wood & Kilkenny, attorneys, Chancery Bldg., San Francisco, for 0.1 c.f.s. from Laurel Spring and Sulphur Spring tributary to Agua Caliente creek, for domestic purposes. Est. cost \$800.

App. 6866 (Alameda Co.) Sisters of the Sacred Name of Jesus and Mary, a corporation, care Hatfield, Wood & Kilkenny, attorneys, Chancery Bldg., San Francisco, 0.2 c.f.s. and 45 ac. ft. per annum, from Laurel Creek and Arroyo Agua Caliente Creek tributary to San Francisco Bay, for irrigation and domestic (stockwater) purposes on 25 acres and 200 head of stock. Est. cost, \$525.

App. 6867 (Riverside Co.) F. W. Sheffield and Chas. Harnack, care F. W. Sheffield, Redlands, 3.0 c.f.s. from Falls Creek, for irrigation and domestic purposes on 150 acres. Est. cost, \$3200.

App. 6868 (Inyo Co.) H. J. Halliday, Bishop, 0.0035 c.f.s. or approximately 2260 gals. per day from small unnamed stream tributary to Bishop Creek and Owens River, for domestic and recreational purposes. Est. cost, \$155.

App. 6869 (Siskiyou County) Elliott Creek Mines, Inc., care W. L. Cobb, Pres., Box 608, Roseburg, Oregon, for 0.5 c.f.s. from Elliott Creek tributary to Applegate River, for power purposes.

App. 6870 (Nevada County) Charles Thompson, care J. F. Hoffman, agent Box 307, Grass Valley, 50 c.f.s. from (a) Steepholow Creek and (b) South Fork of Little Greenhorn Creek tributary to Bear River, for mining and domestic purposes. Est. cost \$50.

App. 6871 (Trinity Co.) S. G. Shepard and associates, Penny, Trinity Co., 30 c.f.s. from Slide Creek (and Emigrant Creek at its mouth) tributary to New Creek, for mining purposes.

App. 6872 (Plumas Co.) Max Paul Boehme, 809 Kearny St., San Francisco, 1.0 c.f.s. from Mill Creek tributary to East Branch of the N Fork of Bear River, for irrigation and domestic purposes on 6 acres.

App. 6873 (Humboldt Co.) Thos. N. McDaniel, 312 Byington Bldg., Reno, Nev., 150 c.f.s. from Willow Creek tributary to Trinity river, for mining and domestic purposes.

App. 6874 (Plumas Co.) Oscar T. Schumacher, Quincy, 1.0 c.f.s. from unnamed spring tributary to Dixon Creek, thence Nelson Creek, thence Middle Fork Feather River, for mining and domestic purposes on 20 acres. Est. cost \$350.

App. 6875 (San Diego Co.) C. D. Eddy and F. I. Eddy, care C. D. Eddy, 1132 20th Street, National City, 0.25 c.f.s. from spring in unnamed stream tributary to Sweetwater River, for irrigation and domestic purposes on 20 acres. Est. cost \$500.

App. 6876 (El Dorado Co.) Mrs. Bertha Stover, care A. E. Carlette, 1279 Temple St., Los Angeles, one-third miner's inch c.f.s. from School Spring tributary to Little Iowa Creek, thence S. Fork American River, for irrigation and domestic purposes on 8 acres. Est. cost \$75.

App. 6877 (San Joaquin Co.) J. C. Blossom and F. M. Lamb, care Ohm & Raab, 109 E. Weber Ave., Stockton, 15.15 c.f.s. from North Canal tributary to Middle River Branch of San Joaquin River, for irrigation purposes on 1,212.6 acres. Est. cost \$4,000.

App. 6878 (Del Norte Co.) W. G. Munry, P. O., Box 378, Crescent City, 1,000 gals. per day from Kelly's Gulch tributary to Smith River, for irrigation and domestic purposes on 2 acres.

App. 6879 (Albion Co.) Edith Raymer, Bishop, 0.005 c.f.s. or, approx. 3250 g.p.d. from Convict Creek tributary to Owens River, for domestic purposes. Est. cost \$500.

App. 6880 (Tulare Co.) H. J. Gardner, Box 666, Springville, 1.0 c.f.s. from Bear Creek tributary to Tule River for irrigation and domestic purposes on 24 acres. Est. cost \$500.

App. 6881 (Orange Co.) Mrs. C. C. Graybill, Box 43, Ladera Ranch, 2.60 gals. per day from spring tributary to North Fork San Juan Creek, for domestic purposes.

App. 6882 (Los Angeles Co.) C. A. and Wm. H. Cruzan, care C. A. Cruzan, 915 E. 10th St., Los Angeles, 2.0 c.f.s., 4.0 c.f.s. from each of two springs from (1) Warm Spring and (2) Whiskey Spring tributary to Mint Canyon, thence Santa Clara River, for mining purposes. Est. cost \$5,000.

STREET LIGHTING SYSTEMS

EUREKA, Humboldt Co., Cal.—Until February 17, bids will be received by A. Walter Kildale, city clerk (423) to install cast iron lighting standards, together with underground system, in Fourth Street from Broadway to J St. Estimated cost \$15,000, 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk. E. D. Gardner, city engineer.

LIVERMORE, Alameda Co., Cal.—City trustees seek contracts to type of standard in connection with electrolier system to be installed in the business district. L. E. Wright is city engineer.

MACHINERY AND EQUIPMENT

SACRAMENTO, Cal.—Sparks-Wells Machinery Co., at \$2,443 awarded contract by city council to furnish one Buffalo Springfield 8-ton road roller for street department.

OAKLAND, Cal.—Rix Co., Inc., 400 Fourth St., San Francisco, at \$1,655 awarded contract by East Bay Municipal Utility District to furnish one air compressor for El Cerrito Pumping Plant.

MADERA, Madera Co., Cal.—L. A. Rose, 227 Main St., Porterville, at \$2,952.50, awarded contract by county supervisors to furnish one new 25-Monarch Tractor f. o. b. Madera, including allowance for old tractor no longer required by the county.

OAKLAND, Cal.—Brooks Motor Co., 820 S. 8th St., El Cerrito, at \$4,366.06 awarded contract by East Bay Municipal Utility District to furnish six motor cars and to Connell & Shumate, 480 23rd St., Richmond, at \$2,008.15 to furnish five Chevrolet cars. Both bids allowed for turn-ins.

LOS ANGELES, Calif.—Until 11 A. M., February 17, bids will be received by the Los Angeles city purchasing agent, Thomas Oughton, for furnishing two gasoline engine driven air compressors, f. o. b. Ducommun St., under Spec. No. 2332. Allowance on one used machine to be stated.

LOS GATOS, Santa Clara Co., Cal.—Until March 2, 8 P. M., bids will be received by Donna M. Winning, city clerk, to furnish and deliver one steel closed cab and steel body, mounted on 103½-inch wheelbase; 4-cylinder; 1½-ton capacity chassis; equipped with front bumper, 4-hydraulic shock absorbers, etc., for use of Street Department. Further information obtainable from city clerk.

DELANO, Kern Co., Calif.—Until February 20, 7 P. M., bids will be received by G. A. Swanson, clerk, Delano Union Grammar School District, to furnish school bus of at least 25-hp. with a seating capacity of not less than 50 grammar school pupils. Certified check or bidder's bond 10% payable to clerk required with bid. Spec. obtainable from the clerk at Delano.

SAN FRANCISCO.—Until February 24, 10 A. M., under Schedule No. 928-31-204, bids will be received by Quartermaster Supply Officer, General Depot, Fort Mason, to furnish and deliver: One Industrial Tractor, four-wheel, gasoline propelled. To be equipped with 24-hp. motor, four speeds forward and one reverse speed. Solid rubber tires, size of rear tires approx. 40-in. by 5-in., front tires approx. 24-in. by 3½-in. To be complete with front and rear bumpers; securely attached and braced, for shunting railroad cars. Equipped with standard automatic drawbar coupler. To be equal and similar to Model "47" Industrial Tractor as manufactured by Allis-Chalmers Mfg. Co., Milwaukee, Wis.

WANTED

TO PURCHASE used Linn Tractor Truck. Lidlal-Wiley, Inc., 208 Columbia St., Seattle Washington.

SAN FRANCISCO.—Until February 24, 10 A. M., under Schedule No. 928-31-204, bids will be received by Quartermaster Supply Officer, General Depot, Fort Mason, to furnish and deliver: Four heavy duty trailers, 5-ton capacity, steel frame, wood platform, approx. size 4-ft. x 10-ft., height of platform not to exceed 24-in. With 4 cast steel wheels with roller bearings.

EUREKA, Humboldt Co., Cal.—Until February 17, 8 P. M., bids will be received by A. Walter Kildale, city clerk, to furnish light automobile sedan, 4- or 6-cylinder, fully equipped, for Police Department. Specification obtainable from city clerk.

CHULA VISTA, San Diego Co., Cal.—Until 7:30 P. M., Feb. 24, bids will be received by city council for the purchase of one dump truck, of about 3 tons capacity. Bidders are to submit specifications. C. S. Timmons, city clerk.

SACRAMENTO, Cal.—Until February 19, 8:15 P. M., bids will be received by H. G. Denton, city clerk, to furnish elevating and screening equipment for Sacramento Filtration Plant. Certified check 5% payable to City Controller required with bid. Plans on file in office of clerk. Fred J. Klaus, city engineer.

SAN FRANCISCO.—Until February 24, 10 A. M., under Schedule No. 928-31-204, bids will be received by Quartermaster Supply Officer, General Depot, Fort Mason, to furnish and deliver: One tying lifting truck without battery, 3000-lb. capacity; spur gear drive, four wheel steer, two-wheel drive, two speeds forward and reverse. Weight without battery approx. 1750 lbs. Dimensions overall

approx. 33-in. wide x 93-in. long. To be complete with all accessories for operation except to be without battery. To be equal and similar to Model No. TLGL as manufactured by the Automatic Trans. Co., Inc., Buffalo, N. Y.

FIRE EQUIPMENT

NEWPORT BEACH, Orange Co., Cal.—City council orders advertising for bids for fire equipment, including two fire engines, to cost about \$18,000.

OAKLAND, Calif.—Pioneer Rubber Mills at \$5,745 awarded contract by city council to furnish and deliver 14,000 ft. of fire hose. Complete list of unit bids received published in issue of January 30.

PACIFIC GROVE, Monterey Co., Calif.—American-LaFrance Fire Engine Co., at \$13,150 awarded contract by city council to furnish and deliver one 750-gallon pumping engine and hose car with booster tank.

LOS ANGELES, Cal.—Pioneer Rubber Mills, 822 E. 3rd St., was awarded contract by city purchasing agent, at \$5c ft. for 30,000 ft. 1½-in. fire hose. Spec. No. 2315.

RESERVOIRS AND DAMS

HAYWARD, Alameda Co., Cal.—Until February 18, 8 p. m., bids will be received by M. B. Templeton, city clerk, to construct reinforced concrete reservoir of 1,000,000 gals. capacity to be constructed in Upper D. St. The project follows:

- (1) 29.49 M.B.M. lumber;
- (2) 12,670 sq. ft. 4-ply tar and gravel roofing;
- (3) 4,850 cu. yds. excavation;
- (4) 193.7 cu. yds. concrete in footings;
- (5) 283 cu. yds. concrete in floor, walls and columns;
- (6) 48,400 lbs. reinf. steel;
- (7) 1,270 lbs. asphalt sealing compound;
- (8) 201 1/4 in. 8-in. vit. clay B & S pipe;
- (9) 590 sq. ft. 1½-in. wire screening;
- (10) 920 lin. ft. 12-in. C. I. supply main (to be laid only);
- (11) 2 concrete valve boxes;
- (12) 1 12-in. C. I. inlet pipe installed;
- (13) 1 8-in. C. I. overflow pipe;
- (14) 1 8-in. washout C. I. pipe;
- (15) 1 wooden indicator.

NOTE: All C. I. pipe, specials and valves furnished by the city. Certified check 10% payable to city required with bid. Plans obtainable from clerk or City Engineer Jesse B. Holly on deposit of \$5. returnable.

SARATOGA, Santa Clara Co., Cal.—San Jose Water Works, San Jose, has appropriated \$224,110 for improvements for the current year including the construction of a 1,000,000 gallon reinforced concrete reservoir above Saratoga. It is proposed to commence construction within 30 days.

ORANGE, Orange Co., Cal.—As previously reported, bids will be received February 26, 2 P. M., by Serrano Irrigation District, to construct earth fill dam in Santiago Canyon. A. Kempkey, engineer, Hobart Bldg., San Francisco. Following is a complete listing of the quantity of materials involved in the project:

(a) The excavation of approximately 124,000 cubic yards of material in stripping the foundation of the dam.

(b) The excavation of approximately

6740 cubic yards of material for the cut-off trenches of the dam.

(c) The placing and compacting of approximately 350,000 cubic yards of selected material to form the dam.

(d) The placing of approximately 6400 cubic yards of concrete slab facing on the upstream face of the dam.

(e) The construction of a reinforced concrete outlet tower and conduit.

(f) The construction of a spillway and wasteway channel involving the excavation of approximately 43,000 cubic yards of material and the placing of approximately 2900 cubic yards of reinforced concrete.

(g) The supplying of approximately 13,500 barrels of Portland cement.

(h) The supplying of approximately 690 tons of reinforcing steel.

(i) The supplying of cast iron body, brass mounted, non-rising stem gate valves.

(j) The supplying of cast iron thimbles, nipples, pipe railing, metal fixtures, anchor bolts, lead gaskets, valve stem extensions, ladders, etc.

(k) The supplying of flanged 36-in. diameter by one-fourth inch welded steel pipe.

(l) The clearing of the flooded and marginal area of the reservoir embracing approximately 750 acres.

The work will be sub-divided and proposals will be received for the separate portions thereof under eight schedules as follows:

SCHEDULE NO. 1

This schedule will embrace the major portion of the construction work. There will be included thereunder Items (a), (b), (c), (d), (e), (f), as above set forth.

SCHEDULE NO. 2

This schedule will cover the furnishing of Portland Cement, Item (g), as above set forth.

SCHEDULE NO. 3

This schedule will cover the furnishing of reinforcing steel, Item (h), as above set forth.

SCHEDULE NO. 4

This schedule will cover the furnishing of gate valves, Item (i), as above set forth.

SCHEDULE NO. 5

This schedule will cover the supplying of cast iron and wrought iron work, Item (j), as above set forth.

SCHEDULE NO. 6

This schedule will cover the supplying of 36-in. dia. by one-fourth inch welded steel pipe, Item (k), as above set forth.

SCHEDULE NO. 7

This schedule will cover the supplying of one cast iron Venturi meter and one manometer tube.

SCHEDULE NO. 8

This schedule will cover the clearing of the flooded and marginal area of the reservoir, Item (l), as above set forth.

A certified check in the amount of \$70,000 must accompany the bid.

Attention is particularly directed to the fact that the proposals covering Schedules Nos. 1, 2, 3, 4, 5, 6, 7 and 8, will be embodied in a single contract and that separate contracts will not be let covering any one of them.

Plans and specifications can be seen at the office of the board of directors of Serrano Irrigation District at the residence of F. H. Collins, Secretary of said District, located on Prospect Avenue between Lincoln Street and East Collins Avenue, one mile north and two miles east of the City of Orange, Orange County, California, and at the office of the

Board of Directors of Carpenter Irregular District at the residence of D. S. Smiley, Secretary of said District, located on the west side of Alameda Street one mile north of the town of El Modena, Orange County, California, and copies of said plans and specifications and proposal forms may be secured at either of said offices and at the office of A. Kempker, Consulting Engineer, Hobart Bldg., San Francisco, Calif.

The proposed dam will be 130 ft. in height, 1450 ft. in length, with a 602-ft. thickness at the base tapering at the top to 10 ft. The structure will have concrete spillway and will provide a 25,000-acre ft. storage reservoir.

PIPE LINES, WELLS, ETC.

CORCORAN, Kings Co., Cal.—Until February 16, 8 P. M., bids will be received by James C. Condon, city clerk to drill well in Lot 8, Block 8. Bids are wanted under the following items: First: Drill a test hole and log formations for a water well to a depth of not to exceed 400 ft. or at any lesser depth depending on formations.

Second: If said formations are acceptable to said City, to ream said test hole for 12-in. casing to a depth of 120 ft. and 10-in. casing to a depth of not to exceed 300 ft.

Third: Furnish and set screw casing, 45-lb. 12-in. C. I. casing, and 33-lb. 10-in. O. D. casing; casing to be perforated as may be directed by City. Alternate Bid: Ream test hole, furnish and set 12-in. 45-lb. I. D. screw casing to a depth of not to exceed 400 ft. and to be perforated as may be directed by said City.

SANTA CLARA, Santa Clara Co., Cal.—Until February 16, 8:00 P. M., bids will be received by A. J. Cronin, city clerk, to drill one well approximately 300 feet in depth, either 16 or 14 inches in diameter. Certified check 10% payable to city required with bid. Specifications on file in office of clerk.

SEWERS AND SEWAGE DISPOSAL PLANTS

SAN LUIS OBISPO, San Luis Obispo Co., Cal.—City Council has authorized proceedings for sewer in Erizolara St. bet. Mill and Nipomo Sts. Est. cost, \$3380.

BERKELEY, Alameda Co., Cal.—As previously reported, bids will be received by Florence E. Turner, city clerk, February 17, to construct sewer in Cragmont Ave. and Rock Lane from Regal Road to Poplar St. Project involves:

- (1) 150 ft. 18-in. vitrified pipe;
- (2) 420 ft. 15-in. do;
- (3) 570 ft. 12-in. do;
- (4) 65 ft. 10-in. do;
- (5) 25 ft. 8-in. do;
- (6) 2 catchbasins;
- (7) 4 manholes.

Certified check 10% payable to city required with bid. Plans on file in office of clerk and obtainable from Harry Goodridge, city engineer.

SAN JOSE, Santa Clara Co., Cal.—City council declares intention (5297) to sewer portions of Willow St., Prevost St., and Delmas Ave., involving vit. pipe san. sewers; brick manholes; vit. wye branches, house laterals and flushing inlets. 1911 Act. Hearing Feb. 24. John J. Lynch, city clerk. Wm. Popp, city engineer.

STOCKTON, San Joaquin Co., Cal.—County Surveyor Julius Mantney preparing plans for sewer system at county fair grounds.

HILLSBORO, Clatsop Co., Ore.—Cal.—Oakland Sewer Const. Co., 10-003 82nd Avenue, Oakland, at \$9,100 awarded contract by town trustees to construct storm sewer system, consisting of 12-in., 15-in., 18-in. and 21-in. concrete pipe sewers; brick manholes and catchbasins.

BERKELEY, Alameda Co., Cal.—Until February 17, 10 A. M., bids will be received by Florence E. Turner, city clerk, to construct sewer in Cragmont Ave. and Rock Lane from Regal Road to Poplar St. Certified check 10 per cent payable to city required with bid. Plans on file in office of clerk and obtainable from City Engineer Harry Goodridge on deposit of \$10, returnable.

OAKLAND, Cal.—J. M. Calhoun, 2294 E. 19th St., Oakland, submitted low bid to the City Council at \$318.50 to construct sewer in south half of 6th St. from Castro St. easterly, involving:

- (1) 115 lin. ft. 8-in. pipe sewer;
- (2) 1 12-inch lampole;
- (3) 1 8-inch lampole;
- (4) 3 wye branches.

Following is a complete list of the bids and units received:

(A) J. M. Calhoun, Oakland	\$318.50	(B)	(C)
(B) Thomas P. Geary, Oakland	\$325.27	(D)	(E)
(C) Oakland Sewer Const. Co.,	\$458.99	(F)	(G)
(A)	(B)	(C)	(D)
(1)	\$ 2.40	\$ 2.75	\$ 3.54
(2)	25.00	17.00	35.00
(3)	16.00	17.00	15.00
(4)	5.00	2.00	5.00

All bids held under advisement.

TULARE, Tulare Co., Cal.—Pollard Bros., Ltd., Kingsburg, at 50c foot submitted low bid to city council to furnish 2,500 ft. 18-in. hydraulic concrete sewer pipe. Complete list of bids follows, all being taken under advisement until February 11:

Pollard Brothers	\$50
R. Tonkens, Tulare	52
P. W. Ebbins, Tulare	65
Tulare Cement Co., Tulare	62
Jourdan Cone Pipe Co., Selma	65

OAKLAND, Cal.—City Eng. Walter Fricke preparing plans for storm sewers in 41st Street and portions of Broadway and the Ridge Road.

SANTA CLARA, Santa Clara Co., Cal.—City trustees have purchased a 236-acre site on which to locate the sewer farm including the erection of a modern treating plant similar to that now in operation at Lodi. The cost is placed at \$100,000.

MODESTO, Stanislaus Co., Cal.—H. A. Truesdale at \$2,424.13 awarded contract by city council to furnish vitrified clay sewer pipe, as follows:

- 1650 ft. 18-in. sewer pipe;
- 160 ft. 15-in. do;
- 1070 ft. 12-in. do.

This pipe will be installed under the supervision of Frank J. Rossi, city engineer, as a means to relieve unemployment in Modesto.

SANTA MARIA, Santa Barbara Co., Cal.—City Supt. Harry Nell, Jr., and City Engineer Percy Peterson have been authorized by the Santa Maria city council to prepare plans for extensions to the city's sewage system in N Broadway; estimated cost \$15,000.

LOS ANGELES, Cal.—F. F. Greenfield Co., 1808 W 7th St., reports that the contract for sludge tanks in connection with the two new sludge digestion units costing \$106,056 for the County Sanitation District No. 2, has been awarded to the Truscon Steel Co., 5480 E. Slauson Ave. The excavating contract was awarded to Pacific Crane Service Co., 3128 E 26th St. A. K. Warren, 200 Law Bldg., chief engineer.

WATER WORKS

SANTA BARBARA, Calif.—Stanley McCormick estate has started preliminary work on new water system and a new sewer system at River Rock, Montecito, to cost \$100,000.

SAN JOSE, Santa Clara Co., Cal.—Until March 2, bids will be received by Henry A. Pfister, county clerk, for the purchase of the \$27,500 bond issue of County Water Works District No. 1, proceeds of the sale to finance construction of a water distributing system to be supplied from Spring Valley lines, Palo Alto's municipal water system and domestic wells. Plans are being completed by the Burns-McDonnell-Smith Engineering Co., Western Pacific Bldg., Los Angeles.

MADERA, Madera Co., Cal.—Pacific States Cast Iron Pipe Co., 111 Sutter St., San Francisco, awarded contract by city council to furnish and deliver pipe and fittings, as follows:

- 2,500 ft. 6-in. c. i. pipe, 150 lbs. working pressure;
- 8 6x6x6x6 bell and end crosses;
- 1 8x6x6x6 bell end cross;
- 4 6x6x6 bell end tees;
- 14 6x6 reducers, 6-inch spigot, 4-in. bell;
- 4 6-inch plugs;
- 4 joining material for 200 6-inch joints.

Pacific States Company \$2,385.60
A.I.T. (McWane) Pre-cast 2,698.25
National C. I. Pipe Co. 2,394.75
C. S. Pipe & Foundry Co. 2,480.80
American C. I. Pipe Co. 2,493.10
Universal C. I. Pipe Co. 2,685.40
Last four named bidders did not include jointing material.

SAN JOSE, Santa Clara Co., Cal.—San Jose Water Works has provided \$224,110 in 1931 budget to finance improvements to system, including \$88,706 for distributing system, \$18,306 on transmission system, \$21,104 on pumping equipment, and \$47,249 on its service, meters, etc.

LOS ANGELES, Cal.—Until 11 A. M., February 17, bids will be received by the Los Angeles purchasing agent, Thomas Oughton, for furnishing 2500 2-in. bronze curb cocks; Spec. No. 2337.

Bids, same date, for furnishing two 24-in. automatic check valves for use on the discharge of centrifugal pumps handling 40 cu. ft. per second against a head of 225 ft. Spec. No. 2331.

- LOMPOC, Cal.—Standard Pipe & Supply Co., 441 Santa Fe Ave., Vernon, submitted the low bid to the Lompoc City Council Feb. 3, for furnishing black steel pipe, as follows:
- (1) 2800 ft. 8.625-in. O. D. by 8.249-in. I. D., lap weld black steel pipe, plain end beveled 45 deg. for welding, asphaltum dipped, weight 16.94 lbs. per ft.;
- (2) 100 ft. 8-in. O. D. by 7.628-in. I. D., lap weld black steel pipe, plain end, beveled 45 deg. for welding, asphaltum dipped, weight 15.522 lbs. per ft.;
- (3) 600 ft. 7-in. O. D. by 6.652-in. I. D., lap weld black steel pipe, plain end, beveled 45 deg. for welding, asphaltum dipped, weight 12.685 lbs. per ft.

The unit prices were: (1) 67.5c ft.; (2) 69c ft.; (3) 55c ft.

GRIDLEY, Butte Co., Calif.—City Clerk J. L. Lewis announces time for asking new bids to furnish and install diesel engine in connection with the municipal light and water plant is indefinite.

SACRAMENTO, Cal.—Until Feb. 19, bids will be received by H. G. Denton, city clerk, to furnish and install elevating and screening equipment at the Municipal Filtration Plant; est. cost, \$1200. Funds for this work are available in the current budget. Plans on file in office of clerk Fred J. Klaus is city engineer.

NEVADA CITY, Nevada Co., Cal.—City trustees contemplate special election to decide on using the \$10,000 swimming pool bond fund for street work and extensions to the sewer system, \$5,000 to be applied to each activity.

PLAYGROUNDS & PARKS

SAN FRANCISCO — See "Streets and Highways," this issue. Bonds of \$2,500,000 voted by City and County of San Francisco for bond and playground and street improvements.

PALO ALTO, Santa Clara Co., Cal.—A group of citizens have submitted proposal to the city council offering to underwrite a sum of \$25,000 to purchase on the lease contract basis, the old Palo Alto Hospital site, and reserve the site as a decorative park and not as a children's playground with apparatus. Taken under advisement.

STREETS AND HIGHWAYS

CLARK COUNTY, Nev.—Triangle Rock and Gravel Co., 2548 G St., San Bernardino, Calif., at \$68,875 awarded contract by Nevada State Highway Commission to reconstruct 19.68 miles of highway in Clark County between the west slope of Mormon Mesa and the Lower Virgin river bridge. Project involves: 77,000 cu. yds. excav., incl. 50,544 yds. cut, overhaul; 12.55 miles prepare subgrade and shoulders; 6.73 miles prepare shoulders; 48,700 cu. yds. crushed rock or crushed gravel in place; 1000 cu. yds. crushed rock or crushed gravel in stockpile; 12 cu. yds. class A concrete; 17 cu. yds. class B concrete; 45 lin. ft. remove 18-in. corr. metal pipe; 24 lin. ft. remove 24-in. corr. metal pipe; 244 lin. ft. 15-in. corr. metal pipe; 552 lin. ft. 18-in. do.; 522 lin. ft. 24-in. do.; 46 lin. ft. 30-in. do., and 34 lin. ft. 36-in. corr. metal pipe, to be installed; 4 corr. metal pipe culvert extensions; 74 demolish headwalls; 85 monuments; furnish water equipment; 728 M. gals. apply water; 1024 lin. ft. remove wooden guard rail; 1128 lin. ft. standard timber guard railing in place; 2 posts for Federal Aid markers; 19.68 miles finish roadway.

State will furnish corrugated metal pipe culverts and hand couplings, f. o. b. cars, Arrowhead siding, Clark County.

PALO ALTO, Santa Clara Co., Cal.—Bids received by city council Feb. 9, under Resolution of Intention No. 98 to improve Palo Alto Ave., Hole, Pope and Dana Sts., etc., were returned to bidders unopened and new bids have been asked to be opened February 25, 7:30 P. M. The action was taken due to the fact that one-half block in Embarcadero Road, bet. High and Alma Sts., had been eliminated from the project. The work involves construction of vit. sewer mains and connections, brick manholes, c. i. water mains and gals., iron water pipe connections, fire hydrants, gas mains, concrete storm sewer pipe, cem. conc. pavement, sidewalks, etc. 1011 Act. Certified check 10% payable to city required with bid. Plans obtainable from J. F. Byxbee Jr., city engineer.

SANTA ROSA, Sonoma Co., Cal.—J. V. Galbraith, 314 7th St., Petaluma, at \$39,780.00 awarded contract by county supervisors for concrete pavement on the Petaluma to Point Reyes Highway, Section E in the Second Supervisorial District, involving:

- (1) 5500 cu. yds. excavation;
- (2) 245 cu. yds. concrete in pavement
- (3) 70 cu. yds. concrete in structure and headwalls;
- (4) 4000 lbs. reinforcing steel;
- (5) 400 lin. ft. 12-in. corr. metal pipe
- (6) 44 lin. ft. 18-in. do.;
- (7) 20 lin. ft. 24-in. do.;
- (8) 32 lin. ft. 30-in. do.;
- (9) 16 lin. ft. 36-in. do.;

Unit bids of three low bidders follow:

(a) J. V. Galbraith	\$29,786.60
(b) Bodenhamer Const. Co., Oakland	30,400.75
(c) W. C. Colley, Berkeley ..	30,528.80
(A) (B) (C)	

	(A)	(B)	(C)

(9)	2.50	.50	1.00

SAN RAFAEL, Marin Co., Cal.—County Surveyor Rodney Messner making surveys for county road from city limits of San Rafael to the Kentfield-Greenbrae road.

SAN LUIS OBISPO, San Luis Obispo Co., Cal.—City council declares intention (346) to improve portions of Pacific street involving grading; 6-inch and 8-inch hydraulic cem. concrete pavement; hyd. cem. conc. curbs and walks. 1911 Act. Bond Act 1915. Hearing March 2. Callie M. John, city clerk.

SONORA, Tuolumne Co., Cal.—Until February 19, bids will be received by county supervisors to extend the Big Hill-Longeway road, east of Columbia, for a distance of 13,367 feet. Road will be 20 ft. wide with maximum grade of 6%. Specifications on file in office of county clerk and obtainable from county surveyor.

COLUSA COUNTY, Cal.—Until February 18, 2 P. M., bids will be received by C. H. Whitmore, district engineer, State Highway Commission, 502 State Office Bldg., Sacramento, to surface with pit-run gravel, 1.5 miles between Maxwell and the north boundary.

SIERRA COUNTY, Cal.—C. R. Adams, Nevada City, at \$123.15 awarded contract by U. S. Bureau of Public Roads, San Francisco, for grading and placing crushed rock surfacing on Section No. 3, Shady

Flat-Downieville Route No. 26, Yuba Pass National Forest Highway, 4.114 miles in length. Unit bid follows:

148,000 cu. yds. excav. unchairs,	\$60
265 cu. yds. excav. structure,	\$1
278,320 sta. yds. overhaul,	\$0.2
6,700 cu. yds. crushed rock surf,	\$1.90
400 cu. yds. supp. crushed rock,	\$1.90
400 m. gals. watering,	\$2.
41 cu. yds. class A concrete,	\$35.
31 cu. yds. class B concrete,	\$35.
3,120 lbs. reinf. steel,	\$98.
282 cement rubble masonry,	\$12.
1,148 18-in. C. M. pipe in place,	\$2.
226 24-in. do.,	\$3.
350 cu. yds. hand placed embankment,	\$2.
118 30-in. do.,	\$4.
280 cu. yds. hand placed rip-rap,	\$2.50.
136 right-of-way monuments,	\$3

SANTA BARBARA, Calif.—City council plans the resurfacing of Canyon Ferido St. from Santa Barbara St. to Milpas St.; est. cost \$52,600. Will involve only pavement, the curbs and walks having been eliminated from the plans.

SAN LUIS OBISPO COUNTY, Cal.—Until March 4, 2 P. M., bids will be received by the State Highway Commission to grade and pave with asphalt concrete 9.8 miles between 1.5 miles south of Santa Margarita and Atascadero.

See call for bids under official proposal section in this issue.

SAN BERNARDINO COUNTY, Cal.—Until March 4, 2 P. M., bids will be received by the State Highway Commission to grade and surface with oil treated crushed gravel or stone, 13.8 miles between Cronise Valley and 6 miles west of Baker.

See call for bids under official proposal section in this issue.

SAN FRANCISCO — E. J. Treacy, Call Bldg., at \$1,257.14 awarded contract by Board of Public Works to improve crossing of Oxford and Sullivan Sts., involving:

- (a) 63 lin. ft. armored concrete curb;
- (b) 3 brick catchbasins;
- (c) 90 lin. ft. 10-in. V.C.P. culvert;
- (d) 284 sq. ft. 1-course conc. sidewalk;

(e) 328 sq. ft. asphalt concrete pavement, 2-in. asphalt conc. surface on 6-in. class F concrete base.

Unit bid follows:
(a) \$1; (b) \$80; (c) \$1; (d) \$15; (e) \$25; total \$1,257.14.

SAN ANSELMO, Marin Co., Cal.—Until February 21, 8 P. M., bids will be received by F. D. Burrows, city clerk (96) to improve Essex Street, involving grading, hyd. cem. concrete curbs, gutters and headwall hyd. ce-

Utah Construction Co., Ogden, Utah 98,523
Contract for culverts in connection with this project awarded to Flanigan Warehouse Co., Reno, Nev., at \$1489.91.

ELECTRICAL MEN OF DENVER SIGN LABOR AGREEMENT

With one exception, all electrical contractors of Denver who have been employing members of Local Union No. 68, I.E.E.W., have signed a new labor agreement prepared by a joint committee of the two organizations.

While wage scales have remained the same, union members will benefit by old age pensions and disability and death insurance provided by the employer in a group plan. Contractors have benefited by rule changes concerning overtime work, allowing shifts to use labor-saving devices, method of arbitration differences which may arise, and the observance by union men of installing wiring under requirements of an Electrical Approval Bureau. The latter furnishes both customer and contractor protection.

If no change is made within two years, the agreement automatically is in effect from year to year. Changes may be made by a joint committee.

SAN JOSE REPORTS \$216,810 BUILDING TOTAL IN JANUARY

M. C. Woodruff, city building inspector of San Jose, reports the issuance of 52 permits during the month of January for improvements involving an expenditure of \$216,810. The total, however, includes a subway project for the Southern Pacific Railroad, estimated to cost \$140,000.

The following is a segregated report of the January activities as compiled by Woodruff:

NEW WORK

Grand Totals	52	\$216,810

Blanche Reggiardo will operate from 20 Ninth St. under the firm name of California Building Maintenance Co.

PLANS STARTED FOR UNION DEPOT

San Francisco's need for a great union depot which will serve as a terminal for present and future transcontinental railroads, interstate and interurban stage services to be located in a central part of San Francisco will be studied by a special committee of the San Francisco Chamber of Commerce to be appointed soon by President Roland W. Cutler. This was the decision of the Board of Directors of the local Chamber yesterday with the added suggestion that the City Planning Commission be invited to participate in a fact-finding survey to be started in the near future.

Necessity for a centralized station as a logical preparation for the handling of vastly increased passenger traffic during coming years was emphasized by the recent decision of the Interstate Commerce Commission granting permission to the Western Pacific Railroad to enter San Francisco, the coming of the Northern Pacific, prospects for bay bridges to the east and north and the rapid growth of stage and bus facilities.

In studying the possibility of a union depot the Chamber of Commerce will assume the leadership. It was said by members of the Board in one of the most important development projects confronting San Francisco in many years. President Cutler will announce the personnel of the Chamber's committee within the next few days, he said.

REPUBLIC STEEL REPORTS NET LOSS

The Republic Steel Corporation, formed early last year by the merger of several steel companies, had a net loss of \$3,522,003.20 for 1930, according to an announcement of company officials at Youngstown, Ohio. The loss is equivalent to \$1.74 a share on the 1,989,212 shares of common stock outstanding.

The announcement said that the firm included operating and subsidiary companies for the first three months of 1930 so that it embraces a full year's operations of all units in Republic.

CASEY COMPANY INSURES EMPLOYEES

H. E. Casey Company, building material dealers of San Mateo, has put into effect a combined plan of group life and group accident and sickness insurance which provides for employees of the company with a large amount of life insurance protection and weekly benefits in the event of non-occupational accidents and sickness. The Travelers Insurance Company, Hartford, Conn., underwrote the policies. The Casey Company is co-operating with its employees by contributing toward the payment of premiums.

All employees of the company were eligible for the protection at the time the plan was made effective, and were insured regardless of physical condition, age and sex if applications were made within a specified period. New employees likewise will be eligible under the same conditions after an initial service of six months.

Under the plan the protection provided for the payment of individual amounts of insurance in the event of death and also the payment of benefits in installments to employees who become permanently and totally disabled from any cause before reaching the age of 60. The disability plan offers weekly benefits in the event of non-occupational accidents and sickness.

In putting the combined plan of insurance in force the Casey Company has become one of around 20,000 employers that have adopted such forms of insurance in co-operation with their employees. The total amount of group life insurance in force at the close of last year was around ten billion dollars, and the benefits to beneficiaries and employees permanently and totally disabled totaled approximately 20 million dollars.

Statistics indicate that under group accident and sickness plans one in every seven employees insured received benefits annually. It has been estimated that more than a billion dollars is lost each year to workers in the United States on account of sickness alone.

L. A. GAS TO SPEND \$4,000,000

Principal items of the Los Angeles Gas and Electric Corporation's 1931 construction budget, totaling approximately \$4,000,000, include 20 miles of commercial gas mains; 9,500 gas services; 10,000 gas meters; 4,000 gas regulators; 8,000 electric services; 6,600 electric meters with the necessary poles, wires and conduits; a new supervisory control electric substation of 15,000-kva. capacity; and preparation for changing 16,500-volt high lines to 33,000 volts. This latter project will be completed in 1932. Doubtless the capacity of the present high lines is necessary because of the difficulty in getting routes for additional lines, company officials announce.

Regional Planning Agencies in the United States have been swelling the number of 50 by the appointment of county planning commissions in 22 California counties, comprising about one-half the state's area and more than half of its population.

Don and M. J. Dickinson of Santa Rosa, have formed a partnership and will operate under the firm name of Dickinson Building Material Company.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be re-
ceived at the office of the State High-
way Engineer, Public Works Building,

Sacramento, California, until 2 o'clock
P. M. on March 4, 1931, at which
time they will be publicly opened and
read, for construction in accordance
with the specifications therefor, to
which special reference is made, of
portions of State Highway, as follows:

San Mateo and Santa Clara Coun-
ties, a reinforced concrete girder
bridge across San Francisco Creek at
Palo Alto (V-S-M. & S-C-18-8-A),
consisting of three 27-foot spans on
concrete pile bents.

San Luis Obispo County, between
1.5 miles south of San Margarita and
Atascadero (V-SLO-2-C & D), about
nine and eight-tenths (9.8) miles in
length, to be graded and paved with
asphalt concrete.

San Barbara County, a reinforced
concrete arch bridge across Gaviota
Creek (V-SB-2-E), consisting of one
100' 0" span.

San Bernardino County, between
Crownise Valley and six miles west of
Baker (VII-834-31-J, K), about thir-
teen and six-tenths (13.6) miles in
length, to be graded and surfaced with
oil treated crushed gravel or stone.

Proposal forms will be issued only
to those Contractors who have fur-
nished a verified statement of expe-
rience and financial condition in ac-
cordance with the provisions of
Chapter 11, Statutes of 1929,
and whose statements so furnished are
satisfactory to the Department of
Public Works. Bids will not be ac-
cepted from a Contractor to whom a
proposal form has not been issued by
the Department of Public Works.

Plans may be seen, and forms of
proposal, bonds, contract and speci-
fications may be obtained at the said
office and they may be seen at the of-
fices of the District Engineers at Los
Angeles and San Francisco, and at
the office of the District Engineer of
the district in which the work is
situated. The District Engineers' of-
fices are located at Eureka, Redding,
Sacramento, San Francisco, San Luis
Obispo, Fresno, Los Angeles, San
Bernardino and Bishop.

A representative from the District
office will be available to accompany
prospective bidders for an inspection
of the work herein contemplated and
Contractors are urged to investigate
the location, character and quantity
of work to be done, with a representa-
tive of the Division of Highways. It
is requested that arrangements for
joint field inspection be made as far
in advance as possible. Detailed in-
formation concerning the proposed
work may be obtained from the dis-
trict office.

No bid will be received unless it is
made on a blank form furnished by
the State Highway Engineer. The
special attention of prospective bid-
ders is called to the "Proposal Re-
quirements and Conditions" annexed
to the blank form of proposal, for full
directions as to bidding, etc.

The Department of Public Works
reserves the right to reject any or all
bids or to accept the bid deemed for
the best interests of the State.

DEPARTMENT OF PUBLIC WORKS, DIVISION OF HIGHWAYS.

C. H. PURCELL,
State Highway Engineer
Dated February 4, 1931.

San Joaquin County supervisors
have rejected the request of the dis-
trict attorney to permit inmates of
the county jail to engage in county
work. The supervisors rescinded a
prior order of the board that the sher-
iff be authorized to allow the pris-
oners to work outside the jail.

L. A. INSPECTOR REPORTS INSPECTIONS

The annual report of the Department of Building and Safety of Los Angeles shows the many different phases of building inspection and regulation, according to J. J. Backus, building superintendent.

All masonry and steel construction is inspected to insure proper foundation and walls and to see that all steel is properly set before being covered, says the report. A total of 27,758 masonry building inspections, 6156 Class A building inspections and 213,478 general building inspections were made. In addition 154,892 plumbing inspections and 118,572 electrical inspections were made by the respective divisions.

A survey started in the metropolitan district to correct defects found in existing buildings showed that change of occupancy, whereby a former office building was used for light manufacturing, caused the loading of floors, electrical and plumbing installations, and rendered exits and fire retardant equipment inadequate due to increased fire hazard. A total of 10,548 inspections were made. Approximately 65 per cent of all corrections ordered have been completed, involving \$130,000 of electrical reconstruction work and \$60,000 plumbing work in the metropolitan district, besides much work outside this area which was concerned with underpinning, frame work of buildings and exits.

Inspection was made of all major fires to determine their effect on building materials and methods of construction. Investigations have shown that while present methods of construction required by building laws hold fire damage to a minimum, careless maintenance of buildings has been the principal cause of the spread of fires, fire doors being blocked with merchandise and sprinkler systems being left turned off, through oversight, after repairs were finished.

WESTERN PIPE EARNINGS IN '30

Western Pipe and Steel Company of California earned \$3.09 per share, or more than 50 per cent in excess of dividend requirements, in 1930, according to the report of the board of directors to the stockholders at the annual meeting in San Francisco last Monday.

Total earnings were \$924,420.52, and final net earnings after all charges were \$527,372.36. The gross income for 1930, \$7,648,685.94. Unfilled orders at December 1 exceeded \$2,200,000, the largest at the beginning of any year in the history of the company. Officials of the company stated that 1930 has been a very successful year, considering the condition of business generally.

A notable feature of the report is that showing the writeoff of \$285,750 for depreciation, equivalent to \$1.66 per share of stock outstanding.

The balance sheet as of December 31, 1930, shows current assets of \$1,102,851 of which \$440,769 was cash. Current liabilities were \$1,715,331, thus establishing a ratio of nearly 2.5 to 1.

Total assets of the corporation were \$7,702,100 and total surplus \$2,850,722, including reserves of \$120,657.

All officers and directors were re-elected. They are J. A. Talbot, president; H. G. Tallerdar, executive vice-president; L. N. Slater, vice-president; R. D. Plageman, vice-president; W. G. Aldenhagen, vice-president and secretary; W. G. Aldenhagen, treasurer; directors J. A.

Talbot, H. G. Tallerdar, W. G. Aldenhagen, L. N. Slater, J. J. Baumgartner, Francis S. Howard, R. D. Plageman.

STANDARD EQUIPMENT PLAN OF FOUNDRIES

The standardization of equipment used by American foundries manufacturing an innumerable variety of metal products from radiators to steel locomotive frames has just been decided upon by the American Standards Association.

Under the technical leadership of the American Society of Mechanical Engineers and the American Foundrymen's Association the project will be placed in the hands of a working committee representing manufacturers of foundry equipment, government metallurgical specialists, and important branches of the foundry industries, having an annual production of several billion dollars.

The work will be carried on under the administrative procedure of the American Standards Association and will lead ultimately to the preparation of a group of authoritative American Standards for various types of equipment used in foundries producing iron, steel, and other cast metal products.

Several years ago the various branches of the foundry industry co-operated with safety organizations and other bodies under the procedure of the American Standards Association in the preparation of a national safety code for the protection of foundry workers against injury through accidents.

E. D. Tennant has been appointed field service representative for the Lumber and Allied Products Institute of Southern California in Southwest Los Angeles, Compton, Centinela and Torrance districts.

BRIDGE FRANCHISE EXTENSION GRANTED

Six months' extension of time for beginning construction on the \$15,000,000 Richmond-San Rafael bridge granted by the Board of Supervisors of Contra Costa County. The board intimated that if the directors of the bridge company found it difficult to arrange for finances another extension of six months would be granted.

The extension was granted at the request of the San Rafael Ferry Company, which now controls the franchise, originally granted to Oscar H. Klatt, president of the American Toll Bridge Company, owners of the Carquinez bridge.

A. B. Tinning, attorney for the ferry company, told the Supervisors meeting that it is the plan of the new franchise holders to make every effort to finance the bridge in San Francisco or the West, but failing that capital will be sought in the East.

William Duerner will operate under the firm name of Aetna Construction Company, according to articles filed with the county clerk's office in San Francisco.

The City of Montreal has been authorized by the Quebec government to borrow money to construct two tunnels under the Lachine Canal. The limit of the cost is \$5,500,000, of which the city, the Montreal Tramways Company and the federal government will each pay a third.

A marked reduction, compared with the preceding year, in the number of accidents at highway grade crossings is shown by reports for the first nine months of 1930 filed by the railroad with the Interstate Commerce Commission. Such accidents total 3.35 for the first nine-month period, a reduction of 599 compared with the same period in 1929. Fatalities totaled 1,448, a reduction of 263.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

FOREIGN BUILDING DIVISION IS FORMED

Organization of a foreign construction division is announced by William L. Cooper, director of the Bureau of Foreign and Domestic Commerce. This new unit will officially start operations in February with H. M. Bletz of Pennsylvania in charge.

This division, with duties technical, informational and promotional in character, will work in conjunction with the foreign field staff and the various commodity divisions, and coordinate in one office the present foreign construction activities of the bureau. Service will be supplied in connection with construction of dams, irrigation projects, power plants, waterworks, telephone and telegraph works, radio stations, railways, street car lines, air ports, inland waterways, canals, ship construction, harbor improvements, docks works, terminals, highways and roads, city planning, office buildings, industrial plants, hotels and apartments, and operations of residence construction.

The division will promote American participation in foreign construction in every way practicable. It will collect, review, investigate and disseminate information regarding foreign construction, potential usage and outlet for American machinery, equipment and supplies, facilities for testing and inspection, domestic and foreign standards, specifications, codes and practices in use, certain phases of financing of projects, construction statistics, labor costs, and related matters. It will be used also as a vehicle to investigate and promote in every way practicable correct usage of American products as applied to the construction field, and will endeavor to simplify and standardize methods employed.

an important function of the division will be to contact and service, both here and abroad, public works engineers, construction firms and architects, or, in general, the planner and constructor. The manufacturer and merchant will be serviced largely through the respective commodity divisions of the bureau.

ENGINEERS OF SAN JOSE ELECT

Samuel P. Laverty was elected president of the San Jose Engineers' Club at the annual banquet-meeting held last Wednesday evening. Laverty succeeds John Ford. William D. Lotz was elected vice-president and Mark C. Thomas was re-elected secretary. Directors installed were: Harold J. Flannery, W. H. MacLean, E. Rea and H. A. Weigand.

A program of entertainment under the direction of Wm. Popp, city engineer of San Jose, was a feature of the meeting.

TITLE INTERESTS CONDEMN LIEN LAWS

Unqualified demand for a notice publicly recorded by holders of mechanics and judgment liens on real estate as a protection for the home owner was voiced by delegates of the American Title Association meeting in Chicago last week.

"Under the present lien laws of most states the owner of the average home and the purchaser of real estate is without protection of any kind from the slumbering lien of which he has no knowledge," said Edward C. Wyckoff of New Jersey.

"We are unanimously of the belief that the working man employed in the construction of a home should have full rights to record his lien under the law, but it's our conviction that the protection of the home itself is paramount. We believe that the lien laws of our states should be changed to compel the recording of all, and particularly mechanics liens, within an extremely limited period of time following delivery of merchandise upon the premises or labor in connection with the construction."

The American Title Association is composed of three thousand trust and title companies of the United States.

SONOMA PLUMBERS SEEK REGULATIONS

Master Plumbers' Association of Sonoma County has petitioned the Sonoma County supervisors to pass a county ordinance providing for plumbing regulations and inspection outside incorporated districts.

The proposed ordinance is based on an ordinance in effect in San Diego County for over five years and will provide regulations concerning the installation of sanitary fixtures, cess pools, septic tanks, etc.

Inspection of all plumbing installation would be provided in the ordinance by plumbing inspectors appointed by a sanitary board consisting of one member of the board of supervisors, the health officer and one member of the Master Plumbers.

Under the proposed county regulations farmers can install their own plumbing providing it complies with the regulations set forth in the ordinance and providing the installation is approved by the inspector and the board.

The proposed ordinance is similar in nature to the Santa Rosa plumbing inspection ordinance and that in use in other incorporated cities of Sonoma County and elsewhere. The cost of the inspection would be added to the contract price of the building as it is done in incorporated districts where similar ordinances are now in effect.

The proposed ordinance was taken under advisement.

SAFETY CODE FOR DUST EXPLOSIONS

An action unique in the history of the safety movement has just been taken by the American Standards Association with the approval of a national accident prevention code for a process in which not a single serious accident has yet occurred. The new code is aimed at the prevention of dust explosions in pneumatic cleaning plants for pulverized coal, according to an announcement made by the Association. Coal pulverized so finely that it can be shot through a nozzle and burned like a liquid fuel is now being used in many industries.

Each of the fifty other national safety code projects completed or in process of development under the auspices of the American Standards Association has followed a long series of fatalities or injuries or a spectacular disaster which led the industry concerned to request the establishment of a safety code. In the case of pneumatic cleaning plants for pulverized coal, the widespread use of which started only a comparatively few years ago, however, there has not been a single serious dust explosion. It was the belief of the industry and of safety experts that the potential hazard was great enough to warrant the development of a national code which would provide every possible safeguard against disastrous dust explosions. Dust explosions have frequently occurred in coal mines and grain elevators, and in factories where pulverizing processes may, without proper safeguards, fill the air with a fine explosive dust.

The work on the preparation of the code was carried on by a technical committee under the direction of the U. S. Department of Agriculture and the National Fire Protection Association. The technical committee has completed safety codes for the prevention of dust explosions in grain elevators, flour and feed mills, starch factories, pulverizing systems for sugar and cocoa, and in pulverized fuel systems apart from pneumatic cleaning plants. The code contains comprehensive provisions for the construction and ventilation of buildings in which pneumatic screening and cleaning equipment and driers are located and for the safeguarding of equipment, and methods of dust collection.

SACTO. EXCHANGE ELECTS OFFICERS

Orland Close was elected president of the Sacramento Builders' Exchange at the annual meeting of that body held in the capitol city last week. W. E. Truesdale was elected vice-president, John Hawley, treasurer, and L. S. Patterson, re-elected secretary.

Directors are Orland Close, W. E. Truesdale, Alvin W. Simpson, E. E. Moor, A. H. Wagner, John Redmond, Earl Markwart, Fred Benton, Alfred Gustafson, John Hawley, P. D. Reese.

PROFITS IN COOPERATION ARE CITED BY STEEL CHIEF

(By Chas. F. Abbott, Executive Director, American Institute of Steel Construction)

If we are to profit from the costly experience of the past two years, we should recognize what honest cooperation can accomplish not only for business but for the peace and happiness of all peoples throughout the world.

Cooperative activities in industry are just as important in peace times as they are during periods of war or other emergencies. Organized programs to include standardization, simplification, reduction of costs, research, extension of markets, advertising and education to inspire better methods, and to eliminate misunderstandings and suspicions, provide industry with the hardihood to combat economic barriers and emergencies. These programs enable an industry to take the initiative in cleaning up its own affairs instead of encouraging governmental regulation or control.

The shifting in economic laws during the past few years has brought about unusual conditions affecting all industries. New problems have been created that have called for cooperative organizations in order that the interests of each industry might be safeguarded. Those who have heeded the call have profited, while those who have hesitated are experiencing the ill effects of these new economic conditions.

Industrial associations are not only essential in promoting progress, but they are a necessary benefit to members, to customers and to the public. Most of the problems that confront the individual business man are shared equally with his competitors, his customers and the public. He cannot solve them alone. Success will depend upon the cooperation of all interests involved.

It was California that first demonstrated the value of cooperation. The natural advantages of this great state became widely recognized as a result of cooperative effort. The vegetable and fruit packing industries of California have experienced remarkable growth as a result of cooperation and the public have benefited equally with the producers.

Every industry has its problems, some basically economic, others more specifically related to production or selling, that can be overcome more effectively by cooperation than by any individual action. The individual concern unaided cannot cope with this modern day struggle for markets. The forces that are marshalled against it are too great. The battle line is too far-flung. The vision to see that the individual concern can prosper only as the industry prospers, offers the sole hope of survival.

Such cooperative activity, aimed primarily at better merchandising methods, offers the one assurance of prosperity. During the period of transition the future problem is to locate buyers to absorb what we produce, to make them want what we have for sale.

The fruit and vegetable growers of California would be helpless were they to rely upon individual effort. The grower of a thousand crates of lemons could not make his message heard outside of his own county, but by paying a few cents per crate into a common fund his voice is heard in every city and town in the country.

It is the trade association that offers the greatest security to the individual initiative and future permanency of the smaller plants and individual concerns.

Address delivered at the Annual Conference of the Iron, Steel and Allied Industries of California, February 12, 1931, at Del Monte, Calif.

Despite the tendency toward large plant operation, the bulk of business of all kinds is still being carried on by relatively small concerns. The moderate sized plant remains the typical unit. In spite of the rapid growth of chain stores, department stores and mail order houses, these groups combined are reported to be handling only about 30% of the total retail business.

During the lifetime of Judge Gary he constantly emphasized the need of cooperation. Both Mr. Farrell and Mr. Schwab have referred to the huge savings that are possible if honest cooperation could prevail throughout the Steel Industry.

Honesty is no question but what all these practical benefits could be obtained for the advantage of the whole industry. More considerate, honest and reasonable understandings would follow as a result of cooperation, eliminating all trace of suspicions and selfishness.

One of the highest purposes of an organization is to establish the confidence upon which honesty is based. Without honesty there can be no agreements. Honesty can be established as relationships increase, and confidence will replace suspicion. It is a hopeless task to place too great reliance upon mutual agreements unless honesty becomes a part of man's character. There can be no exceptions. And all honest men can support trade agreements that are honest. Illegal agreements are unlawful because they are against public interest. Any movement that does not have as its objective the promotion of public welfare cannot obtain permanent success, and it is foolish of us to advocate such a movement.

If an agreement is made among competitors and later broken it usually results that conditions become worse than those which existed before the agreement was made. The honest intent of the individual must be relied upon, and it is always put to a severe test as long as agreements exist. The last priority in nearly every industry are honest and faithfully carrying out their promises.

There must be higher ideals and motives expressed in a comprehensive program that includes constructive activities if the interest and support of the more successful concerns is to be obtained. Busy men have no time for little piquey things in business. Little men take an hour to figure out how they can beat out a competitor. Big men are searching for ideas that will build up their business next month and next year.

It should be rung in the ears of every business man that it pays handsomely to be considerate toward everyone, including competitors and the general public. The millennium has not arrived. We shall probably not see it in the near future, but conditions are improving and better men of the average are growing better. They are becoming more and more intelligent and better educated. This makes for legitimate advancement, for prosperity and happiness.

Fortunately the structural steel industry grasped the full meaning of

the new form of competition and of its other problems and has adopted policies to meet them. Through the American Institute of Steel Construction it has been able to recognize the changed conditions that confront it. In placing the proper valuation upon public opinion as the controlling factor in industrial progress it has brought into service a program that effectually and legally enables it to meet economic changes and to do so more successfully than by any other method.

Under the guidance of such a constructive force the future will unquestionably bring with it a constantly increasing opportunity for structural steel. Markets will be extended, consumption increased and individual concerns, both large and small, will profit through a better appreciation and knowledge of business fundamentals whereby are developed increased sales on a more profitable basis.

Organized cooperation, supporting a well developed practical program, opens the way for important accomplishments that would advance the industry and promote individual success and public welfare. Research to develop new uses, new markets, and reduce costs, advertising, education, and many similar activities can be economically and more effectively promoted than would be possible if entrusted to individual action.

These objectives are important. There are, of course, problems that hold a keener interest for the individual competitor. He is concerned more directly with those internal questions that affect profits. Present existing laws restrict any program compelling the elimination of all illegal activities such as price agreements, restraint of trade. Education to promote more ethical relations and to establish the fallacy of unfair practices, price cutting and similar evils is permissible and very effective, however. It is this coordination of right thinking and acting incident to such a program that lifts an industry out of most of its difficulties.

There should be no doubt, no hesitation, in the acceptance and application of wholesome cooperative effort among competitors. It offers the only way to a larger business, a better business and satisfactory profits. There is no other answer. Either competition will fall to the level of vicious fighting and trade demoralization, or we must adopt a practical plan of cooperation. Men working together sincerely for a common end and a common purpose, can so organize their energies that problems fade before them and limitations recede. It is then that the individual prospers the most.

Napoleon failed because of three things:

1. He stopped listening.
2. He disliked to hear unpleasant news.
3. He under-estimated his competitors.

The industrial and commercial contest of the next twenty years will be cyclonic in its intensity. It will be vast and magnificent. Sales managers are just beginning to realize that business is in its dawn, and that the victories of the past are small in comparison with the victories of the future. Just as the master word of yesterday was "Initiative"—so the word of today is "Cooperation" and the

word of tomorrow, "Cooperative Co-ordination."

The efficient association is one reason for America's famed teamwork in business. It serves as an enlightenment of selfishness a generosity on the part of the big fellows to help the little fellows. It has already taught us that the main secret of a successful business and a happy life is to climb up from retaliation to reciprocity.

It may be safely said that few phases of a trade association's work are more important than the education of its members to the point where they will realize the value of an established sales price that is fair to both buyer and seller. The interests of the public are also protected by such a move, for the public suffers a distinct loss when sales are made at cost or less than cost.

It is difficult for some to accept the idea that operating policies in the industry must be based upon conditions of sale. They are too frequently formulated by disregarding those conditions.

Industry must understand and accept the theory of stabilized production. It must recognize the folly of attempting to operate a plant on a basis of 100% capacity output when statistics indicate a demand of but 50% of plant capacity. It must recognize the spirit of live and let live and overcome that of selfishness which induces others to enter into a war of price cutting in an attempt to keep operating at live capacity. It must adopt the formula of total cost plus a fixed selling price.

Is capacity production at a net loss more desirable than 60 or 80% output at a profit? If one competitor wastes its capital assets, must every other seller in competition watch his destructive ignorant policy?

In a number of industries, there has been severe trade depression. There recognize inefficient methods that have obliterated all semblance of order. If the tendency in any direction continues at its present rate, it threatens to develop into trade prostitution of the worst kind. The best hope of checking this trend lies in convincing sales executives that volition should not be the sole aim of business.

If Moses had given us eleven commandments instead of ten, the eleventh might well have been "Uphold the Sales Price." Short of downright robbery, there is nothing so unethical in business as cutting the price for the sake of getting an order.

Mr. James A. Farrell, President of the United States Steel Corporation, at Pinchurst, North Carolina, before the annual banquet of the American Institute of Steel Construction, made his statement:

"Business exists for making profits. When profits disappear, business ceases. The satisfaction of the laborer working for an adequate wage, of the consuming public for an adequate supply of goods at reasonable prices, of the investor for a return on his money, of the government for an unimpaired source of tax revenues, are all dependent uniformly upon the profitable operation of business. This problem of earning a profit, however, is properly left to the discretion of business management. Consequently, management is free to round to apply scientific thinking and planning in effecting better methods or the stabilizing of business prosperity."

Steel is the most valuable of all our national accomplishments. The most highly prized material either in times of peace or in war periods—more so than gold itself. Iron ore, the most valuable of all our national resources, is limited in its supply and should be conserved in profit above all other materials, it should never be wasted.

It is an insane policy that permits the squandering of our resources either by price cutting below a reasonable margin of profit or by over production in excess of known demand.

Stabilization of production and control of our resources by leadership can and should bring prosperity to all branches of the steel industry. Consumers are not demanding price cuts by the steel industry. To resist them is merely to make good on the public trust imposed upon the industry.

Consumers of steel will never complain of prices that include fair profits for the producers. What they want is prices that can be relied upon, that are the same to all users, and that are stabilized. They object to fluctuating prices and concessions enjoyed by a few, or prices that may be cut tomorrow.

In the meantime, notwithstanding, the price wars go merrily on. The buyers sit on the side line playing the part of victimized bystanders. Their great hope is that in the near future "service to the buyer through cut prices" will give way to a more intelligent stabilization of prices with a fair profit to all concerned.

Unless price cutting is stopped and prices are advanced to the point where they will show a reasonable profit, then wages must be reduced, increasing the volume of unemployment. The scale cannot be maintained and the unemployment problem cannot be solved unless profits can be realized.

If we stop to reason the matter out, eliminating all of the disturbing speculative element, would it not be possible that we would find that American business has slipped back into the jungle and must start all over again the slow process of evolution? The law of the jungle is that "might makes right" or its denizens with the sharp teeth and the longest claws survive in the struggle for existence.

Whenever a seller becomes recognized as a price cutter, his competitors as price cutters, his troubles begin. Whenever he submits competitive bids, he becomes the target at which his competitors shoot their prices. The individual who relies upon price cutting as a means of obtaining his business becomes a marked man and his days are numbered. The life of a price cutter is not a pleasant one nor a long one. The trouble with the price cutter is that he spends all of his time trying to close the order. If he would devote as much time to convincing his prospect he would find that when he is convinced he closes himself.

There is no credit to anyone when an order is taken at a cut price. The buyer may gain a temporary benefit and the seller has the order, but in the end both buyer and seller lose far more than they gain. The buyer offers encouragement to price demagogues and he can never tell whether his price is right on his future purchases. The seller reduces his profit and in the end he may find himself giving away a part of his capital assets.

Selling is so easy as to cut prices; and nothing is so hard as to get them back when once they have been pulled down. Any child can break an egg by throwing it on the floor, but all the learned scientists in the world cannot pick it up again. Any one can cut prices, but it requires the combined power of the industry to put them back again.

There is only one way to make money in business. That way is to sell the product at a profit. The fact that there are many in every line who are making a profit proves that knowledge and self restraint are not without their rewards.

It takes courage to look a large order square in the face and say "No" if it is not in accord with established terms and prices. Nevertheless, there

are concerns in highly competitive industries that are displaying that courage year in and year out. True, they may not have the big volume, but they have not been drowned in red ink.

Of course, you cannot get all orders without price being the indicator in some cases, but there are many other factors worth talking about. When the price is once submitted there should be no further concessions. That is salesmanship.

The future will call for many changes in distribution. Costs must be reduced. Wasteful methods must be eliminated. Efficiency in salesmanship must be developed upon a higher standard than ever before. Those in charge of sales will be called upon to exercise more intensive control and supervision. A profit on every sale will become the banker's formula for estimating worth. There will be no bluffs and no explanations. Management will be held responsible and judged by its efficiency and aggressiveness.

Destructive competition during the past year has brought consumers to the point where they are purchasing as the only consideration the purchase of steel products. Price cutting has educated buyers to realize that the low price of today may not be the low price of tomorrow. The problem is not so much the cut price as it is the attitude of some of the sellers who are out to get the business at any price. Invariably they cut their own low price, and such a policy incurs economic loss. The regrettable part is that someone loses his temper and uses his time and money to prevent someone else from getting business to which he may be entitled. Under such conditions a fertile field is being created for competitive materials which may profit from the uncertainty created. We should not forget the old adage "whom fortune wishes to destroy she first makes mad."

Every business enterprise is fundamentally a public service undertaking. It can make good and should be allowed to exist only in proportion as it recognizes the public character of the function it is performing. One of these functions is that of treating its customers alike, relieving them of the necessity of bargaining, and thus allowing them to exert their full economic strength. Uniformity of prices and of treatment until the time comes when there is reason for a uniform change, with full publicity for the facts, is the course upon which the interests of all can be reconciled—and the only one.

The whole structure of business is based upon profit and not upon the mere production or exchange of commodities. Business success demands exactness. The world is filled with men who guess or assume, or are led to understand, that a certain figure is nearly, or approximately, or to all intents, accurate. But they are possessed by the man who knows.

There are many concerns without adequate cost systems and there are others who supply their cost figures with a system of outrageous competition in computing their selling prices. A disregard of cost figures will eventually invite bankruptcy.

Business men can solve this problem to their own satisfaction and to their own financial success if they know accurately their costs and refuse to be bluffed into a sale at a price which will not cover those costs plus a fair profit.

When business men will give heed to the obvious way out of their difficulties they will be in a better position to plan intelligently. When industry holds fast to the fundamental law of profitable business it will become profitable and the steel industry will move toward the goal of success. There is no substitute, however, for in-

PROFITS IN COOPERATION ARE CITED BY STEEL CHIEF

(By Chas. F. Abbott, Executive Director, American Institute
of Steel Construction)

If we are to profit from the costly experience of the past two years we should recognize what honest cooperation can accomplish not only for business but for the peace and happiness of all peoples throughout the world.

Cooperative activities in industry are just as important in peace times as they are during periods of war or other emergencies. Organized programs to include standardization, simplification, reduction of costs, research, extension of markets, advertising and education to inspire better methods, and to eliminate misunderstandings and suspicions, provide industry with the hardihood to combat economic barriers and emergencies. These programs enable an industry to take the initiative in cleaning up its own affairs instead of encouraging governmental regulation or control.

The shifting in economic laws during the past few years has brought about unusual conditions affecting all industries. New problems have been created that have called for cooperative organizations in order that the interests of each industry might be safeguarded. Those who have heeded the call have profited, while those who have hesitated are experiencing the ill effects of these new economic conditions.

Industrial associations are not only essential in promoting progress, but they are a necessary benefit to members, to customers and to the public. Most of the problems that confront the individual business man are shared equally with his competitors, his customers and the public. He cannot solve them alone. Success will depend upon the cooperation of all interests involved.

It was California that first demonstrated the value of cooperation. The natural advantages of this great state became widely recognized as a result of cooperative effort. The vegetable and fruit packing industries of California have experienced remarkable growth as a result of cooperation and the public have benefitted equally with the producers.

Every industry has its problems, some basically economic, others more specifically related to production or selling, that can be overcome more effectively by cooperation than by any individual action. The individual concern unaided cannot cope with this modern day struggle for markets. The forces that are marshalled against it are too great. The battle line is too far-flung. The vision to see that the individual concern can prosper only as the industry prospers, offers the sole hope of survival.

Such cooperative activity, aimed primarily at better merchandising methods, offers the one assurance of prosperity. During this period of transition the future problem is to locate buyers to absorb what we produce, to make them want what we have for sale.

The fruit and vegetable growers of California would be helpless were they to rely upon individual effort. The grower of a thousand crates of lemons could not make his message heard outside of his own county, but by paying a few cents per crate into a common fund, his voice is heard in every city and town in the country.

It is the trade association that offers the greatest security to the individual initiative and future permanency of the smaller plants and individual concerns.

Address delivered at the Annual Conference of the Iron, Steel and Allied Industries of California, February 12, 1931, at Del Monte, Calif.

Despite the tendency toward large-plant operation, the bulk of business of all kinds is still being carried on by relatively small concerns. The moderate sized plant remains the typical unit. In spite of the rapid growth of chain stores, department stores and mail order houses, these groups combined are reported to be handling only about 30% of the total retail business.

During the lifetime of Judge Gary he constantly emphasized the need of cooperation. Both Mr. Farrell and Mr. Schwab have referred to the huge savings that are possible if honest cooperation could prevail throughout the steel industry.

There is no question but what all these practical benefits could be obtained for the advantage of the whole industry. More considerate, honest and reasonable understandings would result as a result of cooperation, eliminating all trace of suspicion and selfishness.

One of the highest purposes of an organization is to establish the confidence upon which honesty is based. Without honesty there can be no agreements. Honesty can be established as relationships increase, and confidence will replace suspicion. It is a hopeless task to place too great reliance upon mutual agreements until honesty becomes part of man's character. There can be no exceptions. And all honest men can support trade agreements that are honest. Illegal agreements are unlawful because they are against public interest. Any movement that has as its objective the promotion of public welfare cannot obtain permanent success, and it is foolish of us to advocate such a movement.

If an agreement is made among competitors and later broken, it usually results that conditions become worse than those which existed before the agreement was made. The honest intent of the individual must be relied upon, and it is always put to a severe test as long as agreements exist. The large majority in nearly every industry are honest and faithfully carrying out their promises.

There must be higher ideals and motives expressed in a comprehensive program that includes constructive activities if the interest and support of the more successful concerns is to be obtained. Busy men have no time for little piquey things in business. Little men take an hour to figure out how they can beat out a competitor. Big men are searching for ideas that will build up their business next month and next year.

There is only one way to make money in business. That way is to sell the product at a profit. The fact that there are many in every line who are making a profit proves that knowledge and self restraint are not without their rewards.

It takes courage to look a large order square in the fact and say "No" if it is not in accord with established terms and prices. Nevertheless, there

are concerns in highly competitive industries that are displaying that courage year in and year out. True, they may not have the big volume, but they have not been drowned in red ink.

Of course, you cannot get all orders without price being the inducement in some cases, but there are many other factors worth talking about. When the price is once submitted there should be no further concessions. That is salesmanship.

The future will call for many changes in distribution. Costs must be reduced. Wasteful methods must be eliminated. Efficiency in salesmanship must be developed upon a higher standard than ever before. Those in charge of sales will be called upon to exercise more intensive control and supervision. A profit on every sale will become the banker's formula for estimating worth. There will be no excuses and no explanations. Management will be held responsible and judged by its efficiency and aggressiveness.

Destructive competition during the past year has brought consumers to the point where they regard low price as the only consideration in the purchase of many commodities. The public has educated buyers to realize that the low price of today may not be the low price of tomorrow. The problem is not so much the cut price as it is the attitude of mind of the buyers who are out to get the business at any price. Invariably they cut their own low price, and such a policy inevitably results in economic loss. The regrettable part is that some buyers are dishonest and use his time and money to prevent someone else from getting business to which he may be entitled. In such conditions a fertile field is being created for the sale of materials which may profit from the uncertainty created. We should not forget the old adage "whom fortune favors, she first makes mad."

Every business enterprise is fundamentally a public service undertaking. It can make good and should be allowed to exist only in proportion as it recognizes the public character of the function it is performing. One of these functions is that of treating its customers alike, relieving them of the necessity of bargaining, and thus allowing them to exert their full economic strength. Uniformity of prices and of treatment until the time comes when there is reason for a uniform charge is a public policy. For these facts, is the course upon which the interests of all can be reconciled—and the only one.

The whole structure of business is based upon profit and not upon the mere production or exchange of commodities. Business success demands exactness. The world is filled with men who guess or assume, or are led to understand, that a certain figure is nearly, or approximately, or to all intents, accurate. But they are bossed by the man who knows.

There are many concerns without adequate cost systems and there are others who supplant their cost figures with a system of outguessing competition in computing their selling prices. A disregard of cost figures will eventually invite bankruptcy.

Business men can solve this problem to their own satisfaction and their own financial success if they know accurately their costs and refuse to be bluffed into a sale at a price which will not cover those costs plus a fair profit.

When business men will give heed to the obvious way out of their difficulties they will be in a better position to plan intelligently. When industry holds fast to the fundamental law of profitable business it will become profit-minded, and that is a long way toward the goal of success. There is no substitute, however, for in-

dividual responsibility, and no hope of effective cooperation without it.

The market value of any business depends upon the amount and regularity of its profits. Real estate and inventories do not add much to market value. The real market value is determined by the efficiency of the whole organization and its profit-making ability. Dealers are searching day and night for the profit-makers and they run away very fast when the profit account is not bright.

Every factor in the industry should cooperate to this end, whether he is the manufacturer, the wholesaler, or the retailer. Their interests are basic—that of producing, selling and distributing—and to succeed all must do so on a reasonable, profitable basis. The big problem is for the manufacturer to recognize his rightful position of leadership. If conditions among jobbers and retailers are unsatisfactory, then the manufacturer has shirked his duty. There are many instances on record where manufacturers are selling to the ultimate consumer at prices lower than either the jobber or the retailer could possibly quote. Then again, we experience in many instances the old vicious system of secret rebating with all of its destructive influences. We also find manufacturers who are selling jobbers or retailers of questionable financial standing, thereby encouraging destructive competition on the part of incompetents. We witness manufacturers selling to brokers or those who have no rightful position in the cycle of distribution.

If demoralized price cutting is to be eliminated and the business transacted on a basis of profit, the manufacturer must exert his leadership, and in the formulation of his selling policy, he must define fair practices and then vigorously enforce them without any partiality or deviation. One of the most constructive influences in the establishment of a one price policy, thereby establishing rebates and discounts that will be fair to all.

It is obvious that the problem of the distributors becomes the problem of the manufacturers, on the other hand, the distributors cannot expect to profit unless they, on their part, extend to the manufacturers the degree of efficient distribution which it is reasonable to expect. It is only through this recognition of the vital necessity of group conferences on the part of manufacturers, jobbers and retailers representing an industry that unfair, unethical and unsound trade practices can be eliminated. It should be clearly recognized by all that the manufacturer cannot profit at the expense of the jobber or the retailer, and vice versa; the jobber or the retailer cannot profit by pursuing methods contrary to the defined policy of the manufacturer.

There are instances where buyers attempt to make the seller believe that lower prices have been quoted. There are other occasions when the buyer may be sincere in his statement. In the long run, however, it will pay the seller well to pursue the one price policy and submit a price based on a cost that he believes to be fair. He may lose some business but he gains as confidence and self respect become established. Buyers are always attracted by a strong personality. They shy away from the weak-kneed seller. In the last analysis the courageous seller is the winner.

Furthermore, the practice is contrary to the interests of the buyer. While the law of supply and demand operates it is economically sound for the buyer to try to get the best possible price, but to drive the bargain below the line of a fair profit, good quality, and proper service, is poor business in the long run. Substitutions, inferior quality, and inadequate

service logically follow. The buyer suffers and pays a much greater price in the end.

The buyer and the seller are as dependent upon each other as are the producer and distributor of the product. In the long run, buyer and seller alike will be adversely affected by any influence which undermines the stability of the other. The best assurance for the consistent prosperity and progress of both, and of American industry as a whole, lies in cooperative action to foster constructive influences and stamp out those, such as price cutting, which are responsible for destructive competition and that menace the welfare of all concerned. It is not the lawful reduction of prices that I condemn. We must recognize the ethical distinction between necessary price reductions and price cutting which is inspired by a selfish desire to obtain more than a reasonable proportion of business.

Prices that are reduced to dispose of excess inventories or to meet emergency conditions confronting a producer would not, and should not, be classified as illegal price cutting. On the other hand, prices that are cut for the purpose of taking business away from others who may be entitled to it, is an objectionable form of price cutting. Under the spirit of the Clayton Act in practice, it is not believed, are illegal. Cut prices to obtain more than one's share of business or to obtain business on a price basis alone is another form of price cutting that is reprehensible. To submit one price, and then to submit three or four additional lower prices, thereby starting a price cutting orgy, represents a vicious form of price cutting.

The Clayton Act plainly condemns price discriminations which are designed for the purpose of lessening competition. The idea behind the Federal Law is in line with what we all believe in, and I feel confident that we could cure the evils of price cutting today were we not so hopelessly away in the morass of legal technicality that so often follows when we depend entirely upon the courts to correct economic evils.

Reforms are difficult to realize when left to the compulsion of law and administration. Reforms must exist in the hearts of men before it is really accomplished. Therefore no statute will ever cure business men of the evils of price cutting until business men cure themselves individually of all desire to indulge in evil practices. We must convince ourselves of the desirability of the right before we can attain it.

Every now and then someone hobbles up announcing a newly discovered plan to relieve some industry of all of its difficulties. Meetings are held and a plan is launched with great enthusiasm. But the first stop of the joy ride is usually at the office of the Department of Justice in Washington. As far as I know no one has as yet ever devised a legal plan to get around the Anti-Trust Laws. I do things that the laws specifically state must not be done.

Most men will agree that prices are lower, that profits have become impossibly small, and that competition is more difficult to meet. It is a strange phenomenon to some as they are left hopelessly struggling for a solution and relief from the perplexing difficulties with which business has become afflicted.

The Anti-Trust Laws, with some of their now obsolete interpretations and many doubtful regulations under them are probably responsible for some of the business man's worries. A modification of these laws with better interpretations would undoubtedly offer relief; but by no means are they alone responsible for the new conditions now confronting our business activities, nor would their repeal re-

move the principal present day problems.

The argument for such a revision is valid in itself for the Anti-Trust Laws were enacted to prevent restraint of trade rather than to forbid all trade agreements. Therefore, trade agreements which have for their purpose the conservation of a product for the best interest of the public or for the saving of an industry would not necessarily come under the prohibition of the intent of the framers of the statute. It is becoming more and more apparent that production in important fields has outgrown many of the rulings under the Anti-Trust Laws.

While modifications are undoubtedly necessary, it is well to remember that extreme selfishness on the part of some at a disregard of the rights of others represents a principal evil. Until individual selfishness can give way to justice and fairness with the spirit of the industry of paramount importance, we cannot expect any relief even though the laws might be modified. It is only through honest cooperation that enlightened selfishness can produce the best results. Competition which is the real hazard.

The cause of price cutting is to be found in the mental qualities of the cutter. Ignorance, misunderstandings, confusion, greed, distrust and antagonism are the dominating elements. The solution of the problem involves the curing or elimination of these qualities. Failure to do so means continued unprofitable operation.

Our only legal cure of the evil is demoralized price cutting. Indisputable facts home again and again to every member of an industry the influences that promote price cutting can be reversed.

Education should start by destroying the illusion that greater profits can be obtained from an increase in volume secured by price cutting. When this illusion has been destroyed the root of the price cutting evil will be eliminated.

We can do much to effect this education through cooperation, through coming together and honestly discussing our problems. Around a conference table, in trade association meetings, this education is possible and the circumstances of the rights of individuals.

If the executive heads of each company within an industry cannot put a stop to cut-throat competition and price cutting, then the Government may be forced to do so. Labor unions, in a number of instances, have already taken the matter in hand.

Those who insist upon price cutting and destructive competition as a means of obtaining their business can well afford to stop and consider just what may be in store for them. If supported by public opinion will insist upon profitable operation of our industries. If the present management cannot succeed then it must step aside for another method of conducting business.

The challenge to industry today is whether we are going to meet this issue and solve it effectively, or whether we are going to invite the Government to do it for us. You have witnessed what happened in Italy. Extreme individualism in industry and trade has been replaced by a state dictator. Russia is doing the same, only through a differing political method.

The people of the United States have declared for a democracy and American industry is confronted with the serious necessity of proving that these economic emergencies can be successfully coped with on a democratic basis. If these business problems can be solved through cooperative effort and without recourse to governmental interference. This is certainly a time when we should be willing to submerge our wilful de-

sires, our selfish ambitions for the betterment of our industries and traders and thus prove our ability to cooperate for progress.

We have this challenge thrown at us by Mussolini and by Stalin. Are we going to acknowledge that our democratic principles are wrong? I think not, for we have learned how to cooperate.

HERE—THERE EVERYWHERE

The annual convention of the Pacific Coast Electrical Association will be held at the Del Monte Hotel, Del Monte, Calif., June 24-26.

The International Association of Electrical Inspectors, Northwest Section, will hold its annual convention at Salem, Oregon, Oct. 5-7, 1931.

U. S. Treasury Department on February 10 issued an official finding to bar entry of lumber and pulpwood from Soviet Russia on the ground it was produced with convict labor.

Delegates to the forty-ninth annual meeting of the National Association of Master Plumbers at Milwaukee in June will be entertained at Kohler, Wis., on June 26, as guests of the Kohler Company, one of the nation's largest manufacturers of plumbing fixtures.

Union carpenters of Merced on last Tuesday succeeded under protest to the demands of G. B. Pasqualetti, San Francisco contractor, and will work five and a half days weekly in the building of the new \$100,000 Merced Theatre. The Union men had favored a five-day week, with the view to employing more mechanics on the structure.

The annual spring meeting of the Commercial Section of the Northwest Electric Light & Power Association will be held in Spokane, Wash., March 16-18, it is announced by Geo. E. Sullivan of Portland, section chairman. The meeting will follow the general outline of those of recent years in that all sessions will be general sessions at which each committee will present the results of its study on some phase of commercial development within its scope.

Eighty oil burner and accessories manufacturers—a record number—are expected to invade Philadelphia the week of April 12 to 15 for the Eighth Annual Convention and Oil Burner Show. This is the conservative estimate of Harry F. Tapp, executive secretary of the American Oil Burner Association, who reports that 72 exhibitors have already signed up for 120 booths. Convention headquarters will be at the Benjamin Franklin Hotel. Show headquarters will be located across the street in the Gimbel Building.

At a recent meeting of members of the Fresno city council, the Fresno Real Estate Board and the Chamber of Commerce, discussion was given to a \$2,000,000 bond issue to finance the purchase of a site and the erection of a municipal auditorium. The question of a new city hall and jail building was also discussed which would cost an additional \$500,000. It is possible that the bond proposals will be submitted to the voters at the April election.

THE OBSERVER

What He Hears and Sees on His Rounds

An ordinance requiring that all contractors on buildings for which permits are issued by the Los Angeles city building department shall have state licenses was adopted by the city council February 11. The ordinance was recommended by the building and safety commission.

Kern County supervisors will call an election shortly to vote bonds of \$2,500,000 to finance improvement of the county highway system. About \$1,125,000 will be used for immediate paving of old roads, about \$900,000 for work on commercial highways and approximately \$100,000 for building a recreational highway system.

By a vote of thirty-one to two with four not voting the Nevada State Assembly passed A. B. 33, fixing a minimum wage of five dollars for labor on all public work in Nevada. The measure was passed after an effort had been made by Frohlich of Washoe to amend it fixing the wage at four dollars a day.

The proposal of the San Francisco Board of Public Works to write into contractors' specifications that no wage minimum below that set by the Impartial Wage Board be paid on contracts involving city work, has been referred to Assistant City Attorney Henry Heidelberg by an opinion, doubt having arisen as to the authority of the board to write in the provision. The Industrial Association has joined the Building Trades Council and the Labor Council in endorsing the proposal.

After more than a year's work the Health Committee of the San Francisco Board of Supervisors discarded a proposed new ordinance to regulate installation of gas appliance fixtures and named a new committee to draft another plan. Henry Eastwick of the Pacific Gas & Electric Company, E. B. Fitzgerald of the Plumbers' Union, and Frank Klimm, president of the Board of Health, will attempt to frame an ordinance to prevent deaths and accidents from faulty gas fixtures.

With a view to lessening unemployment the Los Angeles city council has set March 5 as the date to vote on proposals to issue bonds of \$5,000,000 of which \$2,000,000 is to finance street improvements, \$1,000,000 for public park development and \$1,000,000 for public playgrounds. Most of the money is to be spent for labor, as little as possible for materials and none for acquisitions.

Dave Petrie, plumber of Napa, has protested to the Napa city council against the practice of out-of-town plumbers undertaking work within the city limits without paying the \$50 license fee. Petrie further charges that only two local plumbers have paid the license fee this year. H. A. Harrold, city engineer, has been instructed to collect from those who are delinquent.

Modern apartment replacing New York's East Side tenements and containing for not more than \$12.50 a month a room are planned by Alfred R. Smith. A group of bankers has subscribed the larger part of the capital needed, he said in asking for financial support for the plan.

Senator Norris, Republican, Nebraska, has introduced a resolution for a Federal Trade Commission investigation of the cement industry with a view to determining if any price agreements exist in violation of the anti-trust laws. The Nebraska sought immediate consideration of his proposal, but Senator Keim, Republican, New Jersey, objected.

C. H. Badwell, mayor of Sacramento and president of the League of California Municipalities, has requested the Oakland city council to endorse a bill providing that portions of city streets forming continuations of state highways be part of the state highway system and be repaired from gasoline tax funds. The bill also provides that if streets are opened or widened for the benefit of the state that the expense be borne by the state.

President Hoover has signed the Wagner Bill which enables the Secretary of the Treasury to expedite work on the Federal buildings program authorized by law by authorizing him to obtain by contract without competition topographical surveys of sites, test pits, and borings where such sites have been selected, although the thereto may not have been vested in the United States; to limit to such number of days as he deems proper the advertising for bids for sites for public buildings; to obtain outside architectural, engineering, technical, or professional services to such extent as he deems necessary in connection with the plans and specifications for Federal buildings which have been specifically authorized to be constructed where the sites have been selected notwithstanding title to such sites may not have been vested in the United States.

Beginning March 1, all the Works and Offices of the Westinghouse Electric and Manufacturing Company will omit Saturday operations, except as involved in maintaining continuous service with customers and others with whom the company does business, according to an announcement by President F. A. Merriek.

Mr. Merriek's announcement states that the plan to be followed for the immediate future is to shorten the working week to the extent represented by the work normally required on Saturday throughout the company. As this reduction of service represents approximately 10 per cent, that amount of reduction will apply to all salaried employees. Similar arrangements have already been put into effect as to employees on an hourly basis.

Mr. Merriek emphasizes the point that this arrangement is solely an emergency measure to spread the work through this period of severe business depression and that normal arrangements will be reinstated with the advent of normal times.

ALONG THE LINE

As an aftermath of the Oakland paving graft scandal of last year, the City Council of El Cerrito, Contra Costa County, voted to request the resignation of City Engineer Ross Calfee, who has served in that position for the last eight years. Councilman Leroy Larsen said the city had been adversely criticized for Calfee's testimony in behalf of Harry Lesser, convicted for his part in the paving graft ring in Oakland.

Leroy S. Buffington, 83, architect, who claimed to have originated the skyscraper idea, was found dead in bed Feb. 16, at Minneapolis, Minn., the victim of a heart attack.

R. F. Hammett retired February 1 from the position of secretary-manager of the California Redwood Association, which position he held for the last ten years.

George A. Posey, county surveyor of Alameda County, has been appointed as official advisor for the town of Livermore in the preparation of a zoning ordinance which will protect the residential districts of the city from encroachment of business establishments.

City Commissioner George Wilhelm and Walter N. Frickel, city engineer, have been appointed by the Oakland city council to act as that city's representatives on February 23 in San Francisco, concerning the proposed widening of the Brooklyn Basin and the elimination of Government Island. Representatives of the port commission and the city of Alameda will also be present at the hearing. East bay officials say that they favor the establishment of a wide turning basin for shipping in Brooklyn basin.

Jas. Dean, city manager of Sacramento, in a report to the city commissioners, estimates the cost of a subway under the Sacramento river at \$4,212,000. Preliminary surveys for the project have been made by Fred J. Klaus, city engineer.

V. L. Peterson, engineer for the Tacoma, Wash., public utilities extension division for the past four years, has resigned to accept a position with the U. S. Army in connection with barracks construction at Fort Shafter, near Honolulu.

T. C. Kistner of the architectural firm of T. C. Kistner & Co., of Los Angeles, has been appointed as California representative on the National Council on School Buildings. He was named to the post by William John Cooper, U. S. Commissioner of Education. Mr. Kistner will attend the meeting of the council in Detroit the latter part of the month.

Assemblyman Mathews has offered an amendment to the Nevada state constitution which would permit taxpayers and citizens to determine the need for bond issues themselves instead of having the legislature decide on the question. Mathews believes the legislature has other things to do besides worrying about local bond issues and in addition, he believes, many issues have not the full support of the citizens which they affect but are adopted by the legislature because none of the opposition's arguments reach the legislators' ears.

TRADE LITERATURE

J. Gerald Erennen, former manager of insulating sales for the E. K. Wood Lumber Company of Los Angeles, and for six years with the Celotex Company in California, has been appointed general field representative for the Thermax Corp., 1411 Fourth Avenue Building, Seattle. His work will consist of promotion of sales in the western states and will maintain headquarters at Seattle.

S. P. Larsen, for the past four years Northwest manager of the Line Material Company, has been made district sales manager in the Northwest for Hubbard & Company, pole line hardware manufacturers of Pittsburgh, Chicago, and Oakland. He succeeds H. L. Manny, who resigned to become manager of the Seattle office of Maydwell & Hartzell, Inc.

Pacific Electric Manufacturing Co. of San Francisco, announces the appointment of Roy Wilkins as vice-president in charge of engineering. Stockholders have ratified the appointment. Wilkins joined the Pacific Electric Manufacturing Company early in 1928 to act in a consulting capacity. For fifteen years prior to that date he had been associated with the Pacific Gas and Electric Company, and at the time of his resignation was assistant engineer in the division of hydro-electric and transmission engineering.

ARIZONA REJECTS DAY LABOR ON ROADS

By a vote of 36 to 26, the assembly of the Arizona Legislature defeated a bill which provided for the construction of state highways by day labor instead of the contract method which has prevailed heretofore. The measure was urged by Governor Hunt as an unemployment relief measure.

Thomas MacDonald, chief of the Bureau of Public Roads, advised the state highway department of Arizona by telegram that Federal aid road work cannot be done by day labor; also that the prevailing wage scale in the state must be maintained on all Federal aid contracts.

YARDS AND DOCKS EXPENDITURES HEAVY

During the last six months of 1930 the Bureau of Yards and Docks, Department of the Navy, in its efforts to speed up construction for relief of unemployment, awarded 164 contracts involving a total of \$4,739,750, which is \$506,000 more than all the work contracted for in the fiscal year ended June 30, 1928, and within \$90,000 of the amount contracted for during the fiscal year ended June 30, 1929.

In addition to the contracts awarded during the last half of 1930 "a vast amount" of new construction has been carried on by day labor, the department reports. The latter will probably run more than \$1,600,000.

Bids have been requested on 10 projects estimated to cost \$1,680,000, including work at Hampton Roads, Pearl Harbor, Hawaii, and Mare Island, Calif. Calling for bids on a \$2,750,000 ammunition depot in the Hawaiian Islands awaits the final decree in condemnation proceedings for a site, now pending.

TRADE NOTES

Under the title "Insulation" C. D. La Moree, with offices in Los Angeles, San Francisco, Phoenix, and Seattle, has issued catalog of the products of the manufacturers whom he represents.

Type AL knife switches, a new line of switches designed to meet the latest requirements of the National Electric Code and the National Board of Fire Underwriters, are described in Leaflet 20509, a new publication of the Westinghouse Electric and Manufacturing Company. This publication covers the application and construction of these switches, and contains a table including ratings and style numbers. It has been assigned A. I. A. Number 31-D-41.

Catalog No. 4,000 is the third catalog section issued by The Bristol Company, Watertbury, Conn., on the subject of air operated control equipment, and is devoted to accessories made by The Bristol Company and other manufacturers for use with such equipment.

The consolidation of two or more solenoid operated oil circuit breakers into one compact, steel-armored unit is described in the Dec. 15 issue of The Delta Star, published monthly by Delta-Star Electric Company, Chicago.

Vertical triplex single-acting power pumps are described in a recent booklet of the Worthington Pump & Machinery Corp., Harrison, N. J.

Illumination, Ltd., recently incorporated in succession, Henck Co., has opened headquarters at 71-73 Thirteenth Street, Oakland. The new firm will specialize in the sale and distribution of floodlighting equipment and general illumination, particularly airport lighting. R. B. Bernard is president of the company and Chas. L. Henck, illumination engineer.

Insulators for wood poles where guy wires are used are described in Publication No. 404H of the Ohio Brass Company, Mansfield, Ohio, entitled "O-B Wood Guy Strain Insulators."

Type T heavy-duty planer motors for reversing service are the subject of Bulletin No. 207 of the Reliance Electric and Engineering Company, Cleveland, Ohio.

VALUE OF PLANING MILL PRODUCTS LOW

A report just published by the Bureau of the Census shows the value of planing mill products in the U. S. for the year 1929 was \$1,046,528,051, a decrease of 5.6 per cent as compared with the next previous census of the industry taken in 1927.

Production for 1929 is classified as follows: Dressed lumber, including flooring, ceiling and siding, \$492,650,828; doors, \$59,215,987; sash, \$25,282,123; window and door frames, \$27,699,331; plywood, \$55,085,220; portable houses, \$11,575,152; tanks and vats, \$5,187,047; silo stock, \$3,273,497; miscellaneous millwork and millwork not reported by kind, \$359,827,703; amount received for custom planing, \$5,630,563.

SOUTHERN CONFERENCE ENDORSES MECHANICS LIEN LAW AMENDMENTS

The following resolution was passed at the meeting of the Southern Conference of Builders' Exchanges, held at Pasadena, January 30, endorsing the principle of the proposed amendments to the California Mechanics' Lien Law:

BE IT RESOLVED

That the Southern Conference of Builders' Exchanges this day assembled at Pasadena, California, hereby endorse the principle of the proposed amendments to the Mechanics' Lien Law as drafted by Glen Behrmer along the following lines, to-wit:

1. Giving concurrent jurisdiction in Mechanics' Lien action under \$2000.00, to the Superior and Municipal Courts and clearing up doubts as to necessary parties defendant where they are holders of mortgages or deeds of trust.

2. An obligatory requirement for the withholding of building funds after the service of the stop notice, unless a bond for the protection of the laborers and material men has been furnished in response thereto.

3. The provision that bonds executed by money lenders for faithful completion should be required to inure to the laborers and material men as well.

4. The enactment of a statute permitting the financing of the property either before or after beginning construction, by the filing of a bond running to the laborers and material men in an amount equal to one-half of the face principal amount of any mortgage or deed of trust which is to be a building loan upon the property.

5. The enactment of legislation establishing, so far as possible, the principle that a building loan is a trust fund applicable to the completion of the building and the payment of laborers and material men involved therein, and all building loans to maintain priority shall be accompanied by a recorded bond insuring to laborers and material men for an amount equal to one-half of the face of said loan.

FURTHERMORE,

The conference endorses the principle of the act providing for the recording of a "Notice of Intention to Improve Real Property" suggested by

J. W. Morin, defining building loans as being credit extended to the owners of real property as conditional upon the erection of buildings thereon, and providing that all persons who propose to erect improvements upon property which is subject to encumbrances must make a verified statement of the condition of their title with reference to encumbrances, including a summary of the nature and extent of the encumbrances, identifying the holders thereof and set forth the fact as to the actual and true consideration of said encumbrances whether the same be money, exchanges of real estate, chattels, commissions, and what deductions from the building loan are proposed to be made, necessarily developing therefrom the fact as to what actual monies remain available for actual building purposes, said act furthermore requiring a statement of the amount which it is proposed to expend on said building projects.

Said Act furthermore providing for a Notice of Abandonment in case said project is not begun, thereby clearing the title from the effect of the preliminary notice. Attention is hereby called to the fact that the provisions of this act in no way affect the work of cities, counties, state or other political subdivisions, or corporations acting upon jurisdiction of the state railroad commission, or in case of projects involving less than \$500.00.

FURTHERMORE,

This Conference approves in principle the changes proposed in amendments to the Contractors' License Law of 1929 by J. W. Morin and urges that the Department of Professional and Vocational Standards co-operate with Mr. Morin to bring his suggestions of details so far as possible into harmony with the general suggestions of the department on this subject.

Providing, however, that it was the sense of the meeting that the law should be so designed on the subject of connivance and collusion between contractors and others, that material dealers should be protected when dealing in good faith with contractors whom they believe to hold licenses in good standing.

that prompted him to take the initial step and move on with a general determination, to complete same step. Give the average individual his money's worth and he will pay it without a whimper; if he doesn't get his money's worth he has a right to kick, and he will. The business of financing homes is no exception to the rule.

"It is in this connection that I have been much interested in the present efforts of the National Committee on Wood Utilization of the Department of Commerce in cooperation with the Ohio Association of Retail Lumber Dealers and the Service Bureau of the American Wood Preservers' Association to foster the use of treated lumber in residential buildings. Whether wood under any conditions of quality or use will outlast the normal expectancy of the building may or may not be a moot question. The fact is that the accumulation of moisture at points of contact of wood work and masonry makes it necessary to replace wooden floors and foundation members long before the wood in other portions of the building shows signs of decay. These replacements are expensive."

Of equal or greater importance is the protection which the use of treated lumber provides against subterranean termites which, according to Mr. Wyman, "silently, but certainly have become a real menace to home owners over a large section of the United States. Untreated wood is in great danger of destruction wherever insects can reach it from the ground. Thousands of home owners in the United States today are headed for heavy repair bills because of termites. An investment of only a few dollars in chemically treated lumber would have precluded the absolute certainty of a much greater cost of replacements."

Again referring to the wood utilization committee's treated lumber program, Mr. Wyman said that time and effort "expended in educating the public to the many advantages of treated lumber cannot be valued in terms of mere profit from the sale of the material itself. It is an investment in the business of home building and home owning. Whatever increases and stabilizes that business cannot be measured in dollars and cents."

While the committee stresses the immunity of properly treated lumber to decay and insects, it also points out that there are a number of naturally durable woods with special properties which make them resistant without treatment. The supply of these woods, however, is inadequate to meet the demands of the building and construction industries, and so builders and home-financing institutions are turning to the preservative treatment of the less durable species of which there is an ample supply.

CHEMICALLY TREATED LUMBER RECOMMENDED FOR RESIDENCES

Declaring that every home owner has a right to expect full value for the money invested in the construction of a house, John M. Wyman of Cincinnati, Ohio, editor of the American Building Association News, in a recent address at the annual meeting of the Ohio Association of Retail Lumber Dealers at Cleveland, commended efforts of the National Committee on Wood Utilization of the Department of Commerce to further sound wood-using practices.

Mr. Wyman is author of the recently published "Building and Loan Construction Standards" which have been adopted by the United States Building and Loan League as minimum specifications upon which money will be advanced for the building of homes. The use of chemically treated lumber, resistant to decay and insect attack, is recommended in the new standards to prevent premature depreciation and

excessive repairs of certain parts of a building, such as foundations, sills and joists, where the lumber is exposed to dampness.

It is in this connection that Mr. Wyman referred to the program of the National Committee on Wood Utilization, which seeks to familiarize the home building public with the uses and economies of treated lumber. The committee is sponsoring the distribution of the material through retail lumber dealers, so that it may be obtained easily by the small consumer who wants only the few board feet, all that is usually required, to protect his home from the chief enemies of wood: Mr. Wyman said:

"Time is the laboratory in which all things receive the final test. The individual who, by actual performance of his house is made to realize that he has received full value for his investment will feel more keenly the urge

Employment in the Seattle building trades is at a low point, it is announced. All trades have been hard hit and no improvement is expected for at least six weeks.

Somewhat more activity is noted in smaller construction as the season progresses. More inquiries are being directed to architects from prospective builders than has been the case for many months, but there is certainly no evidence of any building boom. Home building is more active.

Indications point to increasing activity in smaller structures with few exceptionally large projects on the boards of the architects at this time.

ARCHITECT AS A BUILDING SPECIALIST

Paper presented by the Architectural Institute of British Columbia and read at the February luncheon meeting of the Victoria chapter of the Institute.

"In these days of intense competition in the business world the man who is to succeed must concentrate every thought upon his own particular field of endeavor.

"It naturally follows that when the need arises for building a factory, office building or residence, the prospective owner finds himself lacking in the specialized knowledge of building methods so necessary to the attainment of successful results. He must seek someone fitted by training and experience to analyze the project, from the drawing of the plans to its satisfactory completion.

"An architect is the best qualified for the important job. Based on a careful analysis of building problems, the architect's plans and specifications will present practical methods of meeting every requirement of owner or occupant.

"The superintendence of an architect is not that of a mere overseer, but rather that of a trained director, who co-ordinates the various features of the work so as to insure satisfaction, both from an economic and an artistic standpoint.

"The ideal building would be built by the owner, if the owner had the training and experience requisite for the work. But most men have been too busy all their lives with their own enterprises to study the technique of building design and construction. Bewildered, would be the result of any attempt on the part of the owner to establish a 'construction department' of his own.

"It is in the construction department of an architect's office that the problem is analyzed and solved. The resulting plans, after receiving the customer's approval, become the basis for the tenders of the several contractors.

"The work of the contractor is done with the guidance of the architect, whose training and specialized skill are at the owner's disposal. Employed and paid by the owner, the architect represents him in the hundred and one decisions involved in the processes of the building. He is bound by the ethics of his profession to accept no fees from any other source. He must, at the same time, exercise all fairness in his dealings with the contractor.

"Successful building operations, like successful army operations, call for the appointment of one man who shall have final authority for all practical decisions as to materials and methods. The scope of the architect covers every branch of the building industry. He has at his command full and complete knowledge of practical methods, suitable men and available materials.

"After the plans are approved, the architect co-operates with the owner and the various contractors. He directs the work at every stage, and assumes full responsibility for carrying through every detail of the specifications to the satisfaction of those who are to own or use the finished structure."

ORNAMENTAL METAL INDUSTRY GROWING

American architects are unanimous in the belief that there can be no substitute for art, according to William A. Boesche, President of the National Association of Ornamental Iron, Bronze and Wire Manufacturers.

"Despite the fact that many modern building materials are now produced synthetically, the demand for the genuine still leads the demand for the imitation," Mr. Boesche declared. "Even in these days of economy and substitution, art still triumphs over imitation in the long run.

"Caen stone" made of plaster, 'marble flooring' made of composition, 'walnut panelling' that comes in paper bags ready to be mixed with water—these, some authorities tell us, are characteristic of the modern urge to get everything done as quickly and as cheaply as possible. It is even predicted that the current architectural era will go down in history as the 'Age of Imitations.'

"This I cannot agree with, especially in view of the record of the ornamental metal industry last year. Approximately a quarter of a billion dollars was spent by builders and home owners last year for wrought iron and bronze—two materials which refuse to be imitated and which have maintained their individuality for centuries. This seems to indicate conclusively that true art and craftsmanship have not been displaced by cheaper substitutes. Architects and builders are turning back to basic and true materials to achieve the beauty and individuality which they cannot attain with substitutes.

"Proof of this is seen in most of the outstanding skyscrapers of 1930. Built in a slow year with the expectation that they would return a profit on the investment over a period of years, these buildings are heavily decked with doors, balconies, stoop rails, stairs, grilles, marquees and other fixtures of genuine metal.

"The fact that 1930 was a busy year for the skilled metal craftsman is ample proof that art still triumphs. We have yet to find a substitute for beauty."

ENGINEERS WANTED FOR STATE SERVICE

Applications are being received by the California State Civil Service Commission, 319 State Capital Building, Sacramento, for positions in State Department of Public Works. Those desiring to take the examinations must file their application with the commission before February 28.

Examinations will be held in the immediate future for the following positions:

Under engineering aid, salary \$105-\$115.

Junior engineering field aid; entrance salary, \$120.

Senior engineering field aid; entrance salary, \$145.

Junior engineering office aid; entrance salary, \$120.

Senior engineering office aid; entrance salary, \$145.

Highway draftsman—computer; entrance salary, \$170.

Complete details are available from the commission offices in Sacramento or the San Francisco office, 115 State Building, in Civic Center.

U. C. ARCHITECT WINS ART HONOR

To Michael Baltekal-Goodman, Russian emigre and University of California alumnaus and lecturer, architecture is work and art a hobby. Though he is a lecturer in the former in the university, and employed in the same field in the business world, he has received two signal recognitions from the art world within a week.

The first recognition came from the jury of award at the recent state-wide art exhibition in Santa Cruz. One of Goodman's sketches, a Berkeley hills scene entitled "Spring Grass," was awarded first place in the pastels division of the exhibit.

On the heels of the notification from Santa Cruz came another notice from the American Institute of Graphic Arts of New York that a wood engraving of a circus scene, entitled "Canvas Mountains," has been selected as one of the fifty best prints of 1930 by American artists both in this country and abroad.

The selection was made this year by Louis Mumford, internationally known critic, as a jury of one. The prints selected will be published in book form this spring. Goodman has given several exhibitions in the bay region, as well as exhibited work in galleries on the west coast and the east coast. He hopes to arrange another exhibit on the campus at Berkeley late this spring.

STRUCTURAL STEEL STANDARD APPROVED

The American Tentative Standard, Zinc Coatings on Structural Steel Shapes, Plates, and Bars and their Products (GSC-1930), has been approved by the American Standards Association.

The standard was submitted for ASA approval under the proprietary sponsorship made by the American Society for Testing Materials as a revision of a previous A. S. T. M. standard. It includes designations of specific grades of structural steel, grades of galvanizing spelter bath, maximum amount of impurities allowed in the molten zinc, the specifications for steel embrittlement, weight of zinc coating, and a test for uniformity of zinc coating.

The standard departs from the previous issue is no longer designating specific grades of structural steel but permitting instead the use of steel conforming to standard specifications. Definite limits were also provided for the permissible proportion of impurities in the galvanizing spelter bath. The limits are 1.66 per cent lead, 0.06 per cent iron, and 0.01 per cent aluminum. A minimum weight of 2.0 ounces of zinc coating per square foot of strip surface is set in the standard in place of the added provision that no individual specimen shall show less than 1.8 ounces per square foot.

The method recommended for determining the weight is that of weighing one or more specimens after pickling and drying and again after coating, or inspection is made after manufacture. However, the weight may be determined by stripping an entire piece in accordance with the A. S. T. M. standard method (A90) covering this subject. Because of the general use by consumers of the Freese test for determining the uniformity of the zinc coating that test is included in the standard, although it is pointed out that the test is inadequate for determining weight, thickness, or uniformity of the coating.

Copies of the standard may be ordered from the ASA office, 29 West 39th Street, New York City, or from the American Society for Testing Materials, 1315 Spruce Street, Philadelphia, Pa.

 Santa Rosa.

BONDS

ARROYO GRANDE. San Luis
 Obispo Co., Cal.—Arroyo Grande
 School District will call a bond elec-
 tion soon to vote on the question of
 issuing bonds for the erection of a
 new elementary school. Approxi-
 mately \$45,000 will be needed for the
 new building.

FRESNO. Fresno Co., Calif.—At a
 recent joint meeting of the Fresno
 Real Estate Board, the Chamber of
 Commerce and members of the City
 Council, discussion was given to a \$2-
 000,000 bond issue to finance purchase
 of a site and the erection of a munici-
 pal auditorium. The question of a
 new city hall and jail building was
 also discussed which would cost an
 additional \$500,000. It is possible that
 the bond proposals will be submitted
 to the voters at the April election.

LOS ANGELES. Cal.—Election will
 be held March 5 to vote on a \$1,000-
 000 bond issue for the improvement
 of parks and \$1,000,000 for improve-
 ment of playgrounds. Work will be
 planned to assist unemployed.

LOS BANOS. Merced Co., Cal.—
 West Side Union High School District
 has called a bond election for March
 10 at which time it is proposed to
 vote bonds in the sum of \$175,000 for
 the erection of a new high school
 building. W. D. Coates Jr., Fresno,
 will be the architect.

 San Francisco 7962
 SALES . SERVICE . RENTALS

LAKEPORT. Lake Co., Cal.—County
 supervisors sell \$8,000 bond issue
 of Superior Bank School District for
 premium of \$300, proceeds of sale to
 finance erection of additions to the
 present school.

ST. HELENA. Napa Co., Cal.—St
 Helena School District Trustees con-
 template a bond issue for \$112,000 to
 finance erection of a new grammar
 school to replace the present stone
 building which has been declared un-
 safe. The State Division of School-
 house Planning estimates the cost of
 reconstructing the present structure
 at \$16,000.

CORONA. Los Angeles Co., Calif.—
 Special election will be held in March,
 at which time it is proposed to vote
 bonds in sum of \$75,000 for construc-
 tion of school additions. Program calls
 for a 6-room addition to the high
 school and a 4-room addition to the
 Jefferson school. G. S. Wilson, River-
 side, will probably be the architect.

CHURCHES

GRASS VALLEY. Nevada Co., Cal.—
 E. Hutton, Grass Valley, awarded
 contract by Christian Science Society
 to erect edifice in south side of West
 Main St., near School St. Will house
 church auditorium and public reading
 rooms.

Completing Plans—contract Awarded.
CHURCH Cost, \$40,000
SAN PABLO. Contra Costa Co., Cal.
 Church and Market Streets.
 Church (Mission style).
 Owner—St. Pauls Catholic Church
 Rev. Eyste Tozzi, San Pablo.
 Architect—John Foley 770 Fifth Ave.,
 San Francisco.
 Contractor—S. Rasori, Cal Building,
 San Francisco.

Construction will start about March
 1st. The site of the new church is
 near the present St. Pauls church and
 upon its completion the old church
 will be placed in repair and used for
 a hall.

Plans Being Prepared.
CHURCH Cost, \$4000
HAYWARD. Alameda Co., Cal. Grace
 and Soto Sts.
 Frame church.
 Owner—Grace Lutheran Church, Rev.
 Walter Luebkehan, pastor.
 Plans by Walter Hagedorn, 905 South
 Western Ave., Los Angeles.

VISALIA. Tulare Co., Cal.—First
 Presbyterian Church, C. R. Bolier,
 chairman of building committee, has
 started work on the erection of a
 Sunday school building to cost \$10-
 000. It will contain eleven classrooms
 and two auditoriums.

Preliminary Plans Being Prepared.
CHURCH Cost, \$—
CHICO. Butte Co., Cal.
 Church building.

Owner—Bidwell Memorial Church.
 Rev. R. C. LaPorte, pastor.
 Architect—Chas. F. Dean, California
 State Life Bldg., Sacramento.

The structure will be erected on the
 site of the old Presbyterian Church
 which was recently destroyed by fire.
 A portion of the old church building
 will probably be used in the erection
 of the new structure.

FACTORIES AND WARE-HOUSES

Plans Being Prepared.
SHOP Cost, \$10,000
SANTA ROSA, Sonoma Co., Cal. 3rd and A Streets.
 One-story reinforced concrete sheet metal and shop radiator.
 Owner—Ed Holtz, 503 3rd St., Santa Rosa.
 Private plans.

Plans Being Completed
SAN JOSE, Santa Clara Co., Cal.
PLANT Cost, \$100,000
 Three- or four-story concrete or brick manufacturing and refining plant.
 Owner—Liquid Sugar Corp., 637 Battery St., San Francisco.
 Plans by Eng. Dept. of Owner.
 Bids will be taken in about thirty days.

To Be Done By Day's Work.
DECK Cost, \$11,000
SAN FRANCISCO. Carroll and Newhall Streets.
 Steel trussed and steel roofed deck to cover bar yard.

visors to furnish and deliver gasoline
and oils during the year 1931.

Engineering News Section

BRIDGES

PALO ALTO, Santa Clara Co., Cal.—City council contemplates a bond issue to finance construction of a sub-way at the Embarcadero road railroad crossing. Preliminary surveys for the sub-way have been completed by J. F. Eybsee, Jr., city engineer. The Southern Pacific R. R. would share in the cost of construction.

SAN BERNARDINO COUNTY, Cal.—Until March 11, 2 P. M., bids will be received by State Highway Commission to construct a reinforced concrete girder bridge over the tracks of the Atchison, Topeka and Santa Fe Railway, about two miles east of Essex, consisting of one 48-ft. and four 34-ft. spans on concrete bents.

See call for bids under official proposal section in this issue.

PLACER CO., Cal.—Until March 11, 2 P. M., bids will be received by State Highway Commission to construct undergrade crossing under the tracks of the Southern Pacific R. R. at New England Mills, consisting of two concrete abutments with wing walls and grading and surfacing approximately 1,000 lineal feet of roadway with bituminous treated crushed gravel or stone surfacing.

See call for bids under official proposal section in this issue.

MODESTO, Stanislaus Co., Calif.—Bids will be asked within two weeks by the county supervisors to construct a reinforced concrete bridge over the Stanislaus river at Oakdale; estimated cost \$92,000. George Macomber, county surveyor.

SAN FRANCISCO.—Until March 25, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to construct bascule bridge over the Islais Creek Channel in 3rd Street. Estimated cost, \$400,000. The structure will be a single leaf bascule bridge, 140 ft. span, 80 ft. overall width; 103 ft. between fenders with 6 foot sidewalks. Provision will be made for two street railway tracks and the Belt Line Railroad in addition to vehicular traffic.

Bids are wanted for:

(1) Furnishing and erecting a bascule bridge superstructure and approaches, including the dismantling of the existing bridge anchors and appurtenances, and the construction of all necessary foundations, piers, abutments and appurtenances, all in conformity with the plans and specifications.

(2) Furnishing and erecting a bascule bridge superstructure, including counterweight, machinery and appurtenances, all in conformity with the plans and specifications.

Certified check 10% payable to the Clerk of the Board of Supervisors required with bid. Plans obtainable from the Bureau of Engineering, 3rd floor, City Hall.

OAKLAND, Cal.—As previously reported, bids will be received March 3, 10:30 A. M., by George E. Gross, county clerk, to construct reinforced concrete multiple box culvert at Station 520+00, known as the Alvarado-Centerville Road in Washington Road District. Project involves:

- (1) 370 cu. yds. excavation of struct.
- (2) 305 cu. yds. Port. cement concrete in structure.

- (3) 57,000 lbs. reinforcing steel;
- (4) remove existing bridge.

Certified check 10% payable to clerk required with bid. Plans obtainable from clerk Geo. A. Posey, county surveyor.

STOCKTON, San Joaquin Co., Cal.—Alfred Love, Stockton, at \$2,846 submitted low bid to county supervisors to construct two bridges on the Farmington-Bellota road in Road District No. 1. Complete list of bids follows:

Alfred Love	\$2,846
Carl Nelson	2,865
Ulrich Const. Co.	2,997
Nelson Brothers	3,065
J. Hackman	3,080
Periera & Reed	3,280
Clyde Wood	3,250
I. E. Toothacre	3,330
L. Uhels	3,345
Edw. R. Jamieson	3,590
Engstrom Const. Co.	5,560

STOCKTON, San Joaquin Co., Cal.—County supervisors reject bids to construct subway near Forrest Lake on the Lower Sacramento road in Rd. Dist. No. 2, under the tracks of the Southern Pacific Railroad. E. R. Stokes, 933 S. Sierra Nevada Street, Stockton, submitted the low bid at \$12,370.25, and is declared to have claimed an error in compiling the bid. Specifications also failed to state the time of completion for the work. New bids will probably be asked at once. A complete list of the unit bids on this project were published in issue of February 13. Julius Manthey is county surveyor.

SONOMA COUNTY, Cal.—Following bids received Feb. 18 by State Highway Commission to construct timber bridge across Mark West Creek about 45 miles north of Santa Rosa, consisting of six 19-ft. spans and two 16-ft. 10-in. spans, surfaced with Portland cement concrete, on pile bents and grading and paving approaches with Portland cement concrete pave. Peter McHugh, 466 36th Ave., San Francisco

San Francisco	\$19,356
Ralph Hunter, Sacramento	19,511
J. W. Hoops, Sacramento	21,287
Fred. J. Maurer, Eureka	22,255
A. T. Howe, Santa Rosa	22,743
Smith Bros. Co., Eureka	22,791
W. C. Cooley, Santa Rosa	23,455

LOS ANGELES, Cal.—Bids will be asked in March by the Board of Public Works to construct the Sixth St. Viaduct; estimated cost \$1,520,000. Will be reinforced concrete construction, girder span type, with structural steel river span. Total length 3600 feet. The bridge proper will be 46 ft. wide; at the approaches 56 ft. East of the river the bridge will be 60 to 68 ft. above the street level. Merrill Butler is chief bridge engineer for the city.

PORTLAND, Ore.—Until 10 A. M., Feb. 25, bids will be received by the U. S. Bureau of Public Roads, New Postoffice Bldg., Portland, Ore., to construct bridge over Sauk River, consisting of one 225 ft. through steel truss span; one 25-ft. and three 33-ft. log framed trestle spans together with a log framed trestle over logging railroad consisting of one 20-ft. and four 30-ft. spans and grading west approach on Sialatte River

Forest Development Road, located within or adjacent to Mount Baker National Forest, County of Skagit, State of Washington. The principal items are:

- (1) 4500 cu. yds. excav. unclass. west approach;
- (2) 400 cu. yds. excav. struc. unclass;
- (3) 100 cu. yds. screened surfacing;
- (4) 49 M ft. B. M. untreated timber;
- (5) 0.4 M. ft. B. M. treated timber;
- (6) one 25-ft. log span;
- (7) three 33-ft. log spans;
- (8) four 30-ft. log spans;
- (9) one 20-ft. log span;
- (10) 900 ft. logs in log bents;
- (11) 180 cu. yds. class A concrete;
- (12) 51 cu. yds. class B concrete;
- (13) 42 cu. yds. class C concrete;
- (14) 13,500 lbs. reinf. steel;
- (15) 245,700 lbs. structural steel;
- (16) one movable span.

Plans may be obtained from the district engineer, W. H. Lynch, at above address, upon deposit of \$10. Proposal guaranty, 5%.

STOCKTON, San Joaquin Co., Cal.—Alfred Love, Stockton, at \$2,846 awarded contract by county supervisors to construct two bridges on the Farmington-Bellota road in Road District No. 1.

PERSHING COUNTY, Nevada.—As previously reported, bids will be received February 25, 3 P. M., by State Highway Commission, S. C. Durkee engineer, Carson City, to construct concrete and steel grade separation structure including approaches over the Southern Pacific Railway near Woolsey in Pershing County. Project involves:

- (1) 42,600 cu. yds. excav., unclass., in place;
- (2) 420 cu. yds. structure excav;
- (3) 0.26 mile prepare subgrade and shoulders;
- (4) 77,000 lbs. reinf. steel in place;
- (5) 53,700 lbs. structural steel in place;
- (6) 210 cu. yds. class D concrete;
- (7) 240 cu. yds. class A concrete;
- (8) 2056 lin. ft. standard timbe guard rail in place;
- (9) 8 monuments;
- (10) 900 cu. yds. load, haul and spread gravel;
- (11) 0.29 mile finishing roadway.

Crushed rock or crushed gravel for surfacing roadway furnished by the state in stockpile opposite Station "L" 422.

Certified check 5% required with bid. Plans obtainable from engineer on deposit of \$15, of which \$10 is returnable and on file in the office of the U. S. Bureau of Public Roads, 44 Market St., San Francisco.

SAN FRANCISCO.—Bids for all the major construction features of the Golden Gate Bridge will be called for during April and May and will be opened about June 1. Announcement of this plan was made by the directors of the Golden Gate Bridge Highway District. Financial Cente Bldg., following their acceptance of the recommendations made by the chief engineer and the consulting board. The first call will include bid for the substructure for the main bridge, which will require three set

arate bids: (1) the two main piers; (2) the two anchorages; (3) a bid on the two items combined.

The steel superstructure will be included in item 3, on which three bids will be called; (1) on the cables, suspenders and anchorage steel; (2) towers, stiffening trusses, floor system, steel approaches and all other steelwork between the anchorages; (3) a bid on the two items combined.

Item 3 will be the bids for the two approaches: (1) the Presidio road, including viaducts and accessory structures; (2) the Sausalito road, including viaducts and accessory structures.

All miscellaneous construction will be included in item 4, which will be let in six contracts: (1) paving of roadway floor of main structure and to the plaza; (2) the railing on the main structure; (3) lighting; (4) toll houses and plazas; (5) final painting coat; and (6) incidentals.

In order to allow ample time for coordination with the issues of the bonds, it is recommended that bids be asked for item 2 on April 1. Item 1 on April 15 and item 3 on May 1, all of which will be opened on June 1. Bids will not be called for on item 4 until a later date, but an estimate of the cost of construction included in this item will be submitted on June 1st.

DREDGING, HARBOR WORKS & EXCAVATIONS

OAKLAND, Cal.—American Dredge Co., 255 California St., San Francisco, at (a) \$.52 cu. yd. for dredging and disposing of material and (b) at \$4 each to remove pile studs from water, awarded contract by City Port Commission for dredging slips fronting the Inland Waterways Pier at the foot of Webster and Franklin Sts.

Pacific Coast Dredging Company, San Francisco, at (a) \$.625, and (b) \$.5, only other bidder.

STOCKTON, San Joaquin Co., Cal.—Following bids taken under advisement by U. S. Engineer Office, Sacramento, for dredging approximately 4,320,000 cubic yards of material in the Stockton 26-foot channel prism, from the mouth of Mormon Channel in the City of Stockton to the mouth of Burnett Cut-off, in the San Joaquin river:

Hydraulic Dredging Co., Oakland, (a) 17c; (b) 19c; (c) 175c.

Standard Dredging Co., Oakland (a) 1824c; (b) 1655c; (c) no bid.

S. F. Bridge Co., San Francisco (a) 185c; (b) 165c; (c) no bid.

Engineer's estimate, (a) 144c; (b) 115c; (c) 133c.

Taken under advisement.

OAKLAND, Alameda Co., Calif.—Jack Casson, Hayward, at \$.399 submitted lowest bid to City Port Commission for disposition of excess dredge fill east of Warehouse B on the waterfront, involving 5,000 cu. yds. Complete list of bids follows:

Jack Casson\$399
L. J. Immel425
Paris Eros,429
N. E. Lee47
Ariss-Knapp Co.,50
J. Catucci535
W. Forsythe75

OAKLAND, Alameda Co., Calif.—Longview Dredging Co., Longview, Wash., at 3c per cu. yd. submitted only bid to City Port Commission, 424 Oakland Bank Bldg., for placing 600,000 cu. yds. dredging material tracks north of the Key Route Mole.

PEARL HARBOR, T. H.—Bids will be asked shortly by the Bureau of Yards and Docks, Navy Department, Washington, D. C., under Specification No. 6299, for dredging at the

Naval Operating Base, Pearl Harbor. The work includes dredging and disposal of approximately 2,900,000 cubic yards of material. Applications for plans may be filed with the Commandant at the Mare Island Navy Yard and must be accompanied by a check or postal money order for \$20, payable to the Chief of the Bureau of Yards and Docks. Deposit is returnable.

WANTED

TO PURCHASE used Linn Tractor Truck, Lidlal-Wiley, Inc., 208 Columbia St., Seattle Washington.

AUBURN, Placer Co., Cal.—Miners Foundry, Nevada City, has been awarded contract by City at \$375 for furnishing one rock crusher, jaw type, 8x10-in. Other bids were: Harron, Rickard & McCone Co., \$755 and \$767; A. L. Young Machinery Co., \$846; Ails Chalmers Mfg. Co., \$880; Joshua Hendy Iron Works, \$897; Kratz & McClelland Co., \$1637 and \$1945.

RAILROADS

BOULDER CITY, Nev.—R. Hardisty Mfg. Co., 3063 Blake St., Denver, awarded contract by U. S. Bureau of Reclamation, at \$15,507 for furnishing metal pipes and coupling bars for the Hoover Dam Railway project.

BOULDER CITY, Nev.—J. M. Gordon of Denver, Colo., awarded subcontract by the Lewis Construction Co., 300 S. Juanita St., Los Angeles, for constructing approximately 1609 lin. ft. of tunnel, 18x26-ft. section, in connection with the building of the Hoover Dam Railway, contract for which was awarded to the Lewis Construction Co. on Jan. 28 at \$455,509.50.

FIRE ALARM SYSTEMS

SOUTH SAN FRANCISCO, San Mateo Co., Cal.—City Improvement Co., Berkeley, at \$1897 awarded contract by city council to furnish and install traffic signals and control equipment at two street intersections. Complete list of bids follows:

City Imp Co., Berkeley\$1,897
General Elec. Co., S. F.2,264
Ganewell Co., San Francisco2,299

SAN MATEO, San Mateo Co., Cal.—Until March 2, bids will be received by city council to furnish and install traffic signal at Twelfth Ave. and El Camino Real. Specifications on file in office of clerk.

FIRE EQUIPMENT

RENO, Nevada.—City Councilman Chas. Nichols has introduced an ordinance in the city council providing for the purchase of a motor fire pump, engine.

SACRAMENTO, Cal.—Until February 25, 2 P. M., bids will be received by D. H. Greeley, superintendent of equipment, Shop No. 3, State Highway Commission, Sacramento, for the purchase of the following equipment no longer required:

CHC 176 Caterpillar "26" Tractor
CHC 142 150 Gallon Alco Asphalt Kettle.
CHC 142 150 Gallon Alco Asphalt Kettle.
CHC 45 Fairbanks Morse Pump Unit.
CHC 255 Caterpillar 2-ton Tractor.

Bidders may make offers for one or more items but must state price offered for each item. No lump sum bids will be considered.

All equipment may be inspected at the Division of Highways yards at 1832 34th Street, Sacramento, from 8:30 P. M. to 4:30 P. M. on any working days.

FAIRFIELD, Solano Co., Cal.—City council contemplates bond issue for \$7000 to finance purchase of motor fire engine.

RESERVOIRS AND DAMS

HEALDSBURG, Sonoma Co., Cal.—Until March 2, bids will be received by the city trustees to enlarge second reservoir in connection with municipal water system. Reservoir wall will be raised approximately 5 ft., adding approximately 50% additional storage capacity. Plans obtainable from City Engineer Archer B. Stuart.

HAWTHORNE, Nev.—Bids will be asked shortly by the Bureau of Yards and Docks, Navy Department, Washington, D. C., under Spec. No. 6329, to construct Cat Creek Dam in connection with the Naval Ammunition Plant; estimated cost \$150,000. Will be 120 ft. high and about 250 ft. across top, impounding approx. 50,000,000 gallons of water.

PIPE LINES, WELLS, ETC.

BERKELEY, Alameda Co., Calif.—T. D. Courtright, 5098 Manila Ave., Oakland, at \$601.70 submitted low bid to city council to construct storm sewer in Contra Costa Ave., involving (a) 12-in. sewer, \$1.36; (b) 10-in. sewer, \$1.74; (c) box culvert, \$2.50; (d) catchbasin, \$60; (e) manhole, \$52.
J. T. Clinch, 669 9th St., Oakland, only other bidder at \$794.50; (a) \$2.10; (b) \$2.10; (c) \$3; (d) \$60; (e) \$60.
Taken under advisement.

RENO, Nevada.—State officials are conferring with the Reno city council regarding the proposed connection of the Nevada state hospital sewage system with the Reno disposal plant.

COALINGA, Fresno Co., Cal.—Bunting Iron Works, Coalinga, at \$3.75 per 100 ft. awarded contract by city trustees to furnish 5000 ft. of 1-inch gas pipe. Complete list of bids follow: Hockey Pipe & Supply Co., \$3.75
Bunting Iron Works, 8.75
A. P. May, Inc., 8.75
Pauson & Co., 9.02

SEWERS AND SEWAGE DISPOSAL PLANTS

TULARE, Tulare Co., Calif.—City council rejects bids to furnish 3,500

ft. 18-in. hydraulic concrete pipe, and the city manager, R. M. Berryhill, instructed to purchase the pipe in the open market if lower prices can be secured, otherwise new bids will be asked. Rejection of the bids was prompted due to the fact that an outside concern was low bidder. The bids received follow:

Folland Bros., Kingsburg, \$5.50
R. Tonkers, Tulare, 5.52
F. W. Elaine, Tulare, 6.25
Tulare Cement Co., Tulare, 6.62
Jourdan Conc. Pipe Co., Selma, 6.65

ANTIOCH, Contra Costa Co., Cal.—City council will start proceedings shortly for sewer and water improvements in the Wills Addition, property owners having petitioned for the work. Street paving will be undertaken with the completion of the sewer and water projects.

SAN RAFAEL, Marin Co., Cal.—Residents in the Homestead Addition, adjoining Mill Valley, contemplate formation of a sanitary district to vote bonds to finance construction of a sanitary sewer system.

LONG BEACH, Cal.—Plans for the North Long Beach Sanitary Sewer System are being prepared by H. Paterson, city engineer, and will be ready for the city council within two months. The proposed system will serve the city north of the Virginia Country Club. It will involve between 40 and 50 miles of sewer, including pipe from 8-in. to 36-in. in diameter, with pumping station, etc. Outfall will be into the Metropolitan Sewer System. All work will be done under the 1911 Act.

LAS VEGAS, Nev.—The Las Vegas city commission has under consideration a bond election to vote on an issue of \$150,000 for constructing a sewage disposal plant, with necessary mains. The materials would be built by assessment, the estimate being about \$75 per lot.

SANTA MARIA, Santa Barbara Co., Cal.—Sewer extensions on North Broadway, as planned by City Engineer York Peterson, will involve pipe and equipment, as follows:

1500 ft. 12-in. vit. pipe;
2250 ft. 10-in. vit. pipe;
470 ft. 8-in. vit. pipe;
Temporary collecting tank;
Pumping Unit.

Work under Imp. Act 1911, with aid from the General Fund The estimated cost is \$14,300.

WATER WORKS

EL CENTRO, Imperial Co., Cal.—Until 7:30 P. M., Feb. 25, bids will be received by the El Centro city council

for 4000 ft. 4-in. class 150 bell and spigot cast iron pipe in 12 or 16-ft. lengths. Bids are desired on foundry; or coast stock, f. o. b. El Centro. Certified check or bond, 10%. J. C. Neale, city clerk.

MADERA, Madera Co., Cal.—Until March 2, 4 P. M., bids will be received by Jas. Wakefield, city clerk, for painting, minor adjustments and in incidental repairs to the municipal water tank with a capacity of 50,000-gals.

Interior and exterior of tank to be painted; replace spider rods where necessary; 2 air vents, 2 sq. ft. each to be set in tank roof and covered with 18-gauge, 1/2-mesh galvanize wire screen; caulk all leaks, etc.

Alternate bids will be received for the job complete and separately for labor, for materials and for paints.

Certified check 10% required with bid. Specifications on file in office of city clerk.

SAN FRANCISCO.—Until February 25, 2:30 p. m., bids will be received by S. J. Hester, secretary, Board of Public Works, for drilling 4 wells in 43rd avenue between Kirkham and Santiago streets and a test well in 46th avenue between Noriega and Ortega streets. Estimated cost \$11,000. Bids are wanted for (a) price per foot if well is on paved street;

(b) price per foot if well is in unpaved street.

Certified check 10% payable to clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall, on deposit of \$10, returnable.

ANTIOCH, Contra Costa Co., Cal.—City council will start proceeding shortly for sewer and water improvements in the Wills Addition, property owners having petitioned for the work. Street paving will be undertaken with the completion of the sewer and water projects.

OAKLAND, Calif.—Western Engineering Co., 18 Main St., San Francisco, at \$6,717 submitted low bid to East Bay Municipal Utility District to furnish and install centrifugal pumps and synchronous motor-pump units 5 and 6 for the El Cerrito Booster Plant. Complete list of bids follows:

Western Eng. Co., S. F., \$6,717
Pacific Pump Works, S. F., 6,76
Water Works Supply Co., S. F., 6,89
United Iron Works, Oakland, 6,99
Woodin & Little, S. F., 6,99
Pelton Water Wheel Co., S. F., 7,93
DeLaval Steam Turbine Co.,
San Francisco, 8,38
Allis-Chalmers Mfg. Co., S. F., 9,20
Byron Jackson Pump Co. Berkeley, 9,61
Worthington Machinery Corp.,
San Francisco, 10,97

FAIRFIELD, Solano Co., Cal.—City council plans bond issue to finance improvements and extensions to water system involving installation of mains, \$14,000; 100,000-gallon water tank on 100 ft. tower, \$7600; drilling wells, \$10,000; deep well pump, \$1500; water softening plant, \$6000.

PLAYGROUNDS & PARKS

SACRAMENTO, Cal.—City Manager Jas. Dean in a report submitted to the city council estimates the cost of a subway under the Sacramento river at \$1,212,000. Preliminary drawings for the subway have been completed by Fred J. Klaus, city engineer.

LOS ANGELES, Cal.—Dana R. Tyson, city landscape architect, 225 City Hall Bldg., has prepared preliminary plans for work to be done under the \$5,000,000 unemployed relief bond issue to be voted on March 5. The work includes replacing old trees around the city and placing new trees in all city parks and new districts. The lake beds of Hollenbeck, Westlake and Lincoln parks will be partially filled in. It is also planned to build a roadway to the observatory and hall of science in Griffith Park and build new trails throughout Griffith and Elysian parks. The total amount to be spent is approximately \$1,600,000.

STREETS AND HIGHWAYS

February 13, 1931

BID CALL CANCELLED

PALO ALTO, Santa Clara Co., Cal.—City council cancels call for bids scheduled to be opened Feb. 9 and adopts Resolution of Intention No. 962 providing for the improvement of the same streets with the exception of one-half block which has been eliminated from the program. Streets to be improved are Palo Alto Ave., Hale, Pope and Dana Sts., Forest Court, Addison and Harker Aves., Webster St., Embarcadero Road, Lane "B" East, Santa Rita Ave., Sherman Ave., Princeton, Oberlin and Harvard Sts., involving construction of vit. sewer mains and connections, brick manholes, c. i. water mains and galvanized iron water pipe connections, fire hydrants, gas mains, concrete storm sewer pipe, cem. conc. pavement, sidewalks, etc., 1911 Act. Hearing Feb. 25, 7:30 P. M. E. L. Beach, city clerk. J. F. Byxbee, Jr., city engineer.

SAN BERNARDINO COUNTY, Cal.—Following bids received February 11 by State Highway Commission to grade and surface with oil-treated crushed gravel or stone, 29.2 miles between 1.5 miles east of Essex and 1 mile southeast of Kinfeletter, involving:

- (1) 227,600 cu. yds. roadway excavation without class (Location A);
- (2) 132,000 cu. yds. roadway excavation without class (Location B);
- (3) 490,000 sta. yds. overhaul;
- (4) 106,000 cu. yds. imported borrow;
- (5) 97,000 cu. yds. ditch and channel excavation;
- (6) 42,800 cu. yds. pit run gravel sub-base;
- (7) 9170 cu. yds. structural excavation;
- (8) 80,000 tons oil-treated crushed gravel or stone surfacing;
- (9) 1900 cu. yds. crushed gravel or stone screenings (seal coat);
- (10) 1400 bbls. fuel oil (seal coat);
- (11) 346 lin. ft. 18-in. corr. metal pipe;
- (12) 2032 lin. ft. 24-in. corr. metal pipe;

- (13) 2888 lin. ft. 36-in. corr. metal pipe;
 - (14) 648 lin. ft. 48-in. corr. metal pipe;
 - (15) 8700 M. gals. water applied to sub-base;
 - (16) 29,420 lin. ft. furnishing treated pipes;
 - (17) 1399 each, driving pipes;
 - (18) 588 M. ft. B. M. redwood timber, dense select all-heart structural grade;
 - (19) 387 M. ft. B. M. redwood timber, select all-heart structural grade;
 - (20) 1543 stns. tussling roadway;
 - (21) 480 each, monuments, complete, in place
- State will furnish corrugated metal pipe.
- H. W. Rohl Co., 1351 Alhambra Ave., Los Angeles \$496,246
George Herz & Co., San Bernardino 521,325
J. F. Knapp, Oakland 553,073
John & Bressi, Los Angeles 557,412
Merritt Chapman & Scott 559,828
A. Teichert & Son, Sacramento 567,324

Pinnell Company	33,917

LOS ANGELES, Cal.—City calls election for March 5 to vote bonds of \$3,000,000 to finance street improvements with a view to lessening unemployment.

SAN JOSE, Santa Clara Co., Cal.—As previously reported, bids will be received March 16, 11 A. M., by Henry A. Pfister, county clerk, to improve Congress Springs Road in Supervisor District No. 5, from Saratoga to the Summit where it joins the Skyline Blvd. Project involves 516,000 sq. ft. oil macadam pavement. Plans obtainable from County Surveyor Robert Chandler.

STOCKTON, San Joaquin Co., Cal.—Periera and Reed, Stockton, at \$25,788 awarded contract by county supervisors to improve 4.7 miles of Farmington-Bellota Road from Upper Copernopolis Road to the Linden Road, involving: 18,500 cu. yds. grading; 11,500 tons base course; 1060 tons crushed rock; 470 tons rock chips; 355 tons pea gravel; 252 bbls. fuel oil; 112 tons asphaltic oil; 19 installing pipes.

SANTA MARIA, Santa Barbara Co., Cal.—Approximate quantities for the improvement of East Cook and other streets for which plans are being completed by City Engineer York Peterson, City Hall, are:

- (1) 276,000 sq. ft. 4-in. asphalt concrete pavement;
 - (2) 100 cu. ft. curb;
 - (3) 9150 sq. ft. cement concrete walk.
- Act of 1911.

BAKERSFIELD, Kern Co., Cal.—Kern County supervisors vote to call a special election to vote bonds of \$2,500,000 to finance construction of a road building program. About \$1,250,000 will be used for immediate paving of old roads, about \$500,000 for work on commercial highways, and approximately \$460,000 for building up a recreational highway system. There are three separate highway systems in the county: (1) State highway, which comprises 365 miles and over which the county has no control; (2) Countywide highway, 328 miles, which are supported by both city and county (and under which organization the proposed bond issue will be affected); (3) regular county system, supported entirely by taxes outside of cities, and by gas and other forms of taxation.

OAKLAND, Cal.—Until March 5, 12 noon, bids will be received by Frank C. Merritt, city clerk, to improve Masonic Ave., bet. Florence and Moraga Aves., and portions of Florence and Proctor Ave., Amy Drive and Moraga Ave., adjacent to Masonic Ave., involving:

- (1) 11,673 cu. yds. excavation;
- (2) 5,526 lin. ft. concrete curb;
- (3) 11,075 sq. ft. concrete gutter;
- (4) 80,531 sq. ft. concrete penetration macadam pavement;
- (5) 13,597 sq. ft. concrete cement sidewalks;
- (6) 30 lin. ft. 8x29-in. corr. iron and cement culvert;
- (7) 10 lin. ft. 8x24-in. do.
- (8) 74 lin. ft. 12-in. reinf. concrete pipe conduit;
- (9) 336 lin. ft. 15-in. do.
- (10) 55 lin. ft. 12-in. extra strength reinf. conc. pipe conduit;
- (11) 206 lin. ft. 15-in. do.
- (12) storm water inlet (2-inch opening);
- (13) 6 storm water inlets (34-in. opening);
- (14) 4 concrete handholes with cast iron covers;
- (15) 1 manhole;
- (16) 59 lin. ft. wooden culvert.

Est. cost, \$35,815. Street Imp. Act 1913. Certified check 10% payable to city required with bid. Plans on file in office of clerk, Walter N. Prickstad, city engineer.

SAN JOSE, Santa Clara Co., Cal.—As previously reported, bids will be received March 16, 11 A. M., by Henry A. Pfister, county clerk, to improve Cadwallader Ave. in Supervisor District No. 2. Project involves 218,750 sq. ft. oil macadam pavement. Plans obtainable from Robert Chandler, county surveyor.

ALAMEDA, Alameda Co., Cal.—Hutchinson Co., 4020 Hollis St., Oakland, at \$8,283.75 awarded contract by city council (96) to improve Third St. bet. Pacific Ave. and Maple St., involving grading; concrete curbs, gutters, walks; corrugated iron culverts; 6-in. oil macadam pavement. Following is a complete list of the bids:

Hutchinson Company	\$8,283.75
L. J. Immel	8,666
Healy-Moore Company	8,862
L. L. Page	9,709

COLUSA COUNTY, Cal.—Following bids received February 18 by C. H. Whitmore, district engineer, State Highway Commission, Sacramento, to surface with pit run gravel, 1.5 miles bet. Maxwell and the north boundary. Harris Bros., Galt, \$9,715; McDonald, Sacramento, 11,049; A. Teichert & Son, Sacto., 12,446.

SAN JOAQUIN COUNTY, Cal.—Following bids received Feb. 18 by State Highway Commission to grade and pave with Portland cement concrete, 1.7 miles between Stockton and one-half mile north of Houston School: John & Bressi, Lane Mortgage Bldg., Los Angeles, \$249,598; Hanrahan Co., San Francisco, 252,602; Basch Bros., Torrance, 256,137; C. W. Wood, Stockton, 260,058; Frederickson & Watson and Frederickson Bros., Oakland, 264,700; M. N. Hall, Portland, 264,911; Clark & Henery Co., S. F., 274,521.

REDWOOD CITY, San Mateo Co., Cal.—City council has started proceedings to extend Main street to connect with the Bayshore Highway, involving paving, curbs and walks; the work to be financed by property owners at a cost \$85,000. E. A. Rollson is city manager.

SAN JOSE, Santa Clara Co., Cal.—As previously reported, bids will be received March 16, 11:00 A. M., by Harry A. Pfister, county clerk, to improve San Jose and Almaden road in Supervisor District No. 4. Project involves 59,275 sq. ft. oil macadam pavement. Plans obtainable from Robert Chandler, county surveyor.

SANTA CRUZ, Santa Cruz Co., Cal.—City council has started proceedings to grade and pave the extension of Vine St., between Locust and Church Sts. Roy Fowler, city engineer.

BUSINESS OPPORTUNITIES
